Jan. 2, 2023 - Bioweapon prototype deployments, informed consent, targeted enemies, state of war, doctrine of necessity.

An email correspondent recently asked me if I had read Deputy Attorney General Dawn Johnsen's July 6, 2021 opinion¹ on the legal implications of the Emergency Use Authorization (EUA) laws, in which Johnsen offered the Department of Justice position on the question (posed by President Biden's Deputy Counsel, who was seeking DOJ cover for Biden's executive orders and agency 'vaccine' mandates):

"Whether Section 564 of the Food, Drug, and Cosmetic Act Prohibits Entities from Requiring the Use of a Vaccine Subject to an Emergency Use Authorization?"

The DOJ attorney concluded that no legal impediment to 'vaccine' mandates by public and private entities exists.

The email correspondent pointed out that Attorney Aaron Siri wrote an August 4, 2021 rebuttal letter² and speculated as to whether American lawyers had missed an opportunity to challenge mandates on the grounds that the Johnsen opinion was legally weak.

There has been more discussion of the legal relevance of informed consent provisions in 21 USC 360bbb et seq. (the EUA laws) and 42 USC 247d et seq. (the public health emergency laws) over the weekend.

Paraphrased email discussion questions:

Why aren't more attorneys filing more cases on grounds that 10 USC 1107a requires a Presidential waiver of informed consent before EUA products can be mandated on military personnel, and can't be mandated at all on civilians?

And why are so many judges blocking or dismissing the handful of cases that have been filed, to prevent discovery and substantive argument?

I learned about the Johnsen opinion sometime in Spring 2022 through my research into the American Domestic Bioterrorism Program,³ and wrote about it a couple of times but haven't yet found time to do a comprehensive analysis piece.

- April 4, 2022 - 2004 Project Bioshield Act amendments to 1938 Food, Drug and Cosmetics Act attempted to legally void Nuremberg principles, through redefinitions.⁴
- July 4, 2022 - Possibilities for proving intent⁵
- July 6, 2022 - More on the tiered coercion cascades⁶

My take on the Johnsen opinion, along with other legal opinions produced by HHS and DOJ lawyers (i.e. Robert Charrow's May 19, 2020 PREP Act advisory opinion⁷) is that they're not meant to be strong legal arguments.

They're meant to throw enough mud around to keep the overall fraud, enslavement, murder and theft program going without judicial impediments or informed, organized, confident popular resistance.

I think Johnsen knew, while writing her opinion, that the products were bioweapons whose use could not constitute clinical investigations under 21 USC 360bbb-3(k)⁸ and related provisions.

I think she also knew that informed consent principles are inapplicable and do not apply to lawful enemy targets of military weapons used during a state of war, which is what all the people who took the injections are, in legal terms.

Aaron Siri probably did not understand that at the time he wrote his rebuttal.

So Johnsen set up a false framing of Section 564, pretending it relates to investigational or experimental drugs (that are instead bioweapons), and Siri responded from within the same false framing.

*

One of the email correspondents pushed back on the status of injected victims as lawful enemy targets.

I expanded on why I hold that view, and I'm working on a longer piece explaining the background as I'm beginning to understand it.

My take on the legal status of the victims is based on my initial understanding of the permanent state of war/state of emergency — as we've observed the effects during the Covid-19 Constitutional crisis — and the implications of the central bankers' silent overthrow of the Constitution implemented piece by piece starting with the Civil War, if not earlier.

The central bankers and their national government accomplices see all of the people as legally enemy aliens or enemy insurrectionists and morally-insignificant chattel property or contract collateral that can be attacked and disposed of with impunity to balance financial books and for other purposes.

I'm convinced (even at this early point in my learning curve) that quiet law substitutions that have corrupted the legal status of living men and women since the Civil War, are directly related to the current cull program.

Those substitutions form the broader, hidden legal platform that made it possible for Congress and US Presidents to build the bioterrorism-as-public-health program from mid-20th century to now.⁹

Last night I read Siri's rebuttal to the Johnsen memo and looked over my notes from my original reading of the Johnsen memo, and this morning I read more of the back and forth among the email correspondents.

In light of what I've learned in the last few months, I'm convinced that the whole project, as a bioweapons prototype deployment project, falls exclusively under 50 USC Ch. 32 - Chemical and Biological Warfare.¹⁰

There are some notice and consent provisions in 50 USC Ch. 32.

But 50 USC 1515 authorizes the President to waive any part of the Chemical and Biological Warfare laws, under emergency powers during a declared emergency.

There may be a publicly-available document recording the date on which President Trump and/or President Biden invoked or extended 50 USC 1515 to suspend all prohibitions on use of chemical and biological weapons on American people and people in other countries.

But it may be classified and non-public as a national security document.

If that document exists — and the observable evidence of how the vaxx campaign has unfolded suggests it does — Trump and Biden waived all rights to resist/refuse administration for all potential targets (military and civilian) because under a state of war, state of national emergency, and/or state of public health emergency, all resisters are classified as enemy insurgents or enemy aliens.

Johnsen's (and many other federal officials') invoking of 21 USC 360bbb and 42 USC 247d in opinions, declarations and determinations, were, in my view, simply red herrings. Those legal frameworks were cited only to increase the persuasiveness and distract the targets from the core illusion: that biological and chemical weapons — primarily packaged as vaccines and in use for many decades — are medicinal products.

Put another way, a target of a weapon intended to kill him or her does not have any right, under federal or international law, to be informed of the imminent attack or to exercise a right to refuse to be attacked.

The applicable international law framework isn't the Nuremberg Code and international and federal biomedical research and treatment ethics codes.

It's the laws of war, with prohibitions on chemical and biological weapons dating back to the 1975 UN biological weapons convention¹¹ and the 1990 US ratification of that convention under 18 USC 175, suspended under a fraud-based application of the doctrine of necessity¹² framework.

The killers' interest in keeping the real state of war between governments and people covert for a bit longer, combined with the well-armed US population, are, in my view, the only things that have kept them from trying to do gunpoint roundups and gun/needle execution programs in the US.

I might do a detailed analysis post about the Johnsen memo and the Siri rebuttal at some point, to flesh out this interpretation. But not sure when, because of other writing priorities.

Jan. 3, 2023 - Bioweapons, EUA products, IND products, Constitutional crisis.

For readers interested in checking the legal citations in this post, you can find them in the timeline at the pinned American Domestic Bioterrorism Program post.¹³

I was recently sent a link to Karen Kingston's interview with Greg Hunter, posted Dec. 24, 2022, and asked for my views on points she makes at 22:00-28:00. During that segment, Kingston discusses legal implications of the FDA's Aug. 23, 2021 Investigational New Drug (IND) "approval" of Pfizer's "legally distinct" Comirnaty product, as possibly piercing the Emergency Use Authorization (EUA) civil and criminal liability shields.

- Dec. 24, 2022 - FDA Criminally Approved Bioweapon as Safe & Effective Vaccine.¹⁴ Greg Hunter/USAWatchdog interview of Karen Kingston.

I understand where she's coming from, but don't agree with her analysis.

I don't think any of the EUA or public health emergency laws are controlling, as public health and drug regulation laws.

I think they're only controlling in the sense that they transfer all use and legal implications of the products from public health programs to the chemical and biological weapons program (50 USC 1511 et seq.)

So, under a state of war, state of national emergency and/or state of public health emergency, all Americans are classified as enemies of the state (the District of Columbia federal government pretense¹), as insurgents, rebels or aliens, and can be legally targeted for killing, using any weapons the federal government and its military deem appropriate, at the President and Defense Secretary's discretion.

SIDEBAR: I learned recently that the J6 events occurring within the District of Columbia is probably significant, in terms of the corporate structure of the country and the legal status of the men and women who crossed into the 10 square miles of DC, while a public health emergency/national emergency declaration was in effect.

I can't remember if there have been other large political demonstrations in DC since Jan. 2020. If so, I don't know how DOJ rationalizes throwing J6 political prisoners in jail but not Black Lives Matter, for example, or even if they'll try to rationalize that disparate treatment. It's likely that the J6 protestors and their clear Constitutional allegiance, had potential to interfere with the central bankers' bid for control, while BLM protestors did not.

In any case, I now think that the trespass and insurrection charges may be more related to the J6 protestors entering DC, not entering the Capitol building itself. Or, more precisely, that they had to be fraudulently-induced, by embedded FBI agents, to enter the Capitol building, to provide a false front for the trespass and insurrection charges that would play better in the propagandist media.

Within the trove of useful material readers have sent to me about the executive/military law takeover during the Civil War, there is evidence to support the argument that military law status was never lifted as the battlefield hostilities ended in 1865.

Instead, many generations of Americans — of all races, classes and ethnicities — have been born into, lived and died under a covert, illegitimate, financialized, federal military occupation. Without knowing it.

From the start of the Civil War in 1861 until 2001 AUMF/Proclamation 7463, the globalist central bankers had enough control of the levers they wanted to control, that they could allow some of the Constitutional separation of powers

¹³ <https://bailiwicknews.substack.com/p/american-domestic-bioterrorism-program>

¹⁴ <https://rumble.com/v228tus-fda-criminally-approved-bioweapon-as-safe-and-effective-vaccine-karen-kings.html>

provisions to appear to operate more or less intact, including some Congressional oversight, some judicial review, and some limited states' rights, providing some counterweights to the President and executive, administrative agencies.

As the decades passed, the central bankers were planning and preparing to take more power, and putting quiet transfer mechanisms in place, such as the Federal Reserve Act of 1913, Executive Order 6102 and House Joint Resolution 192 of 1933 and Bretton Woods Agreement of 1945, along with the construction of the legal, financial and scientific architecture for the bioterrorism program.¹⁵

By 2001, they wanted more control and were willing to risk a little more exposure to get it.

In September 2001, under the fear-cover provided by 9/11 and the anthrax attacks, another layer of national emergency/state of war (Global War on Terror) was put in place, through the Congressional Authorization for Use of Military Force (AUMF) and George W. Bush's Proclamation 7463, *Declaration of National Emergency by Reason of Certain Terrorist Attacks*, promulgated under the 1975 National Emergencies Act and renewed every year since.

Those were quickly followed by the PATRIOT Act in October 2001, the establishment of the Department of Homeland Security in November 2002 and the expansion of biomedical police state programs for the next two decades through the PREP Act, Project Bioshield Act and more.

By 2019, they wanted to take even more direct control, were prepared to risk just a bit more exposure, and had put more pieces on the board to centralize more power under public health emergency conditions.

So in 2020, under the fear-cover provided by Covid-19, another layer of control went into effect, through the January 2020 determination that a public health emergency exists (HHS Secretary Alex Azar) and Donald Trump's March 13, 2022, Proclamation 9994, *Declaring a National Emergency Concerning the Novel Coronavirus Disease (COVID-19) Outbreak*, also under the 1975 National Emergencies Act.

Also renewed every year since.

And being positioned as a Global War on Humans Susceptible to Communicable Diseases: translation of the **Global Health Security Agenda** embedded in World Health Organization regulations and treaties, and US federal programs. See Section 5955 of NDAA for FY2023.¹⁶

I think the way out and through this whole mess is for People, Congress, courts and state governments to openly acknowledge and deal with the Constitutional crisis set in motion during the Civil War and built up by the central bankers and executive branch/administrative state since then.

It sucks.

Civil and criminal cases brought in the meantime, under the current pseudo-legal structures that were designed by the central bankers to moot the Constitution and thereby fail the People, can help to make clear when and how our current legal structures lost their legitimacy and point out some paths back to the original Constitutional foundation.

I also think — weird as it is — that some of the most important corrections would be remarkably straightforward to carry out, once Congressional majorities, federal judges and state governors, attorneys general and legislators, begin to understand the war footing situation and switch sides from central bankers to Constitution + People.

The Civil War records and intervening events strongly support the argument that Congress has been a sham, pseudo-institution since about 1863, occupying the empty seats of the real Congress¹⁷ by mutual, covert agreement among the knowing leadership — to participate in and promulgate the illusion — and plain ignorance about the existence of the illusion among the general membership.

¹⁵ <https://bailiwicknewsarchives.files.wordpress.com/2022/12/2022.12.19-six-key-statutes-creating-adbp.pdf>

¹⁶ <https://www.congress.gov/117/bills/hr/7776/BILLS-117hr7776enr.pdf>

¹⁷ <https://bailiwicknews.substack.com/p/reinhabiting-congress-and-all-the>

With good leadership and strong popular pressure, the living men and women sitting in those seats now could openly introduce resolutions, debate and vote to revoke their consent to participate in the lie anymore, and thereby re-occupy the real Congress.

If such a resolution passed, it would wipe out every Congressional statute, every derivative federal agency and regulation, and every Presidential executive order and proclamation, back to 1861.

Including all the national emergency and public health emergency laws that, for now, appear to shield the killers from criminal prosecution for the mass atrocities they've committed these last three years.

A great Constitutional re-set, as it were.

From that return to founding principles, the real Congress and the states could begin to debate and adopt Constitutionally-compliant laws, accompanied by a much more alert population and functional courts positioned to review and nullify unconstitutional laws.

*

To amuse myself, sometimes I imagine that under the transitive property of wokeness, anyone could "identify as" John Roberts, Chief Justice of the Supreme Court of the United States; walk in and take over SCOTUS and its docket; and call upon public and private attorneys to file of cases challenging the Constitutionality of the American domestic bioterrorism program enabling statutes, executive orders, and agency regulations, and their precursor legal fictions.

Who are the courthouse security guards to refuse to defer to our preferred proper names, identities and legal authorities?

Jan. 4, 2023 - On American state-level prosecution for federal government chemical and biological WMD crimes.

A reader sent me a link to Karen Kingston's post: Jan. 3, 2022 - How Florida Can Bring Criminal Charges against Pfizer and the FDA Under Title 46 Ch. 790¹⁸

Kingston quotes extensively from the Florida state law,¹⁹ which is worth reading in full, and is applicable to the two-part US Government chemical and biological weapons system:

1. SARS-CoV-2 **communicable pathogen** [and precursors], designed, funded and managed by the Fauci-Daszak-Baric-Shi consortia within the US Government through the Department of Defense (DARPA) and the Department of Health and Human Services (NIH, NIAID, BARDA), plus
2. mRNA/DNA/lipid nanoparticle, assorted-payload-carrying **lethal, coerced injections** designed, funded, managed and mandated by the US Government through DoD, HHS (CDC, FDA, Strategic National Stockpile) and Public Health Emergency Medical Countermeasures Enterprise.²⁰

¹⁹ <https://m.flsenate.gov/Statutes/790.166>

²⁰ <https://bailiwicknews.substack.com/p/public-health-emergency-medical-countermeasures>

- (a) “Weapon of mass destruction” means:
1. Any device or object that is designed or intended to cause death or serious bodily injury to any human or animal, or severe emotional or mental harm to any human, through the release, dissemination, or impact of toxic or poisonous chemicals, or their precursors;
 2. Any device or object involving a biological agent;
 3. Any device or object that is designed or intended to release radiation or radioactivity at a level dangerous to human or animal life; or
 4. Any biological agent, toxin, vector, or delivery system...
- (c) “Biological agent” means any microorganism, virus, infectious substance, or biological product that may be engineered through biotechnology, or any naturally occurring or bioengineered component of any such microorganism, virus, infectious substance, or biological product, capable of causing:
1. Death, disease, or other biological malfunction in a human, an animal, a plant, or other living organism...
- (d) “Toxin” means the toxic material of plants, animals, microorganisms, viruses, fungi, or infectious substances, or a recombinant molecule, whatever its origin or method of reproduction, including:
1. Any poisonous substance or biological product that may be engineered through biotechnology produced by a living organism; or
 2. Any poisonous isomer or biological product, homolog, or derivative of such substance.
- (e) “Delivery system” means:
1. Any apparatus, equipment, device, or means of delivery specifically designed to deliver or disseminate a biological agent, toxin, or vector; or
 2. Any vector.
- (f) “Vector” means a living organism or molecule, including a recombinant molecule or biological product that may be engineered through biotechnology, capable of carrying a biological agent or toxin to a host...

(2) A person who, without lawful authority, manufactures, possesses, sells, delivers, sends, mails, displays, uses, threatens to use, attempts to use, or conspires to use, or who makes readily accessible to others a weapon of mass destruction commits a felony of the first degree, punishable by imprisonment for a term of years not exceeding life...and if death results, commits a capital felony...

I wrote briefly about a similar state-level strategy in October: State authority to seize and destroy mRNA/DNA injections delivered by DOD across state borders, if classified as bioweapons,²¹ after a reader quoted Igor Chudov’s statement on a post about Florida’s recommendation that males under 40 not take the lethal injections.²²

Chudov had written: “Florida cannot ban mRNA vaccines, because it can only be done at the federal level.”

I replied to the reader:

Without more information, my guess is that Chudov means “If the mRNA injections are classified as FDA-approved medicines, or as Drug Enforcement Administration-regulated controlled substances, then states must defer to federal agency decisions on interstate commerce in those substances.”

²¹ <https://bailiwicknews.substack.com/p/five-small-stones-website-buildout>

²² <https://igorchudov.substack.com/p/florida-recommends-against-mrna-vaccines>

However, Florida's governor, Surgeon General, legislature and/or courts could classify the mRNA injections — once delivered across their state border — as bioweapons, and classify the DOD delivery supply chain as a WMD attack.

Then I think they could ban them and destroy them under their own state-level statutes prohibiting possession, transport or use of weapons of mass destruction.

In Florida, that law is Florida Statutes 790.166.

Please do pursue it at the state level.

This is the main thrust of what I'm getting at with the federal complaint drafting.²³

If the product gets shifted at every legal level where it's legally classified in some way, out of the medical countermeasure/FDA pharmaceutical product framework and into the criminal DOD-bioweapon/WMD-attack framework, it changes the whole ballgame.

That shift can and should be pushed in every state too.

Most of the states have WMD laws, ever since 9/11.

*

In her post,²⁴ Kingston makes an argument for state prosecutors in Florida and other states to go after Pfizer officials and FDA regulators, but not US Presidents, senior executive service (SES) officials in HHS, DoD or other cabinet agencies, on grounds that US government officials will seek refuge in government immunity, by arguing that *their* use of bioweapons is authorized under national security frameworks.

I think state prosecutors should investigate and charge federal officials anyway, even though they will try to claim immunity.

Investigate and charge them, to force them to make their horrific defense arguments under oath in public filings and open courtrooms.

Make President Trump, President Biden, Secretary of Defense Lloyd Austin, HHS Secretary Xavier Becerra, through Attorney General Merrick Garland on their behalf and as a co-defendant, file sworn defenses to filed charges.

Make them argue that the US government must commit global mass murder in order to save humanity from famine, poverty, and climate disasters; they must destroy the village to save it.²⁵

Make them argue that they must kill us to save us from food, water, energy and other calamities that — like the chemical and biological warfare program — are threats *they themselves* have demonstrably planned and implemented for at least a century for the same evil purpose: to kill people.

Make Merrick Garland say, loudly and clearly, that Becerra, Austin and Biden are committing mass atrocities using toxic pathogens and lethal injections, “with lawful authority.”

Make them say it so everyone can hear them.

On defeatism

I know the material presented here is hard to process.

I don’t offer it to help readers resign themselves to being enslaved and killed by the US Government, its globalist central banker overlords, and counterparts in other sovereign nation-states around the world.

I do it because I think the odds of successfully fighting off the would-be slave masters and murderers goes up, the better the targeted victims understand the plans, programs and pseudo-legal tools the killers build and use against us.

I think that people should continue to fight the fight using the weak legal tools the bankster-killers have left intact — as so many courageous, persistent people have already been doing for three years, and so many more have been doing for decades and centuries previously.

I think people should continue to investigate and learn how and when the bankster-killers weakened the legal tools. I think people should keep crafting stronger legal tools to replace the collapsing mess as it falls.

And I think the construction process for new legal tools benefits from broader, deeper understanding of the current predicament and how it was brought into being.

If you disagree and think it’s better to roll over and expose your soft underbelly and the underbellies of your children and grandchildren to the knives, please don’t read or comment at Bailiwick.

There are other online venues at which you can discuss your sense of futility and wait for the next bio-digital-banking-police shackles to snap shut around your neck.

On commenting at Bailiwick

Bailiwick's readership is growing, and there are also a lot of tectonic shifts happening in the litigation and prosecution domains.

As a result of those two developments, I've changed the comment notification settings so that I will no longer get an email notification every time someone posts a comment.

I want to devote more time to litigation and prosecution prep, while sticking with the historical research and writing about the 1861-1969 period, which means I'll have less time available for following comment threads and responding to comments individually.

Comment threads will still be open for readers, and I'll try to skim the discussions at least once a week.

If you post comments referring to documents, please post links to the documents so other readers can track down your sources if they're interested.

"What to do?"

July 18, 2022 - *Reader comment on American Domestic Bioterrorism Program.*³¹

What do we do? If they cannot be prosecuted...or held legally liable...Seems to me like HHS needs to be disbanded at once? Along with anyone else they passed the authority to?

My reply:

The short answer is, we need to dismantle the existing institutions, down to the bedrock of the US Constitution, and build new institutions on that foundation: legislatures, courts, executives, health care, schools, journalism, financial transaction systems, and many others.

And to do that, we need to build a critical mass of people who understand that that's the scale of the problem, and are prepared to fight until their last breath to do the work: educate people, dismantle the corrupt institutions, protect the Constitutional bedrock, and build the new institutions.

In the meantime, do not comply. Withhold your individual explicit and implicit consent.

Constitutional cities

Dec. 29, 2022 - *Reader comment on Legal history of the American domestic bioterrorism program is useful for understanding why the crimes continue and criminal prosecutions have not happened yet*³²

Regarding criminal prosecutions — I have been thinking about this for a long time. The state of Nevada is offering to allow the set up of tech cities with their own rules and regulations.

What is to prevent us from setting one up based upon the Constitution? We could get prosecutors, judges and law enforcement who honor the rights of the people and take their oath of office seriously. We can be courageous and find other courageous people who will take on the task of arresting and trying people who have been/still are committing genocide.

It would be a good idea to have tech savvy people because we need to block spying and EMF to the best of our ability.

So why not set up such a city and do the work? We could invite the inventors, entrepreneurs, the artists, the teachers the true healers. This might be a way.

I've been thinking along similar but less ambitious lines, about setting up grassroots courts of assizes.³³ Can't remember how it crossed my path recently, but something I read. Dates back to 1166 Assize of Clarendon³⁴ and 1215 Magna Carta,³⁵ in use in England up until 1972.³⁶

Does resistance matter?

Jan. 2, 2022 - *Reader comment on Bioweapon prototype deployments, informed consent, targeted enemies, state of war, doctrine of necessity.*³⁷

If what you are saying is correct — that we are under rules of war — the next question would seem to be "What are our rights, and how should we proceed?" That's only if it really matters, of course, since being at war with your own government pretty much means that all bets (and laws) are off...

My reply:

It does matter. Here and now is not the first time and place a government has been at war with its own people, covertly or overtly.

It's always been worth fighting back and it still is.

It's going to be a slow process of pulling more thoughts together about which rules— if any — ordinary people can wield against government agents.

I've done some thinking and writing about it already, (one example³⁸ of half-dozen or so) and am now doing much more research and thinking about it.

Things we already know:

1. Don't voluntarily take any more government-sponsored "medical treatments." Those are not medical treatments. Those are bioweapons.
2. Smartphones are bad news. If you use one, wean off of it. They're too useful for the government to surveil, track and control us.
3. Electronic payments (auto-pay, debit cards, credit cards) are bad news. Pay in cash or with checks.
4. Household guns and the strong gun culture in the U.S. are good news. If you are interested in buying guns and ammo and learning how to use them (if you don't already have them and know how to use them), do so. If you don't want to for your own reasons, don't. There's room for all kinds of people in the resistance. The biggest benefit for the people, against the government that's trying to kill us, is the government agents *not knowing* which people have guns and which don't, and being worried about going door-to-door to do round-ups in case a lot of the people who have them, are mentally prepared to use them.¹
5. Prayer is useful. Especially the Rosary.

Aleksandr I. Solzhenitsyn , The Gulag Archipelago:

“And how we burned in the camps later, thinking: What would things have been like if every Security operative, when he went out at night to make an arrest, had been uncertain whether he would return alive and had to say good-bye to his family?

Or if, during periods of mass arrests, as for example in Leningrad, when they arrested a quarter of the entire city, people had not simply sat there in their lairs, paling with terror at every bang of the downstairs door and at every step on the staircase, but had understood they had nothing left to lose and had boldly set up in the downstairs hall an ambush of half a dozen people with axes, hammers, pickers, or whatever else was at hand?...

The Organs would very quickly have suffered a shortage of officers and transport and, notwithstanding all of Stalin's thirst, the cursed machine would have ground to a halt!

If...if...We didn't love freedom enough. And even more – we had no awareness of the real situation.... We purely and simply deserved everything that happened afterward.”

Jan. 5, 2023 - The New Constitution - Living War Crimes

Documentary produced by JP and Julie Collins

From the Book of Ours newsletter:

We now know that the US Department of Defense along with the World Health Organization, while partnering with other governments, bio-tech and pharmaceutical corporations are responsible for the deaths of so many people from the shots marketed as vaccines. We also know that the DOD is behind the omni-channel campaign that was so well organized, so consistent and maintained such continuity in the messaging, training and execution of the covid narrative and distribution of the shots.

Our latest video essay *The New Constitution: Living War Crimes*,³⁹ goes into detail about who's behind the genocide and how over the years, the legal underpinnings of Congressional legislation has created an end-run around the US Constitution.

The DOD has used the dismantling of Constitutional protections to place power into the hands of the Department of Health and Human Services. And the laws that have been put into place make it impossible to legally challenge that power.

A literal military coup of the US government and a war on its citizens has taken place under our noses. Although no bombs were dropped, no armed troops moved into our communities and no doors were kicked in, there has been a mass-killing of citizens all under the guise of a health emergency.

This is what we mean by the mundane because we don't see the outward signs of war, death and destruction but it's there and it's being felt. Source notes PDF.⁴⁰

I watched the video today, because the producers sent me the link in their year-end newsletter. They drew from the work that Brook Jackson, Sasha Latypova⁴¹ and I have done, fitting it together with additional material to contextualize the story further.

It's very well done.

I especially like the cold rage of the reporting tone, and the focal length they chose: not minutely detailed but also not superficial.

They've created an accessible, calm condemnation of war crimes and war criminals.

One minor correction: I have a philosophy degree from Penn State University, not the University of Pennsylvania. The two schools are frequently mis-identified because their names are so similar.

Also I think it's very funny that they clipped footage of me holding a pen to my forehead, from the discussion I had with Sasha in November.⁴² Transcript by David Ratcliffe at Ratical.org.⁴³

Jan. 6, 2023 - US no longer Constitutional republic; domestic deployment of military has been pseudo-legalized. Also Global Health Security Agenda Act, World Health Organization noose-tightening, and PDF compilations of Bailiwick reporting.

Peter McCullough and John Leake post at Courageous Discourse:

Is the USA No Longer a Constitutional Republic?⁴⁴

Leake concludes:

Thankfully there is one enormous difference between the United States now and the final decades of the Roman Republic—namely, the use of U.S. military units on American soil still seems to be off limits.

My reply

Although the US Government oligarchs haven't yet openly deployed the US military or foreign troops on American soil, against civilians, it's not off-limits.

Those acts are pseudo-authorized under illegitimate statutes and Presidential executive orders passed by Congress and signed by US presidents under globalized, militarized public health and population control frameworks; bioweapons and Artificial Intelligence programs; and continuity of government (COG) protocols for deployment of domestic and foreign troops to control American civilians on US soil.

They haven't attempted to use these illegitimate powers yet, at least in a widespread, open way.

In my view, their hesitation is mostly because so many American civilians are still well-armed and well-trained in firearms use. That's why they're working so hard to disarm us.

- 2006/10/17 - Congress and President Bush passed NDAA/John Warner Defense Authorization Act for FY2007 - PL 109-364, 120 Stat. 2095. Section 1076 amended 1807 Insurrection Act, (10 USC 333, renumbered as 10 USC 253), providing exemptions to 1878 Posse Comitatus Act, to expand the authority of federal government to deploy US military on American soil against American citizens during “natural disaster, epidemic, or other serious public health emergency, terrorist attack or incident, or other condition in any State or possession of the United States.” Repealed in NDAA for FY2008. Passed again in NDAA for FY2012.
- 2008/01/28 - Congress and President Bush passed National Defense Authorization Act for FY2008. PL 110-181, 122 Stat. 325. Section 1068 repealed 2007 amendments to Insurrection Act which had expanded exemptions to 1878 Posse Comitatus Act limits on US Presidents’ power to deploy the military domestically. Amendments passed again in NDAA for FY2012, again giving President power to deploy military domestically.
- 2011/12/31 - Congress and President Obama passed National Defense Authorization Act for FY2012 - PL 112-81, 125 Stat. 1298. Section 1021 codified authority for US President to order military arrest and indefinite detention of American civilians without charge or trial under 10 USC 801 et seq. (Uniform Code of Military Justice), to the extent the 2001 Authorization for Use of Military Force, passed under the 1973 War Powers Act, (50 U.S. Code § 1541) is construed as putting the United States in a permanent state of war (Global War on Terror) and Proclamation 7463, *Declaration of National Emergency by Reason of Certain Terrorist Attacks*, first declared by President Bush in 2001 is extended. It has been extended, every year since and is in force today, most recently Sept. 9, 2022 by Biden, along with President Trump’s Proclamation 9994, *Declaring a National Emergency Concerning the Novel Coronavirus Disease (COVID–19) Outbreak*

Global Health Security Agenda Act in NDAA: WHO International Health Regulations amendments and pandemic treaty

Related: A few weeks ago, Congress and President Biden passed the Global Health Security Agenda Act, as part of the NDAA for FY2023⁵² at Section 5955, p. 951.

They've been trying to smuggle that through since 2016, to strengthen the interlocking chains between World Health Organization programs to terrify, control and kill people, and US Government programs to do the same things.

Translated into plain English, the Global Health Security Agenda is the Global War on Humans Using Terror, Communicable Pathogens and Toxic Injections.

For the latest on the WHO campaigns, see James Roguski, Top 100 Reasons to #StopTheTreaty, #StopTheAmendments, and #ExitTheWHO.⁵³

From Roguski transcript:

The first and most important point that I would like to make is that I am about to discuss two very different things. First, I will talk briefly about the proposed "Pandemic Treaty."

More people seem to be aware of the so-called "Pandemic Treaty," but, while I see it as being an important issue, I believe that it is also functioning as a decoy that is designed to distract people from the much larger and more immediate threat to our rights and freedoms, which are the proposed amendments to the International Health Regulations.

Jan, 7, 2023 - Could Congress members, federal and state judges, state legislators, governors and prosecutors restore the American Constitutional republic?

Yes. But they've failed to take the necessary steps for a long time, and they need well-informed, strong popular support to start walking that path now.

I field a lot of emails and comments, paraphrased as:

WTF?

How can unconstitutional executive abuses of power happen in a Constitutional republic?

They're unconstitutional!

They're illegal! They're unlawful!

They're treasonous! They're crimes!

Why can't the bioterrorism program be stopped through Congress repealing the bad laws? Or by withholding funding through its budget power and debt-ceiling control and other financial mechanisms?

Why can't it be stopped in the courts? Why don't people just file some lawsuits?

It's oxymoronic to say that unconstitutional things can happen in a Constitutional republic!

Stop saying these terrible things!!!

Longtime readers will know (I mention it for new readers) that since I wandered into these dark caves of American legal history almost a year ago⁶⁹ — I've found it extraordinarily difficult to express the paradoxes living in here.

I have yet to find a quick, clean way to convey the distinction between

1. Federal, state and local government-run slavery and killing programs that are actually, observably being funded by Congress, implemented by Presidents and Cabinet agencies, including the US military, left undisturbed by courts, and cooperated-with by most of the population, in the real world we've lived in since January 2020 and
2. What things would be like if those government agents and acts were bound by constitutional limits, and pushed back within those legitimate, moral limits.

It's the difference between *de facto* and *de jure*.

*De facto*⁷⁰ is what happens and is enforced or not stopped in fact and in practice.

*De jure*⁷¹ is what is right by law, just and proper in moral terms, even if it's not occurring in fact because the men, women and institutions empowered to protect and defend those lawful principles and practices have been incapacitated, bound up or induced into a moral and legal coma.

Living, breathing tyrants are currently, observably, effectively using power they do not rightfully have, because no one is stopping them.

⁷⁰ [https://www.merriam-webster.com/dictionary/de facto](https://www.merriam-webster.com/dictionary/de%20facto)

⁷¹ [https://www.merriam-webster.com/dictionary/de jure](https://www.merriam-webster.com/dictionary/de%20jure)

The coma has been induced by men and women engaged in evil, not to give the American Constitutional republic patient's body politic rest and time to heal, but to prevent the People who live under that social covenant, from thwarting the aims of those evil tyrants.

*

Two more paradoxical aspects of the current situation, the *status quo*:⁷²

Lawmakers

For many decades, almost all of the American lawmakers whose duty it is to be careful about only adopting constitutionally-sound laws and blocking bad laws from passage, failed to fulfill those legal and moral obligations, at the federal and state levels.

Worse, almost all of them cast votes to actively pass bad laws that *de facto* transferred massive amounts of illegitimate pseudo-power into the hands of the President and Cabinet secretaries. Many of them have been returned to office repeatedly. None of them, as of today, have made moves to publicly call out the stealth coup d'état that's occurred, and repeal the very bad laws that made the coup possible at all.

Judges

Almost all of the jurists whose job it is to interpret laws, nullify bad ones, and restore justice during circumstances in which real world actors are violating legal and moral boundaries, have themselves been AWOL. They've dismissed thousands of cases whose full development would have provided openings for judicial checks on tyrannical power.

Even worse, some judges have made precedential decisions purporting (unjustly and immorally) to pseudo-uphold unconstitutional laws and executive acts.

The corrective mechanisms built into the Constitution by Divine inspiration given to the Founding Fathers — the checks and balances — are broken.

And they've been broken for a really long time.

Despite the past record of failure and the structural barriers to success, I have consistently encouraged everyone who wants to file anything, with any federal or state court or legislative body, to do so. I still do.

The aggregate of all that litigation and petitioning is part of what will push the judges and legislators — who have been deferring to the unconstitutional pseudo-authority wielded by the executive branch for a very long time — to *stop deferring* to the illegitimate executive usurpation, and join Team People and Team Constitutional-republic.

*

Why does it continue, and what can be done to change things?

Congress and Courts Past (think Charles Dickens and Scrooge) were comprised of at least two sorts of people. Some have been men and women who didn't understand how broken their institutions had become and how much their own contemporary actions were contributing to the broken state of affairs and helping the tyrants induce the coma into which the American Constitutional republic has fallen.

Others knew how broken the institutions were, but willed the destruction to happen and to expand in scope. Some of them benefited financially or socially from their own incapacitation; they aggregated wealth and long political careers.

Others have been — and still are — true believers in the merits of slavery and mass murder under the more palatable programmatic label of population control to ease burdens on planetary resources. Think Henry Kissinger and Bill Gates.

⁷² [https://www.merriam-webster.com/dictionary/status quo](https://www.merriam-webster.com/dictionary/status%20quo)

For those who are all-in on the criminal project, it doesn't matter how much information or popular support the People provide them. They won't find the will or the path to fight back. They're not looking.

But for those who are merely ignorant (because kept so by the tyrants) or who understand the predicament but lack personal courage and strong wills, information and popular support from the People are extremely useful.

A new Congress has just been seated: Congress Present. State and federal judges continue to handle civil litigation and criminal prosecution in courthouses all over the country. New state legislators are working in the statehouses. Attorneys general and district attorneys exist.

If some of those men and women stand up, speak out and stop deferring to tyrants, huge chunks of the open-air prison walls will fall down.

Keep pushing, People.

Repost -- Oct. 12, 2022 - Secret Squirrel v. Azar, Kadlec and Gruber.⁷⁶ First parts of draft 18 USC 2333 federal civil complaint. Secret Squirrel is a John Doe/Jane Doe figure: a stand-in for anyone injured or bereaved by the actions of the US Government agents who launched and currently maintain the fraudulent and murderous Covid-19 national 'public health emergency' program.

Jan. 9, 2023 Note:

Th 18 USC 2333 federal civil-criminal legal strategy was the subject of several other posts and comment threads in October, including posts advocating that an 18 USC 2333 count be added to Brook Jackson's False Claims Act case under 31 U.S.C. § 3730, against Pfizer, Ventavia and ICON.

I advocated for that strategy after the US Government intervened in her case on Oct. 4, 2022⁷⁷ (at pp. 6-8) to corroborate Pfizer's April 22, 2022⁷⁸ claim (at pp. 8, 11-13 and 25-26) that contractors were supplying the Department of Defense under Other Transactions Authority (OTA) bioweapon production contracts that did not include valid clinical trials or compliance with safety or efficacy standards as conditions for product authorization, distribution and use, or as conditions for federal government payment to contractors for products supplied.

In my view, Alex Azar, Robert Kadlec and Marion Gruber should be the first American war criminals prosecuted for the American implementation of the Covid-19 mass terror and mass murder campaign. There will be hundreds of defendants eventually; I posted a starter list in August 2022⁷⁹ and update it as I find more criminals in the records.

As I state in the Oct. 12, 2022 original post⁸⁰ and Oct. 13, 2022 further discussion,⁸¹ Anthony Fauci should be prosecuted. But the case against him will be much larger and more complex than the cases against Azar, Kadlec and Gruber, for example, because Fauci's role as a primary architect of the crimes and the pseudo-legal pre-crime coverup mechanisms, goes back to the late 1960s when he arrived at the National Institutes of Health.

Please don't interpret this draft's focus on Azar, Kadlec and Gruber as somehow exonerating or letting Fauci or other war criminals off the hook.

Readers interested in the 18 USC 2333 and Jackson v. Pfizer/DoD discussions that preceded and followed the original post, please see footnoted PDF compilations of Bailiwick News for October 2022,⁸² and/or Substack links in sidebar.

John Doe v. Azar, Kadlec, Gruber and Hinton.⁸³

18 USC 2333 provides civil remedies in US courts for any national of the United States injured in his or her person, property, or business by reason of an act of international terrorism, or his or her estate, survivors, or heirs.

Plaintiff JOHN DOE, files this suit individually and on behalf of all others similarly situated.

Since January 2020, Plaintiff has been subjected to US-government-directed, purported but illegitimate, suspension of the US Constitution and purported but illegitimate suspension of federal and state laws and regulations criminalizing domestic and international terrorism and related criminal acts.

Plaintiff has been subjected to US Government-directed imposition of coercive psychological manipulation, propaganda and censorship campaigns; physical 'lockdowns;' electoral fraud; mask mandates; school, church and business closures; restrictions on freedom of movement, assembly and association; fraudulent diagnostic testing programs; lethal hospital and nursing home treatment protocols incentivized through federal funding schemes; and fraudulent 'vaccine' promotional campaigns and mandates.

This sequence of US Government attacks on the American people culminated in debilitating and/or lethal 'vaccine' injections which have resulted in personal injury and/or death to victims including Plaintiff and all others similarly situated.

Plaintiff files this action against Defendants Alex **Azar**, Robert **Kadlec**, Marion **Gruber** and Denise **Hinton** in their official capacities as government employees who served, at all relevant times, in the Department of Health and Human Services, to the extent that the US Government attempts to defend this suit on grounds that the PREP Act and related federal legislation duly authorized defendants' criminal acts.

On information and belief, Plaintiff alleges that Defendant Azar committed the first in a series of criminal acts of international terrorism on or about January 31, 2020, when he signed a 'Determination that a Public Health

Emergency Exists,⁸⁴ referring to the Covid-19 outbreak, and a 'Declaration' that "circumstances exist justifying the authorization of emergency use of in vitro diagnostics for detection and/or diagnosis of this novel coronavirus." The determination and declaration were recorded in the Federal Register as taking effect Feb. 04, 2020. 85 Federal Register 7316.⁸⁵

On information and belief, Plaintiff alleges that Defendant Kadlec conspired and coordinated additional criminal acts, including Defendant Azar's March 10, 2020 issuance of A Declaration Under the PREP Act for Medical Countermeasures Against COVID-19, purported to take effect on Feb. 04, 2020. 85 Federal Register 15198.⁸⁶

On information and belief, Kadlec and Azar conspired to prepare and promulgate another 'Declaration of Emergency Use Authorization' on March 24, 2020, this time declaring "that circumstances exist justifying the authorization of emergency use of medical devices, including alternative products used as medical devices." 85 Federal Register 17335.⁸⁷

The "declarations" prepared and promulgated by Kadlec and Azar purported to provide blanket civil liability immunity for all persons involved in criminal acts of bioweapon research, development, manufacture, distribution, storage and administration for the toxic products that were later fraudulently presented to the public as 'medical countermeasures' intended to prevent or treat Covid-19 infection. These toxic and fraudulent products include but are not limited to masks, diagnostic tests, therapeutics and vaccines.

On information and belief, Defendant Marion Gruber knowingly, intentionally, maliciously and with reckless disregard for human life, supervised criminally fraudulent clinical trials and criminally fraudulent regulatory review procedures for the US Government-sponsored bioweapons known as Covid-19 vaccines between February and December 2020.

On information and belief, credible whistleblower reports were filed with FDA by clinical trials manager Brook Jackson, starting in September 2020. Between September and December 2020, Defendant Gruber ignored and suppressed investigation into Jackson's claims.

On the basis of the data produced by the criminally fraudulent clinical trials and regulatory reviews, Defendant Gruber signed Emergency Use Authorization ratification documents on Dec.11, 2020 (Pfizer/BioNTech⁸⁸); Dec. 18, 2020 (Moderna⁸⁹); and Feb. 27, 2021 (Janssen⁹⁰).

The US Government 'vaccination' campaign began Dec. 12, 2020, immediately following Defendant Gruber's signature authorizing emergency use of the Pfizer/BioNTech product.

On information and belief, Defendant Hinton on Jan. 12, 2021 signed two *Authorizations of Emergency Use of Certain Drug and Biological Products During the COVID-19 Pandemic*, pertaining to Pfizer's products, effective Dec. 11, 2020 and Moderna's products, effective Dec. 18, 2020. Rear Admiral Hinton's letters were published in the Jan. 19, 2021 86 Federal Register 5200.⁹¹

But for the criminal actions of defendants Azar, Kadlec, Gruber and Hinton, the US Government's planned and coordinated massacre and maiming of the American people under the fraudulent pretext of 'public health,' operational from January 2020 to the present, could not have occurred.

Plaintiff further files this action against Defendants in their personal capacities to the extent that the US Government attempts to defend this suit on grounds that there are no federal laws authorizing the acts committed by defendants, and defendants therefore acted outside the scope of their official duties and authorities.

Plaintiff seeks declaratory judgment permanently terminating all active US Government emergency declarations and determinations, emergency use authorizations and 'vaccination' campaigns.

These declarations, determinations, authorizations and campaigns and the preparatory psychological, social, political, economic and religious assault on plaintiffs that made them possible, violate the US Constitution and federal laws which prohibit and provide civil and criminal penalties (including capital punishment,) for acts of international and domestic terrorism; acts of chemical, biological, radiological and nuclear warfare; torture; maiming; mutilation; murder; conspiracy to murder; genocide; and other federal and international crimes.

Plaintiff denies that the actions of defendants in the Covid-19 context, undertaken since January 2020, fall under US federal statutes, regulations and executive orders governing public health emergencies, medical countermeasures, and security countermeasures through the Public Health Service Act at 42 USC 201 et seq, the Food Drug and Cosmetics Act at 21 USC 301 et seq. and related public health laws.

Plaintiff denies that the pathogen class known as SARS-CoV-2 is a naturally-occurring virus subject to public health programs under any legitimate communicable disease control and prevention authorities and programs of the Department of Health and Human Services.

Plaintiff denies that the pandemic management program promulgated by the Department of Health and Human Services, National Institutes for Health, Centers for Disease Control and Prevention, Centers for Medicare and Medicaid Services and related agencies, including but not limited to lockdowns and stay-at-home programs; mask programs; Plexiglass barrier programs; mass testing programs; six-foot 'social distancing' programs; occupancy limits and building closures; prohibitions on administration of early treatment protocols such as Ivermectin, hydroxychloroquine, Vitamin D, Vitamin C, Zinc; and coerced administration of deadly late-treatment protocols such as isolation, restraint, dehydration, starvation, sedation, Remdesivir/Veklury, ventilation, may be construed as legitimate exercise of communicable disease control authorities.

Plaintiff denies that the class of injectable toxins known as 'Covid-19 vaccines' are medical products or devices intended to treat or prevent disease, as regulated under FDA programs governing Emergency Use Authorization (EUA) products, Biologics License Applications (BLA), Investigational New Drug (IND), Investigational Device Exemption (IDE) or other FDA frameworks relating to production and use of novel biological and chemical products and devices on human beings.

Plaintiff denies the applicability of the Federal Tort Claims Act (28 U.S.C Chapter 171; 28 USC 1346); Vaccine Injury Compensation Program (42 USC 300aa-10 et seq); Countermeasures Injury Compensation Program (42 USC §247d–6e et seq) and other federal civil remedies, on the grounds that defendants have committed *criminal* acts of an almost-incomprehensibly outrageous nature, which cannot be adequately remedied through compensatory frameworks intended to address ordinary negligence, negligence per se, recklessness or willful misconduct.

Plaintiff asserts that the pathogen class known as SARS-CoV-2 is an offensive biological weapon developed, patented and released by officials working for the US Department of Health and Human Services and Department of Defense Chemical and Biological Warfare Program, in violation of 50 USC Chapter 32 and related federal and international laws.

Plaintiff asserts that the pandemic management program, from the initial promulgation of 'stay-at-home orders' to the execution of CMS-funded hospital homicide protocols and the 'vaccination' campaign, has been — since inception — a planned, coordinated, comprehensive military campaign intended to isolate, disorient, injure and kill as many Americans as possible, under the re-classification of our civilian population as enemy targets by the US Government through the Department of Defense.

Plaintiff asserts that the injectable toxins known as 'Covid-19 vaccines' are a class of biological and chemical weapons developed, patented and released by officials working for the US Department of Health and Human Services and Department of Defense.

Plaintiff asserts that, since January 2020, the US government has met the standards for designation as a foreign terrorist organization under 8 USC 1189, and that the actions of US government defendants in the Covid-19 context were, are and will continue to be criminal acts under US federal statutes, regulations and executive orders prohibiting and establishing criminal penalties for several federal crimes.

Federal crimes for which there is evidence to prosecute defendants, including but not limited to Azar, Kadlec, Gruber and Hinton include **international terrorism** (18 USC 2331-1); **domestic terrorism** (18 USC 2331-2); **biological weapons** production and use (18 USC 175); **chemical weapons** production and use (18 USC 229); **war crimes** as defined by the 1949 Geneva Conventions, including torture, cruel or inhuman treatment, performing biological experiments without informed consent, murder, mutilation or maiming, and intentionally causing serious bodily injury (18 USC 2441); production and use of **weapons of mass destruction** (18 USC 2332a); **genocide** (18 USC 1091); **murder** (18 USC 1111); **attempted murder** (18 USC 1113); **conspiracy to commit murder** (18 USC 1117); **torture** (18 USC 2340A); **financial transactions** with countries supporting international terrorism (18 USC 2332d); providing **material support** to terrorists (18 USC 2339A); **treason** (18 USC 2381); **misprision of treason** (18 USC 2382); **rebellion** or insurrection (18 USC 2383) and **sedition conspiracy** (18 USC 2384).

Plaintiff seeks Declaratory Judgment and Injunctive Relief terminating the 'public health emergency,' restoring our Constitutional, republican, federalist form of government, and suspending the US Government's ongoing chemical and biological warfare program colloquially known as the 'vaccination' program.

Plaintiff seeks removal from office and federal criminal prosecution of the architects and executors of the SARS-CoV-2 pathogen development, patenting, manufacture and release program.

Plaintiff seeks removal from office and federal criminal prosecution of the US government officials who served as architects and executors of the Covid-19 'vaccine' bioweapons development, patenting, manufacture, distribution and administration program.

Plaintiff seeks compensatory and punitive damages for injuries and deaths sustained by Plaintiff and others similarly situated.

Plaintiff seeks additional injunctions, removal from office and criminal prosecutions of all US Government officials identified as co-conspirators during this litigation, to prevent their continued planning and execution of additional US Government-sponsored crimes.

Plaintiff is prepared to produce ample evidence of such ongoing and forthcoming crimes, which have been planned and publicly announced through reports, tabletop exercises, executive orders, press releases and other public records relating to the establishment of 'quarantine camps,' and the deliberate US Government-directed destruction of food supply chains, fuel supply chains, financial transaction systems and other essential human support systems, for the offensive military purpose of instilling and maintaining chronic, intense fear and disorientation among the American people and establishing centralized behavioral control of the population through Central Bank Digital Currency (CBDC) linked to a centralized digital identification and credentialing system.

Jan. 13, 2023 - Repost - Biotech idolatry: DOD-Pfizer contracts have replaced federal constitutions and laws, and the DOD-DOJ-HHS complex has replaced federal legislatures and courts. Originally posted Sept. 14, 2022.

Jan. 13, 2023 introductory note:

A series of recent email exchanges on the role of contracts in the Covid bioterrorism programs, reminded me of this Sept. 14, 2022 post: [Biotech idolatry: DOD-Pfizer contracts have replaced federal constitutions and laws.](#)⁹²

Among other things, the contracts are a window through which to see how treasonous US Government/DOD officials and other one-world-enslavement proponents now frolicking in their own moral excrement at Davos,⁹³ created mechanisms to transfer the governing authorities and national assets of formerly sovereign states to the would-be central-control slave masters, under the pretext and claimed-but-illegitimate emergency powers of each Public Health Emergency of International Concern (PHEIC) declaration.

These mechanisms rely on widespread popular acceptance of lies: that communicable pathogens, ecological crises and minor social inequities among the world's rabble are the main risks to humanity.

These mechanisms rely on deflecting public attention away from the truth: that the biggest threat to humanity is the centuries-old one-world-enslavement program itself, and the social chasm that lies between the rabble and the high-flying, above-the-law men and women who will elaborate on their long-standing, far-reaching diabolical plans in gory-but-disguised detail at the World Economic Forum conference in Switzerland in a few days.

For readers who are extremely invested in Civil War corporate and martial law history,⁹⁴ the District of Columbia organic constitution, current state national citizenship movements, birth certificates as financial instruments and legal standing as “man” and “woman,” please understand that I’m aware of those complex issues and I’m reading and processing the historical material as quickly as I can.

At the same time, I’m also tracking and participating in fast-moving developments in the global effort to use existing legal institutions, however impotent they may appear⁹⁵ when understood in historical context, to stop the Covid bioterrorism program and bring the war criminals to justice.

For example, I’m working on a team of people who are developing more easily-digestible educational materials to help American state prosecutors, legislators, judges and governors understand the complex, hidden power transfers that have already taken place through the power-mediating institutional front of the World Health Organization;⁹⁶ how those power transfers have hurt people and governments in each American state; and how state governments can block expansion plans⁹⁷ and **actively non-comply** with the ongoing federal, criminal enterprises.

In other words, I understand the basic premises of the Civil War legal history and think they’re relevant and important for what’s happening now.

I also believe that the living, breathing, thinking, speaking men and women who are working today in the legislatures, prosecutor’s offices, and courts — already and still have the moral and constitutional, legal authority they need *if they exercise it*, to break the pseudo-legal bars of the pseudo-legal cages in which the globalists and their executive branch and DoD co-conspirators are capturing, controlling and culling us.

I don’t see the organic constitution approach as a silver bullet.

I don’t see any single approach as the best or only way to counter-attack the global criminal syndicalists who are attacking humanity, and bring their current crime spree to an end.

Sept. 14, 2022 - Biotech idolatry: DOD-Pfizer contracts have replaced federal constitutions and laws. And the DOD-DOJ-HHS complex has replaced federal legislatures and courts.

For a while, I thought the World Health Organization Constitution⁹⁸ was the governing document that superseded the US Constitution and other rule-of-law charters governing other formerly sovereign nation-states when the WHO Director-General declared a public health emergency of international concern (PHEIC) and the federal public health officials in each country implemented the globalist overthrow by issuing federal declarations that a public health emergency (PHE) exists.

More recently, I speculated that perhaps there are secret UN Rules of Engagement⁹⁹ that came into play once the nation-states fell to the foreign occupation forces.

I now think that the contracts between governments, pharmaceutical corporations (mostly Pfizer and Moderna) and the US Department of Defense are the legal turnkeys.

As a recap, WHO Director-General Tedros Adhanom Ghebreyesus declared Covid-19 outbreak a “public health emergency of international concern,”¹⁰⁰ (PHEIC) on Jan. 30, 2020.

This triggered the legal obligations of WHO member states under the 2005 International Health Regulations,¹⁰¹ to suspend national sovereignty, WHO-conflicting federal [and state] laws, and all constitutional rights of citizens using the implementing domestic statutes and regulations they had previously adopted in compliance with the WHO IHR.

In compliance with these obligations, US Secretary of Health and Human Services Alex Azar declared Covid-19 a “public health emergency”¹⁰² on Jan. 31, 2020, effective Jan. 27, 2020.

So Jan. 27, 2020 is the date that Americans began living under foreign occupation.

And because the PHE declaration has been renewed by the sitting HHS secretary every few months¹⁰³ since then [most recently Jan. 11, 2023¹⁰⁴], we are still living under foreign occupation today.

[In early September 2022], I was in an email discussion that began with PREP Act provisions found in Department of Defense contracts with subcontractors who produce the lethal injections marketed as “Covid-19 vaccines,” and moved on to address supply contracts signed between Pfizer and at least 110 national governments around the world.

It reminded me of Ehden Biber’s excellent July 2021 reporting on the Brazil contract.¹⁰⁵

Biber is a London-based cybersecurity expert turned independent investigator.

Biber's reporting on the Pfizer contracts can be found at his Substack Sense of Awareness¹⁰⁶ in posts published July 28-31, 2021, plus a few follow-up reports published between August 2021 and January 2022.

Below is an edited version of some of the email exchange, with quotes from Biber's reporting and excerpts from the Brazil and Albania Pfizer¹⁰⁷ contracts.

*

During a recent Zoom meeting, Sasha Latypova, pharma/regulatory clinical trials professional turned independent investigator,¹⁰⁸ shared a website she recently found, which compiles Covid-related contracts.¹⁰⁹

[The site was founded in 2006 and is funded by Soros, Ford, Rockefeller, McArthur and other genocidal zealots, which is odd. Use at your own risk.]

Latypova said she had started reviewing some of the vaxx contracts and discovered multiple subcontracts. She concluded that the products are manufactured by DOD, BigPharma is just a front, and the actual production happens at a network of small suppliers including Emergent Biosolutions (formerly BioPort¹¹⁰), National Resilience, and academic institutions including Texas A&M.

Latypova found contract language indicating that BARDA (DOD Biological Advanced Research and Development Authority) micromanages the projects. For example, some provisions require that DOD agents accompany contractor representatives during meetings with FDA officials. Some contracts list FDA as "chief science officer" for the subcontractor companies.

In other words, DOD has overtaken the entire pharmaceutical sector.

Another person on the call noted that the DOD direct control of the manufacturing through the subcontractors is the reason why there's no public access to vials for testing and verification of contents and no access to the US Attorney General for enforcement of manufacturing and other legal standards.

DOD directs DOJ attorneys to refuse to respond to crime and civil tort reports, citing military security and secrecy.

*

Latypova also recapped work compiling the results of 26 different groups around the world that have analyzed a few thousand smuggled vials, referring to What is in the so-called COVID-19 "Vaccines"?¹¹¹ Part 1: Evidence of a Global Crime Against Humanity, published Sept. 3, 2022 in the *International Journal of Vaccine, Theory and Practice*:

Between July 2021 and August 2022, evidence of undisclosed ingredients in the COVID-19 "vaccines" was published by at least 26 researchers/research teams in 16 different countries across five continents using spectroscopic and microscopic analysis.

Despite operating largely independently of one another, their findings are remarkably similar and highlight the clear and present danger that the world's population has been lied to regarding the contents of the COVID-19 "vaccines"...

Surprise findings include sharp-edged geometric structures, fibrous or tube-like structures, crystalline formations, "microbubbles," and possible self-assembling nanotechnology.

The blood of people who have received one or more COVID-19 "vaccines" appears, in case after case, to contain foreign bodies and to be seriously degraded, with red blood cells typically in Rouleaux formation.

"Not a single vial conforms to the manufacturing label," Latypova said.

After the meeting, Latypova circulated additional information by email, citing a PREP Act clause from a June 15, 2021 Moderna-DOD contract¹¹² for \$8 billion in product, noting that Pfizer and other contracts have the same clauses: H.8. Public Readiness and Emergency Preparedness (PREP) Act:

In accordance with the PREP Act, P.L. 109-148, Division C, Section 2, as amended (codified at 42 USC 247d-6d and 42 USC 247d-6e, as well as the Secretary of HHS's Declaration Under the PREP Act for Medical Countermeasures Against COVID-19, 85 Federal Register 15198 (Mar. 17, 2020, effective Feb. 4, 2020) and amended on April 15, 2020, 85 Federal Register 21012...

(i) This Agreement is being entered into for purposes of facilitating the manufacture, testing, development, distribution, administration and use of "Covered Countermeasures" for responding to the COVID-19 public health emergency, in accordance with Section VI of the PREP Act Declaration;

(ii) Contractor's performance of this Agreement falls within the scope of the "Recommended Activities" for responding to the COVID-19 public health emergency, to the extent it is in accordance with Section III of the PREP Act Declaration; and

(iii) Contractor is a "Covered Person" to the extent it is a person defined in Section V of the PREP Act Declaration.

Therefore, in accordance with Sections IV and VII of the PREP Act Declaration as well as the PREP Act, the Department of Defense contracting via assisted acquisition on behalf of the HHS, expressly acknowledges and agrees that the HHS Declaration cited above, specifically its language providing immunity from suit and liability is applicable to this acquisition as long as Contractors activities fall within the terms and conditions of the PREP Act and the PREP Act Declaration.

The Government may not use, or authorize the use of, any products or materials provided under this contract, unless such use occurs in the United States (or a U.S. territory where U.S. law applies such as embassies, military and NATO installations) and is protected from liability under a declaration issued under the PREP Act, or a successor COVID-19 PREP Act Declaration of equal or greater scope. Any use where the application of the PREP Act is in question will be discussed with Moderna prior to use and, if the parties disagree on such use, the dispute will be resolved according to the "Disputes Clause." (52.233-1)

The items and technology covered by this Contract are being developed for both civil and military applications."

Latypova commented:

"One obvious thing - statement that this technology is dual use, i.e. both civilian and military applications at the end of this clause. Meaning this is a weapon."

"Given this text, how are they selling this product internationally? They are saying that the PREP Act only absolves them if the product is sold in the US?"

I replied:

I don't know the answer to your question about selling internationally. Two possibilities that come to mind:

1. Maybe the pharma corps have parallel contracts in place with other countries/other countries' militaries, and the other countries have their versions of the PREP Act, which would be in line with the WHO IHR 2005 provisions requiring each signatory to adopt implementing legislation at the nation-state level.

¹¹² <https://www.keionline.org/misc-docs/FOIA/DOD-Moderna-Contract-W911QY20C0100-P00007-15June2021.pdf>

2. Maybe the pharma corp contracts with other countries stipulate that the sales are conducted under US law, and US law provides the only remedies, superseding any domestic law of the other country and any international law, and the contracts provide citations back to the US PREP Act. That would be in line with the various Intellectual Property and international trade laws and agreements from the last couple of decades that explicitly supersede domestic environmental and labor laws, under the World Trade Organization and GATT (General Agreement on Tariffs and Trade) frameworks

Then I dug up the January 2021 Albania contract¹¹³ on my hard-drive and did keyword searches for 'PREP' and 'liabilit,' and located an indemnification section that covers a lot of potential losses.

8.1 Indemnification by Purchaser [Government of Albania].

Purchaser hereby agrees to indemnify, defend and hold harmless Pfizer, BioNTech, each of their Affiliates, contractors, sub-contractors, licensors, licensees, sub-licensees, distributors, contract manufacturers, services providers, clinical trial researchers, third parties to whom Pfizer or BioNTech or any of their respective Affiliates may directly or indirectly owe an indemnity based on the research, development, manufacture, distribution, commercialization or use of the Vaccine, and each of the officers, directors, employees and other agents and representatives, and the respective predecessors, successors and assigns of any of the foregoing ("Indemnitees"), from and against any and all suits, claims, actions, demands, losses, damages, liabilities, settlements, penalties, fines, costs and expenses (including, without limitation, reasonable attorneys' fees and other expenses of an investigation or litigation), whether sounding in contract, tort, intellectual property, or any other theory, and whether legal, statutory, equitable or otherwise (collectively, "Losses") arising out of, relating to, or resulting from the Vaccine, including but not limited to any stage of design, development, investigation, formulation, testing, clinical testing, manufacture, labeling, packaging, transport, storage, distribution, marketing, promotion, sale, purchase, licensing, donation, dispensing, prescribing, administration, provision, or use of the Vaccine.

8.2 Assumption of Defense by Purchaser.

The Indemnitee(s) shall notify Purchaser of Losses for which it is seeking indemnification pursuant hereto ("Indemnified Claims"). Upon such notification, Purchaser shall promptly assume conduct and control of the defense of such Indemnified Claims on behalf of the Indemnitee with counsel acceptable to Indemnitee(s), whether or not the Indemnified Claim is rightfully brought; provided, however, that Purchaser shall provide advance notice in writing of any proposed compromise or settlement of any Indemnified Claim and in no event may Purchaser compromise or settle any Indemnified Claim without Indemnitee(s)'s prior written consent, such consent not to be unreasonably withheld. Indemnitee(s) shall reasonably cooperate with Purchaser in the defense of the Indemnified Claims.

The same language is in the contract the Brazilian government signed in Spring 2021, described by Ehden Biber in July 2021.¹¹⁴ [I haven't been able to find a PDF of the Brazil contract Biber used; he used screenshots and alternated the screenshots with interpretive text.]

Biber found that the Brazil contract imposed no requirements for current Good Manufacturing Practices, and required the Brazilian government to "grant or obtain on Pfizer's behalf, all exemptions, exceptions and waivers of country specific requirements for the Product...including but not limited to serialization, applicable laboratory or quality testing and/or marketing information form submission and approval..." and required that the contracts be kept from the public for 10 years.

Biber also found that the Brazil contract put the Brazilian government on the hook for damages, waived the sovereign immunity of the Brazilian government, referred all claims to New York, USA courts or other "court of competent jurisdiction" and prohibited Brazil's government from changing its own national laws to change liability, in language identical to the Albanian Pfizer contract at 9.5:

Purchaser represents that it has and will continue to have adequate statutory or regulatory authority and adequate funding appropriation to undertake and completely fulfil the indemnification obligations and provide

¹¹³ <https://ti-health.org/wp-content/uploads/2021/05/Albania-Pfizer.pdf>

¹¹⁴ <https://ehden.substack.com/p/pfizerleak-exposing-the-pfizer-manufacturing-and-supply-agreement-the-brazilian-job-day-56>

adequate protection to Pfizer and all Indemnitees from liability for claims and all Losses arising out of or in connection with the Vaccine or its use.

Purchaser hereby covenants and acknowledges and agrees that a condition precedent for the supply of the Product hereunder requires that Purchaser shall implement and maintain in effect such statutory or regulatory requirements or funding appropriation sufficient to meet its obligations in this Agreement prior to supply of the Product by Pfizer and thereafter shall maintain such statutory and regulatory requirement and funding appropriation, each as applicable, for so long as necessary to meet all of Purchaser's obligations under this Agreement...

Biber later reported that Carlos Murillo,¹¹⁵ who was the head of Pfizer Brazil in 2020 when the contract negotiations started, and was head of Pfizer Latin America as of January 2022, testified in May 2021:

"The conditions that Pfizer sought for Brazil are exactly the same conditions that Pfizer has negotiated and signed, at this moment, with more than 110 countries in the world.[...] From the point of view of our international consistency, given the pandemic situation, given our vaccine development process, these were the conditions negotiated and accepted by 110 countries with whom Pfizer has signed the contract today."

Biber's Aug. 2021 take on what to do: What if the Pfizer contracts were declared illegal?¹¹⁶ and his request to the British government from Jan. 2022: Leaked: Our Government's Secret Contract That Endangers Our Democracy.¹¹⁷

*

Latypova asked: "Can this be viewed as invasion, i.e. takeover of legislature of sovereign states by the DOD-Pharma cartel? Are the buyers effectively signing away their rights to make laws in their own countries?"

I replied:

Yes. But also, there are many, many precedents for that signing away of sovereignty over the last few decades, especially through the General Agreement on Trade and Tariffs (1947) as updated and institutionalized in the World Trade Organization (1995) to override laws protecting domestic industrial production rights, labor and environmental standards and intellectual property rights held by formerly-sovereign nations and people.

It can and has been viewed as invasion, mostly by people like the 1999 Battle for Seattle, anti-WEF, anti-WTO organizers and demonstrators and those who still try to demonstrate at Davos every year.

But the Soros team captured and marginalized most of those groups, especially by infiltrating and weakening the Occupy Wall Street movement just at the point OWS on the left was starting to make common cause with the Tea Party on the right through their shared critique of the corporate-state.

And then most of the public intellectuals like Noam Chomsky and Naomi Klein, who were supporting those pro-sovereignty/anti-globalist street-level fighters, collapsed under the Covid propaganda and lined up to call for starvation of vaxx refusers. (Klein wrote a 2007 book about how the Shock Doctrine¹¹⁸ works in every country around the world, and then couldn't see it when it happened to her in her own country in real time: she condemned the Canadian truckers for fighting¹¹⁹ for humans to be free from corporate-government oppression.)

So the opposition has been weakened a lot, and corralled, while the 1996 Telecom Act and its progeny have narrowed the public communications space available for educating and mobilizing resistance. Intensifying through things like the Journalism Competition and Preservation Act.¹²⁰

*Subsequent comment I posted at Sage Hana's [September 2022] related report about trends in biotech investment.*¹²¹

I think the entire pharma/DOD industrial-state sector is preparing to focus on gene therapy/bioweapons almost exclusively for the foreseeable future.

There's no other growth area of products in R&D, their older drugs are moving off-patent, and Covid has been the prototype of forced medical treatment on a captive population with routine (ie quarterly) updates/boosters, which has been extremely good for the money laundering pipeline from taxpayers to government to DOD to pharma back to government-officials in their pharma-shareholder positions.

The Biden Executive Order from Sept. 12, 2022 supports this theory of the totalitarian business model built on mandated biotech: *Advancing Biotechnology and Biomanufacturing for a Sustainable, Safe and Secure American Bioeconomy*,¹²² as does Biden's appointment of Renee Wegrzyn, former DARPA official with bioengineering and gene editing background, as the first director of the Advanced Research Projects Agency for Health (ARPA-H),¹²³ which was established and funded by Congress and President Biden in March.¹²⁴

As does the whole Global Health Security Act apparatus and the PREP Act/BioShield bit about classifying new products as medical countermeasures so as to unlock the government money to produce the strategic stockpile and then have government mandates that people undergo the treatments so manufactured...

Evidence from the contracts makes it super-clear that Pfizer and Moderna are acting as front companies for US-DOD/BARDA, while DOD controls the manufacturing and distribution contracts, controls FDA and CDC regulatory systems, and coordinates with DOJ to block all accountability efforts through the courts.

Conclusion:

The business contract has, after centuries of effort, almost-fully eclipsed the social contract, almost-fully converting the legal status of human beings from unique created souls to soul-less commodities.

Stopping the biotech genocide-and-enslavement-of-humanity project — the Arian heresy of our day¹²⁵ — probably includes reading and understanding the biotech manufacturing and supply contracts, and voiding them through individual noncompliance (don't accept *any* government-sponsored medical treatments or pharmaceutical products and keep resisting right up until the killers kill you against your will) and new political leadership invoking higher laws than the international trade agreements and domestic commerce laws that underpin the current genocidal regime.

The higher laws are the ones about not worshiping false idols, not killing and not bearing false witness. Which, in Christ-centered times past, were well-reflected in human lawmaking and law enforcement.

Notwithstanding the recent admonitions of Bergoglio and Biden, we need to go backwards.¹²⁶

Jan. 13, 2023 - Covid-19 bioweapons and the Defense Production Act of 1950

Reader comment:

Karen Kingston just put up another piece about the contract¹²⁷ and it's getting weird because it seems like we're talking about two different things entirely.

My reply, expanded:

I think the divergence lies in the difference between a pharmaceutical corporation operating as a private, commercial business, and a pharmaceutical corporation that has been folded into the government's national security complex through invoking of the Defense Production Act of 1950,¹²⁸ PL 81-774, 64 Stat. 798.

Nov. 22, 2021 - Domestic Funding for COVID-19 Vaccines: An Overview,¹²⁹ Congressional Research Service

Research and Development, Manufacture, and Purchase

COVID-19 vaccine R&D, manufacture, and purchase have been largely supported by a collaboration among several federal agencies, including the National Institutes of Health (NIH) and the Biomedical Advanced Research and Development Authority (BARDA) of HHS, and DOD— formerly Operation Warp Speed (OWS) and now the Countermeasures Acceleration Group (CAG).

Six vaccines were chosen for coordinated federal support under OWS. Some vaccine R&D has been supported by NIH, BARDA, and DOD separately from the OWS/CAG efforts.

NIH and DOD: FY2020 and FY2021 supplemental appropriations to NIH and DOD for COVID-19-related R&D can fund vaccine R&D. In the FY2020 and FY2021 supplemental appropriations acts, NIH received over \$1.5 billion, available until September 30, 2024, broadly for COVID-19 related research.

The CARES Act (P.L. 116- 136) provided DOD with \$415 million for COVID-19 medical R&D in the Defense Health Program account with some flexibility to reallocate other funds toward R&D.

BARDA and Other R&D, Manufacture, and Purchase:

In the FY2020 and FY2021 supplemental appropriations acts, over \$50 billion in Public Health and Social Services Emergency Fund (PHSSEF) funding, available until September 30, 2024, is designated for a broad set of medical countermeasures and surge capacity purposes, including for the development, manufacture, and purchase of vaccines and related supplies.

The PHSSEF account funds BARDA, the main entity that has awarded large funding agreements to pharmaceutical companies for vaccine development, manufacture, and purchase.

Not less than \$23.2 billion is set aside for BARDA in the FY2020 and FY2021 supplemental appropriations that can be used for vaccine-related efforts.

[American Rescue Plan Act, PL 117-2¹³⁰] further provides two relevant mandatory appropriations:

(1) in Section 2303, \$6.05 billion, available until expended, to HHS for R&D, manufacturing, production, and purchase of vaccines and other medical products—available for COVID-19, SARS-CoV-2 or its variants, and any disease with potential for creating a pandemic; and

(2) in Section 3101, \$10 billion, available until September 30, 2025, for activities under the Defense Production Act (DPA) for the purchase, production and distribution of medical supplies, including vaccines and related supplies, among others. Both of these ARPA appropriations have been assigned to HHS accounts—the first to PHSEF and the second to a new HHSDPA [Health and Human Services Defense Production Act] account.

For more on the HHSDPA, see March 27, 2020 Executive Order 13911,¹³¹ *Delegating Additional Authority Under the Defense Production Act With Respect to Health and Medical Resources To Respond to the Spread of COVID-19*, and Department of Commerce Bureau of Industry and Security June 30, 2022 PowerPoint:¹³²

DPA Use for COVID-19 Response: Spring-Summer 2020

- Initial use was directed by Executive Orders
 - Priority ratings were applied to USG contracts to procure ventilators and personal protective equipment (PPE)
- EO 13911, issued March 2020, conditionally granted DHS equivalent DPA authorities for "health resources" for COVID-19 response efforts.
 - In April 2021, a MOU was signed by HHS and FEMA to coordinate and centralize use of all DPA authorities.
 - This MOU designated FEMA as the lead federal agency to determine when and how to utilize DPA authorities.
 - From April through September 2020, HHS and other Departments and Agencies submitted priority rating requests for health and medical resources through the FEMA DPA office to the FEMA Administrator.

ASPR Unclassified

HHS Use of DPA for COVID-19 Response: Summer 2020

- In June 2020, HHS/ASPR created the Defense Production Act – Emergency Response Authorities (DPA-ERA) Office
 - This Office leads and centralizes all HHS DPA-related activities for the Department
 - Since MOU with FEMA expired in September 2020, the DPA-ERA Office has led and managed COVID (and non-COVID) DPA activities
- HHS/ASPRs DPA-ERA Office:
 - Established process for reviewing requests for priority rating authorization
 - Served as subject matter experts for advising on DPA and priority rating action
 - Established templates and process for routing and coordinating requests for Secretary review and approval
- Summer and fall 2020, priority ratings were primarily applied to USG contracts developing COVID-19 vaccines, therapeutics, and diagnostics.

ASPR Unclassified

The pharmaceutical corporations have essentially turned into a branch of the federal government, whose agents have been granted sovereign immunities and set beyond ordinary judicial proceedings, short of treason, sedition and bioterrorism prosecutions.

I think Kingston's civil liability approach is very valuable for drawing that government-corporation merger or absorption process into clearer view and public understanding, in the same way that Brook Jackson's False Claims Act case provides opportunities to see it in action, through (so far) the Pfizer arguments April 22, 2022¹³³ at pp. 8, 11-13 and 25-26, and the US government's endorsement of that legal argument Oct. 4, 2022¹³⁴ at pp. 6-8.

Since the November 2021 CRS report quoted above, Congress in March 2022 appropriated billions more for the pharma-military kill programs,¹³⁵ and they just appropriated billions more in the December 2022 Consolidated Appropriations Act for FY2023 and NDAA for FY2023. I found a few of the relevant provisions during a brief keyword search a few days ago but have not done a detailed review of these two Congressional acts yet.

Below is an abstract written for organizers of an international human rights law conference to which I’ve been invited. The full paper is due by mid-May and the conference will be held in June.

Writing the abstract and responding to a comment at my Gab feed,¹⁴¹ helped me further distill the language and classification substitutions (lies) that keep people confused about the genocide and illegal war we’re living and dying through.

The commenter asked, “Can we find out if the DOD asked permission to experiment on us?” and linked to 50 U.S. Code §1520a - Restrictions on use of human subjects for testing of chemical or biological agents.

Under the illegitimate pseudo-law frameworks set up to pseudo-legalize an unjust war on the world’s people and pseudo-legalize the actions of men and women committing war crimes,¹⁴²

No. Injection recipients never had to be asked for permission to “experiment on us.”

It’s not an experiment.

It’s an attack.

The recipients of Covid-19 bioweapons, and now all products classified as ‘vaccines,’ are not patients or subjects in clinical research trials.

The recipients of Covid-19 bioweapons are military targets.

The US Government is not testing novel, investigational medicinal treatments to protect or cure people.

The US Government is using intentionally lethal weapons to injure and kill people.

Military officers don't ask targets for permission to use weapons to injure and kill the targets.

Military officers follow orders from superior officers, up to the Commander-in-Chief, the US President, to use weapons to injure and kill targets.

The products are not a class of medicinal treatments administered to protect the recipients from infectious disease (the former meaning of 'vaccines.')

The products are a class of bioweapons administered to protect the US Government, its central bank owners, and its land and resources, from their enemy: healthy, living men, women and children.

The pharmaceutical companies researching, developing and manufacturing Covid-19 bioweapons are not private business companies led by private business executives, with commercial interests in, or regulatory supervision of, product safety and consumer protection.

The pharmaceutical companies researching, developing and manufacturing Covid-19 bioweapons, under federal military contracts, are federalized defense production facilities, operated by commissioned executives, working under the control and on behalf of the US Government's military-industrial-pharmaceutical complex, to produce bioweapons designed, intended and highly effective for injuring and killing recipients.

The nurses and doctors and pharmacists and firefighters injecting people are not private medical or health care workers with professional ethical obligations under biomedical ethics laws, codes and conventions.

Nurses, pharmacists and other 'vaccinators' have been conscripted into the US Department of Defense military-industrial-pharmaceutical complex, as commissioned, reserve or volunteer corps officers of the US Public Health Service, which is a military branch,¹⁴³ to carry out military orders at "point of dispensing"¹⁴⁴ to injure and kill the target population: living men, women and children.

The whole biowarfare program, aimed at all of humanity, by those who would like to kill off most of the world's people and set themselves up as gods and overlords of the remnant, has been hiding in plain sight for decades.

Weaponization of Language and Law: US Government Bioterrorism Program from 1969 to Covid.

ABSTRACT: This paper addresses provisions of American law that enabled the US Government, Department of Defense, Department of Health and Human Services, pharmaceutical contractors, United Nations World Health Organization, World Economic Forum, member states and private research and development funding organizations such as the Bill and Melinda Gates Foundation, to jointly develop and deploy bioweapons on target populations around the world.

These American laws also set up structural barriers to legal accountability, to delay public understanding of the criminal enterprise and impede substantive criminal and civil prosecutions, and have been replicated in the federal laws of other countries.

The US Government bioterrorism program includes development and deployment of strains of communicable pathogens, aerosolized toxins, and products allegedly intended to prevent or treat effects of infection and exposure in human beings. Examples include swine influenza, avian influenza, human immunodeficiency virus (HIV), acquired immune deficiency syndrome (AIDS), anthrax, squalene, pyridostigmine bromide, Gulf War Syndrome, severe acute respiratory syndrome (SARS), Middle East respiratory syndrome (MERS), Coronavirus Disease-2019 (CoViD-19), lipid nanotechnology, genetic coding platforms and other chemical, biological, radiological and nuclear materials.

The bioterrorism programs violate the 1975 UN Convention on the Prohibition of the Development, Production and Stockpiling of Bacteriological (Biological) and Toxin Weapons and on their Destruction; the 1990 US Biological Weapons Antiterrorism Act, codified at 18 USC 175; the 1997 UN Convention on the Prohibition of the Development, Production, Stockpiling and Use of Chemical Weapons; the 1998 US Chemical Weapons Convention Implementation Act codified at 18 USC 229 and 22 USC 6701; and related American and international law.

But the illegal and malign offensive attack on the world's population has not yet been stopped by governments, because the bioterrorism program has been misclassified as a lawful and defensive public health program mounted by those same governments in response to a Public Health Emergency of International Concern (PHEIC), using linguistic redefinition of terms in conjunction with the legal frameworks created by the WHO International Health Regulations, including amendments adopted in 2005, and implemented by participating nation-states and their political subdivisions.

Through gradual, covert statutory reclassification and program transfers, reinforced through Presidential Executive Orders and related executive branch declarations, and implemented through hundreds of regulatory amendments, the US Government's Chemical and Biological Warfare Program originally housed in the Department of Defense (DOD), became the Public Health Emergency-Emergency Use Authorization-Medical Countermeasures program housed in the Department of Health and Human Services (HHS).

The bioterrorism program is now jointly operated by DOD, HHS, Department of Homeland Security, Department of State, most other US federal agencies and their subordinate departments, divisions, offices, authorities, enterprises, committees, advisory boards and employees, in collaboration with the World Health Organization, the Bill and Melinda Gates Foundation, and other public, private and public-private hybrid institutions around the world.

Jan. 16, 2023 - Reports - DOD chemical and biological warfare program: herd-culling plus stockpile disposal in one tidy package (Sept. 28, 2022) and Shell game: November 1997. Congress pretended to protect military servicemen and women from forced submission to biological and chemical weapons experiments. (May 10, 2022)

Jan. 16, 2023 Note:

The introduction to the Sept. 28, 2022 Bailiwick report reposted below says that I was still untangling changes to the laws requiring reporting by DOD, to Congress, on chemical and biological weapons programs, including programs for testing on human subjects.

I haven't completed that untangling process yet, but in the intervening months I also haven't found any evidence to contradict the legal history and the conclusions I'd drawn from it by late September.

One relevant find during the last few months has been the Public Health Emergency Medical Countermeasures Enterprise (PHEMCE) and how that government-sponsored enterprise (GSE) fits into the Congressional reporting frameworks. (Dec. 20, 2022 - Public Health Emergency Medical Countermeasures Enterprise. Who's who of American government biomedical terrorists, murderers and thieves.¹⁴⁵)

Bottom line: I believe DOD does report to at least a handful of members of Congress on the US Government's Chemical and Biological Warfare programs, to provide information about the morbidity and mortality rates for the class of bioweapons known as "Covid-19 vaccines" and effectively used to injure and kill military targets: the people of the world.

I think DOD/HHS use VAERS, V-Safe and other government and corporate insurance data sets to make those reports. I also think those reports will be withheld from the public under national security classifications, but I haven't yet filed any FOIA's aimed at eliciting that response from DOD and HHS.

Such a denial would provide additional corroboration that the Covid-19 program is a deliberate, DOD-operated, global war crime.

May 10, 2022 - Shell game. November 1997: Congress pretended to protect military servicemen and women from forced submission to biological and chemical weapons experiments. But really just transferred the program to FDA.¹⁴⁶

Listening today to Truth4Health podcast interview of US Army Lt. Mark Bashaw, and attorneys David Willson and Dawn Uballe,¹⁴⁷ regarding Lt. Bashaw's court-martial prosecution for raising questions about the adverse effects and deaths caused by the DOD-mandated products marketed by the US government as Covid-19 vaccinations, as documented in VAERS.

The interviewer, Dr. Elizabeth Lee Vliet, Lt. Bashaw and the two attorneys discussed their sense that what the military is doing is illegal, as violations of the informed consent rights of human beings who serve in the US military.

As I've written previously, I think US Congress members, presidents and Health and Human Services secretaries have passed laws and regulations, mostly since 1983, to give themselves on-paper legal authority to commit crimes including fraud, medical battery and homicide, and to violate Constitutional rights with impunity, even though those acts are war crimes and crimes against humanity under natural law and divine law ordained by God.

While listening to the podcast, I looked up my index card notes on the 1997 National Defense Authorization Act, through which Congress responded to public outrage about injuries and deaths caused by mandated anthrax vaccinations of military servicemembers, a subject also addressed by federal courts in *Doe v. Rumsfeld*, 341 F. Supp. 2d 1 (D.D.C. 2004).¹⁴⁸

On Nov. 18, 1997, in Section 1078 of the NDAA (PL 105-85), Congress repealed and replaced a 1977 law that had given Congressional blessing to DOD experimentation on humans so long as DOD reported on the experiments to Congress (PL 95-79).

On Nov. 21, 1997 — three days later — Congress added the original Emergency Use Authorization section to the Federal Food Drug and Cosmetics Act (PL 105-115).

In other words, Congress did the opposite of protecting Americans' right to refuse to submit to chemical and biological experimentation.

Congress expanded the program while transferring it from the Department of Defense, operating under 50 USC Chapter 32 — Chemical and Biological Warfare Program, to the Department of Health and Human Services Food and Drug Administration, operating under 21 USC Chapter 9, Subchapter V — Drugs and Devices.

I've updated the American Domestic Bioterrorism Program¹⁴⁹ post to add this information.

- 1997 National Defense Authorization Act for FY98¹⁵⁰ - PL 105-85, 111 Stat. 1915 (450 pages). Section 1078, "Restrictions on the use of human subjects for testing of chemical or biological agents," repealed and replaced a 1977 section of 50 USC Chapter 32, the Chemical and Biological Warfare Program. The 1977 provision (50 USC 1520) had added a requirement that DOD report to Congress about DOD human experimentation programs. In 1997, Congress replaced 1520 with 1520a, purportedly to prohibit DOD conducting experiments on soldiers without the individual soldiers informed consent. It was passed by Congress in response to public outrage over injuries and deaths caused by mandated anthrax injections of soldiers during and after the 1991 Gulf War. However, the authority for federal government experimentation on non-consenting human beings continued; Congress simply transferred the program to the Food Drug and Cosmetics Act, 21 USC 360bbb (see below, passed three days after the NDAA) under declared emergency situations (Emergency Use Authorizations/EUA).
- 1997 Food and Drug Administration Modernization Act¹⁵¹ - PL 105-115, 11 Stat. 2296. (86 pages). Added new section to Federal Food Drug and Cosmetics Act (21 USC 9) to expand access to investigational drugs and devices during emergency situations (21 USC 360bbb). This was the beginning of the Emergency Use Authorization framework that culminated in the federal government's psychological, social and economic coercion program aimed at universal injection of all American citizens with products marketed as Covid-19 vaccines, operational from mid-2020 to the present.
- 2016 21st Century Cures Act¹⁵² (Cures Act 1.0) - PL 114-255, 130 Stat. 1033 (312 pages). Updated and expanded Public Health Service Act, 42 USC 201, "to accelerate the discovery, development, and delivery of 21st century cures." Provided (Section 3022, 130 Stat. 1097) for 'real world evidence' instead of clinical trials as grounds for FDA authorizing general use of experimental products, transforming Americans into human subjects and our communities into unmonitored, unregulated experimental test sites. Provided (Section 3023 and 3024, 130 Stat. 1098) broad authority for HHS Secretary to waive or alter human subject protections and informed consent requirements, by transferring each individual human subject's risk-benefit assessment authority to the HHS Secretary, who can preemptively decide, for all subjects collectively, without knowledge of individual health conditions or conscientious beliefs, and without the subjects' knowledge or consent, that risk is 'minimal.'

Sept. 27, 2022 - DOD chemical and biological warfare program: herd-culling plus stockpile disposal in one tidy package¹⁵³

[Sept. 27, 2022] Note: This report is a rough-cut subject to correction and clarification after further research; there are several strands I haven't fully tracked down yet.

Specifically, I need to untangle the differences, overlaps and current status (in force or repealed) between DOD-to-Congress reporting laws, including 50 USC 1511, which was added November 1969, amended 1977 and 1982, repealed 1996; 50 USC 1523, added November 1993, amended 1997 and 2006, possibly repealed in 2017 effective Dec. 31, 2021; and any other chemical and biological weapons program reporting laws that might exist under other sections of the United States Code.

I'm posting it anyway.

*Reader comment on yesterday's post:*¹⁵⁴

"Even if such a bill got through Congress with a veto-proof majority, the biomedical police state laws on the books specifically exclude Congressional and court review of HHS declarations and actions. (See, for example, 42 USC 247d-6d(b)(7), as amended in 2005 by PREP Act, blocking court review.) "

So let me get this straight - A law is passed that prevents the checks and balances of the Constitution from being in force and allowing the courts to review it? And nobody sued because it was unconstitutional?

I can get Congress giving away their own power, but they can't give away the power of the courts.

My reply, revised and expanded:

Yup: totally insane abdication of power by Congress, and usurpation of the third branch.

Most of the men and women who voted for these things had no idea what they were doing.

My current larger project is drafting a federal complaint under 18 USC 2333 that explicitly shifts the whole argument out of the public health emergency civil law framework, and into the bioterrorism and mass murder criminal framework.

I'm thinking about putting together a Proposed Joint Stipulation as to Material Facts,¹⁵⁵ which would offer the courts a statutory chronology, and propose that the US government defendants stipulate that Congress passed these laws, with these effects, whether or not any individual Congress member who voted on each one had any idea what it said and did.

Among other things, I've also pieced together that in the 1969-2023 timeframe that's most relevant, the changing relationships between DOD, Congress, chemical and biological weapons testing on human subjects, and informed consent can be broken up into phases.

In November 1969, President Richard Nixon issued a (false) statement¹⁵⁶ that the US was getting out of the chemical and biological weapons development business, six days after Congress authorized DOD to conduct such programs.¹⁵⁷

The 1969 Congressional act pulled off the sleight of hand by (falsely) classifying the DOD conduct and program purpose as “defensive,” and through a sequence of provisions prohibiting certain conduct “until” or “unless” DOD said it really needed or wanted to engage in the conduct.

Under the 1969 law at Section 409, DOD had a legal obligation to report annually to Congress on “expenditures for research, development, test, and evaluation of all lethal and nonlethal chemical and biological agents,” codified at 50 USC 1511.

Section 409. (a) The Secretary of Defense shall submit semiannual reports to the Congress on or before January 31 and on or before July 31 of each year setting forth the amounts spent during the preceding six-month period for research, development, test and evaluation and procurement of all lethal and nonlethal chemical and biological agents. The Secretary shall include in each report a full explanation of each expenditure, including the purpose and necessity therefor.

In 1975, Senator Frank Church led a commission, which published a Report on the Foreign and Military Intelligence Activities of the United States¹⁵⁹ in April 1976.

The Church Report included, at Chapter 15-F, information about chemical and biological activities, and at Chapter 17, information about “Testing and Use of Chemical and Biological Agents by the Intelligence Community.” It reported on Project Chatter, Project Bluebird/Artichoke, MK-ULTRA, MK-NAOMI and other programs through which the US Government conducted experiments on human subjects against their will and to their detriment.

I haven’t confirmed, but it’s plausible that the Church Report influenced Congress to update laws governing chemical and biological experiments on human subjects, including DOD-Congressional reporting requirements, in 1977, through Section 808 of the NDAA, codified at 50 USC 1520.

Section 808 - The Secretary of Defense shall supply the Committees on Armed Services of the Senate and House of Representatives, not later than October 1 of each year, a full accounting of all experiments and studies conducted by the Department of Defense in the preceding twelve-month period, whether directly or under contract, which involve the use of human subjects for the testing of chemical or biological agents.

50 USC 1520 was amended in 1982 and then repealed and replaced by 50 USC 1520a in 1997 and 1998, alongside the transfer of the program from DOD to HHS under the Emergency Use Authorization (EUA) program covered below and previously.¹⁶⁰

And so the US Government, through the DOD, continued testing all sorts of sickening, sterilizing and lethal agents on soldiers and prisoners throughout the 1970s and 1980s, leading to the swine flu outbreak in 1976, HIV outbreak shortly after, and on into the Gulf War.

Perhaps reporting to Congress about its chemical and biological human testing projects. Maybe not.

*

In 1990, Congress passed the Biological Weapons Antiterrorism Act, to give the public appearance of bringing the US into compliance with the 1975 UN convention prohibiting biological weapons.

As I wrote at the top, I still need to dig into 50 USC 1523, which was passed in November 1993 as part of the FY1994 NDAA, amended in 1997 and 2006, and possibly repealed in 2017, effective Dec. 31, 2021.

At this time, my understanding is that the 1993 law set up a parallel reporting requirement that the Defense Secretary include, in his or her general annual report to Congress, “a report on chemical and biological warfare defense,” including

50 USC 1523(b)(9): A description of any program involving the testing of biological or chemical agents on human subjects that was carried out by the Department of Defense during the period covered by the report, together with— (A) a detailed justification for the testing; (B) a detailed explanation of the purposes of the

testing; (C) a description of each chemical or biological agent tested; and (D) the Secretary's certification that informed consent to the testing was obtained from each human subject in advance of the testing on that subject.

In 1994, a Senate committee led by John D. Rockefeller of West Virginia looked at DOD abuse of military men and women under chemical and biological warfare programs: *Is Military Research Hazardous to Veterans Health? Lessons Spanning Half a Century: A Staff Report Prepared for the Committee on Veterans Affairs.*¹⁶¹

The 1994 Rockefeller committee issued a list of "Findings and Conclusions," including:

- For at least 50 years, DOD has intentionally exposed military personnel to potentially dangerous substances, often in secret
- DOD has repeatedly failed to comply with required ethical standards when using human subjects in military research during war or threat of war
- DOD incorrectly claims that since their goal was treatment, the use of investigational drugs in the Persian Gulf War was not research
- DOD used investigational drugs in the Persian Gulf War in ways that were not effective
- DOD did not know whether pyridostigmine bromide would be safe for use by U.S. troops in the Persian Gulf War...
- The safety of the botulism vaccine was not established prior to the Persian Gulf War...
- Records of anthrax vaccinations are not suitable to evaluate safety...
- Army regulations exempt informed consent for volunteers in some types of military research...
- DOD and DVA have repeatedly failed to provide information and medical follow-up to those who participate in military research or are ordered to take investigational drugs
- The Federal Government has failed to support scientific studies that provide information about the reproductive problems experienced by veterans who were intentionally exposed to potentially dangerous substances
- The Federal Government has failed to support scientific studies that provide timely information for compensation decisions regarding military personnel who were harmed by various exposures
- Participation in military research is rarely included in military medical records, making it impossible to support a veteran's claim for service-connected disabilities from military research
- DOD has demonstrated a pattern of misrepresenting the danger of various military exposures that continues today

The Rockefeller committee also made recommendations, including:

- Congress should deny the DOD request for a blanket waiver to use investigational drugs in case of war or threat of war [= the EUA program passed by Congress in 1997.]
- FDA should reject any applications from DOD that do not include data on women, and long-term followup data
- Congress should authorize a centralized database for all federally funded experiments that utilize human subjects
- Congress should mandate all Federal agencies to declassify most documents on research involving human subjects
- Congress should reestablish a National Commission for the Protection of Human Subjects...

*

In November 1996, Congress repealed the 50 USC 1511 DOD reporting requirement, through the FY1996 NDAA at Section 1061(k), as a note under 10 USC 111.

NDAA FY1996, Section 1061(k) - Reports and Notifications Relating to Chemical and Biological Agents -- Subsection (a) of section 409 of Public Law 91-121 (50 USC 1511) is repealed.

¹⁶¹ <http://www.prop1.org/2000/du/reports/941208rr.htm>

In November 1997 — through the FY1998 NDAA and the Food and Drug Administration Modernization Act — Congress and President Clinton set up the Emergency Use Authorization program, accomplishing two things.

The amendments and additions transferred the DOD chemical and biological weapons research and development program to the Health and Human Services Department under the Food and Drug Administration, and expanded the pool of humans subject to experimentation without informed consent [= attack using lethal bioweapons] from military personnel and prisoners, to the whole American population.

In October 1998, Congress and President Clinton passed the Omnibus Consolidated and Emergency Supplemental Appropriations Act.

Title II established the National Pharmaceutical Stockpile, later renamed the Strategic National Stockpile, and appropriated \$51 million (regularly topped up in subsequent appropriations) “to remain available until expended...for pharmaceutical and vaccine stockpiling activities at the Centers for Disease Control and Prevention.”

Division I of the same 1998 bill — the Chemical Weapons Convention Implementation Act of 1998 — established prohibitions on chemical weapons, to give the appearance of US compliance with the terms of the 1997 UN Convention on the Prohibition of the Development, Production, Stockpiling and Use of Chemical Weapons and on their Destruction.¹⁶²

The 1998 dual-use legislation accomplished another key US Government objective: it rendered the DOD’s illegal stockpile of biological and chemical agents into a ‘legal’ stockpile of pharmaceutical products and vaccines.

Same deadly toxins.

Different labels.

Just as the 1997 dual-use legislation continued to support and fund the same unethical human testing program, on a larger human test subject population.

*

As far as I can tell right now (subject to change with more research), DOD has had minimal or no statutory obligation to report on chemical and biological weapons programs to Congress since the mid-1990s, partially on the (false) basis that no such programs exist.

And as of Dec. 31, 2021 — based on provisions of the NDAA for FY 2017 — the last Congressional reporting requirement -- the 1994 requirement under 50 USC 1523 -- is now gone.

NDAA, FY2017, Subtitle F, Section 1061(b) - Final Termination Date for Submittal of Exempted Reports -- (1) In General. -- Except as provided in paragraph (2), each report required pursuant to a provision of law specified in this section that is still required to be submitted as of December 31, 2021, shall no longer be required to be submitted to Congress after that date...Section 1061(i)(2) Section 1703 of the National Defense Authorization Act for Fiscal Year 1994 (50 U.S.C. 1523).

This conclusion is supported by Senator Rand Paul’s recent comments¹⁶³ that nobody in Congress is allowed to know about Gain of Function or Dual Use Research of Concern projects.

It also aligns with DOD’s continued claim, at its health.mil Chemical and Biological Exposures webpage,¹⁶⁴ that the US Government hasn’t conducted any biological weapons testing on humans since 1969, and hasn’t conducted any chemical weapons testing on humans since 1975.

¹⁶² https://www.un.org/en/genocideprevention/documents/atrocity-crimes/Doc.42_Conv_Chemical_weapons.pdf

¹⁶³ <https://summit.news/2022/08/04/rand-paul-congress-is-not-allowed-to-know-about-top-secret-gain-of-function-research-committee/>

¹⁶⁴ <https://www.health.mil/Military-Health-Topics/Health-Readiness/Environmental-Exposures/Chemical-and-Biological-Exposures>

Since the end of World War II, DoD periodically evaluated the CB threat and the ability of U.S. forces to fight on a chemical and biological battlefield. In some programs Service members were present but not test subjects and in other programs they were volunteer human subjects. Testing of biological agents in human subjects ended in 1969; testing of chemical agents on human subjects ended in 1975. DoD is investigating these exposures that occurred as far back as 30 to 60 years ago.

Duh.

There's no need to report to Congress on chemical and biological weapon human trials that you're not conducting.

And in a way, DOD isn't lying.

Since the mid-1990s, the US Government's illegal chemical and biological warfare program has all been operated under HHS public health frameworks, by relabeling weapons as prophylactics and treatments.

Since then, the US government has only developed, produced and deployed *FDA-authorized* bioweapons.

Note, though, that FDA authorization doesn't mean that the products comply with any FDA consumer-protection regulations on clinical trials, manufacturing, distribution, labeling or administration. Or safety and efficacy. Or recalls.

They don't comply with any of those legal standards, and there's no legal reason why they should comply.

Compliance would be silly, because they're weapons, not medicines, and they're shot into targeted enemies (everyone on the planet) to kill them, not offered to patients to protect or heal them.

*

The DOD/HHS/DARPA/BARDA program isn't just a great way to cull and control the herd though.

Turns out, shoving biochemical weapons at needlepoint into the arms of hundreds of millions of people is also a great way to dispose of illegal stockpiles and destroy evidence of US violation of international treaties.

See 50 USC 1524, also added to the Chemical and Biological Warfare Program (50 USC 32) by Congress in 1993: Agreements to provide support to vaccination programs of Department of Health and Human Services...

The Secretary of Defense may enter into agreements with the Secretary of Health and Human Services to provide support for vaccination programs of the Secretary of Health and Human Services in the United States through use of the excess peacetime biological weapons defense capability of the Department of Defense...

Jan. 16, 2023 - Dual-use government officials of concern. Prosecute war criminals in personal capacity or US Government official capacity?

I think prosecution of the American Covid-19 war criminals — starting with Robert Kadlec, Alex Azar, Marion Gruber and Denise Hinton and moving on from there, as outlined Oct. 12, 2022¹⁶⁵ — will be more effective if those criminal cases are filed against the perpetrators in their personal capacities, as false impersonators or foreign imposters acting outside the bounds of legitimate government authority, rather than in their official capacities as US government agents acting within the authorized scope of their duties.

- Jan. 10, 2023 - Draft Complaint Intro/Background: John Doe v. Azar, Kadlec, Gruber and Hinton (PDF).¹⁶⁶

That PDF draft addresses the defendants in both their official and personal capacities. I wrote it in October, before reaching the conclusions I'm writing about now.

*

The US Government is making war on its own people covertly, through the conversion of the chemical and biological warfare program into the public health emergency medical countermeasures program, and is working in collaboration with globalist institutions and other national governments around the world, to make war on all people.

The central bank globalists running the worldwide program — one main battlefield is currently the World Health Organization¹⁶⁷ — want to kill as many of us as possible, as quickly and with as much plausible deniability as possible.

They also want to depose as many national, sovereign governments as possible, as quickly and with as much plausible deniability as possible, in order to install the one-world government, presented as a solution to the civil, political, financial and economic chaos and dysfunctionality they themselves have brought into being.

So legal strategies need to walk a fine line between holding the war criminals to account and also protecting each country's sovereign government institutions, so that the small-but-growing remnants of non-criminal government officials can work with informed popular support to rebuild legitimacy, economic stability and public trust.

Sometimes I get asked to look at legal pleadings people are thinking about filing, or have already filed, and offer my views on them.

As I've said and written repeatedly, I think every legal civil and criminal strategy that people are interested in preparing and filing should be tried.

Last fall I helped set up two self-help websites to support people interested in filing cases:

- Five Small Stones¹⁶⁸ - text-only, pharmaco-military crimes only.
- Five Small Stones¹⁶⁹ - multimedia, pharmaco-military and election crimes.

I find arguments that there is “only one way,” “only two paths,” a “best way,” or ways that should “never” be tried, or some “easy” way to attack the Monster, or some strategy “must” get good results and other strategies that “can never” get good results, to be counterproductive.

There are as many ways to attack the Monster as there are people willing to fight. They are all difficult and strewn with obstacles, and they should all be tried anyway: each person should fight in the way that he or she thinks makes sense and uses the skills and interests that he or she has available to offer to the fight.

For legal strategies in general, I think the simpler the arguments, the better, for both generating public understanding and support, and for engaging prosecutors, judges and legislators.

In my view, neither judges nor the public care anymore about dueling data analysis experts or the status of efforts to isolate SARS-CoV-2 viruses or prove that PCR tests work or don't work.

They know several things from direct experience:

- Something made people sick in a strange way starting in late 2019 and early 2020.
- Governments and their media propagandists said that nothing but social isolation, economic dependency, testing, masking and vaxxes would solve the problem, and blocked every other possible mitigation, prevention and treatment.
- The claims of governments and media propagandists proved to be false, because people have continued to get sick with weird things even after complying with the recommendations and 'mandates,' and lacking access to the things the governments blocked.
- Since the vaxx rollout, people are sick and dying from blood clots, heart attacks, turbo-cancers, immune system dysregulation and many other horrible things, and birth rates are dropping.
- Governments and media propagandists are pretending that's not happening, and continuing to fund and push the same policies and programs.

My work up to this point has been about figuring out how and why the regulatory, consumer safety mechanisms have been blocked, and how and why the constitutional checks and balances have been blocked.

Now that I know, beyond any doubt, that it's because our governments are at war with us, and that their war plans included establishing triggers to quietly and illegitimately, suspend all constitutional and regulatory provisions that would have protected us from the attack, I'm focused on educating more people about that reality, and thinking through legal strategies that can expose and nullify that war footing as being an illegal war that does not comply with just war doctrine,¹⁷⁰ such that acts undertaken in support of it are war crimes, in addition to being grave mortal sins.

For my own contributions to the fight against the Monster, I'm most interested in developing and supporting cases that force government defendants and defense counsel to first, admit that the evidence (the record of their public acts and documents) conclusively shows they've launched a covert war with their people, which is becoming widely seen and understood.

The government attorneys would then be compelled to choose between two defenses:

1. The war on the world is legal and the use of bioweapons to carry out official, authorized duties and orders to maim and kill billions of people, is justified and endorsed by the US government as an institution.
2. The war is illegal, such that the official government acts undertaken by named defendants, to conduct the war, have been done without proper authority, by rogue actors, who can and will be removed from power and tried for their war crimes.

To the extent the Department of Justice responded to a criminal prosecution of Kadlec, Azar, Gruber and Hinton by using the second argument, the war criminals would be subject to prosecution in their personal capacity, without recourse to sovereign, legislative, administrative or other immunities.

They would be cut loose from the government, and legally construed as people who committed the war crimes outside their official capacities, while impersonating federal officials, or while serving as agents of foreign invaders or occupiers.

The advantage offered by cutting the war criminals loose, is that it would leave the core governing institutions (legislatures, courts and executives) and the US Constitution intact.

Badly damaged. Threadbare.

But intact, and positioned to begin the long process of rebuilding and reweaving legitimacy and public trust from a solid foundation.

¹⁷⁰ https://en.wikipedia.org/wiki/Just_war_theory#Saint_Thomas_Aquinas

Some of my thinking about this comes from the many carve-outs built into criminal and civil statutes, to exempt senior executive service (SES) officials, cabinet secretaries, Congress members, judges, military officials and state and local government agents from prosecution for acts that are criminal when committed by anyone else.

Examples of laws containing carve-out provisions include the False Claims Act (31 US 3729); Racketeer Influenced and Corrupt Organizations (RICO) Act (18 USC 1961); federal laws prohibiting use of biological weapons of mass destruction (18 USC 175); prohibiting use of chemical weapons of mass destruction (18 USC 229); prohibiting international and domestic terrorism (18 USC 2331); prohibiting genocide (18 USC 1091); prohibiting torture (18 USC 2340A); and prohibiting war crimes (18 USC 2441).

A couple of months ago, I read a book chapter by Jed S. Rakoff, *Fundamentals of RICO, (RICO - Civil Law and Strategy, 1999¹⁷¹)*, in which Rakoff reported:

Consistent with the Supreme Court's increasing receptivity to claims of sovereign immunity by state governments, several circuit courts have held that state governmental entities cannot be sued under RICO. One approach to the issue of sovereign immunity, which is best exemplified by decisions from the Ninth Circuit, has concluded that government entities cannot violate RICO because they are **incapable of forming the "malicious intent" needed to commit predicate acts.**

Until very recently, I took those carve-outs at face value. I construed them as self-serving methods whereby powerful people protect themselves from criminal prosecution and civil liability.

They serve that function well, for as long as the People, including honorable, courageous legislators, judges and governors construe them as applicable.

And yes, I do believe that there are honorable, courageous government officials walking among us. There aren't many. But there are enough for now, and more joining the battle daily.

I now think these carve-outs have a far deeper and nobler purpose.

They represent a suppressed but useful scalpel with which honorable government officials can excise the cancer from the body politic.

The "government" cannot form malicious intent, because the only legitimate, valid basis for the existence and continuation of any government is the protection and prosperity of the people living on the soil within its sovereign territory.

All intentions and acts formed or committed for purposes other than the protection and prosperity of the people, are by definition no longer government intentions and acts.

Individual human beings occupying government positions certainly can form malicious intent.

They often do, and demonstrably have, to unfathomable depths that have become visible since January 2020. The deeper and nobler function of the carve-outs in the laws, imply that, starting with the moment in time and place that anyone elected or appointed to office or employed by the government, engages in criminal acts and conspiracies to commit criminal acts, or induce others to participate in crimes (knowingly or unknowingly), he silently and automatically forfeits classification as a government official and removes him or herself from the protective shield that Almighty God has placed around legitimate, valid sovereigns who serve the legitimate, valid purpose of protecting and defending the lives and properties of the people entrusted to their care and jurisdiction.

In other words, a government at war with its people is not a valid, legitimate government.

It's an invalid, imposter government.

¹⁷¹ https://www.lawcatalog.com/media/productattach/r/i/rico_chapter_1-r47.pdf

By logical extension, any individual government official demonstrably engaged in war on the people is not part of a valid, legitimate government.

He's an invalid, imposter official.

He's a rogue, an outlaw, operating beyond the scope of the authority given to valid governments through legitimate social compacts and covenants formed (in various ways) among the three parties: God, Sovereign Government and People.

To sum up, if an illegal, immoral war is being waged on the people, (it is) and if it's legally and morally impossible for a VALID government to do such things, in the course of VALID official duties (it is), then by legal and moral definition, the people doing these things are not of, from or inside the US Government.

They are outside of the government, and outside of the law.

They are outlaws occupying government offices.

The legitimate, valid, authorized government still includes anyone in executive, legislative, judicial and military positions who either resisted going along with the program from the start, such as by defying unlawful orders, and also includes men and women who cooperated at the start when under the false impression of legitimacy, but have since realized an illegal war is underway, have stopped cooperating and have started resisting.

Those conducting the war have already abdicated from office in substance, but not in form.

They are filling real time and space — the physical offices in Washington DC and other US government sites, as of Jan. 16, 2023.

But they are not fulfilling proper functions, and are in fact violating them.

As it happens, the same inversion and obscuring of truth is playing out at many levels right now, including the pretend papacy of Pretender-Pope Francis in the wake of Pope Benedict XVI's incomplete, coerced abdication in 2013.

*

What to do?

1. Pray the Rosary.
2. Don't take any more 'vaccines' ever, or allow anyone to 'vaccinate' your children, and support everyone you can support, in making those same decisions.
3. Buy guns and know how to use them, unless you don't want to for your own personal reasons.
4. Use cash and checks, not electronic payment platforms.
5. Share information as widely as possible.
6. Support the handful of legislators, prosecutors, judges and executives (federal and state) who are rapidly figuring these things out and working to remove the imposters from power while protecting the US Constitution and the legitimate government institutions built upon it. And encourage others to get on the right side of the war and help them.

We should be obedient unto God, rather than follow those who in arrogance and unruliness have set themselves up as leaders in abominable jealousy...For Christ is with them that are lowly of mind, not with them that exalt themselves over the flock. - Pope St. Clement

Jan. 17, 2023 - On quietly bringing county, state and federal officials up to speed. Sheriffs, prosecutors, lawmakers, judges, governors

I've been fielding more emails and comments asking how to help and how to donate to legal funds to support the kinds of criminal cases I write about.

I'm still working on the fundraising piece. It needs to be set up to be somewhat under-the-radar but still publicly accessible, and that's a hard balance to strike.

On the public education piece, the general public is far out in front of the public officials — most of whom don't understand the massive criminal enterprise in which they've become entangled.

The gap between the two groups is widening as the public gallops on ahead.

More ordinary people understand the big picture of what's happening, and more people are getting more angry about it, while so many prosecutors, lawmakers, judges, governors and sheriffs are just starting to catch on.

This is a good development overall.

Because so many ordinary people now understand things more fully, and the government officials (at least, those who aren't willing, premeditated co-conspirators in the crimes) are finally noticing some things that seem a little off, the time is ripe for more ordinary people to make more ordinary appointments with county and state officials, and with your Congressional representatives, to talk through some of these things.

I know that many of you have been doing that already. Keep doing it.

If you haven't been doing it yet, now is a good time to start.

The task is mobilizing potential statesmen to step up and follow where the people are already leading, and mobilizing more well-informed popular support at the same time, so the two groups can converge on each other and strengthen each other to withstand the genociders and the genocidal mass media that have been keeping the two groups weak, ignorant and isolated from each other for more than 100 years, and are intensifying those efforts now.

If you are interested, please find the offices and try to make an appointment to meet with one or more of the following people, wherever you live:

- county sheriff
- county district attorney
- county commissioners
- county magistrate judges
- state attorney general
- state legislators
- state governor
- state judges
- Congress members
- US Senators
- federal judges

Go to the appointment prepared to explain the situation in America and the world right now, as you understand those things, in your own words.

Be prepared to explain as best you can how you would like these men and women to respond: by joining with you to publicly name and shame the covert globalist overthrow of Constitution and country; by resisting it; by repealing the unlawful federal, county and state pseudo-laws and appropriations that enabled it; by formally rejecting and refunding the hush money, bribery and extortion payments the feds have been funneling to school districts, hospitals, universities, towns, counties and states to buy silence and cooperation with evil; and by launching and supporting criminal prosecutions.

Two documents to print, bring with you and give to the people you talk with.

1. To demonstrate your own commitment to help these men and women see what's happening and stand up at their sides to fight, print, sign and bring along the Affidavit of Noncompliance.¹⁷²
2. To leave them material so they can educate themselves more after your meeting, bring along a copy of the American Domestic Bioterrorism Program Executive Summary,¹⁷³ Jan. 2023 version

Take notes during the meeting. Write down questions they have. If you can point them to sources of more information during the meeting, do that. If you need to track down answers to their questions and get back to them later, do that.

Godspeed.

Keep pushing.

Jan. 18, 2023 - Repost - Other Transaction Authority (OTA) is to federal procurement contract regulation as Emergency Use Authorization (EUA) is to federal drug safety regulation. They're both provisions through which Congress and US presidents pretended to legalize criminal conspiracy to produce and use weapons of mass destruction. (Oct. 19, 2022)

Jan. 18, 2023 Notes:

One, I've been reposting material recently because Bailiwick readership has doubled since November, new people are arriving here every day, and I think it's useful to point new readers to some of the relevant past reporting, which led to the broader exposure on other platforms, which is growing readership now.

Two, I'm dealing with some burnout. This is an occupational hazard I have dealt with many times in the past and am fully equipped to deal with now. I'm also working on non-Bailiwick, time-sensitive legal research and writing projects to support civil litigation, criminal prosecution and public education teams.

New reporting will be light for a few weeks while I re-fill the depleted reserves and complete some tasks for those group projects.

Three, interesting new reporting by Leo Hohmann at Gateway Pundit, about WHO International Diagnostic Code Z28.310.¹⁷⁴ "This is the code your doctor will log into the computer system that is accessed by government and private health insurers informing them of your Covid vaccine status." It's very useful information, because it will require a step-up in preparedness and willingness to resist and non-comply.

Doctors will be required to collect and submit this information, if they want to be reimbursed for providing treatment to patients. Think through ways to pay doctors directly, by cash or check, if you want to consult doctors at all, so that the good ones can make a living without engaging in biomedical surveillance and control of you and other patients. ICD codes have played a key role in the cull to date,¹⁷⁵ so WHO and the federal bioterrorism cabal members will keep using them as long as they can get away with it by getting people to cooperate. *See also* Legal Walls of the Covid-19 Kill Box, May 2022 version,¹⁷⁶ at p. 2.

Four, going forward, I'll be deleting comments and emails that take the futility position, paraphrased as "the globalists are going to kill us all and there's no way to resist or change things. They control all the power, all the money, all the people, all the water, food and energy, and they will forever and ever."

¹⁷² <https://bailiwicknewsarchives.files.wordpress.com/2022/11/affidavit-of-noncompliance-with-title-case-type.pdf>

¹⁷⁶ <https://bailiwicknewsarchives.files.wordpress.com/2022/05/2022.02.26-legal-walls-of-the-covid19-kill-box.pdf>

People who hold those views have an absolute right to believe them and to express them publicly, but not at Bailiwick, because I'm the publisher and editor at Bailiwick, and I find such arguments irritating, to put it mildly.

I believe the only unchangeable constant in the world, apart from the unchangeable God in Whom all things exist and have their being, is that things change.¹⁷⁷

And that it is therefore worthwhile, and a moral duty, for people to work cooperatively with God to fight evil and evil-doers, challenge and depose them, and build up goodness and virtue in the world.

It's a big Internet; spread your sense of futility and despair to readers elsewhere, work on your spiritual and emotional health if you want to, and come back to the Bailiwick community when you feel better.

Five, the OTA-EUA reporting below was written Oct. 19, 2022, and therefore pre-dates subsequent developments in Brook Jackson's False Claims Act case against Pfizer, Ventavia and ICON.

Jackson's team filed a response to the US Government's Oct. 4 letter on Oct. 27.¹⁷⁸ Judge Truncale heard argument on Pfizer's motion to delay discovery in early December, and the most recent entry on the docket is an amended scheduling order dated Dec. 15, 2022.¹⁷⁹

Pfizer's motion to dismiss is still pending, as far as I know, and document production is scheduled to begin March 15, 2023.

The case has not been dismissed. It's just moving slowly, in a way that's disproportionate to the genocidal mayhem enabled by ongoing deference to and compliance with illegitimate pseudo-laws.¹⁸⁰

Oct. 19, 2022 - Other Transaction Authority (OTA) is to federal procurement contract regulation as Emergency Use Authorization (EUA) is to federal drug safety regulation.¹⁸¹

They're both provisions through which Congress and US presidents pretended to legalize criminal conspiracy to produce and use weapons of mass destruction.

Means, motive and opportunity

Emergency Use Authorization (EUA) programs established by Congress and President Clinton on Nov. 21, 1997 pretended to authorize the US Secretary of Health and Human Services and Secretary of Defense to illegally order illegal use of illegal chemical and biological weapons of mass destruction on all Americans and all the people in the rest of the world.

Other Transaction Authority (OTA) programs established by Congress and President Obama on Nov. 25, 2015 pretended to authorize SecDef and HHS Secretary to illegally contract with and pay criminal private corporations to illegally produce illegal weapons.

On Nov. 21, 1997, Congress and President Clinton passed the Food and Drug Administration Modernization Act. Through it, they added a new section (21 USC 360bbb) to the Federal Food Drug and Cosmetics Act: "Expanded access to unapproved therapies and diagnostics."

Code translation:

- Access = production and deployment

- Unapproved = illegal/prohibited under federal and international law
- Therapies and diagnostics = weapons

The Emergency Use Authorization program under 21 USC 360bbb, if correctly titled, would be “Expanded production and deployment of illegal and prohibited weapons.”

On Nov. 24, 2003, Congress and President Bush passed the National Defense Authorization Act for FY2004, adding 21 USC 360bbb-3, “Authorization for Medical Products for Use in Emergencies.”

Section 360bbb-3 refers to “products,” a category that includes qualified countermeasures, which includes medical countermeasures and security countermeasures.

The term “medical countermeasures” seems to have entered the lexicon on Nov. 30, 1993, when Congress and President Clinton passed the NDAA for FY1994 and added to Title 10, Armed Forces, Section 2370a. “Medical countermeasures against biowarfare threats: allocation of funding between near-term and other threats.”

At least that’s the first document on my hard-drive that shows up in a keyword search.

10 USC 2370a was repealed on Oct. 28, 2004.

Not to worry.

Two years earlier on June 12, 2002, “medical countermeasures” had been shifted out of Title 10 (Armed Forces) and put under Title 42, (Public Health and Welfare) at 42 USC 300hhh, “Public health and medical preparedness and response functions,” through the Public Health Security and Bioterrorism Preparedness and Response Act passed by Congress and President Bush.

Medical countermeasures moved again on July 21, 2004, when Congress and President Bush passed the Project Bioshield Act.

Project Bioshield moved the “qualified countermeasures” program to 42 USC 247d-6a: “Authority for use of certain procedures regarding qualified countermeasure research and development activities.”

Whatever the products are called, and wherever the pretend lawfulness of their use is addressed in the United States Code, they are chemical and biological weapons.

Whenever you read or hear the terms “biologic” “vaccine” or “countermeasure,” translate them as “illegal weapon.” The terms are simply ways Congress, Presidents and appointed US government officials pretend that the crimes they’re committing are lawful acts, while they pretend to regulate illegal weapon manufacturing and use, through the pretend process of fulfilling their duties to protect public health and safety from toxic food and drugs.

On Nov. 25, 2015, Congress and President Obama passed the National Defense Authorization Act for FY2016.

This is how they corrupted the procurement contracting system in the same way that they’d already corrupted the food and drug regulatory system.

The ‘prototype’ procurement language, called Other Transaction Authority or OTA, was added at 10 USC 2371b, “Authority of the Department of Defense to carry out certain prototype projects.

10 USC 2371b was renumbered 10 USC 4022 effective 01/01/2022, through the NDAA for FY2021 passed on Jan. 1, 2021 by Congress and President Trump.

Which the criminals who write US laws for the zombie Congress to pass apparently forgot, because they tried to amend it again, back at 10 USC 2371, in the NDAA for FY2022 passed on Dec. 27, 2021, at 135 Stat. 1825.

It's all part of the overall game of throwing Americans off the rancid scent of the criminal infiltrators working in the US Department of Defense and Department of Health and Human Services as they carry out their fraud-based global mass murder campaign.

Lying and killing. Killing and lying.

*

Through 10 USC 2371b/10 USC 4022 Other Transaction Authority (OTA) program set up in 2015, Congress and President Obama pretended to legalize Department of Defense contracting with pharmaceutical corporations to produce bioweapons, in violation of federal and international laws prohibiting same.

10 USC 4022(a)(1) - "[T]he Director of the Defense Advanced Research Projects Agency (DARPA), the Secretary of a military department, or any other official designated by the Secretary of Defense may, under the authority of section 4021 of this title, carry out prototype projects that are directly relevant to enhancing the mission effectiveness of military personnel and the supporting platforms, systems, components, or materials proposed to be acquired or developed by the Department of Defense, or to improvement of platforms, systems, components, or materials in use by the armed forces."

Like the EUA product-development and FDA review program, the OTA government purchasing program classified bioweapons as qualified countermeasures, medical countermeasures and security countermeasures.

*

The OTA federal contract procurement program set up by Congress paralleled the creation of the Medical CBRN [Chemical Biological Radiological Nuclear] Defense Consortium, or MCDC.

This is the public-private partnership through which new chemical, biological, radiological and nuclear weapons are funded, developed and deployed by the US Government in conspiracy with private sector agents to sicken and kill human beings.

MCDC members describe themselves¹⁸² as

A consortium formed in response to the Government's expressed interest to establish an Other Transaction Agreement (OTA) with an eligible entity or group of entities, to include industry, academic, and not-for-profit partners, for advanced development efforts to support the Department of Defense's (DoD) medical, pharmaceutical and diagnostic requirements as related to enhancing the mission effectiveness of military personnel.

Through the Joint Program Executive Office for Chemical, Biological, Radiological and Nuclear Defense (JPEO-CBRND), the Medical Countermeasures Systems (MCS) Joint Project Management Office is always looking for innovative, safe and effective medical solutions to counter CBRN threats. The usage of an OTA allows government to partner with the MCDC to leverage cutting edge R&D and develop prototypes from commercial sources. This gives MCS an agile and flexible way to develop medical countermeasures using new and innovative technology.

Pfizer, Inc. is among the current members of the MCDC consortium.¹⁸³

FDA has a parallel program, called the Medical Countermeasures Initiative (MCMi).¹⁸⁴

That's the FDA branch of the US Government's public-private partnership program to produce and use illegal chemical and biological weapons.

¹⁸³ <https://www.medcbrn.org/current-members/>

¹⁸⁴ <https://www.fda.gov/emergency-preparedness-and-response/counterterrorism-and-emerging-threats/medical-countermeasures-initiative-mcmi>

The 2015 Congressional act pretending to authorize the OTA program is one of the many ways that the US Government has “expressed interest” in setting up the corporate-state death machine since the mid-1940s.

Here’s how this fits with the US Government’s statement of interest in Brook Jackson’s whistleblower case.

- 2020.07.20 Base Agreement DOD-ATI-Pfizer-FDA contract¹⁸⁵
- 2020.07.21 OTA Technical Direction Letter DOD-ATI-Pfizer-FDA¹⁸⁶
- 2021.01.08 Brook Jackson Original Complaint¹⁸⁷
- 2022.01.18 US Gov DOJ declines to intervene¹⁸⁸
- 2022.02.10 Judge Truncale Order on Gov decline to intervene¹⁸⁹

- 2022.09.20 Pfizer Reply in support MtD¹⁹³
- 2022.10.04 US Gov Statement of Interest in support MtD¹⁹⁴
- 2022.10.11 Jackson Leave to File Response to US Gov¹⁹⁵
- 2022.10.14 Judge Truncale Order Granting Leave to Respond¹⁹⁶

Two key US Government contracts are involved.

First is the July 20, 2020 Base Agreement between Advanced Technology (ATI) and Pfizer, Inc., identified as MCDC Base Agreement No. 2020 - 532.

Signing authority was listed as

MCDC Other Transaction Agreement (OTA) No. W15QKN-16-9-1002 and 10 U.S.C. § 2371b, Section 815 of the 2016 National Defense Authorization Act (NDAA), Public Law 114-92.

The second contract is the July 21, 2020, MCDC Technical Direction Letter or Statement of Work (SOW) for "COVID-19 Pandemic - Large Scale Vaccine Manufacturing Demonstration" between Pfizer and DOD/Advanced Technologies Inc.

The military prototype contracting provision must be read in conjunction with several other ways that the US Government gradually, quietly "expressed interest" in conspiring with businesses like Pfizer to commit genocide.

These include Congressional amendments to the 1938 Food, Drug and Cosmetics Act and the 1944 Public Health Service Acts which — by January 2020 when the US Government's Covid-19 crime spree began — had entirely eliminated federal regulatory standards for production and use of products designated by the FDA for emergency use during an HHS-declared, HHS-maintained 'public health emergency.'

21 USC 360bbb-3(c) "Criteria for Issuance of Authorization" is a linchpin.

At 21 USC 360bbb-3(c)(2), the law provides that the HHS Secretary may issue emergency use authorizations if he or she concludes that, based on the totality of scientific evidence available to the Secretary, including data from adequate and well-controlled clinical trials, if available, it is reasonable to believe that—

(A) the product may be effective in diagnosing, treating, or preventing—

(i) such disease or condition; or

(ii) a serious or life-threatening disease or condition caused by a product authorized under this section, approved or cleared under this chapter, or licensed under section 351 of the Public Health Service Act [42 U.S.C. 262], for diagnosing, treating, or preventing such a disease or condition caused by such an agent; and

(B) the known and potential benefits of the product, when used to diagnose, prevent, or treat such disease or condition, outweigh the known and potential risks of the product, taking into consideration the material threat posed by the agent or agents identified in a declaration under subsection (b)(1)(D), if applicable;

With the benefit of the July 2020 OTA contract, Pfizer's April 2022 motion to dismiss and the US Government's October 2022 statement of interest, we can now fully understand several things.

- No safety standard is material to the HHS or FDA decisions.
- The only efficacy standard is that the product "may be effective."
- Efficacy conclusions are to be based on the totality of scientific evidence available to the Secretary.
- If no scientific evidence is construed as available to the HHS Secretary, the HHS Secretary can make the declaration anyway.

The Base Agreement contract provided, at Section 21.06, for DOD military personnel to monitor and control every document, phone call, email, meeting and third-party audit between Pfizer (the "project agreement holder" or PAH) and FDA regulators.

DOD put this into the OTA bioweapons procurement contracts to ensure from the very start that Operation Warp Speed could only ever conclude with FDA authorizations and approvals, and that the FDA would never, under any circumstances, revoke the authorizations and approvals, because revocation of the authorization is the only condition under which US Government payment on the contracts can be suspended.

Section 21.06 Regulatory Affairs...The Government shall ensure performance includes regulatory expertise and guidance for candidate medical countermeasure development efforts...

(3) [Project Agreement Holder Pfizer] will provide FDA submissions to the government [US DOD] such as all documentation requested by FDA and all proposals to FDA

(4) PAH will allow the government [US DOD] to monitor all FDA communications by listening to teleconferences and attending meetings.

(5) PAH will allow the government [US DOD] to attend regulatory site visits and audits, and actively participate in all third-party audits...

DOD and Pfizer agents had means, motive and opportunity, through OTA contracts, to personally ensure that

- no valid clinical trials would be conducted,
- no valid clinical data would be collected and analyzed, and
- all scientific evidence of product toxicity would be removed, altered, suppressed, falsified, destroyed, discredited or otherwise disappeared, by anyone involved anywhere in the pretend clinical trials process.

DOD and Pfizer agents could thereby ensure that no evidence capable of interfering with the HHS Secretary and FDA regulatory officials (Azar/Kadlec/Gruber) EUA declarations would ever become available.

The mechanism was reinforced by other contractual provisions that separated the military "prototype manufacturing demonstration projects" from the pretend pharmaceutical research and development projects.

In other words, the FDA's decisions about products manufactured by Pfizer and other DOD contractors were made long before anyone in America had ever heard of Covid-19. The clinical trials were done to support the psychological part of the military operation; the scientific validity and regulatory compliance of the trials was irrelevant.

The FDA decisions based on the pretend trials were made by identifiable FDA officials, each of whom evidence will show either had knowledge, complicity and intent to further the crimes, or acted out of fear and ignorance, under DOD duress and coercion.

Back to Brook Jackson's case.

Pfizer's core argument in its Motion to Dismiss, which the US Government has now endorsed in its Oct. 4 statement of interest, is that clinical trials and clinical data from all of the sites, including the serious adverse event reports from the very start of the trials in Summer 2020, were not "material" or "necessary" to the FDA's decisions to grant Emergency Use Authorization (Dec. 11, 2020) and approval (Aug. 23, 2021) to Pfizer's product.

Pfizer, April 22, 2022 at p. 3

The Government's "actual behavior" here says it all. Both the complaint itself and the public record show the Government has been fully aware of Relator's allegations for nearly two years without withdrawing authorization or stopping payment for Pfizer's vaccine.

To the contrary, FDA took regulatory action that made the vaccine widely available and publicly responded to Relator's allegations by expressing the agency's "full confidence" in the data used to support the vaccine. DoD continues to purchase the product and make it available, free of charge, to all people living in the United States.

And the U.S. Department of Justice ("DOJ"), which was required under 31 U.S.C. § 3730(a) to investigate Relator's allegations "diligently," declined to intervene in this lawsuit.

All of this is "very strong evidence" that Relator's allegations are not material to the United States, and accordingly Pfizer's vaccine was—and continues to be—eligible for payment by the Government.

US Government, Oct. 4, 2022, at p. 10

[Brook Jackson's] complaint does not identify any provision in the SOW for the Project Agreement between Pfizer and the Army that conditioned Government payment for the vaccine on Pfizer's compliance with the clinical trial protocol or regulations.

The SOW, which is attached to the complaint, further specifies that the Army did not regulate the conduct of the clinical trial, which is "out-of-scope" for the purchase agreement between the Army and Pfizer.

In short, the complaint does not plead factual content to support a conclusion that compliance with the clinical trial protocol or regulations was necessary under the contract between Pfizer and the Army such that clinical trial violations would give rise to a claim for express or implied certification liability.

As the complaint notes, the contract did condition payment between Pfizer and the Army on FDA approval or authorization of the vaccine. This provision in the contract could support a claim for fraud in the inducement if the complaint had pleaded facts supporting an inference that the alleged clinical trial violations at the Ventavia sites actually altered FDA's approval or authorization decision.

However, while the complaint generally contends that the alleged clinical trial violations by Ventavia "call[] the vaccine's EUA into question," there are no allegations in the complaint that the data from the Ventavia sites caused FDA to authorize the vaccine or that FDA would have revoked authorization had it known about the alleged clinical trial violations by Ventavia.

*

Short note about where I'm going with this series of reports.

The implications of the contract terms were first publicly acknowledged by Pfizer on April 22, 2022, in Pfizer's motion to dismiss Brook Jackson's whistleblower case.

As of Oct. 4, 2022, the implications of the contract terms have now been publicly acknowledged and endorsed by the US Government.

On Oct. 11, 2022, Brook Jackson's attorneys asked Judge Truncale for permission to file a response to the US Government's statement of interest.

On Oct. 14, 2022, Judge Truncale granted that permission, and ordered Jackson's attorneys to file a response by Oct. 27.

I think that in their response Brook Jackson's attorneys should take the US Government's newly-discovered interest in intervening, and accept it, by asking Judge Truncale to:

1. Deny Pfizer's motion to dismiss
2. Add the US Government, including President Trump, President Biden, current and past secretaries of DOD, HHS, DOJ and DHS, along with CDC, FDA, NIH, NIAID, DARPA and BARDA officials *as defendants*.
3. Add a claim under 18 USC 2333 against the named US government officials and their subordinates (agency and departmental directors, advisory board members, etc.)
4. Terminate the national emergency declarations, proclamations and programs.
5. Immediately suspend the entire US vaccination program including the schedules for childhood, adolescent and adult injections, and order a full, independent investigation to be conducted by a civilian team led by Steve Kirsch and Naomi Wolf.
6. Close all DOD, FDA, CDC, Pfizer, Moderna, J&J and subcontractor facilities, and designate them as crime scenes in an active criminal investigation conducted by a civilian team led by Robert F. Kennedy Jr. and Francis A. Boyle.

If ordered by Judge Truncale, this would enable full discovery into the multiple, heinous crimes including fraud; production, stockpiling and use of chemical and biological weapons of mass destruction; and mass murder, that the US Government planned, conspired and contracted with the private corporate defendants (Pfizer, Ventavia and Icon) to conceal from the public during the planning stages, commit and then cover up.

Jan. 19, 2023 - Repost - Pharmaco-military genocide, enabling laws Congress should repeal and courts should nullify. (Aug. 11, 2022)

Jan. 19, 2023 Note:

In August, I posted a list of the worst public health emergency-predicated stand-alone acts, and larger consolidated acts (such as NDAAs) into which “public health” amendments and expansions have been folded, enacted since 1983. August list is reposted below.

Those unconstitutional laws constructed the public health-police state kill box in which so many millions of people have been trapped, sickened and killed.

They’re also listed, along with many others, in the footnotes of Legal History of American Domestic Bioterrorism Program¹⁹⁷ (14-page executive summary of pinned post¹⁹⁸).

The three main DOD-HHS mass murder programs that need to be repealed, stripped of funding, and judicially nullified, along with their tentacles in other chapters, subchapters, parts and sections, are:

- 50 USC Ch. 32, **Chemical and Biological Warfare Program**, falsely portrayed by DoD in official reports and by DoD scribes in the propagandist media as “defensive”
- 42 USC Ch. 6A, Subchapter 2, Part B, Federal-State Cooperation, including 42 USC 247d, **Public Health Emergencies Program**
- 21 USC Ch. 9, Subchapter V, Part E, General Provisions Relating to Drugs and Devices, including 21 USC 360bbb, **Expanded access to unapproved therapies and diagnostics.**

I estimate there have been at least 60 relevant Congressional acts passed as stand-alones or buried in ‘defense’ and appropriations bills between 1969 and the present, including the most recent: the 2023 National Defense Authorization Act and 2023 Consolidated Appropriations Act, as reported by The Sharp Edge at Corey’s Digs, Jan. 13, 2022 - Funding the Control Grid Part 1: The Biomedical Framework.¹⁹⁹

Congressional repeal of the three laws listed above would go a long way toward eliminating the HHS Secretary’s unilateral, unreviewable biowarfare powers, starving the planned expansion of the biowarfare program of federal funding, and tearing down the immunity shields protecting DoD and HHS personnel and pharmaceutical-bioweapons dealers from accountability for the crimes.

Now that I understand the kill box construction better, there are several more laws that should be repealed by Congress and/or nullified by federal and state courts, because their invocation under the Covid-19 pretext created redundancy around the state of emergency or state of war, through which the totalitarian state has tightened its grip.

Those laws include:

- 50 USC Ch. 33, War Powers Resolution or War Powers Act. Passed by Congress in 1973 and, through the Sept. 18, 2001 Authorization for Use of Military Force (AUMF), also passed by Congress, construed as putting the United States in a permanent state of war (Global War on Terror, including bioterror) against every country in the world, with no limitations in time or geographically, with every individual man, woman and child presumptively classified as a threat, combatant and enemy target.
- 50 USC Ch. 34, National Emergencies Act. Passed by Congress in 1976 and cited in George W. Bush’s Sept. 14, 2001 Proclamation 7463, *Declaration of National Emergency by Reason of Certain Terrorist Attacks* and renewed every year since, and in Donald Trump’s March 13, 2020 Proclamation 9994, *Declaring a National Emergency Concerning the Novel Coronavirus Disease (COVID-19) Outbreak*, renewed every year since.
- 42 USC Ch. 68, Disaster Relief Act, also known as the Stafford Act. Passed in 1988, cited by Donald Trump in his March 13, 2020 Stafford Act declaration and renewed every year since.

¹⁹⁷ <https://bailiwicknewsarchives.files.wordpress.com/2023/01/jan.-2023-legal-history-american-domestic-bioterrorism-program.pdf>

¹⁹⁸ <https://bailiwicknews.substack.com/p/american-domestic-bioterrorism-program>

¹⁹⁹ <https://www.coreysdigs.com/health-science/funding-the-control-grid-part-1-the-biomedical-framework/>

These three laws supply the pretextual basis for designating all people as presumptive terrorists, insurrectionists, combatants or pre-communicable, asymptomatic, deadly disease-carriers, such that killing us can be construed as legal and in the interests of national security, for so long as Congress and courts fail to repeal or nullify them.

Repealing or nullifying these laws would remove the statutory foundation for Presidential proclamations, declarations and executive orders derived from alleged “emergency powers” transferred during war or national emergency from the People, Congress, and the courts, to the President, Health and Human Services Secretary, Secretary of Defense and other Cabinet officials and those to whom they delegate executive power.

To recap, a good Omnibus Chemical and Biological Warfare Program Repeal Act of 2023 (OCBWPRRA) would repeal:

- 50 USC Ch. 33, War Powers Resolution or War Powers Act
- 50 USC Ch. 34, National Emergencies Act
- 42 USC Ch. 68, Disaster Relief Act
- 50 USC Ch. 32, Chemical and Biological Warfare Program
- 42 USC Ch. 6A, Subchapter 2, Part B, Section 247d, Public Health Emergencies Program
- 21 USC Ch. 9, Subchapter V, Part E, Section 360bbb, Expanded access to unapproved therapies and diagnostics.

Aug. 11, 2022 - 22 worst Congressional bioterrorism authorization and funding laws passed since 1983²⁰⁰

I’m trying to think through which of the many enabling statutes passed by Congress since 1983 (the introduction of the Public Health Emergency framework) are the worst, and therefore highest priority for matching the statutes to the treasonous sponsors and ‘Aye’ voters, and also highest priority for repeal during the process of returning our Constitution-in-exile back home to America.

A chronological list of the statutes passed by Congress between 1983 and this year, that I’m currently aware of, is at the footnote.²⁰¹

I find new ones daily.

Worst 22, in my current opinion, also listed chronologically:

1. 1983 Public Health Service Act Amendment - PL 98-49
2. 1986 State Comprehensive Mental Health Services Plan Act - PL 99-660 (National Childhood Vaccine Injury Act)
3. 1997 National Defense Authorization Act for FY98 - PL 105-85
4. 1997 Food and Drug Administration Modernization Act - PL 105-115
5. 1998 Omnibus Consolidated and Emergency Supplemental Appropriations for FY1999 - PL 105-277 (Strategic National Stockpile = bioweapons mislabeled as vaccines)
6. 2000 Public Health Improvement Act - PL 106-505
7. 2001 Authorization for Use of Military Force - PL 107-40
8. 2001 Uniting and Strengthening America by Providing Appropriate Tools Required to Intercept and Obstruct Terrorism (USA PATRIOT) Act - PL 107-56
9. 2002 Public Health Security and Bioterrorism Preparedness and Response Act - PL 107-188
10. 2002 Homeland Security Act - PL 107-296

Jan 20, 2023 - Subsidiarity. Political, social and economic organizing principle that stands in opposition to centralized bio-digital totalitarianism

Thank you to the reader who posted a comment at Dual-use government officials of concern,²⁰² with a link to the Wikipedia page on Subsidiarity (Catholicism).²⁰³

That was a new word to me, and it's hard to overstate how useful it is to have been pointed to it.

I read the linked material, and when I saw references to Pope Leo XIII's 1891 encyclical On the Condition of the Working Classes²⁰⁴ (*Rerum novarum*) and Pope Pius XI's 1931 encyclical On Social Reconstruction²⁰⁵ (*Quadragesimo anno*), I trotted upstairs to the beautiful collection of my late father's Catholic books, found them both there and started reading.

*

Subsidiarity is the opposing social and economic moral principle to the globalists' nightmare vision of a biologically- and digitally-controlled central government for the whole world.

Pope Pius XI:

As history abundantly proves, it is true that on account of changed conditions many things which were done by small associations in former times cannot be done now save by large associations. Still, that most weighty principle, which cannot be set aside or changed, remains fixed and unshaken in social philosophy: **Just as it is gravely wrong to take from individuals what they can accomplish by their own initiative and industry and give it to the community, so also it is an injustice and at the same time a grave evil and disturbance of right order to assign to a greater and higher association what lesser and subordinate organizations can do. For every social activity ought of its very nature to furnish help to the members of the body social, and never destroy and absorb them.**

The supreme authority of the State ought, therefore, to let subordinate groups handle matters and concerns of lesser importance, which would otherwise dissipate its efforts greatly. Thereby the State will more freely, powerfully, and effectively do all those things that belong to it alone because it alone can do them: directing, watching, urging, restraining, as occasion requires and necessity demands. Therefore, those in power should be sure that the more perfectly a graduated order is kept among the various associations, in observance of the principle of "subsidiary function," the stronger social authority and effectiveness will be the happier and more prosperous the condition of the State.

Subsidiarity is a much better word than the word I've used up until this point: "relocalization." More on that below. Even more importantly, subsidiarity is a fully-developed social, political and economic moral philosophy that can be used to better challenge and defeat the Luciferian secularist-communist-socialist-capitalist-materialist enslavement system proposed by the deranged lunatics now gathered in Davos.

Subsidiarity can be used to build up the kinds of human societies that Our Lord Jesus Christ wants us to live in, instead.

Long-time readers may already know, but new readers probably not, that my background from 2005 to 2019 prepared me for the work I do in Covid-times.

While working professionally in law firms that handled constitutional and civil rights cases, I also worked *pro bono* on peak oil, local food, relocalization, community rights campaigns as an independent journalist and civic organizer.

Long story short, I read Richard Heinberg's *The Party's Over: Oil, War and the Fate of Industrial Society*²⁰⁶ in 2005, and found the geopolitical and historical analysis highly motivating. I wanted to be part of restoring local water, food, energy and manufacturing systems to be more resilient to fuel supply and price shocks, so that present and future generations — children, grandchildren, great-grandchildren — could not just survive but thrive.

Within a year or two, I connected with Thomas Linzey of the Community Environmental Legal Defense Fund (CELDF), which was a spin-off of Richard Grossman's Program on Corporations, Law and Democracy (POCLAD). For 15 years, I worked on several local-level community organizing campaigns aimed at confronting the legal principle of "preemption,"²⁰⁷ which is a human social, political and economic organization system in which power is centralized at higher level of authorities, by taking power from lower levels of authorities.

Preemption proved to be a major obstacle for people trying to restore local water, food, energy and manufacturing systems.

Under the preemption doctrine, articulated in the American context by Judge John F. Dillon as Dillon's Rule²⁰⁸ in 1868, municipal authority trumps individual authority, state authority trumps municipal authority, federal authority trumps state authority, and corporate authority — the power of commercial and financial organizations like the Dutch East India Company in centuries past, and Microsoft, Raytheon and Monsanto today — trump everybody else.

As Dillon put it:

"Municipal corporations owe their origin to, and derive their powers and rights wholly from, the legislature. It breathes into them the breath of life, without which they cannot exist. As it creates, so may it destroy. If it may destroy, it may abridge and control."

Community campaigns built on the POCLAD/CELDF historical analysis, were and still are a vigorous attempt to resist preemption and restore self-governing power and socio-economic sovereignty at the local and individual level, although CELDF itself has gone woke, which is sad.

In fact, throughout the millennia of human social, political and economic struggle, there have been people pushing for decentralization.

In Dillon's day, one of the leading voices was another judge, Thomas Cooley, who wrote what's become known as the Cooley Doctrine:²⁰⁹

"Local government is a matter of absolute right; and the state cannot take it away"

²⁰⁶ <https://richardheinberg.com/bookshelf/partys-over>

²⁰⁷ <https://bailiwicknewsarchives.files.wordpress.com/2020/09/9.3.19-bailiwick-news.pdf>

²⁰⁸ https://en.wikipedia.org/wiki/John_Forrest_Dillon#Dillon's_Rule

²⁰⁹ https://en.wikipedia.org/wiki/Thomas_M._Cooley#Cooley_Doctrine

I no longer find peak oil data sources to be credible,²¹⁰ because they are controlled by the same globalist institutions that have fully corrupted the academic, scientific and public health, and food and drug regulation systems. Covid-19 has revealed that capture-and-control program, and the massive structural lies underneath it, in great detail.

As a result, I no longer regard the geopolitical analysis built on peak oil evidence to be accurate.

But I still think restoring individual and local control of essential things like water, food, energy and manufacturing is a good set of goals.

Whether supply and price shocks are caused by impersonal geochemical factors (dwindling access to cheap liquid fuel oil) or by depraved men and women trying to kill most of the world's people while passing themselves off as "a select group" of heroic "extraterrestrials" saving the planet,²¹¹ the sensible response is the same.

Get the power out of the hands of the crazy people, and put it in the hands of ordinary people who are trying to work hard, live in decent homes and neighborhoods, drink clean water, eat nourishing food, raise good kids and serve God.

*

By the end of 2019, I had spent 15 years researching, writing about and working with the preemption principle — and its opposite, the clunkily-named relocalization — in the communities where I've lived. The "think globally, act locally" thing.

This is why, when governments around the world suddenly took over every aspect of every individual's daily life in March 2020, through weaponized fear and ignorance passed through ordinary family, friend and neighbor relationships — I was primed to recognize it for the preemption-based, global power grab that it was.

I recognized it, but I didn't understand the mechanisms.

I didn't understand *how* it was being done, until the Jan. 30, 2022 Todd Callender podcast,²¹² which was the crucial lead that took me into the dark caves of American statutory, regulatory, and executive/administrative history, where I've been spelunking for almost a year.

*

Covid-times exposed the preemption doctrine — the opposite of subsidiarity — imposed on a global scale.

The transnational corporate powers effectively preempted nation-state powers, using fear (psychological manipulation through centralized, captured mass media); legal mechanisms; and financial coercion.

The financial coercion piece is the second of my two 2023 research priorities:²¹³ the Covid-era purpose and observable functions of transnational institutions like the World Trade Organization, World Bank,²¹⁴ World Health Organization, International Monetary Fund, Bank for International Settlements and SWIFT (Society for Worldwide Interbank Financial Telecommunication).

See Sept. 22, 2022 Laundering with Immunity: The Control Framework – Part 1,²¹⁵ by Corey Lynn at Corey’s Digs, for an excellent overview of sovereign immunities claimed by transnational quasi- and non-governmental organizations under the US International Organizations Immunities Act of 1945,²¹⁶ which is applicable to “any international organization in which the United States participates.”

76 International organizations and banks enjoy immunities, privileges, and tax exemptions

- GAVI, Big Pharma, and CERN enjoy similar immunities
- The Bank for International Settlements has sovereign immunity and some of these immunities extend to its members, being 63 central banks and the Federal Reserve System, while other immunities extend to “systemically important institutions”
- Trillions of taxpayer dollars and printed money has moved through these organizations and banks with no transparency or accountability as they continue to build a global enslavement system
- Hundreds, if not thousands, of NGOs and corporations work with and through these organizations and banks, some of whom have agreements, NDAs, and/or immunity by extension

They do not operate above the law, they operate entirely outside of the law.

We already know a lot about how the Pfizer contracts preempt nation-state power to adopt tighter drug regulation laws, for example, and put national assets like military bases up as collateral that can be seized if legislators start to get out of line. See Sept. 14, 2022 - Biotech idolatry: DOD-Pfizer contracts have replaced federal constitutions and laws.²¹⁷ See July 9, 2022 - More on the tiered coercion cascades,²¹⁸ for a short post on smaller-scale coercion mechanisms (federal coercion of states, hospitals, schools, etc.)

The same mechanism is probably also in place to control the valid, legitimate US Government that exists underneath the invalid, illegitimate one²¹⁹ whose imposter, criminal spokesmen include Secretary of Health and Human Services Xavier Becerra and Defense Secretary Lloyd Austin.

There’s probably something in the undisclosed government-pharmaceutical contracts that incorporates BIS and SWIFT as parties, such that any government moves to stop the killing will immediately cut off access to financial systems and loans.

Support for this hypothesis comes from 2013 and 2015 reporting by French and Italian reporters — sent to me by another reader — about how central bankers working through the Bank of Italy, cut the Vatican off from credit card processing services in January 2013.

The central banking cabal thereby coerced the partial abdication of Pope Benedict XVI — announced on Feb. 11, 2013 — to pave the way for installation of Jorge Bergoglio as Pretend-Pope Francis.

Satisfied with Pope Benedict’s announcement, Vatican access to international banking was restored by the central bankers on Feb. 12, 2013.

Federal and state legislators and judges should still move forward with repealing and nullifying²²⁵ the American laws enabling fraud-based global mass murder.

They just need to understand and prepare to withstand the financial consequences.

Understanding social, political and economic subsidiarity will help.

Beautiful passage from C.S. Lewis' Mere Christianity, through Catholic.com's Morning Offering newsletter²²⁶ today:

“And let me make it quite clear that when Christians say the Christ-life is in them, they do not mean simply something mental or moral. When they speak of being ‘in Christ’ or of Christ being ‘in them’, this is not simply a way of saying that they are thinking about Christ or copying Him.

They mean that Christ is actually operating through them; that the whole mass of Christians are the physical organism through which Christ acts — that we are His fingers and muscles, the cells of His body. And perhaps that explains one or two things. It explains why this new life is spread not only by purely mental acts like belief, but by bodily acts like baptism and Holy Communion.

It is not merely the spreading of an idea; it is more like evolution—a biological or superbiological fact. There is no good trying to be more spiritual than God. God never meant man to be a purely spiritual creature. That is why He uses material things like bread and wine to put the new life into us.

We may think this rather crude and unspiritual.

God does not: He invented eating. He likes matter. He invented it.

Jan. 23, 2023 - On Trump's role and secret military-led continuity of government for purposes of swamp-draining.

Alternate take on Derek Johnson's legal research findings: there are two puppet regimes active in America right now, not just one.

Reader sent me a link to Derek Johnson's latest post:

- Jan. 22, 2023 - The Military Blueprint That Proves Donald Trump is STILL Commander-in-Chief.²²⁷ (PDF²²⁸)

I think Johnson's research is extremely useful and important.

I interpret the information differently.

I see the military law blueprint Johnson outlines and documents in excellent detail, as support for the hypothesis that neither Trump nor Biden is the current *de facto* commander-in-chief, but that the US is under *de facto* foreign occupation by the Bank for International Settlements, United Nations and World Health Organization, with two "puppet" regimes.

²²⁵ <https://bailiwicknews.substack.com/p/repost-pharmaco-military-genocide>

²²⁶ <https://www.morningoffering.com/>

²²⁷ <https://www.newstreason.com/post/derek-johnson-the-military-blueprint-that-proves-donald-trump-is-still-commander-in-chief>

²²⁸ <https://bailiwicknewsarchives.files.wordpress.com/2023/01/2023.01.22-derek-johnson-military-occupation-laws-executive-orders-trump-biden.pdf>

Trump is at the head of one of the puppet regimes, serving as a focal point for roughly half the population: those who believe there's been a US military white hat operation authorizing covert martial law to drain the DC Swamp since 2016.

Biden is at the head of the other puppet regime, serving as a focal point for those who believe there's a global public health emergency authorizing covert martial law to surveil, control and kill the American people, to respond to national security threats comprised of communicable pathogens and airborne/waterborne/foodborne toxins.

Meanwhile, all the imposter men and women embedded in American federal agencies are *de facto* loyal, not to any American president, or the US Constitution, or any American laws, regulations, executive orders, continuity of government plans or related documents, but only to the congealing one-world government.

There are hundreds of imposter, foreign occupiers working — mostly at the highest executive levels as secretaries, assistant secretaries and directors²²⁹ — in the Cabinet: departments of Agriculture, Commerce, Defense, Education, Energy, Health and Human Services, Homeland Security, Housing and Urban Development, Interior, Justice (Attorney General), Labor, State, Transportation, Treasury, and Veterans Affairs, alongside the White House Chief of Staff, the US Ambassador to the United Nations, the Director of National Intelligence, and the US Trade Representative, and heads of the Environmental Protection Agency, Office of Management and Budget, Council of Economic Advisers, Office of Science and Technology Policy, and Small Business Administration.

That's all it's taken to pull off the overthrow so far: patient work over about 100 years, to recruit, re-educate and get those treasonous, seditious people into those offices, and place their co-conspirators in the highest levels of academia, corporate industry and non-governmental organizations (ie BMGF) while training the target population — through mass media and mass education — to accept false information as truth and malevolent government intent as benign. We now know that the FDA clinical trials and drug regulation²³⁰ process has been a sham, and the vast majority of clinical investigators, regulators and trial subjects have been unwitting, non-consenting theatrical props, mobilized only to maintain the willing suspension of disbelief in the public mind.

The US government shown to the people as the Biden Administration or the Trump Administration, along with the legal frameworks I've written about in the public health-martial law context,²³¹ and Derek Johnsen writes about in the continuity of government-martial law context,²³² are also shams.

Billions of words, millions of pages, and hundreds of millions of people, shuffled around through misdirection and sleight of hand, to subordinate, distract and confuse, and to reinforce and amplify the criminal perpetrators' core messages:

“Don't think, don't question, don't struggle, don't fight back, don't resist. It's inevitable, it's overwhelming. We're in control. Just relax, sit back, calm your agitated nerves. It will all be over soon and you'll feel so much better when it is. Trust us. This is all for your own good.”

*

My focal point is the triple-threat complex of

1. Bank for International Settlements, which is the financial arm of the proposed one-world secular materialist government, working to build wrap-around digital financial control through CBDCs;
2. United Nations, the political arm of the proposed one-world government, working to erode national sovereignty and citizen loyalty to countries and constitutions, so as to transfer allegiance and submission to the UN;
3. World Health Organization, the military arm of the proposed one-world government, working to shorten life spans and reduce fertility through security “countermeasures” known as “mandatory vaccines” which are in truth, measures to counter human health, longevity, fertility, conscience, free will, and freely-willed faith in Almighty God.

²³² <https://www.newstreason.com/post/derek-johnson-the-military-blueprint-that-proves-donald-trump-is-still-commander-in-chief>

My other focus is the untapped resistance complex of Constitutionally-loyal Congress members; American state legislators and prosecutors; and federal and state judges, who can and should breach the confusion walls in their own minds and the fear walls in their own hearts to speak up, mobilize the People, and then — with the People and the Constitution — point to, expel and prosecute the foreign occupiers in the federal executive branch and the US military.

Jan. 26, 2023 - War criminals.

Starter lists first posted March 2021 and August 2022.

In March 2021, I posted My enemies list, after my year of house-arrest.²³⁵ I used linocut printmaking as part of processing my outrage, producing a guillotine linocut block and a series of prints in June 2021, posted at Nuremberg 2.0.²³⁶

In August 2022, I posted US federal crimes for which there is evidence to prosecute Covid-19 bioterrorists who occupy US government positions, and a starter list of defendants.²³⁷

Since August 2022, I've added more names to that list as I've located them in the US government record documenting US government crimes and US government pre- and during-crime coverups.

It's a work-in-progress; omissions are not intentional; the conspirators' web is complex. I'll continue to update it as my research continues, and as state and federal war crimes investigations move forward.

NOTE: The list does not include many members of Congress by name, other than Nancy Pelosi; it includes "Many, if not all - members of Congress, 1983-present." This is because tracking the bill sponsors, committee memberships, hearing transcripts, and roll call votes for the many Congressional acts passed since 1983 to enable and fund the ongoing DOD-HHS mass murder campaign is work I haven't had time to do. When the federal and state investigations get underway, that research will get done, to support the prosecution of pivotal individual Congress members.

The original post also included a starter list of laws empowering state and federal prosecutors and judges to investigate, charge and bring people to trial.

Summary list of the crimes: war crimes as defined by the 1949 Geneva Conventions, Common Article 3 (torture; cruel or inhuman treatment; performing biological experiments; murder; mutilation or maiming; intentionally causing serious bodily injury; rape; sexual assault or abuse; taking hostages; outrages upon personal dignity, in particular humiliating and degrading treatment); impersonating a federal officer; disloyalty of public office holders; rebellion or insurrection; treason (levying war against the United States or adhering to their enemies, giving them aid and comfort); sedition; advocating overthrow of US government, Constitution and laws; murder; attempted murder; conspiracy to commit murder; genocide; development and use of biological and toxin weapons, chemical weapons and

Jan. 26, 2023 - Why all the breathless finger-wagging at Pfizer?

“Breaking news,” “bombshells” and frantic analysis pieces pointing harder and harder at Pfizer are being circulated to draw public anger away from the DOD-HHS complex, and steer it to expendables.

Pfizer’s leaders and Pfizer’s employees are mass murdering criminals, for sure, and they should be investigated, prosecuted, tried, convicted and punished along with their government co-conspirators.

But Pfizer as a brand is expendable. BioNTech is expendable. Moderna, Advanced Technology International (ATI), Analytic Services Inc. (ANSER), Emergent Biosolutions, BioPort, EcoHealth Alliance...

All these front companies can be dissolved as many times as needed, and reconstituted under new corporate names as many times as needed.

The US military-public health system (DOD+HHS+DHS+DOJ+DOS...) — the infiltrated, semi-overthrown US Government — can't be rebranded once the People understand the mass murder campaign that the imposter senior executive service (SES) officials are operating from within it.

The imposter Cabinet secretaries, President Biden/Obama/Harris, the globalist central bankers pulling the strings, and the mass media are all at a crossroads together.

They can:

1. Keep the long con going — sacrificing Pfizer and other co-conspirators to the public appetite for justice if necessary — while gradually installing the one-world government systems through acts passed and funded by a Potemkin Congress²³⁸ and ratified by the silent immobility of Potemkin courts (vaxx passports, CBDCs, etc.)
2. Accelerate the implosion of the US Government and invite the one-world government officials standing by at the United Nations, into Washington DC and the rest of the country, to form a permanent caretaker government for the American failed state.
3. Submit to ejection by the legitimate US Government (the remnant of courageous, authentic, non-imposter, non-treasonous, non-seditious Congress members and federal judges); submit to prosecutions and trials; and then sit in prison watching the laborious reconstitution of legitimate sovereign government institutions from the wreckage.

They prefer Option 1.

They'll attempt Option 2 if they feel pressured by circumstances.

They're trying to avoid Option 3 at all costs.

Keep pushing.

Jan. 27, 2023 - A little more on the laser pointer/limited hangout campaign to sacrifice Pfizer-Pharma but keep the WHO-DOD-HHS death machine humming.

And a battlefield assessment of the informational-psychological war theatre.

Sage Hana has done two good posts on this topic:

- Jan. 26, 2023 - The Monster is Going to Serve up the Pharm Patsy. "Grifters Grifting Shit" Protects the Long Planned Operations Moving Forwards²³⁹ (Sage Hana)
- Jan. 27, 2023 - How the Project Veritas *bombshell* is being presented to the world. The Monster Protection Racket²⁴⁰ (Sage Hana)

John Leake, Dr. Peter McCullough's co-author, has also posted on this topic:

- Jan. 27, 2023 - Dr. Walker Pleads Normalcy of Lying²⁴¹ (John Leake)

Leake concluded:

The important point is, [Project Veritas source Jordon Trishton Walker] DOES work for Pfizer, and he stated what we all know to be true — namely, that the Bio-Pharmaceutical Complex is in the business of engineering and manipulating viruses for the purpose of developing profitable vaccines against them.

I disagree with Leake's concluding paragraph.

In my view, the truth is that DOD and Pharma are jointly "in the business" of **engineering and manipulating public fear** of viruses for the purpose of developing population control weapons falsely labeled as preventatives, treatments and management tools: bioweapon [vaxx] passports and CBDCs tied to bioweapon [vaxx] submission.

The war profiteering is just a side benefit for Pharma executives, shareholders and the public officials they bribe and extort with campaign contributions and kickbacks — given to cooperators and withheld from resisters — to maintain high levels of complicity with, and political cover for, the mass murder program.

Don't fall for the fear campaign psy-op and informational weapons being circulated by Project Veritas (probably as unwilling, unwitting participants who just want to get scoops) and spun up by other people whose words have the effect of directing public anger away from DOD/HHS/US Gov/WHO and toward expendable Big Pharma.

Pharma must be prosecuted, for sure.

But Pharma *could not* have pulled off its part of the crime without the US Gov/DOD/HHS/WHO/BIS orchestration.

On a different but related topic, a reader yesterday referred to my limited past work on organic constitution issues, politely indicating his interest in reading more coverage on that subject.

- Dec. 22, 2022 - Reinhabiting Congress and all the other government branches: local, county, state and federal²⁴⁴ (Katherine Watt)

I replied that I don't know how soon I'll be able to write more about those things.

There's so much going on right now.

And the goal is the same whether the imposter governments imposing *de facto* covert martial law on the American people and the people of the whole world were fully emplaced in 1861 (Civil War) or 2001 (AUMF and “Global War on Terror”) or 2020 (Covid and the “Global Health Security Agenda”) or some other point in time.

Regardless of when covert martial law was put in place, Covid-19 has rendered it much more visible to many more people, now, in the present moment, where living people live and work.

The goal is establishing battlefield conditions — the understanding and will of the People — so that authentic government can re-emerge, through the work of current, living members of Congress, judges and state government officials who are loyal to the founding principles and disloyal to the global central bankers.

The Luciferian central bankers need widespread cooperation to keep the global martial law program covert.

They need covert martial law — the war on living and future humanity — to keep it relatively unbloody and plausibly deniable, because as soon as it goes kinetic, once the globalists initiate door-to-door armed attacks, tanks rolling down the streets of cities and towns and bombs dropping from the skies, the fraud of “for your own good” will become irreversibly obvious to even the mildest and most cooperative of Covidians.

Odds of successfully turning the tide of battle look terrible, with nothing but a handful of good Congress members, judges, prosecutors and state legislators and governors — most of them still laying low, quietly waiting for the right moment to openly strike the blows they're capable of striking.

Theoretically, that handful of men and women has backing from a rag-tag band of discharged but legitimate, honorably-serving soldiers who have been placed on leave or kicked out of the imposter, infiltrated, illegitimate US military.

Those soldiers have been separated from the military because they actively defied unlawful orders they were given. They refused to assault their fellow officers with lethal injections. They refused to submit to suiciding-by-injection for themselves and their families.

But the low-odds view of the battlefield doesn't account for the center of gravity shift that comes from millions of ordinary people getting wise and angry enough to stop cooperating with the imposters, and start openly throwing their support behind the true, legitimate government and military, and openly identifying and naming the living people who are serving in that legitimate government and the war criminals²⁴⁵ who are not. Both of whom may be known by their fruits.²⁴⁶

The People snowball has been rolling for three years now, and it's picking up more snow and more speed and more power as it goes.

The avalanche is not getting smaller, slower and weaker with each passing day.

²⁴⁶ <https://www.drbo.org/cgi-bin/d?b=drb&bk=47&ch=7&l=16-#x>

It's getting bigger, faster and stronger.

The signals being sent to the quietly waiting handful of lawmakers, judges, prosecutors and governors is also getting stronger.

All the grieving, angry, willing flakes in that snowball — that's you and me — are giving God a lot of excellent material to work with.

Keep pushing.

And Pray the Rosary.

Jan. 27, 2023 - Orientation for new readers. Text and video links.

There is a lot of material here at Bailiwick.

If you're new, here's some orientation.

I'm not a lawyer. I'm a paralegal and writer.

I do legal research and writing to support civil and criminal cases brought in American courts, and to educate and mobilize more people to exert social and political pressure on federal and state legislators, prosecutors and judges, to terminate the interlocking control-and-cull campaigns operated under a fraudulent national emergency framework; hold accountable the US Government officials who pseudo-authorize, actually-fund, and run the programs; and set up relief programs for injured victims and survivors of the dead.

I currently work on several teams, with lawyers and many other people, on these projects.

I post sacred art with my writing because I'm Catholic, the art is beautiful, the saints are inspiring, and without the faith that my father passed down to me, I could not do this work.

If you're a new reader and want to read a few posts to get mostly caught up, please start with these:

As I've written and said recently, we're at the point where every piece of newly-collected evidence (including public, unclassified documents like this one) — and every form of denial undertaken by government and corporate officials in response to questions about the evidence gathered to date, and the implications thereof — will add completeness to the big picture of the siege war to which humanity is being subjected.

Covid-19 is a worldwide, state-sponsored contract terrorism program, fronted by a pretextual 'public health' campaign.

It is jointly conducted by:

1. infiltrators loyal to foreign and domestic enemies, posing as US government officials, primarily in the executive branch, administrative agencies and military;
2. intermediate contract management firms such as Advanced Technology International/ATI and Analytic Services Inc./ANSER;
3. pharmaceutical-weapons manufacturers such as Pfizer, BioNTech, Moderna, BioPort and Emergent BioSolutions, organized through the Medical CBRN Defense Consortium/MCDC.²⁸⁹

* * *

Jan, 30, 2023 - On harboring and financing contract terrorists. And opportunities for People, state governments and True Congress to shut the death machine down.

South Carolina, Virginia and Delaware are harboring contract terrorist organizations ANSER, ATI and Pfizer. Infiltrators within the US Department of Defense are financing contract terrorists ANSER, ATI and Pfizer, through Congressional appropriations — and are using the pharmaceutical-weapons produced by those contractors to intentionally kill people.

Together, DOD and DOD contractors are “exceeding or abusing” the authority conferred upon them by law.

There's plenty of evidence to support these assertions.

State governments (legislators, attorneys general, state treasurers and corporation commissioners) can revoke the corporate charters, through state-level legal procedures called “involuntary dissolution,” revocation or forfeiture of charter.

True Congress members — those who are loyal to the American People and the US Constitution, separate from those who are traitors loyal to the globalist central bankers — can cut off the funding and other forms of material support.

Message to state governments:

Invite ANSER, ATI and Pfizer CEOs to court, to explain to you and your state residents how mass murder and conspiracy to commit mass murder do not “exceed or abuse” conferred corporate authority, because “[Fake] DOD told us to make and distribute these weapons, the Federal Reserve printed the money to pay us, and [Fake] Congress gave the money to DOD, who gave it to us under the terms of our contracts.”

Make them say those things, in open court.

²⁸⁸ <https://mrdc.health.mil/index.cfm/resources/covid-19>

²⁸⁹ <https://www.medcbrn.org/>

Message to True Congress:

Invite ANSER, ATI and Pfizer CEOs, along with Defense Secretary Lloyd Austin, and Health and Human Services Secretary Xavier Becerra, to Congressional hearings, to explain to you and the American people, how mass murder and conspiracy to commit mass murder are lawful activities for which DOD and HHS are authorized, by Congress, to contract with nonprofit corporations chartered in American states.

Make them argue that forced submission to demonstrably toxic and deadly, mandated, fraudulently-labelled pharmaceutical-weapons — conducted without any adherence to any standard drug safety and efficacy regulations or informed consent principles — is the benevolent practice of medicine and public health.

Make them say those things, in public hearings.

Federal Terrorism Laws - harboring and providing material support

18 USC 2339 - Harboring or concealing terrorists

(a) Whoever harbors or conceals any person who he knows, or has reasonable grounds to believe, has committed, or is about to commit, an offense under section 32 (relating to destruction of aircraft or aircraft facilities), section 175 (relating to biological weapons), section 229 (relating to chemical weapons), section 831 (relating to nuclear materials), paragraph (2) or (3) of section 844(f) (relating to arson and bombing of government property risking or causing injury or death), section 1366(a) (relating to the destruction of an energy facility), section 2280 (relating to violence against maritime navigation), section 2332a (relating to weapons of mass destruction), or section 2332b (relating to acts of terrorism transcending national boundaries) of this title...shall be fined under this title or imprisoned not more than ten years, or both.

18 USC 2339A - Providing material support to terrorists

(a) Offense.— Whoever provides material support or resources or conceals or disguises the nature, location, source, or ownership of material support or resources, knowing or intending that they are to be used in preparation for, or in carrying out, a violation of [terrorism crimes listed in] section 32, 37, 81, 175, 229, 351, 831, 842(m) or (n), 844(f) or (i), 930(c), 956, 1091, 1114, 1116, 1203, 1361, 1362, 1363, 1366, 1751, 1992, 2155, 2156, 2280, 2281, 2332, 2332a, 2332b, 2332f, 2340A, or 2442 of this title [Title 18, Crimes and Criminal Procedure] ... or in preparation for, or in carrying out, the concealment of an escape from the commission of any such violation, or attempts or conspires to do such an act, shall be fined under this title, imprisoned not more than 15 years, or both, and, if the death of any person results, shall be imprisoned for any term of years or for life. A violation of this section may be prosecuted in any Federal judicial district in which the underlying offense was committed, or in any other Federal judicial district as provided by law.

(b) Definitions.—As used in this section— (1) the term “material support or resources” means any property, tangible or intangible, or service, including currency or monetary instruments or financial securities, financial services, lodging, training, expert advice or assistance, safehouses, false documentation or identification, communications equipment, facilities, weapons, lethal substances, explosives, personnel (1 or more individuals who may be or include oneself), and transportation, except medicine or religious materials; (2) the term “training” means instruction or teaching designed to impart a specific skill, as opposed to general knowledge; and (3) the term “expert advice or assistance” means advice or assistance derived from scientific, technical or other specialized knowledge.

State Corporate Charter Laws

South Carolina - SC 33-31-1430.²⁹⁰ Grounds for judicial dissolution.

- (a) The court of common pleas may dissolve a corporation:
- (1) in a proceeding by the Attorney General if it is established that:
 - (i) the corporation obtained its articles of incorporation through fraud;

²⁹⁰ <https://law.justia.com/codes/south-carolina/2013/title-33/chapter-31/section-33-31-1430>

- (ii) the corporation has continued to **exceed or abuse the authority** conferred upon it by law;
- (iii) the corporation is a public benefit corporation and the assets are being misapplied or wasted;
- (iv) the corporation is a public benefit corporation and it is no longer able to carry out its purposes;
- (v) the corporation has improperly solicited money or has fraudulently used the money solicited; or
- (vi) has carried on, conducted, or transacted its business or affairs in a persistently fraudulent or illegal manner.

Virginia - §13.1-915.²⁹¹ Involuntary termination of corporate existence.

The corporate existence of a corporation may be terminated involuntarily by order of the [Corporations] Commission when it finds that the corporation (i) has continued to **exceed or abuse the authority** conferred upon it by law...

Delaware - 8 DE Code § 284²⁹² - Revocation or forfeiture of charter

(a) The Court of Chancery shall have jurisdiction to revoke or forfeit the charter of any corporation for **abuse, misuse or nonuse of its corporate powers**, privileges or franchises. The Attorney General shall, upon the Attorney General's own motion or upon the relation of a proper party, proceed for this purpose by complaint in the county in which the registered office of the corporation is located.

Pfizer-BioNTech pharmaceutical-weapons contracts

Related to ongoing efforts to embolden members of True Congress to speak truth publicly, a colleague has been looking at two publicly available Pfizer contracts that form the basis for Brook Jackson's still-active False Claims Act case.²⁹³

- July 20, 2020 - ATI-Pfizer-MCDC Base Agreement²⁹⁴ (55 pages)
- July 21, 2020 - ATI-Pfizer-MCDC Technical Direction Letter²⁹⁵ (35 pages)

I first became aware of the 55-page Base Agreement, and its significance, after Pfizer attached it to their April 22, 2022 Motion to Dismiss.²⁹⁶

I read the Motion to Dismiss in late May 2022 and was then able to connect the dots from the demonstration project, prototype, no-clinical-trials-required language, to the PREP Act and the rest of the pharmaceutical-weapons control and kill program.

There's a third contract that goes with the Base Agreement and Technical Direction Letter, to make a three-part package. (There may be more than three parts to the package, but there are at least three.)

The third contract type is called a "Project Agreement." That third contract is why Pfizer is referred to as the "Project Agreement Holder" or PAH in the Base Agreement. *See* p. 9 of the 55-page Base Agreement.

Neither Sasha Latypova nor I have found or seen the Project Agreement yet.

I speculate that there's much more meat in that contract, and that access to it is very tightly controlled by Department of Defense and the Medical CBRN Defense Consortium (MCDC).

Analysis

ANSER, ATI and Pfizer are business corporations.

They’re incorporated under the laws of the states that hold their corporate charters.

The People of South Carolina, Virginia and Delaware can demand that their own state governments exercise their involuntary dissolution powers to strip the corporate charters from ANSER, ATI and Pfizer.

The People and governments of the other 47 states can demand, by legal notice, that South Carolina, Virginia and Delaware exercise their involuntary dissolution powers to strip the corporate charters from ANSER, ATI and Pfizer, or, in the alternative, prepare to face criminal prosecution — at the hands of the 47 other states — for harboring terrorists in violation of 18 USC 2339.

The People and governments of all 50 states can demand, by legal notice to Congress, that Congress cease and desist financing the contract terrorist organizations doing business as ANSER, ATI and Pfizer, or, in the alternative, prepare to face criminal prosecution — at the hands of the 50 states — for providing material support to terrorists in violation of 18 USC 2339A.

Such state actions can make the contractual relationships and terrorist activities of these state-sponsored contract terrorists more visible to more people, and also advance the process of identifying and isolating the imposter DOD, HHS and other officials who signed the terrorism contracts, as prelude to excising those individuals from the legitimate parts of the US government and prosecuting them for war crimes.³⁰⁸

And yes, the same model can be used by all the states, to shut down all the hundreds of other contractors and subcontractors³⁰⁹ — and American branches of foreign corporations, and NGOs, and academic institutions — and open a legal path to prosecution for all the war criminals who are conducting contract terrorism as cogs in the Covid-19 death machine.

Will the People, the states and True Congress step up?

I don't know.

Keep pushing. Keep praying.

Jan. 31, 2023 Smoke and mirrors. And my views on who's running the whole global operation from deepest, darkest backstage.

Reader comment

Are you aware of this document from the United States Government Accountability Office, dated January 2022: COVID19: HHS and DOD Transitioned Vaccine Responsibilities to HHS, but Need to Address Outstanding Issues?³¹³

Basically, it says what was originally called "Operation Warp Speed" was renamed to HHS-DOD COVID-19 Countermeasures Acceleration Group (CAG).

The document says:

"According to HHS and DOD officials, the CAG dissolved and transitioned its responsibilities—including DOD-led vaccine activities—to HHS by December 31, 2021, as required by an April 2021 memorandum of understanding between the two departments...While HHS and DOD officials said they achieved transition milestones indicating that HHS is ready to assume responsibilities formerly led by DOD, it is unclear how HHS will address its workforce needs now that the CAG has dissolved..."

Are you aware of this alleged transition of power/responsibility? Do you concur it happened? And what does this mean to your theory of the case? I have just started to track and digest what you and Sasha Latypova have been presenting, but if your understanding includes the transition that allegedly took place 13 months ago, I didn't catch that point.

My reply, revised and expanded

My understanding is that DOD and HHS are merged, along with Department of Justice, Department of State, Treasury Department, Commerce Department, and most other federal agencies, into a single Monster that goes by many different names: Deep State, Administrative State, etc.

So yes, I'm aware of the Countermeasures Acceleration Group and reports like the GAO one you linked, although I don't think I'd seen that specific one; there are hundreds of reports, coordinating committees, and memoranda of agreement between and among agencies and departments and committees.

I see such reports and MOUs as evidence that the public-facing front agency is shifted from time to time, from DOD to HHS, from HHS to DOD, from HHS to DHS, from FEMA to BARDA to DARPA to NIAID to NIH to CDC to FDA and all around the mulberry bush.

But because they're all just fronts for the operation, where it's publicly housed at any given moment doesn't matter as much as who is doing the public transfers and re-transfers, which is the permanent, private or public-private partnership administrative state coordinating committee — Public Health Emergency Medical Countermeasures Enterprise³¹⁴ and other similar committees — working on behalf of the Bank for International Settlements (financial war machine) and the World Health Organization (military war machine humming along behind the false front of 'global public health').

The constant shape-shifting, smoke-and-mirrors act serves at least two purposes.

For those who aren't paying close attention, it gives the appearance that someone or some group of credible, authorized public officials is "in charge," and therefore the People can remain compliant and confident in the policies and programs as presented.

For those who are paying close attention — like the Government Accountability Office/GAO staff and independent researchers like me — it occupies enormous amounts of time to follow and interpret the flashing light explosions in the foreground of the show — the paper trails, legal citations and so forth.

³¹³ <https://www.gao.gov/assets/720/718566.pdf>

³¹⁴ <https://bailiwicknews.substack.com/p/public-health-emergency-medical-countermeasures>

Keeping us incessantly occupied with flash-bangs and front-men makes it very difficult to see behind them, into the dark background where the actual operators are at work, running the lights and the smoke machines and the rest of the theatrical performance to engage in and simultaneously cover up global mass murder, mass theft and mass enslavement, and forestall legal and political impediments.

*

A week or so ago on another comment thread, discussion turned as it so often does to “Which men and women, precisely, are at the very head of this global crime syndicate?”

My view is that all the smaller semi-secret organizations — British Pilgrims Society, Muslim Brotherhood, Freemasons, Rothschild-Rockefeller cabal, Zionists, Illuminati, Mossad, Jesuits, SERCO, British Crown, Kabbalism, Orsini Black Nobility, Bilderbergs, Trilateral Commission, Council on Foreign Relations, socialists, communists, etc. — are just brands or flavors of the single underlying Luciferian enterprise.

It needs to present different faces to different groups to elicit cooperation among some people, and conflicts among others.

I think that's what drives people that yell "It's all the British Pilgrims Society [you sheeple morons]!!!" or whichever society they've done the most research into.

These semi-secret societies are many faces of the same Liar telling the same core lie: that God is something other than Who and What He is.

*

It's the same structure of flashing lights and loud bangs in the foreground, puppet-masters carrying on undisturbed in the dark, quiet background, that's been rendered somewhat more visible through the Covid-19 exposure.

Covid-19 undarkened a window and revealed the Supergroup US Department of Defense-Health-Homeland Security-Justice-State-Treasury-Commerce-Education false front on the American branch of the global bioterrorism program.

Reflecting on this a bit more this morning, I think the work of these many secret societies is probably high-level coordinated on the earthly plane, by dead-soul men, and a few women, who began meeting annually in semi-public at the Bilderberg Hotel in Oosterbeek, Netherlands in 1954. *See* The Bilderberg Conferences: A Transnational Informal Governance Network³¹⁵ (Aleksander Miłosz Zieliński, Sept. 2017).

For related information about the Bank for International Settlements, headquartered in Basel, Switzerland, see Tower of Basel³¹⁶ (Adam Lebor, 2014).

Tower of Basel *precis*:

The world's most exclusive club meets every other month at 7 pm on Sunday evening in a circular tower block whose tinted windows overlook Basel railway station. Its members include some of the most powerful men in the world. They are central bankers, who have come to Switzerland to attend the Economic Consultative Committee of the Bank for International Settlements, the bank for central banks.

Set up in 1930 by an international treaty, the BIS and its assets are legally inviolable. The Swiss authorities have no jurisdiction over the bank or its premises. The BIS has just 140 customers but made tax-free profits of \$1.17 billion in 2011-12.

Under Thomas McKittrick, the bank's American president, the BIS continued operating throughout the Second World War. The BIS accepted looted Nazi gold, conducted foreign exchange deals for the Reichsbank and was used by both the Allies and the Axis powers as a secret contact point to keep the channels of international finance open.

³¹⁵ https://www.researchgate.net/publication/327403042_The_Bilderberg_Conferences_as_Transnational_Informal_Governance_Network_TIGN-Part_I

³¹⁶ https://www.adamlebor.com/books/tower_of_basel/

After 1945 the BIS “behind the scenes” for decades provided the necessary technical and administrative support for the trans-European currency project, from the first attempts to harmonize exchange rates in the late 1940s to the launch of the Euro in 2002.

The bank is now at the centre of efforts to build a new global financial and regulatory architecture. Yet despite its central role in the history of the last century and during the current crisis, the BIS remains largely unknown - until now.

Tower of Basel is the first unauthorised investigative history of the world's most influential global financial institution. Based on extensive archival research in Switzerland, Britain and the United States, and in-depth interviews with key decision makers including Paul Volcker, the former chairman of the US Federal Reserve, Mervyn King, governor of the Bank of England and former senior BIS managers and officials, Tower of Basel tells the story of the secretive institution at the heart of the global banking network: the central bankers' own bank.

Bilderberg and BIS meetings are “informal,” and “off-the-record.”

So none of the participants’ fingerprints and paper trails need ever appear in the public or private records. They can simply speak to each other, and then return to their various political, financial, academic, industrial and technological perches around the world, and delegate using the power of the purse-strings, debt-enslavement, and currency exchange systems.

I don’t think the Bilderberg and BIS men bother themselves much about the details of *how* WHO, World Economic Forum, World Bank, and International Monetary Fund, World Trade Organization and the US Mega-Administrative-Agency carry out the chaos-seeding and behavioral control programs.

Because the thing about Lucifer’s multi-millennial project — chaos as a world domination method — is that it’s far easier to destabilize and destroy and kill than to sustain and grow life.

It’s hard work building and sustaining civilizations, nations, legal systems, currencies, food and energy supplies, families and daily personal commitments to perfecting virtues in the service of God.

It’s relatively easy to foment internal conflicts, break things, knock out load-bearing pillars, tempt to sin, and kill. Stable countries...stable families and neighborhoods...steady practice of piety and charity — efforts to build Christendom at every scale — are the things that keep humans functional and often allow for us to thrive. Guiding madmen to destruction of self and others is easy, and that’s why it’s Lucifer’s go-to.

Orderly Creation is hard, and only God can do it.

Jan. 31, 2023 - August 2020 - Elizabeth Sadove presentation to FDA-CDC: Regulatory Updates on Use of Medical Countermeasures.

Longtime Bailiwick readers will understand right away how the slide deck, especially the slide below, fit into the criminal intent evidentiary package. New readers will understand after you get oriented.³¹⁷

For those confused about “right to refuse” to submit to EUA products, the [Potemkin] US government construes this³¹⁸ as meaning military targets, known as “volunteers” in the table below, of the mRNA class of pharmaceutical-weapons, known as Covid-19 vaccines, must be told that they have a “right” to refuse, and that refusal may carry penalties such as loss of employment, military position, educational opportunity, or other *de facto* revocable privileges.

The government construes these information exchanges between conscripted military/public health personnel (nurses, pharmacists, doctors) and targeted individuals (people injected with mRNA/LNP slurries) as non-coercive.

- Aug. 25-28, 2020 - FDA-CDC Joint Learning Session: Regulatory Updates on Use of Medical Countermeasures.³¹⁹ (Elizabeth Sadove, Director, Medical Countermeasure Regulatory Policy, Office of Counterterrorism and Emerging Threats, Office of Chief Scientist, Food and Drug Administration)

Update - Comment I posted to Maryann Demasi’s report Is the FDA “doubling down” on a failed strategy?³²⁰

In August 2020, FDA and CDC agents already knew that they were never going to need to collect, review, discuss, base decisions on, or produce efficacy or safety data for EUA products; that the EUA product program was “not likely” to produce useful information to benefit future patients; and that there would be “no systematic data collection” although “retrospectives studies may be conducted and published.” See table on p. 18 of the 22-page slide deck.

Comparison of Access Mechanisms

Consideration	Clinical Trial	Expanded Access (IND/IDE)	EUA
Ability to inform effectiveness	Yes – designed to provide evidence of safety and effectiveness	Not likely; possibly anecdotal information with larger population size	Not likely
Ability to inform safety	Yes – designed to provide evidence of safety and effectiveness	Safety signals might be identified	Safety signals might be identified
Ability to obtain useful information to benefit future patients	Yes - designed and intended to benefit future patients – randomized/blinded	Not likely; with larger sized populations, possibly some safety data in patient subgroups that could inform broader labeling	Not likely
Availability of findings	Eventually published in medical journals. If part of a regulatory approval, FDA makes reviews public.	Individual medical records are not released to the general public. Case reports might be published in medical journals.	Generally there is no systematic data collection. Retrospectives studies may be conducted and published.
Informed consent required?	Yes	Yes	No, but requires informing the volunteer of 1) right to refuse and 2) that product is unapproved/available under an EUA
Institutional review board (IRB) required?	Yes	Yes, but no prior approval needed for individual patient access	No
Level of access to investigational product	Depends on trial design P1 typically 20 – 100 P2 typically several 100 P3 typically 300 – 3,000	Depends on type of expanded access, which ranges from individual patient (e-IND/IDE) to large (e.g., 100-1,000) populations	Can enable access to a large number of patients

Feb. 1, 2023 - Draft Freedom of Information Act (FOIA) requests to DOD and HHS. And brief comment about high-profile lawyers and diversionary plants etc. in the 'medical freedom movement.'

Prepared for a FOIA coordination call today:

1. Signed, dated ATI-DOD-Pfizer "Project Agreement" contract, under 10 USC 4022 (previously 10 USC 2371b) and MCDC Other Transaction Agreement (OTA) No. W15QKN-16-9-1002, defined at p. 9 of July 20, 2020 Base Agreement,³²¹ under which Pfizer is the Project Agreement Holder ("PAH").

2. Signed, dated documents recording the dates on which President Trump and/or President Biden invoked or extended suspension, under 50 USC 1515, of all prohibitions on DOD testing, use, stockpiling and transport of chemical and biological weapons and delivery systems, and/or suspended all Congressional, international, state, local and other notice and reporting provisions under 50 USC 1512, 50 USC 1512a, 50 USC 1513, 50 USC 1518; 50 USC 1520a, 50 USC 1523, and 50 USC 1528.³²²

3. Signed, dated documents recording dates on which President Trump and/or President Biden waived, and/or extended waiver of, informed consent for military personnel under 10 USC 1107a(a).

Seven Holy Founders of the Servite Order. Painting by Agostino Massucci

4. Signed, dated copies of reports to Congress, prepared and submitted by DOD and HHS, under 50 USC 1512, 50 USC 1513, 50 USC 1518, 50 USC 1523, and 50 USC 1528, and/or any other applicable Congressional notice and/or reporting law, quantifying the mortality and morbidity data collected from any and all government databases (VAERS, V-Safe, VA, DMED, Medicare, Medicaid etc), contract manufacturer and subcontractor databases (ATI, Pfizer, Moderna, Ventavia, ICON, etc.), and private health insurance databases (Kaiser, Blue Cross, etc.), assessing the effectiveness of the mRNA/LNP class of bioweapons for incapacitating, sterilizing and killing adults and children, from the start of the events known as "Covid-19 vaccine clinical trials" in Spring 2020 to the present.

³²² <https://www.law.cornell.edu/uscode/text/50/chapter-32>

DOD and HHS will likely reject these requests on national security grounds, because it's a military campaign, so data about military weapons and their demonstrated effectiveness is probably classified as non-available outside of a very small Congressional oversight committee, assuming there's even a small group of Congress members kept in the loop. Which there may not be.

Or they'll say no such records exist, because there's no statutory requirement that DOD or HHS collect, collate and deliver reports about chemical and biological weapons development, transport, use and effectiveness, to Congress or anyone else.

Rejections and denials are still useful for exposing the globalist killing program to the public; and for mobilizing True Congress³²³ and state, local and tribal governments to stop complying with unlawful military orders as part of an illegal war, seize the stockpiled mRNA/LNP vials from interstate commerce, pharmacies and clinics as evidence, and prosecute the war criminals.

*

I occasionally field comments and emails asking me if I'm working with high-profile Covid-19 lawyers and if not, why not?

First, I'm working closely with lower-profile lawyers and other people, on several projects built on the evidence base for the **US Government-sponsored global contract terrorism program** that I research and write about.

Second, I'm willing to work with the high-profile lawyers and have been introduced to many of them on email threads. To date, they have not demonstrated any interest in publicly pursuing cases challenging US government-sponsored, government-operated, 'public-health'-predicated domestic and international terrorism; chemical and biological warfare programs; treason; sedition; war crimes; genocide; mass murder; and mass torture.

I speculate privately about why they aren't talking about these issues and developing cases, and whether they're developing cases without communicating publicly about those cases, which is an entirely appropriate way for them to plan and handle their legal work. Readers can speculate too, but without asking those lawyers and getting public responses, the reasons are known only to the lawyers themselves.

I don't chase people and shove this information at them. I make it available to people who are looking for it: people who want to better understand what's happening and why, talk about it and use it in their own efforts to build public understanding, terminate the contract terrorism programs and prosecute the war criminals: top-tier, middle-tier and low-level war criminals.

I also field comments and emails warning me about other people who work with much the same evidence and information, but who carefully direct public attention and anger away from the DOD-HHS complex and the Bank for International Settlements-World Health Organization complex that sits above it, and focus public attention and anger exclusively on other, mid- and low-level members of the global crime syndicate.

These comments and emails speculate that individuals have been planted — perhaps years ago — and are currently controlled, by the globalist central banker Monster, to lead the public along the paths where the Monster wants the public to stay, and away from the forbidden terrain that the Monster wants to protect.

I'm aware of the existence and work of these plants and I occasionally write about their work without reference to their potential paymasters and handlers.

I think spending time and energy engaging in debates or confrontations with them, direct or by proxy, only serves the diversionary interests of the killers working from inside BIS, WHO and the infiltrated, false-front US federal government.

³²³ <https://bailiwicknews.substack.com/p/dual-use-government-officials-of>

I try to stay focused on exposing the men and mechanisms at the top of the hierarchy, and on helping clear cognitive paths for state and federal lawmakers, judges and prosecutors to work with the People to stop the crime spree and bring the ringleaders to justice.

Postlude: Advice for office holders, including military and law enforcement who have taken oaths to defend the US Constitution

When asked by LifeSiteNews if she had any suggestions for office holders, including members of the military, who have taken an oath to “defend the Constitution of the United States against all enemies, foreign and domestic,” Watt advised:

Construe the secretaries of federal cabinet agencies and US Presidents as ‘enemies, foreign and domestic,’ openly defy their unlawful orders (including every executive order, declaration, determination, proclamation and classified directive), and talk about why you’re doing what you’re doing.

The rank-and-file soldiers who have been defying unlawful orders to take the shots have been showing the rest of the military and law enforcement the way to handle this for two years now already.

For the Congress members, especially in the House, they can start introducing bills to repeal the unconstitutional laws and dismantle the federal agencies, including the Federal Reserve; they can file federal cases asking federal judges to nullify unconstitutional laws; they can revoke funding for all of the CBRN terrorism programs being run through DoD, HHS and DHS under the ‘Global Health Security Agenda’ pretense; and they can clarify and highlight that the states have power, under the federal constitution, to operate their own financial systems, including state banks and state bullion depositories.

The expression that I use – which I think is very accurate – is we are talking about a technology that, combined with other systems, can turn your home, your car, and your community into a digital concentration camp. We are talking about the end of human freedom centrally controlled through the financial system. Feb. 3, 2022 - Recap of Jackson v. Pfizer, whistleblower Brook Jackson's False Claims Act case.

*Reader comment on yesterday's post.*³³²

I watched the video below earlier today.

- Whistleblower Brook Jackson + Attorneys Warner Mendenhall & Robert Barnes,³³³ Vaccine Safety Research Foundation, Feb. 2, 2023)

During this interview, both of Brook's attorneys talked about FDA's behavior as if there was no explanation for why they've allowed all this fraud and criminal activity to happen. They just said it was like FDA was inexplicably trusting Pfizer to do the right thing or something. They never mentioned anything at all in terms of what you and Sasha have discovered about how BARDA is the real agency in charge of regulating the cv injections, nor did they ever mention OWS, DOD, HHS or any other government agency with regard to accountability for the crimes being committed. They only talked about Pfizer being the culprit behind all the injury and death being perpetrated, and how it's such a David and Goliath battle against this behemoth, but they're going to do their darnedest to hold them to account for financial damages.

I'm curious if you've been in touch with these attorneys at all, or if you know if they're aware of the research on which you and Sasha have been collaborating and sharing?

Also, I remember hearing Sasha say that during initial proceedings in Brook's case it was DOJ attorneys who were arguing for the opposing side in court — not Pfizer attorneys. However neither Barnes nor Mendenhall ever made any reference to this. They just talked about how Pfizer has 100s of lawyers on their payroll so it's going to be an uphill battle.

Just wondering if you have any ideas about any of this?

*

NOTE: I only watched about half of the discussion about Jackson's case in the linked video, (starts at 19:00), until the audience question portion started at about 45:00. I limit my video-watching to conserve my time and attention

My reply to the reader question above

I'm in touch with those individuals and they know about the evidence and legal analysis that Brook Jackson, Sasha Latypova and I have assembled.

Jackson does talk about it publicly.

The attorneys' reasons for not discussing it publicly are unknown to me.

The case that Robert Barnes is handling for Jackson is a False Claims Act case, filed under the *qui tam* provision, which can be used in a situation in which a private citizen (in this case Jackson) serves as a whistleblower, reporting her observations of fraud committed by a contractor against the US Government, to the Department of Justice. Jackson reported her observations first to Ventavia, Pfizer and FDA in Sept. 2020, and then — after she got fired — reported the information to DOJ in or before December 2020.

In a *qui tam* case, the whistleblower — called the “Relator” — provides the evidence, but the DOJ is the primary litigant against the defendants, in this case Ventavia, Pfizer and ICON, because the government is (traditionally) the party being defrauded.

In this case, we now know, the infiltrators in all of the administrative agencies of the US Government — including FDA performers portraying drug regulators — are leading the American branch of the global criminal conspiracy to commit fraud on the public, to carry out a global mass murder campaign disguised as a ‘public health’ campaign.

*

The first federal complaint filed in Jackson's case was filed in January 2021, by DOJ attorneys pretending to act on behalf of Jackson and the US Government, against Pfizer, Ventavia and ICON.

- 2021.01.08 Brook Jackson Original Complaint³³⁴

The case was immediately sealed by the court, and Jackson was put under a gag order. Throughout 2021, treasonous DOJ infiltrators pretended to investigate her claims, but actually did nothing. They just sat on the case and watched millions of people sicken and drop dead, because the Attorney General (William Barr until December 2020, Merrick Garland since March 2021) and other DOJ attorneys are active criminal co-conspirators in the mass murder program.

In November 2021, when the killers pseudo-authorized lethal attacks on children using the injectable mRNA/LNP slurries, Jackson violated the gag order and gave an interview, published in the *British Medical Journal* Nov. 2, 2021.

- 2021.11.02 BMJ Paul Thacker Brook Jackson Ventavia³³⁵

In January 2022, the DOJ finally notified the federal judge that the US Government had no interest in pursuing the case against any of the defendants further.

- 2022.01.18 US Gov DOJ declines to intervene³³⁶

Once the DOJ stepped out of the case, Jackson had the option to hire a private attorney and pursue the case herself, which she did. She hired Barnes.

- 2022.02.22 Brook Jackson Amended Complaint³³⁸

Pfizer filed a Motion to Dismiss on April 22, 2022, arguing that no fraud occurred and no fraud could ever have occurred, because none of the US Government DOD contracts ever required valid clinical trials or evidence of safety or efficacy as a condition for payment.

On Oct. 4, 2022, US Government stepped into the case again — this time *taking Pfizer's side* in the dispute, concurring with Pfizer that there was never any fraud to prosecute, because Pfizer was never obligated to conduct valid clinical trials in order to receive payment for the manufactured bioweapons that they refer to as ‘vaccines.’

- 2022.10.04 US Gov Statement of Interest in support MtD³⁴²

I corresponded with and spoke to Jackson and her attorneys during October 2022. I emailed and spoke directly with Mendenhall, and my understanding was that he was forwarding the information to Barnes and discussing it with the rest of the legal team during their litigation strategy sessions. I have never spoken directly with Barnes.

I provided the material Sasha and I had collected about the DOD bioweapons program to Mendenhall, and urged him and the other attorneys to incorporate the information into their Oct. 27, 2022 response to the US Government's re-entry into the case.

I also published several posts about the significance of Other Transactions Authority as Pfizer's basis for its Motion to Dismiss, including:

- Oct. 19, 2022 - Other Transaction Authority (OTA) is to federal procurement contract regulation as Emergency Use Authorization (EUA) is to federal drug safety regulation. They're both provisions through which Congress and US presidents pretended to legalize criminal conspiracy to produce and use weapons of mass destruction.

The attorneys declined to use the material or pursue the legal strategies suggested.

- 2022.10.27 Jackson response to US Gov³⁴³

They did leave themselves some openings to begin to move in that direction later, as I wrote in my analysis of their Oct. 27 filing:

- Oct. 28, 2022 - Jackson v. Pfizer, Ventavia, Icon: Barnes legal team response filed Oct. 27.

...I think it's good that they mentioned the criminal issues.

I think it's good that they framed the fraud-in-inducement argument in terms of “potential” influence of faked clinical data on FDA decisions. Focusing on the word “potential” was a sidelong way of getting at the fact that

there was no actual, material or causal influence for the clinical trials on FDA decisions, because the FDA's decisions were controlled by the Department of Defense from long before the trials even began.

I think it's good that Jackson's team emphasized the evidence from other trial sites that corroborate what she found in September 2020 at the Texas sites where she worked.

Jackson's team generously construed the Department of Justice's year-long case review/investigation process (January 2021 to January 2022) as evidence of DOJ's view that her claims were well-founded from the start. In truth, it was a DOJ stalling tactic to cover up DOD/HHS/FDA crimes while the crimes carried on. DOJ investigated nothing during those 12 months, because DOJ officials and the Attorney General were and are co-conspirators in the criminal mass murder campaign.

As of February 2023, the judge has not yet ruled on the Motion to Dismiss, but has granted Pfizer's request for a 90-day extension for discovery, which is now scheduled to start on March 15, 2023.³⁴⁴

My understanding, from listening to Robert Barnes' comments in the Feb. 2, 2023 video at about 30:00-34:00,³⁴⁵ is that he interprets the US Government's Oct. 4, 2022 Statement of Interest Supporting Dismissal very differently from how I interpret it.

Barnes — at least in this public appearance — interprets the US Government argument as: "We're trusting Pfizer here."

Barnes also mentioned a Congressional bill to close the "little loophole" as to "materiality" of clinical trials and data for routine FDA regulation of medicinal products and consumer safety.

I disagree with Barnes.

I think the US Government explicitly endorsed Pfizer's April 22, 2022 argument that valid clinical trials and valid evidence of safety and efficacy were never required under the DOD contracts.

I think the US Government officials and Pfizer contractors running the bioterrorism program knew then — and still know now — that the FDA-regulated "clinical trials" and data were fraudulent; that the 'prototypes' under production were and still are a class of bioweapons intended to harm and kill targets; and that clinical trial evidence of safety and efficacy was not then, and is not now, material or necessary to FDA's sham 'review' process or to the US Government's decision to pay Pfizer for goods and services rendered and deploy the weapons on target populations.

I think the US Government position is made very clear in its October 2022 statement. Alongside corporate partner Pfizer, the infiltrators in the US Government would both like Brook Jackson's False Claims Act case to be dismissed so that the contract bioterrorism program can continue and expand without delay, legal impediment or loss of funding.

Feb. 6, 2023 - Wyoming state lawmakers standing up. More of this, please.

Two weeks ago, a group of Wyoming legislators led by Rep. Jeanette Ward sponsored House Bill 143 - Health mandates - CDC and WHO jurisdiction in Wyoming.³⁴⁶

The proposed new state law is concise and clear:

A BILL for AN ACT relating to public health and safety; prohibiting health mandates and requirements by specified federal and nongovernmental health organizations as specified; and providing for an effective date.

Be It Enacted by the Legislature of the State of Wyoming:

Section 1. W.S. 35-4-1001 is created to read:

ARTICLE 10 - PROHIBITED HEALTH ORGANIZATIONS

35-4-1001. Consideration and compliance with specified health organizations; limitations.

The United States Centers for Disease Control and Prevention and the World Health Organization shall have no jurisdiction in Wyoming and any requirements, mandates, recommendations, instructions or guidance provided by either organization shall not be used in this state to justify any mask, vaccine or medical testing requirements and shall have no force or effect in Wyoming.

Section 2. This act is effective July 1, 2023.

*

³⁴⁶ <https://wyoleg.gov/Legislation/2023/HB0143>

Sponsors in the Wyoming House of Representatives include Jeanette Ward, Bill Allemand, Jeremy Haroldson, Mark Jennings, Tony Locke, Ken Pendergraft, Allen Slagle and Tomi Stroock.

Sponsors in the Senate include Lynn Hutchings and Bob Ide.

HB-143 was introduced Jan. 16, 2023.

On Feb. 3, 2023, it passed out of the Labor Committee by a 5-4 vote.

It's scheduled for a floor session today: Feb. 6, 2023.

HB-143 is not yet passed by the full Wyoming House and Senate, and even if passed, it could be vetoed by the governor.

But it's a good sign that it got introduced at all and voted out of committee so quickly.

This sort of public naming of, and resistance to, the globalists' violent, attempted world takeover can and should be done in all 50 states, by all 50 state legislatures.

It should be done all over the world, to make the globalist Monsters take off their 'public health' velvet gloves and openly show us their iron bioterrorist fists.

*

Wyoming lawmakers have put together a good state law that not only blocks the criminals operating from the bowels of the American CDC, but also blocks the puppet-masters in the transnational criminal network: the World Health Organization. The law protects and defends Wyoming's state borders from domestic and foreign enemies, and protects the people and commerce of Wyoming from masking, testing, and the class of bioweapons fraudulently labeled as 'vaccines.'

There are probably similar bills already introduced in other states; this one just happened to show up in my Gab feed last night.

Some commenters at the Gab post scoffed at the Wyoming move, saying that CDC and WHO non-jurisdiction over American citizens, territories, businesses and resources should be the "default" position; it shouldn't require codification into law.

Fair enough. It shouldn't, and it wouldn't require codification if we weren't living in crazy-times, when CDC and WHO *are* overriding national, state and individual sovereignty; when they are killing us off with injectable bioweapons and other poisonings; when they are orchestrating financial collapses, famines and wars and many other mass murder programs; and when they are daily, actively working to expand their level of global totalitarian control.³⁴⁷

We're living in crazy-times.

That makes it necessary to set, re-set, enforce and re-enforce moral, legal and physical boundaries with exceptional clarity, strength and repetition.

For more of the state and local laws the globalists hate — which is the best reason for state and local governments to introduce them and pass them with great enthusiasm and speed:

- Oct. 2022 - State Laws Limiting Public Health Protections: Hazardous for Our Health.³⁴⁸ Network for Public Health Law.

Translation tips: 'public health' is 'State-run contract bioterrorism.'

³⁴⁷ <https://jamesroguski.substack.com/p/dont-fall-for-the-decoy>

³⁴⁸ <https://www.networkforphl.org/wp-content/uploads/2022/11/Analysis-of-State-Laws-Limiting-Public-Health-Protections-1.pdf>

The authors and funders of that report — who see themselves as experts looking out for the common good of their inferiors and subordinates — are actually members of the Network for State-run Bioterrorism Law.

They harbor bitter contempt for individual liberty: the Creator-endowed moral agency of living human beings to exercise discernment and will and make our own determinations, guided by the teachings of Jesus Christ, about what's good, what's evil, what we must do and what we must avoid doing, to protect and sustain the lives and souls entrusted to our care.

Another lie in the report: “masks provide critical protection from illness.”

Translate as: “Masks are excellent psychological and social control mechanisms. They disrupt social bonds mediated through human facial expressions, eye contact, speech and body language, they interfere with breathing, and they provide constant visual triggers eliciting fear responses and suppressing cognitive reasoning.”

Another lie: “Vaccines save lives.”

Translate as: “Bioweapons labeled as vaccines induce suppression of human self-preservation and offspring-preservation instincts. They elicit quiet compliance with induced suicide, sterilization, and homicide, and thereby facilitate covert mass murder.”

“Protect the community” or “protect the common good,” means “shield State officials from facing justice for their participation in financially-coerced mass murder.”

In sum, the Network for Public Health Law does not count among its membership, trustworthy arbiters of what's healthy and what's hazardous. The lawyers who wrote the report, and the report itself, are part of the psychological manipulation system, intended and effective at instilling a sense of inevitability and helplessness among targeted enemies.

(For more on language manipulation, see Nov. 14, 2022 - Thought-stopping stage sets in legal pleadings. Proposed thought-restarting language to help people revoke their coerced suspension of disbelief.)

*

Much as I disagree with their positions, I'm grateful to the report's authors: Donna E. Levin, J.D.; Jill Krueger, J.D.; Kathleen Hoke, J.D.; Emely Sanchez, J.D., M.P.H.; Brianne Schell, J.D., Dawn Hunter, J.D.; M.P.H.; Sara Rogers, M.P.H.; Erica N. White, J.D., and Center for Public Health Law Research at Temple University attorneys Elizabeth Platt, J.D., M.A.; and Katie Moran-McCabe, J.D.

These women have assembled the best ways Americans can and should defend ourselves from biomedical martial law and state-sponsored mass murder programs. Under each heading, they even list sample bills from dozens of states, with citations, making it easy for readers to track existing bills and lobby for drafting and passage of more.

List of the state and local laws State-run contract bioterrorism lawyers don't like:

1. Prohibitions on Mask Requirements
2. Prohibitions on Proof of Vaccination and Vaccine Mandates
3. Shifts in Authority and Limitations on Public Health Orders - “These laws remove authority from the chief executive and public health agencies to exercise their expertise and the flexibility needed for day-to-day public health protection and emergency response. These laws give this authority to those with less knowledge and expertise to make health decisions that impact entire communities. Among other provisions, these laws impose time limits on emergency orders and establish new legislative authority to limit public health protective measures, including guidelines on public gatherings, and to extend, change, terminate, and oversee implementation and enforcement of emergency orders.” *Translation*: “Shut up and submit, you stupid peasants.”
4. Prohibitions on Measures to Protect the Community in the Name of Individual Liberties - “During the COVID-19 pandemic, some politicians weaponized constitutional rights in state legislatures to push for limitations on

public health measures that keep us healthy.” *Translation*: “Some Americans invoked constitutional rights as defensive weapons, to protect and defend themselves and their families from the State’s toxic, lethal trespass of their bodies, bloodstreams and organs.”

Feb. 7, 2023 - On the impalement of embedded, treasonous, DOD-HHS bioterrorists on the horns of their dilemmas. Revisiting double-bind challenges to the Covid-19 cullers and culling agents.

Several months ago, while thinking about Brook Jackson's case,³⁷⁰ I started developing some argument frameworks to help plaintiffs, attorneys and judges get past some of the biggest legal obstacles and move closer to justice for the Covid-19 crimes and criminals.

I published one such exploration in November.

Nov. 16, 2022 - Some thinking about tampering with evidence and spoliation

...The main hurdles, as in all the other strategies, are the court-stripping carve-outs³⁷¹ in which private cause of action is blocked as soon as US Government officials and military leadership are the named defendants...

The only way to move forward, it seems to me, is to have a third prong, which is an argument that the men and women doing these things are not acting in their official capacities or under color of legal authority but are rogue actors.

This is related to the other idea recently kicked around on this email thread: prosecuting Trump, Biden, Azar, Becerra, Fauci, Birx, Walensky, etc. for impersonating federal officials (18 USC 912³⁷²).

We need plaintiffs, fact patterns and claims that drive a legal wedge to separate the legitimate US Government and the people still operating under the US Constitution and legitimate federal laws, from the infiltrated/co-opted illegitimate US Government and the embedded agents operating as if the US Constitution has been suspended, under federal pseudo-laws through the fraudulent national emergency and public health framework.

Summarized: we need to get the US Gov in a position where it must either admit or deny that fraud + mass murder is the official, authorized policy of the US Gov., such that the identifiable people who are running the

programs have recourse to legal defense services provided by the US Department of Justice, or get cut loose, declared rogue and are then opened to criminal prosecution in their personal capacities...

*

I explored this framing a bit more in January:

Jan. 16, 2023 - Dual-use government officials of concern

...For my own contributions to the fight against the Monster, I'm most interested in developing and supporting cases that force government defendants and defense counsel to first, admit that the evidence (the record of their public acts and documents) conclusively shows they've launched a covert war with their people, which is becoming widely seen and understood.

The government attorneys would then be compelled to choose between two defenses:

- The war on the world is legal and the use of bioweapons to carry out official, authorized duties and orders to maim and kill billions of people, is justified and endorsed by the US government as an institution.
- The war is illegal, such that the official government acts undertaken by named defendants, to conduct the war, have been done without proper authority, by rogue actors, who can and will be removed from power and tried for their war crimes.

To the extent the Department of Justice responded to a criminal prosecution of Kadlec, Azar, Gruber and Hinton by using the second argument, the war criminals would be subject to prosecution in their personal capacity, without recourse to sovereign, legislative, administrative or other immunities.

They would be cut loose from the government, and legally construed as people who committed the war crimes outside their official capacities, while impersonating federal officials, or while serving as agents of foreign invaders or occupiers.

The advantage offered by cutting the war criminals loose, is that it would leave the core governing institutions (legislatures, courts and executives) and the US Constitution intact...

*

In the last few days, I've been looking at those argument frameworks again, in terms of the **products** (mRNA/LNP bioweapons) as distinct from the **people** deploying them.

To prosecute defendants for their willed acts and omissions, the theory of the case is that the products in use are military bioweapons, not pharmaceutical drugs, devices, biologics, or vaccines; the program is a covert, state-sponsored, contract terrorism/mass murder program; and there is ample evidence³⁷³ to demonstrate the bioweapons were developed and deployed through military programs (not drug regulation programs) with intent to harm recipients, by named defendants in their official or personal capacities.

To defend, US Gov must take one of two positions:

1. Mass murder using bioweapons is the official policy of the US Government, and officials carrying it out are fully authorized to do so, or
2. Mass murder using bioweapons is prohibited under US law, and US Government officials carrying it out are rogue elements who can and should be removed from power, charged, tried and punished.

The same double-bind can be applied to the manufactured prototype **products**, as distinct from the **people** who developed, pseudo-authorized and deploy them to this day.

³⁷³ <https://sashalatypova.substack.com/p/my-talk-from-lakaruppropet-conference>

For the products, the theory of the case is that the products in use are bioweapons, not pharmaceutical drugs, devices, biologics or vaccines within the purview of FDA regulation.

There is ample evidence³⁷⁴ to demonstrate they were never subject to FDA procedures regulating or monitoring current Good Clinical Practice (cGCP), current Good Manufacturing Practice (cGMP), current Good Laboratory Practice (cGLP), current Good Distribution Practice (cGDP), dispensing, labeling, adverse effects, etc.

To defend, the US Government must take one of two positions:

1. The products are pharmaceutical drugs, devices, biologics or vaccines, but none of the FDA regulatory standards for safety and efficacy testing, manufacturing, distribution, dispensing, labeling were followed prior to dispensing and during use; or
2. The products are military bioweapons for battlefield use, and none of the FDA regulatory standards for safety and efficacy testing, manufacturing and distribution were applicable, legally required or necessary for deployment on military targets.

Combined, these two challenges — to the acts of people and the use of products — place the US Government criminals in two double-binds.

Either

- A. They lied, knowingly and with intent, when they told the world that the products known as Covid-19 vaccines are FDA-authorized/FDA-approved pharmaceutical products, or
- B. They killed, knowingly and with intent, using military bioweapons that were never and could never be, subject to FDA pharmaceutical regulation.
The correct answer is:
- C. Both of the above.

Human law is law only in virtue of its accordance with right reason: and thus it is manifest that it flows from the eternal law.

And in so far as it deviates from right reason, it is called an unjust law; in such case it is not law at all, but rather a species of violence.

Feb, 9, 2023 - Expanded Kill Box slide deck and new videos

Earlier this week I presented at a Doctors4Covid Ethics meeting. I updated and expanded the Kill Box slide deck for the presentation.

The first deck, presented at a Jan. 24, 2023 event organized by Glen Macko³⁷⁵ and his L4Atv1 team, is 18 slides. The expanded deck is 36 slides.

Feb. 9, 2023 - On the significance of 21 USC 360bbb-3(k): "use" of EUA products "shall not constitute clinical investigation."

Last week I got an email requesting clarification about the significance of 21 USC 360bbb-3(k) for the planning, execution and continuance of the Covid-19 global pharmaweapon mass murder campaign.

21 USC 360bbb-3³⁸⁰ Authorization for medical products for use in emergencies

...21 USC 360bbb-3(k) Relation to other provisions

If a product is the subject of an authorization under this section, the **use of such product** within the scope of the authorization **shall not be considered to constitute a clinical investigation** for purposes of section 355(i), 360b(j), or 360j(g) of this title or any other provision of this chapter or section 351 of the Public Health Service Act [42 U.S.C. 262].

My reply, revised/expanded

The shortest version is that — like the certified Good Manufacturing Practice, certified Good Laboratory Practice, certified Good Distribution Practice and labeling and dispensing laws that Sasha Latypova has investigated so thoroughly³⁸¹ (and found that none of the standards that FDA applied to drug, vaccine and biologics development prior to 2020, were applied by FDA to the products produced after the 2020 PREP Act declarations about Covid-19 EUA countermeasures) — so also none of the certified Good Clinical Practices were followed either.

Brook Jackson identified these blatant violations in the human clinical "trials" in August and September 2020, collected supporting evidence, and described the violations in detail, with supporting documentation and photos, in her reports to Ventavia, Pfizer and FDA.

Ventavia, Pfizer and FDA ignored the evidence; continued attacking unwitting victims with lethal injections while telling those victims they were participants in an FDA-regulated clinical trial; and arranged for Jackson to be fired. Jackson included the same information and evidence in her whistleblower complaint³⁸² at p. 8

If **any** FDA regulations had been legally operative, then the whole project would have been stopped by FDA long before human sham-trials could even begin.

Red flag stopping points showed up in the very earliest animal studies, one of which was conducted between July 16, 2020 and Sept. 24, 2020, concurrent with the sham human trials, and eventually provided by Pfizer/Acutas/DOD to FDA in November 2020.³⁸³

Another version was provided to Japanese regulators³⁸⁴ by February 2021, after mass rollout worldwide began in December 2020. It was subsequently translated into English and discussed by Byram Bridle in May 2021 reports and on Bret Weinstein's June 2021 Darkhorse podcast, highlighting that the data showed the lipid nanoparticles (payloads unidentified) accumulate in rat organs, among other toxicity evidence.

Sept. 19, 2022 - In Nov. 2020, Pfizer told FDA reviewers, led by Marion Gruber, that safety studies were neither needed nor conducted. In making that argument, Pfizer cited WHO guidance written in 2002 by a team led by Marion Gruber.³⁸⁵

...At this point in early Summer 2021, four facts became more widely understood among the community of people trying to understand the biotechnology, risks and benefits of the products marketed as 'Covid-19 vaccines.'

1. The inflammatory lipid nanoparticles and their payloads collect in the ovaries and other key organs, are not rapidly cleared from the human body and are toxic.
2. Pfizer scientists knew this before seeking EUA approval from the FDA through the 11/20/2020 EUA application.
3. FDA scientists led by Marion Gruber knew this when authorizing the product for emergency use on 12/11/2020.

³⁸³ <https://bailiwicknewsarchives.files.wordpress.com/2022/09/2020.11.09-pfizer-wistar-study-77-p..pdf>

³⁸⁴ <https://bailiwicknewsarchives.files.wordpress.com/2021/12/2021-japan-study-translation-lnp-in-ovaries.pdf>

³⁸⁵ <https://bailiwicknews.substack.com/p/in-nov-2020-pfizer-told-fda-reviewers>

4. Pfizer, FDA and Gruber withheld this information from the public and knowingly lied each time they described the products as “safe and effective...”

*

The Pfizer-DOD death machine submitted the Wistar rat data to the fake FDA reviewers as part of the EUA package, including a document called “Phase 1/2/3, placebo-controlled, randomized, observer-blind, dose-finding study to evaluate the safety, tolerability, immunogenicity and efficacy of SARS-CoV-2 RNA vaccine candidates against Covid-19 in healthy individuals.”³⁸⁶

In that sham “clinical trial” protocol at p. 72, Pfizer-DOD flatly stated that the “study” had not and would not assess pharmacokinetics, pharmacodynamics, biomarkers or genetics.

The aggregate evidence for the intent and function of 21 USC 360bbb-3(k) as a blanket waiver of the American drug regulation system to facilitate and pre-cover-up a covert, criminal bioweapons production and deployment program — can be summed up as “the dog that didn't bark.”³⁸⁷

Reinforcing evidence is the establishment of “real world evidence”³⁸⁸ — “data regarding the usage, or the potential benefits or risks, of a drug derived from sources other than randomized clinical trials” — as a basis for fake FDA regulatory decisions, a monstrosity Congress passed and Obama signed through the 2016 21st Century Cures Act³⁸⁹ at Section 3022. More reinforcing evidence: the government-coordinated, fraud-based suppression of all the alternative treatments for Covid-19, any one of which would have been enough to block the EUA, which depends on there being no available alternative treatments.

Another way to think about 21 USC 360bbb-3(k):

It's the provision that quietly nullified every substantive way in which FDA regulatory functions would have been fulfilled, rendering the entire FDA performance a sham intended *only* to shield from public view, that the operation was and is actually run under 50 USC Ch. 32, the Chemical and Biological Warfare Program.³⁹⁰

*

As I keep researching, I find more evidence that FDA officials fully understood how outside-the-FDA-law the EUA program is, and they've understood it for a very long time.

Especially FDA lawyers running the “legal preparedness” apparatus.

See, for example, Susan Sherman's part in a 2009 workshop³⁹¹ (*Medical Countermeasures Dispensing Emergency Use Authorization and the Postal Model*, at p. 26) and an August 2020 presentation by Elizabeth Sadove,³⁹² summarizing the simultaneous cover-up/crime in a table at p. 18:

Comparison of Access Mechanisms

Consideration	Clinical Trial	Expanded Access (IND/IDE)	EUA
Ability to inform effectiveness	Yes – designed to provide evidence of safety and effectiveness	Not likely; possibly anecdotal information with larger population size	Not likely
Ability to inform safety	Yes – designed to provide evidence of safety and effectiveness	Safety signals might be identified	Safety signals might be identified
Ability to obtain useful information to benefit future patients	Yes - designed and intended to benefit future patients – randomized/blinded	Not likely; with larger sized populations, possibly some safety data in patient subgroups that could inform broader labeling	Not likely
Availability of findings	Eventually published in medical journals. If part of a regulatory approval, FDA makes reviews public.	Individual medical records are not released to the general public. Case reports might be published in medical journals.	Generally there is no systematic data collection. Retrospectives studies may be conducted and published.
Informed consent required?	Yes	Yes	No, but requires informing the volunteer of 1) right to refuse and 2) that product is unapproved/available under an EUA
Institutional review board (IRB) required?	Yes	Yes, but no prior approval needed for individual patient access	No
Level of access to investigational product	Depends on trial design P1 typically 20 – 100 P2 typically several 100 P3 typically 300 – 3,000	Depends on type of expanded access, which ranges from individual patient (e-IND/IDE) to large (e.g., 100-1,000) populations	Can enable access to a large number of patients

That table makes clear that "Clinical Trial" products, "Expanded Access (IND/IDE)" products and "EUA" products are three completely different legal frameworks.

Under "Clinical Trials," the use will provide evidence of safety and effectiveness; will produce useful information to benefit future patients; will eventually be published in medical journals and possibly published FDA reviews; that informed consent is required; that Institutional Review Boards are required; and that a limited number of people will have access to the product.

Under EUA, product use is "not likely" to provide evidence of efficacy; "might" provide safety signals; is "not likely" to provide useful information to benefit future patients; "generally there is no systematic data collection" although retrospective studies "may" be conducted and published; informed consent is not required; IRB review is not required; and the access pool is "a large number of patients."

The primary purpose of all the statutory, regulatory changes and guidance document revisions year after year, page after page, is to keep people from, first, understanding the war crimes as war crimes, and — if people do figure it out — keep them chasing their tails trying to find the FDA loophole that the war criminals somehow failed to close, through which somebody might someday be able to get them to stop killing us.

In the meantime, they just keep killing, and we don't find loopholes, because the complexity of the web is impenetrable, and the program is not an FDA-regulated medical treatment program anyway: it's a military-operated global genocide.

I try to maintain attention and expand understanding of demonstrable fact sets and the moral judgments that follow once those acts are accurately perceived:

"What they are doing is intentional killing, and intentionally killing people is wrong."

And I try to participate in the global struggle to stop the killing by helping to mobilize political and social pressure on lawmakers to use international and federal criminal laws to stop the cull and bring the killers to justice; repeal the enabling laws³⁹³ and put in place new laws that better protect people from socially- and economically- coerced submission to mass murderers pretending to be everything other than what they are.

Feb. 10, 2023 - On initiating awkward conversations about global pharmaco-military genocide with public officeholders, so as to embolden resistance.

Bailiwick reader Elle Morgan has started a new Substack called Human Writes.³⁹⁴

One of her skill-sets is teaching public speaking and public communications.

Elle is also a personal friend to me, and recently while we were hanging out, we were talking about how difficult it is — not just to think about and emotionally process the horrifying evil unleashed on the world through the Bank for International Settlements and its financial, political and social subsidiaries — but even more so to talk about it publicly with other people who don't or can't yet see it or understand it.

In short: it sounds like crazy talk, because it's talk about things that are crazy and have been set in motion by diabolically disordered souls, but are happening anyway, in the real human world.

Put another way:

It's overwhelming to individually grapple with the facts and the many implications across many human spheres of action: spiritual, moral, legal, political, economic, social, familial, personal, psychological...

The thought of trying to describe or explain these things to public officeholders who may be indifferent, confused or even hostile, and then ask those men and women to use their political power to respond to the complex crisis by standing up against the massive forces arrayed against us, is even more overwhelming.

I agree with her, and I'm grateful that this is a part of the fight where she wants to invest her time and her energy, and make her support available to people who are struggling to get themselves into meetings with government officials to have constructive conversations.

Elle has put together a guide which I've uploaded to Bailiwick's backup Wordpress site:

- Five-step Format for Citizens in Communication with Officeholders³⁹⁵

And an introductory Substack post³⁹⁶ about her project:

...If I want my elected officials to “do something,” first I need to know what they know and what they don't know. How can they act if they don't know what's going on? I'm going to make an appointment. And then, I'm going to sit down and tell them what I think. There you have it.

But can I? Am I able to organize my thoughts, can I distill the last two and a half years of research and questions into something coherent that expresses my very grave concerns about the health and well being of my family, community and country?

Can I adequately convey the emotional toll of these many months, and the desperate, yes *desperate*, longing for some support and help — from *any* sector for God's sake, to overcome the monster that has become our own government?...

I encourage readers who are interested in connecting directly with your local, county, state and federal representatives to discuss these issues, to download the five-page guide and think it over, and then connect with Elle through her Substack for more support and encouragement.

Also, I've fielded several requests for template letters that people could print, sign and mail to office-holders. I've written an Affidavit of Noncompliance³⁹⁷ for filing with county court clerks,³⁹⁸ and there are other templates at Five

Small Stones³⁹⁹ written by me and others, including a Notice of War Crimes Complicity.⁴⁰⁰ The Word versions of the affidavit⁴⁰¹ and notice⁴⁰² could be revised by readers for delivery to government officials.

I haven't written more because I think such letters tend to be more effective the more they express each writer's personal grappling with the things that are most important to them, and any personal connection they have with the recipient of each letter.

If readers have written some templates and want to link to those templates in the comment threads for other readers to download and use, please do.

Feb. 13, 2023 - Shire Herald: new Substack about ancient, medieval and modern developments in the law; and how they relate to current events. And C.S. Lewis on evil and free will.

Two new videos published recently:

- Jan. 25, 2023 - C19: Public Health or Defense Operation?⁴⁰³ *TrialSite News*. Shabnam Palesa Mohamed, Katherine Watt (18 p. slide deck, 1-hour with intermittent discussion.)
- Feb. 9, 2023 - Military Countermeasures.⁴⁰⁴ *Making Sense of the Madness*. Sean Morgan, Sasha Latypova, Katherine Watt

I'm in the bumpy process of adjusting my work plans in response to the recent increase in public awareness of the medicalized martial law issues Brook Jackson, Sasha Latypova and I have been working on (individually and then together) since the complex Covid-19-predicated crises burst into view in January 2020.

I'm trying to clarify for myself and readers, the topics I'm most interested in, as distinct from the many related topics that I'm aware of but don't have the time, energy or interest to work on myself.

For example, at the beginning of 2023, I planned to spend time on organic constitution and state national citizenship history, current events and analysis.

I've done a handful of posts on this topic, read some book chapters, engaged in lengthy email discussions with several readers who know a lot about it, and have barely scratched the surface. I've learned enough to know that a full investigation would occupy all of my time for several years.

- June 20, 2022 - How the 1913 Federal Reserve Act may connect to the government-run bioterrorism campaign called Covid-19.
- Oct. 20, 2022 - Thoughts on American Organic Law
- Nov. 23 - Informed, connected & brave v. ignorant, isolated & scared. Thinking about the Constitution-in-exile predicament.
- Dec. 22, 2022 - Reinhabiting Congress and all the other government branches: local, county, state and federal.

I'm no longer planning to do a deep dive this year.

A Bailiwick reader who writes under the pseudonym Shire Herald, has started a new Substack called Shire Herald,⁴⁰⁵ to focus on those issues.

I agree with Shire Herald and many other readers, that it's a good idea for interested people to try to individually reclaim jurisdiction and legal status as free men and women from the central banker pirates who have (across the centuries) stolen and *de facto* enslaved people through birth certificates, the Social Security system, corporatized governments, fiat money and debt.

But the second reason I'm personally setting aside the research, is that I also think that it's a good idea for interested people to push state and federal lawmakers and judges to use foundational, common law and constitutional republican legal principles to liberate men and women from medical martial law and debt slavery condition by the thousands or millions, in batches. Not just one by one, but a whole state population, for example, or the whole American population all at once, through Congressional action or by judicial decision.

This is related to my understanding of the current US government as dual-use or two-faceted.

- Jan. 16, 2023 - Dual-use government officials of concern
- Jan. 23, 2023 - On Trump's role and secret military-led continuity of government for purposes of swamp-draining.
- Jan. 30, 2023 - Some thoughts about J6 and razor-tipped chain link fence perimeters, literal and metaphorical
- Feb. 7, 2023 - On the impalement of embedded, treasonous, DOD-HHS bioterrorists on the horns of their dilemmas.

Summarized: I think there's a corrupt, illegitimate, captured aspect of the US Government, especially in the federal executive branch and cabinet level, which is used by central bankers to project, maintain and deepen global slavery and conduct covert mass murder.

But I also think there's a deeply legitimate, honorable, freely-willing aspect of the US Government. It's hidden in the bodies, hearts, minds, souls and free wills of the living men and women who currently hold the titles of Congressman, Senator, and Judge. Each of them can freely choose to stop complying with and covering up lie-based corruption, and start acting with truth-based integrity to overtake and expel the illegitimate, criminal, rogue government.

I think fractal versions of that same shadow/light legislative and judicial phenomenon exist in each American state capitol, and in each county.

As I wrote to Shire Herald in an email on Jan. 27, 2023, I see the two civic action approaches as complementary, not in conflict; I think there's potential to develop a pincer movement.

...I would love it if you would start a Substack, because then I could refer all the readers who are interested in learning about and discussing those issues to read your work and engage in the comment threads there, and maintain my focus on my work.

Both research and action tracks are valuable, I think. Yours and Anna Reitz's is aimed at mobilizing grassroots reclaiming of lost personal territory through individual paperwork and state-level associations, and mine is aimed more at motivating and informing the men and women currently in office in the occupied federal and state government territory, to step out of the occupied box and reclaim the original turf too.

At some point, God-willing, the grassroots works will merge with the office-holders' works and we'll see a general reclaiming of turf and an "equal protection under the law" of a single full, free person class, replacing the seven types of bondage, corporatized citizen you listed in your email of Jan. 19: municipal; territorial; naturalized; permanent resident; American State Nationals; American State Citizens; territorial "American State National" described in Federal Code, 8 USC 1101 (a) 21 for Federal Territorial Employees and Dependents.

Both are voluminous, overwhelming and time-consuming to understand and share.

I'll leave it there for now. I encourage readers interested in these issues, to read and comment at Shire Herald.⁴¹²

Sometimes, especially when the "hackable animal" lie told by Noah Juval Hariri and his co-conspirators re-emerges in public discourse, particularly when it's directed in anger at the past and present fecklessness of so many lawmakers, prosecutors and judges, I read C.S. Lewis.

C.S. Lewis' *Mere Christianity*, 1977 paperback edition, pp. 52-53

...God created things which had free will. That means creatures which can go either wrong or right. Some people think they can imagine a creature which was free but had no possibility of going wrong; I cannot. If a thing is free to be good it is also free to be bad. And free will is what has made evil possible.

Why, then, did God give them free will? Because free will, though it makes evil possible, is also the only thing that makes possible any love or goodness or joy worth having.

A world of automats — of creatures that worked like machines — would hardly be worth creating. The happiness which God designs for his higher creatures is the happiness of being freely, voluntarily united to Him and to each other in an ecstasy of love and delight compared with which the most rapturous love between a man and a woman on this earth is mere milk and water.

And for that they must be free.

Of course God knew what would happen if they used their freedom the wrong way: apparently He thought it worth the risk. Perhaps we feel inclined to disagree with Him. But there is a difficulty about disagreeing with God. He is the source from which all your reasoning power comes: you could not be right and He wrong any more than a stream can rise higher than its own source. When you are arguing against Him you are arguing against the very power that makes you able to argue at all: it is like cutting off the branch you are sitting on.

If God thinks this state of war in the universe is a price worth paying for free will — that is, for making a live world in which creatures can do real good or harm and something of real importance can happen, instead of a toy world which only moves when He pulls the strings — then we may take it it is worth paying.

⁴¹² <https://shirenews.substack.com/>

Human beings are not hackable animals.

Manipulation and temptation are possible, not because we lack souls and free will, but because we possess both.

We can choose to cut ourselves off from the grace of God, as Hariri and the globalist central banker death cultists have done for themselves, and as they try to manipulate everyone else to do with them.

Or we can choose to honor and keep our attachment to Him, as vines on the living branch.⁴¹³

Feb. 15, 2023 - European Commission regulations implementing the global pharma-military kill box Also brief response to Robert Barnes' recent post.

New video:

- Feb. 13, 2023 - Worldwide, US Military-Led Medical Martial Law Operation to Kill Off Humans, Exposed.⁴¹⁴ *ZeeMedia.com*. Maria Zeee, Katherine Watt (60 min)

In the Maria Zeee interview, I said that recently, legal researchers in Europe had located some of the mechanisms through which the global bioterrorism/medical martial law program functions to surveil, capture, control and kill people in European countries.

Some of the mechanisms can be found in corporate contracts signed between European governments and pharma-bioweapons manufacturers.

See, for example, Sasha Latypova's reporting about the contents of emails between key European war criminals.

Feb. 6, 2023 Letters from the Underworld:⁴¹⁵

...Ursula von der Leyen - EU Commissioner, whose achievements include negotiating incredible predatory Pfizer supply contracts on behalf of all EU Member States by text messages with Pfizer CEO Albert Bourla. In these contracts the EU countries had to put up state assets as collateral, waive all quality control, importation and consumer protection laws and give up national sovereignty - i.e., not allowed to change legislation with respect to vaccine liability by their own parliaments? The predatory contracts that were completely redacted to protect so-called "Pfizer commercial interests"...

There are a bunch of acronyms used, the most relevant are "EC" = European Commission, "MS" = Member States, "EP"=European Parliament.

The key sentence is that Ursula is "prepared to call relevant health ministers personally to avoid the use of Article 5 (2)."

What is this about? Article 5 (2) refers to "Article 5 (2) of Directive 2001/83"⁴¹⁶ - Emergency use authorization in a European Member State, given by each of the Member States separately in their own countries. ["Article 5 (2). Member States may temporarily authorise the distribution of an unauthorised medicinal product in response to the suspected or confirmed spread of pathogenic agents, toxins, chemical agents or nuclear radiation any of which could cause harm.]

CMA is a Conditional Market Authorization which is issued by the European Medicines Agency for all EU members simultaneously...

The problem is that Ursula never meant to fulfill these promises, and at any rate, it is not possible to produce the mRNA “vaccines” to the safety, efficacy and manufacturing quality required of pharmaceuticals.

What Ursula really needed from this process was to tie all the European Member States together in a pact by promising a “robust” CMA, so that they could not have an independent authority over the shots distributed in their countries...

Article 5 path would have meant each Member State could authorize the product, and would then have the power to revoke the authorization if any problems detected.

Article 5 also provides a liability waiver to the manufacturer, however makes it impossible to mandate the product.

With the CMA route none of the member states could exercise the independent decision making, and so she would be able to then force them all into the same, insane and almost completely redacted Pfizer, Moderna and

AstraZeneca contracts, which waived all liability anyway, and further prohibited the countries to change their own laws in regard to the liability...”

Other mechanisms are embedded in European Commission regulations about “countermeasures” authorizations and financing mechanisms, a paper trail located recently by a legal researcher who works in one of the EU member-states.

Below is a chronological reorganization and expansion of the raw email content Sasha posted last week:

Knowing the names, numbers and contents of the regulations will help in your efforts to educate and mobilize social and political momentum for your government officials to pass blocking legislation at the nation-state level; repeal the kill box laws at the EU level; and/or withdraw your country from the European Union.

The EU provisions correspond with the US provisions related to “medical countermeasures” and establishment of home- and business-based concentration camps (prohibition of free human association, commerce and movement within countries and across borders) in case of “natural or man-made disaster.”

To recap, the American biomedical police state — controlled by the World Health Organization operating as the military branch of the Bank for International Settlements⁴²⁷ — came into force through statutes passed by the US Congress; executive orders issued by US Presidents; administrative/Cabinet agency regulations published in the Federal Register; and state and local versions of same.⁴²⁸ See footnoted executive summary of American Domestic Bioterrorism Program.⁴²⁹

The European biomedical police state came into force through analogous regulations passed by the European Parliament and the Council of the European Union, published in the Official Journal of the European Union.

Prior to locating these European Commission regulations, many attorneys in the EU member states thought that bioweapons regulation (falsely identified by government officials as 'vaccine'-regulation) was covered by provisions of EU law governing Conditional Marketing Authorization (CMA).

Turns out, that is not the case.

The backbone of the EU biomedical police state is comprised of provisions outlined below.

These are the rules the BIS/WHO puppets in the European Union have passed, to support their joint program to poison you and your kids behind the mask of public health, and force you to finance the mass murder program as well.

[1998/09/24 - Council Decision No. 2119/98/EC⁴³⁰ - Setting up a network for the epidemiological surveillance and control of communicable diseases in the Community](#)

Article 1.

The objective of this Decision is to set up a network at European Community level to promote cooperation and coordination between the Member States, with the assistance of the European Commission, with a view to improving the prevention and control, in the European Community, of the categories of communicable diseases specified in the Annex.

This network shall be used for:

- the epidemiological surveillance of these diseases, and
- an early warning and response system for the prevention and control of these diseases.

As regards epidemiological surveillance, the network shall be established by bringing into permanent communication with one another, through all appropriate technical means, the European Commission and those structures and/or authorities which, at the level of each Member State and under the responsibility of that Member State, are competent at national level and are charged with collecting information relating to the epidemiological surveillance of communicable diseases, and by establishing procedures for the dissemination of the relevant surveillance data at Community level.

As regards the early warning and response system, this network shall be formed by bringing into permanent communication with one another, through appropriate means, the Commission and the competent public health

authorities in each Member State responsible for determining the measures which may be required to protect public health.

The European Commission shall provide for the coordination of the network in collaboration with the Member States...

Annex

- Diseases preventable by vaccination
- Sexually-transmitted diseases
- Viral hepatitis
- Food-borne diseases
- Water-borne diseases and diseases of environmental origin
- Nosocomial infections
- Other diseases transmissible by non-conventional agents (including Creutzfeldt-Jakob's disease)
- Diseases covered by the international health regulations (yellow fever, cholera and plague)
- Other diseases (rabies, typhus, viral haemorrhagic fevers, malaria and any other as yet unclassified serious epidemic disease, etc.)

2004/04/21 - Regulation (EC) No. 851/2004⁴³³ - Establishing a European Centre for Disease Prevention and Control.

Article 1. Scope

This Regulation establishes an independent European agency for disease prevention and control, its mission, tasks and organisation.

Additional provisions cover Mission, Obligations of the Member States, Operation of dedicated surveillance networks and networking activities, Operation of early warning and response system, Identification of emerging health threats, Communications, Management, Financial Provisions, Implementation of the Centre's budget, Legal personality and privileges, and more.

Article. 5. Joint procurement of medical countermeasures

1. The institutions of the Union and any Member States which so desire may engage in a joint procurement procedure conducted pursuant to ...the financial rules applicable to the general budget of the Union ... with a view to the advance purchase of medical countermeasures for serious cross-border threats to health.

2. The joint procurement procedure referred to in paragraph 1 shall comply with the following conditions:

- (a) participation in the joint procurement procedure is open to all Member States until the launch of the procedure;
- (b) the rights and obligations of Member States not participating in the joint procurement are respected, in particular those relating to the protection and improvement of human health;
- (c) the joint procurement does not affect the internal market, does not constitute discrimination or a restriction of trade or does not cause distortion of competition;
- (d) the joint procurement does not have any direct financial impact on the budget of Member States not participating in the joint procurement...

Annex. Criteria for selection of communicable diseases and related special health issues to be covered by epidemiological surveillance within the network

- 1. Communicable diseases and related special health issues that cause, or have the potential to cause, significant morbidity or mortality, or both, across the Union, especially where the prevention of those diseases requires an approach to coordination at Union level.
- 2. Communicable diseases and related special health issues where the exchange of information may provide early warning of threats to public health.
- 3. Rare and serious communicable related diseases and special health issues which would not be recognised at national level and where the pooling of data would allow hypothesis generation from a wider knowledge base.
- 4. Communicable diseases and related special health issues for which effective preventive measures are available with a protective health gain.
- 5. Communicable diseases and related special health issues for which a comparison by Member States would contribute to the evaluation of national and Union programmes.

2016/03/15 - Regulation (EU) 2016/369⁴³⁵ - On the provision of emergency support within the Union

Article. 1. Subject matter and scope

This Regulation lays down the framework within which Union emergency support may be awarded through specific measures appropriate to the economic situation in the event of an ongoing or potential natural or man-made disaster...

Article. 2. Activation of the emergency support

...The decision about the activation of the emergency support under this Regulation in case of an ongoing or potential disaster shall be taken by the Council on the basis of a proposal by the Commission, specifying where appropriate the duration of the activation.

2020/04/14 - Regulation (EU) 2020/521⁴³⁶ - Activating the emergency support under Regulation (EU) 2016/369, and amending its provisions taking into account the COVID-19 outbreak

EU government action, retroactive to Feb. 1, 2020 to apply the "emergency support" regulation to the Covid-19 crises.

⁴³⁵ <https://bailiwicknewsarchives.files.wordpress.com/2023/02/2016.03.15-eu-regulation-369.pdf>

⁴³⁶ <https://bailiwicknewsarchives.files.wordpress.com/2023/02/2020.04.14-eu-regulation-521.pdf>

Whereas, No. 19:

Member States have declared, as parties to the Joint Procurement Agreement referred to in Article 5 of Decision No 1082/2013/EU of the European Parliament and of the Council, their agreement to the inclusion of ongoing joint procurement procedures under that Article in the fast-track procurement procedure established by this Regulation, under the conditions set out therein. The type of medical countermeasures to be procured and the distribution of the countermeasures to Member States should follow any agreement reached under those ongoing procedures.

Article 1.

Emergency support under Regulation (EU) 2016/369 is hereby activated to finance expenditure necessary to address the COVID-19 pandemic for the period 1 February 2020 to 31 January 2022.

Annex of Regulation 2016/369/EU, Eligible actions

The following actions may be financed in case of pandemics with large-scale effect:

- (a) temporary reinforcement of the medical workforce, exchange of medical professionals, hosting foreign patients or other type of mutual support;
 - (b) deployment of temporary healthcare facilities and temporary extension of existing healthcare facilities to relieve pressure on existing structures and increase overall healthcare capacity;
 - (c) activities to support the administration of large-scale application of medical tests and prepare the necessary scientific testing strategies and protocols;
 - (d) setting up temporary quarantine facilities and other appropriate measures at the Union borders;
 - (e) development, production or purchase and distribution of medical products;
 - (f) increases and conversions of production capacities for medical products as referred to in point (e) to address supply shortages;
 - (g) maintenance of the stock of medical products as referred to in point (e) and their disposal;
 - (h) actions to support the necessary steps to obtain approval for the use of the medical products as referred to in point (e) if required;
 - (i) actions to develop appropriate methods to track the development of the pandemic and the results of measures implemented to address it;
 - (j) organisation of ad-hoc clinical trials of potential therapies or diagnostics according to trial standards agreed at Union level;
 - (k) scientific validation of medical products, including potential new testing methods.
- The above list is not exhaustive."

*

European legal researcher's preliminary analysis of the combined effects of these directives and regulations, corroborating the global martial law/war machine classification of the Covid-19 crises and the bioweapons classification of the products marketed as 'Covid-19 vaccines.'

...(h) opens the door to any actions they assume necessary in order to achieve their goal of obtaining approval for the use of medical products. Thus, the regulators and suppliers are free to abstain from any provisions applicable to medicinal products, drugs and medical devices.

(j) opens the door to “ad-hoc” clinical trials, meaning they need not conform to certified Good Clinical Practice, but only unspecified “trial standards agreed at Union level.”

This also shows the clear fraud in the European Union they committed against all citizens, giving the impression that they had evaluated the injections according to existing standards for the evaluation of medicinal products at least on the basis of conditional marketing authorisations, whereas behind the scenes they were free to make whatever they desired.

The question “who” had the competence for “approval for the use of the medical products as referred to in point (e) if required;” may be answered with “the EU Commission,” which would not even require a change in competence as the EU Commission has been competent for approval of medicinal products on a central level since 1995 with the new scheme of marketing authorizations in the EU...

...All decisions have been signed by Margaritis Schinas, Vice President of the Commission⁴³⁷ and responsible for security in EU, including coordinating the European Commission’s work on developing a European Security Union; ensuring coherence of the external and internal dimensions of security; coordinating the Commission’s work to strengthen prevention, detection and response measures to hybrid threats.

Schinas authorized the ‘vaccines’ but not the therapeutics, so obviously there is a difference in classification, behind the scenes, between those kinds of products.

Normal medicinal products are always authorized by the EU Commission, Directorate General for Health and signed by a representative of the Director General or the Director General herself.

In Germany they installed a new Department 6 “Health Protection, Health Safety, Sustainability” in the second half of 2019. On March 1, 2020, a military general became head of this department with two sub-departments with five specialist departments each, including departments on national and international crisis management. He was also head of the “Corona Pandemic Crisis Management Team” and led the Health Ministry at the end of 2021.

*

Effective December 2022, the European Parliament and Council of the European Union repealed and replaced Decision No. 1082/2013/EU with Regulation No. 2022/2371/EU, expanding and tightening the EU-level control-and-kill legal framework in support of the One World Health model sought by the BIS and its military branch: the World Health Organization.

[2022/11/23 - Regulation \(EU\) 2022/2371⁴³⁸ - On serious cross-border threats to health and repealing Decision No 1082/2013/EU](#)

Whereas:

1. A network for the epidemiological surveillance and control of communicable diseases was set up by Decision No 2119/98/EC;...its scope was extended by Decision No 1082/2013/EU ... to strengthen and provide for a more coordinated and wider approach to health security at Union level. The implementation of that legislation

⁴³⁸ <https://bailiwicknewsarchives.files.wordpress.com/2023/02/2022.11.23-eu-regulation-2371.pdf>

confirmed that coordinated Union action on monitoring, early warning of and combatting those threats adds value to the protection and improvement of human health.

2. In light of the lessons learnt during the ongoing COVID-19 pandemic and in order to facilitate adequate Union-wide preparedness for and response to all cross-border threats to health, the legal framework for epidemiological surveillance, monitoring, early warning of, and combatting serious cross-border threats to health, including zoonotic-related threats, as provided for in Decision No 1082/2013/EU, needs to be broadened with regard to additional reporting requirements and analysis regarding health systems indicators, and with regard to cooperation between Member States and Union agencies and bodies, particularly the European Centre for Disease Prevention and Control (ECDC), the European Medicines Agency (EMA), and international organisations, in particular the World Health Organization (WHO)...

Article 1. Subject matter

1. In order to address serious cross-border threats to health and the consequences thereof, this Regulation lays down rules on:

- (a) the Health Security Committee (HSC);
- (b) prevention, preparedness and response planning, including:
 - (i) preparedness plans at Union and national levels; and
 - (ii) reporting and assessing preparedness at national level;
- (c) joint procurement of medical countermeasures;
- (d) emergency research and innovation;
- (e) epidemiological surveillance and monitoring;
- (f) the network for epidemiological surveillance;
- (g) the Early Warning and Response System (EWRS);
- (h) risk assessment;
- (i) coordination of response; and
- (j) recognition of a public health emergency at Union level.

2. This Regulation establishes:

- (a) a network of EU reference laboratories for public health;
- (b) a network for substances of human origin; and
- (c) an advisory committee for the occurrence and recognition of a public health emergency at Union level.

3. In line with the One Health and Health in All Policies approaches, the implementation of this Regulation shall be supported by funding from relevant Union programmes and instruments.

Article 2. Scope

1. This Regulation shall apply to public health measures in relation to the following categories of serious cross-border threats to health:

- (a) threats of biological origin, consisting of:

- (i) communicable diseases, including those of zoonotic origin;
 - (ii) antimicrobial resistance and healthcare-associated infections related to communicable diseases ('related special health issues');
 - (iii) biotoxins or other harmful biological agents not related to communicable diseases;
- (b) threats of chemical origin;
 - (c) threats of environmental origin, including those due to the climate;
 - (d) threats of unknown origin; and
 - (e) events which may constitute public health emergencies of international concern under the International Health Regulations (IHR) ('public health emergencies of international concern'), provided that they fall under one of the categories of threats set out in points (a) to (d).

Annex:

Criteria for selection of communicable diseases and related special health issues to be covered by epidemiological surveillance within the network for epidemiological surveillance
 Union surveillance shall provide information for public health action at Union level. More specifically, one of the following criteria shall be met:

1. significant morbidity, significant mortality or emerging disease (increasing five-year trend) in a sizeable percentage of Member States;
2. potential to cause cross-border outbreaks;
3. high-threat pathogen (transmissibility and severity);
4. specifically targeted national or Union public health programmes in place that require monitoring and evaluation;
5. Union surveillance adds public health value to national surveillance systems other than what is implied in criteria 1 to 4.

Brief response to Robert Barnes' recent post

Sage Hana has a repost of content Barnes published through his Locals page.

- Feb. 14, 2023 - Brook Jackson Attorney Robert Barnes Asserts that the DOD is a Patsy for Pfizer Which Sounds Exactly Backwards⁴³⁹

I responded briefly on my Gab feed, reposted below. I don't plan to address how my legal analysis diverges from Barnes' legal analysis further, because I'm focused on developing litigation and social/political pressure strategies that I think have better odds of successfully stopping the ongoing genocide; legislatively repealing or judicially nullifying the enabling laws; and bringing the war criminals to justice.

Barnes' approach is not aimed at those goals, so I'm not willing to spend a lot of time addressing it.

In my view, any legal strategy (civil, criminal or administrative) that sidesteps or covers up the fact that the people of the world are currently enduring, and mounting resistance to, intentional mass murder and mass poisoning, is a bad strategy.

⁴³⁹ <https://sagehana.substack.com/p/brook-jackson-attorney-robert-barnes>

In fact, the people of the world are enduring a criminal military campaign, conducted through production and use of bioweapons, deployed by people claiming to represent the US Government and virtually all other national governments.

The war criminals⁴⁴⁰ are fraudulently referring to deadly bioweapons as regulated pharmaceutical products ('vaccines') and fraudulently describing the unlawful injection of these toxic compounds into human beings as components of a public health campaign.

Accepting and endorsing the war criminals' false main premises, as being true, is counterproductive.

*

Response to Robert Barnes' Locals post:

I looked at it quickly. I think he's misrepresenting the evidence and argument, but he needs to do that to try to discredit us and shore up his own strategy, so I get why he's doing it.

Beyond that, I don't know why (i.e. can only speculate) he doesn't seem able to see the bigger picture, that the bioweapons program and its legal support structure long pre-date Trump and Operation Warp Speed, cover many more "countermeasures" than the Covid-19 injections alone, and that his approach to Brook's case⁴⁴¹ — accepting the Pfizer + Gov claim that the products are pharmaceutical products (vaccines) subject to FDA regulation, and trying to argue on that turf even though the factual record makes it absolutely clear that no valid FDA regulatory actions occurred and the statutory/regulatory record makes it absolutely clear that no valid FDA regulatory action was ever required — yields the most important disputed issue to the Pfizer + Gov benefit, thus increasing the grounds for dismissal.

I think Barnes is going to drive her case right into dismissal for her by failing to see and present the evidence in the way that Sasha and I see it and present it.

There will be other cases though, in which Barnes is not involved, and eventually a plaintiff (whistleblower or not) or group of plaintiffs will present some of those cases properly, on the evidence base Brook, Sasha and I have exposed, as a civil claim based on the criminal actions of the defendants, or as a state, federal or international war crimes/terrorism/genocide/bioweapons/chemical weapons criminal prosecution.

In my view, Barnes is just missing a good opportunity for Brook's original case to be among the cases that start to open those doors.

Feb. 16, 2023 - Written artifacts of informational warfare. Truth, lies, war crimes and objective, observable realities.

Reader comment:

Robert Barnes says you did not read the contracts. According to him, the contracts stipulate that the products (whatever you call them) were to stop getting and transmitting covid19. They did not do that and on that basis Pfizer committed fraud. So, did you read the contracts? That is key.

I agree 100% that all these so called vaccines are bad, not just Pfizer's and none of them actually work like the whooping cough vaccine that represses symptoms but does nothing about catching or transmitting the disease, like the polio vaccine that spreads the disease at the diaper changing table in daycare, or the pneumonia vaccine that has created a nightmare of variants that really pummel the elderly or go down the list of required vaccines...all of them...bad news,... even the measles vaccine that does not stop measles in a whole bunch of people and creates stealth virus.

So... still we need to know if you read the contract and did Pfizer commit fraud?

*

My reply (PDF⁴⁴²)

Yes, I've read the two publicly available Pfizer-ATI-MCDC-DOD-FDA-HHS bioweapons manufacturing contracts that have been disclosed to the public through *Jackson v. Ventavia, Pfizer and ICON*.⁴⁴³

- 2020.07.20 DOD-ATI-MCDC-FDA-Pfizer Base Agreement⁴⁴⁴
- 2020.07.21 DOD-ATI-MCDC-FDA-Pfizer Technical Direction Letter⁴⁴⁵

I also drafted a FOIA request,⁴⁴⁶ submitted a few weeks ago by Judicial Watch, seeking, among other items, a third, related contract that has not yet been disclosed to the public, called the "Project Agreement."

And yes, I believe all of the parties to the contracts — including but not limited to the Pfizer signatories — have been and continue to jointly, collaboratively, cooperatively, intentionally and maliciously commit fraud, mass murder, and war crimes.

They have been and continue to commit those crimes against non-parties to the contracts: all the other people of the world, including more-or-less ignorant, low-ranking members of national, state and local governments (lawmakers, prosecutors and judges) who are not privy to the inner workings of the small mass-murder coordinating committees in each country.

*

In addition to the contracts, I've also read a lot of other material over the last three years including statutes, regulations, hearing transcripts, regulatory guidance documents, regulatory review documents, executive orders, notices, declarations, determinations, training manuals, tabletop exercise reports, slide presentations, patents, civil complaints, criminal indictments, judicial orders, legal opinions, scientific and academic papers published in peer-reviewed journals, scientific and academic papers published through platforms other than peer-reviewed journals, "clinical trial" documents, government database reports, independent analysis of data published by government databases, government-controlled media reports and analysis, and independent and semi-independent media reports and analysis.

⁴⁴⁶ <https://bailiwicknews.substack.com/p/draft-freedom-of-information-act>

In addition to reading, I've also made observations and endured direct experiences in my own life as a human being embedded in personal and professional relationships as a wife, mother, daughter, sister, friend, writer, reader, paralegal, and parishioner.

I've learned a lot about the war by watching and listening to people who have been censored, ignored, propagandized⁴⁴⁷ and gaslit; people who have been fired from their jobs, discharged from the military and expelled from school; people who have been sickened by the bioweapons, and survivors of people who have been killed by the bioweapons.

From my viewing position, living my own human life, I've thought about the written artifacts in their relationships to each other and to those direct experiences.

I've compared and contrasted the contents of the written documents, section by section, looking for patterns and anomalies and contradictions.

Specific to contracts — and in collaboration with Brook Jackson, Sasha Latypova and a few other people I trust — I've compared and contrasted the terms and conditions as written on the pages, with the observable, objective realities about which terms and conditions have been fulfilled by the purportedly responsible parties, and enforced by the counter-parties who have purported standing to enforce the terms.

And which terms and conditions have been neither fulfilled nor enforced.

Valid clinical trials didn't happen.

Valid drug safety regulation didn't happen.

Valid drug manufacturing, labeling, testing, distribution and dispensing didn't happen.

Evidence that these purportedly binding contractual obligations were not being fulfilled, was collected and provided to government authorities.

Government authorities gagged, ignored and gaslit the whistleblowers and suppressed their evidence from public view.

People injected with the products sickened and died.

Evidence that the products were sickening and killing people was collected and provided to government authorities. Government authorities censored, ignored and gaslit the reporters.

In sum, the contract provisions purportedly requiring those things, were not enforced by the contract parties with standing to enforce.

They were not enforced by Pfizer or any of its corporate partners or subcontractors.

They were not enforced by FDA or any other branch of HHS.

They were not enforced by ATI, MCDC or any other branch of DOD.

And they were not enforced by the Department of Justice or the Attorney General.

So the killing machine hums along, undisturbed, day after day, dead after dead, since the first fake "clinical trials" began in Spring 2020.

I've therefore concluded that all of the written artifacts produced and published by governments and government contractors operating the medical martial law system (the kill box) are dual-use documents.

⁴⁴⁷ <https://foreignpolicy.com/2013/07/14/u-s-repeals-propaganda-ban-spreads-government-made-news-to-americans/>

They contain some truths and some lies.

The true provisions are written with the intent to convey real contractual obligations among the parties: terms and conditions that will be fulfilled by the responsible party, and if he or she fails, will be enforced by the counter parties, through their exercise of contractual rights to extract financial or other penalties.

The false provisions are written with the intent to convey the illusion of contractual obligations to non-parties. They list terms and conditions that will never be fulfilled or enforced by the contract parties. Those terms and conditions are listed for the sole purpose of misleading the public in our role as billions of marks⁴⁴⁸ in a global long con.⁴⁴⁹

The false provisions are intended to, and have the observable effect of, manipulating, defrauding, inducing fear, abusing the trust and otherwise covertly controlling the perceptions of non-parties to the contracts.

*

As I've written before, I think 21 USC 360bbb-3(k)⁴⁵⁰ is a “get out of all otherwise applicable FDA regulations free” card, for all products classified as Emergency Use Authorized (EUA) medical countermeasures (MCMs) for use during a declared public health emergency (PHE).

All three of which classifications can be established and maintained under several redundant and interlocking legal frameworks, such that the “use” — bioweapons attacks by fast- or slow-acting lethal injections — can continue even while individual declarations, determinations and states of emergency come and go.

Perhaps Section 19.02 (“Limitations”) of the Base Agreement⁴⁵¹ is pertinent.

Perhaps the parenthetical modifier phrase, “to the extent required for COVID-19 medical countermeasures” in Section 1.3(a) of the Technical Direction Letter⁴⁵² is another way in which regulatory oversight has been waived.

Maybe there are other written but as-yet-undisclosed contract-modification documents, specifying which provisions of the public-facing documents should be legally construed as binding on the contract parties, and which should be construed as inapplicable and unenforceable: incorporated solely to defraud non-parties to the contracts.

Maybe there are also unwritten, handshake agreements, through which the contracting parties have agreed with each other, gentleman-like, as to which elements of the documents that eventually become public are true and enforceable, and which are false, and for theatrical, performative purposes only.

I don't know how many different forms the waivers of performance obligations and waivers of enforcement authorities take.

I only know those waivers exist, and I know it because the parties who appeared to be obligated to perform specific actions, did not perform them, and the failures to perform did not result in enforcement action by the purported contractual counter-parties.

*

The written artifacts of the informational war, as produced by governments and government contractors, are dual-purpose weapons.

In their false aspect, they tell the lie that the world's people are engaged in a public health struggle against communicable disease, to protect and save lives.

⁴⁴⁸ <https://www.dictionary.com/browse/mark>

⁴⁴⁹ <https://www.dictionary.com/browse/long-con>

In their true aspect, they tell the truth: that the world's governments are engaged in a military war against humanity, to ruin and prematurely end lives.

Another example was illuminated for me during a recent Q&A exchange about the so-called “vaccine informed consent” forms signed by military targets, or check-boxed in computer databases by doctors and nurses.

The false intent and effect of those signatures and checkboxes is to support the illusion that the people involved are giving and receiving therapeutic medical treatments, with complete, accurate information as to ingredients, risks and benefits, and complete, personal, limitless rights to refuse, for any reason whatsoever: medical, religious, conscience, or simply because they don't want it.

The true intent and effect of those signatures and checkboxes is to make a written record of formal terms of surrender, by each (unknowing) enemy combatant, to a covert occupying military force, operating through the proxies of medical professionals and the undisclosed contents of lethal injections.

Written artifacts of informational warfare function in the same way human shields⁴⁵³ function in a traditional war zone. Combatants hide behind civilians. Which is also a war crime.

But these are word shields, in which false statements hide among true statements.

It is possible to discern the truth or falsity of each provision, and the intent with which it was written, by the effects it has in objective reality. By the fruits.⁴⁵⁴

This analysis applies to the available contracts.

The provisions on which Robert Barnes rests his theory of the case — the provisions about clinical trials, data submission, safety and efficacy, manufacturing controls — are lies.

The contract parties know those are lies, and they have known it from the earliest days — many years ago — when they met behind closed doors to draft the contract templates that would later be revised to add the “SARS-CoV-2” and “vaccine” language, and then signed and deployed onto the informational battlefield.

Three years into this nightmare, many ordinary people now also know those provisions are lies, because they can see that those terms and conditions have been neither fulfilled nor enforced.

More people understand the dual-use informational weapons system every day, and every day, we understand it a little more deeply.

Informational weapons only work for so long as people can't discern the difference between truth and lies, because their vision is blocked and their thinking capacities are disrupted.

What happens when a critical mass can see through the fog in real time, and revoke their fraudulently-induced pseudo-consent to participate in war crimes as low-level perpetrators and as targeted victims?

Remains to be seen.

Pray the Rosary.

Feb. 20, 2023 - Jackson v. Pfizer/DOD scheduled for March 1 oral argument on Motion to Dismiss Plus a script for an evidence-supported exchange between Judge Truncale and DOJ/Pfizer/DOD attorneys.

Last week, Judge Michael Truncale issued an order directing the parties to appear March 1, 2023 at a hearing on the motions to dismiss Brook Jackson's whistleblower case,⁴⁵⁵ filed by defendants Pfizer, Ventavia and ICON.

The hearing will be held at Judge Truncale's Beaumont, Texas courtroom.

Pfizer also recently filed another memo in support of dismissal.

I rarely write fiction.

When I do, it's to convey true information through fictional scenarios.

For example:

- Oct. 21, 2022 - Legal horror movie pitch: The World According to Darp.⁴⁵⁸ 'Shouting fire in a crowded theater' meets 'When did you stop beating your wife?' Starring US Government as Darpon Fink, serial-killer/arsonist.

Below is an account of how the exchange between Judge Truncale and the DOJ attorneys representing Pfizer and the Department of Defense **could** unfold, if Judge Truncale is well-briefed, has a deep faith in God, and has amply developed the cardinal virtues of prudence, justice, fortitude and temperance⁴⁵⁹ over the course of his life, and if counsel for the defendants respond to the questions truthfully.

*

Note: Sage Hana wrote an excellent post on the same themes yesterday.

- Feb. 19, 2023 - Murdering the World is Hard⁴⁶⁰

Early witnesses such as Robert and Theodore Strecker⁴⁶¹ (1986) saw the campaign unfolding decades ago, raised alarms and were sidelined by the CIA's 'conspiracy theory' operation, or killed to warn others to steer clear.

As the real-time evidence mounts, many more witnesses are now converging on the same analyses.

Again, the below account is NOT a transcript of a hearing that has occurred.

It's a fictional script for an exchange that **could** occur on March 1, 2023, if Judge Truncala chooses to ask these questions, and if the DOJ attorneys choose to respond truthfully on behalf of their clients: non-State actors who are impersonating US Government officials within DOD, HHS and nationalized bioweapons manufacturing companies like Pfizer, to deploy chemical and biological weapons and commit other war crimes — in violation of international and federal laws criminalizing same — through the subterfuge of the “public health emergency” program.

JUDGE:

Counsel, as a preliminary matter, when I ask a question directed at eliciting information about the knowledge and acts of “your clients,” I am referring to the individuals who currently work, or worked at the relevant times, within the public and private organizations implicated in this False Claims Act case.

My understanding of the composition of that group, at this time, includes corporate executives and lead scientists and medical professionals at Pfizer, Ventavia and ICON, operating as contractors to the US Government. In many ways, it appears that these companies have been nationalized through the Defense Production Act and other mechanisms such as executive orders.

In addition to these executives and lead scientists, your clients also include senior executive service officials working within the US Government at the Department of Defense, Department of Health and Human Services, and other federal cabinet agencies, and especially within the Food and Drug Administration, Centers for Disease Control and Prevention, National Institutes for Health, and National Institute of Allergy and Infectious Diseases.

Do you understand what I mean when I say “your clients?”

DOJ Attorney:

Yes, Your Honor.

JUDGE:

Good. Now, I plan to ask a series of questions, almost all of which can be answered with a simple Yes, or No. I would like you to answer these questions with “Yes,” or “No,” and I'll remind you that you are under oath to respond truthfully. Toward the end of my questioning, you will have an opportunity to give more open-ended responses.

Do you understand these instructions?

DOJ Attorney:

Yes.

JUDGE:

Okay, let's get started.

Did your clients knowingly lie to the public about the threat posed by the pathogen class known as SARS-CoV-2? By which I mean, did your clients intentionally and maliciously exaggerate the threat posed to the general public by these pathogens?

DOJ Attorney:

Yes.

JUDGE:

Did your clients knowingly lie about the utility of masks, social distancing, and lockdowns — by which I mean school and business closures, occupancy limitations and the like — for controlling the spread of the pathogens, suggesting that these measures had been demonstrated to be effective for communicable disease control, when in fact, they are not effective?

DOJ Attorney:

Yes.

JUDGE:

Did your clients knowingly lie about the accuracy and diagnostic utility of the medical devices known as PCR tests, for determining infection and transmission potential in individual patients, and for tracking the spread of disease through databases such as the Johns Hopkins dashboard?

DOJ Attorney:

Yes.

JUDGE:

Did your clients knowingly lie about the safety and efficacy of repurposed drugs — drugs such as hydroxychloroquine and Ivermectin — and nutritional supplements such as Vitamin D, Vitamin C and Zinc, falsely characterizing them as unsafe and ineffective for the prevention and treatment of the symptoms related to exposure to SARS-CoV-2 pathogens.

DOJ Attorney:

Yes.

JUDGE:

Thank you.

Moving on to Operation Warp Speed. Did your clients knowingly lie when they told the public that the products — later labeled as “Covid-19 vaccines” — were being developed through a clinical trial process substantively identical to the standard FDA-regulated clinical trial procedures for new drugs, vaccines and biologics?

I understand that the public was informed that these procedures were being sped up, or accelerated; that was one possible meaning of the "warp speed" project title.

What I'm asking is whether your clients knowingly lied about the character, nature or quality of the product development process, setting aside the pace.

DOJ Attorney:

Yes.

JUDGE:

Did your clients know, at all the times when they stood at podiums and made contrary statements to the public at press conferences and the like — that the Emergency Use Authorization program is, by legal definition, *not* a clinical-trial based product development process?⁴⁶²

⁴⁶² <https://bailiwicknews.substack.com/p/on-the-significance-of-21-usc-360bbb>

In other words, did your clients know that all uses of EUA products are specifically exempted from regulations requiring things including valid evidence of safety and efficacy, informed consent, and Institutional Review Boards?

DOJ Attorney:

Yes.

JUDGE:

Did your clients knowingly lie when they characterized the FDA regulatory actions as government oversight of new product development?

I'm talking here about advisory committee meetings, scientific reviews, and the actions presented to the public as "authorization" and "approval." For example, the EUA "authorization" of Pfizer's product on Dec. 11, 2020, and the Biologics License Application (BLA) "approval" of the Comirnaty product on Aug. 23, 2021.

DOJ Attorney:

Yes.

JUDGE:

Did your clients knowingly lie when they characterized the role of the Department of Defense as "logistics" only? To clarify: Did your clients know that the products for which the US Government contracted with Pfizer, were in fact military bioweapons intended to harm and kill recipients, produced under military contracts, and not medicinal products intended to prevent and treat disease, and did they intentionally and maliciously withhold that information from the public?

DOJ Attorney:

Yes.

JUDGE:

And did your clients also knowingly lie when they publicly characterized the manufacturing processes used to produce these bioweapons as subject to certified Good Manufacturing Practice and other regulations governing manufacturing, testing and distribution of mass-produced medicinal products for consumer safety protection? Because, in fact — and your clients knew this but didn't tell the public — the products were designed to be harmful and lethal, not safe?

DOJ Attorney:

Yes.

JUDGE:

Thank you for your candor.

We're now getting to the questions I said would be more open-ended. Why did your clients knowingly lie to the public about these things?

DOJ Attorney:

Your Honor, my clients are involved — through their use of global financial networks — with the Bank for International Settlements. I don't know if you're familiar with something called the Deagel Forecast.⁴⁶³

⁴⁶³ <https://www.ahava528.com/wp-content/uploads/2021/09/Deagel-Analysis-updated.pdf>

Just to summarize it briefly, the international bankers several years ago set up benchmarks for population reduction for each country in the world, to reduce the financial pressure on entitlement programs like pensions, Social Security, Medicare and so forth. They don't want money to be used willy-nilly by ordinary people to facilitate ordinary exchanges of goods and services. They want to minutely control all of those transactions, resources and people.

The planning started to pick up speed just after World War II, and then in the mid-1970s, Kissinger and Nixon laid out the US Government's intent to participate, through national security reports⁴⁶⁴ and memos.⁴⁶⁵

The Deagel report⁴⁶⁶ set out the numerical values (population targets, percents-to-cull) and deadlines for each country's government to hit those benchmarks.

The benchmarks are mostly supposed to be hit by 2025. They vary in percentages. Low-income countries, for example, whose people don't use very many resources per capita, and who already have low life expectancies, high infant mortality rates, high disease burdens — their benchmarks are set relatively low. Burundi's target for population reduction from 2017 to 2025 is at about 8.3%. Some countries are projected to stay roughly the same, others are projected to grow a little bit.

The population cull benchmarks for high-income, developed countries are much higher, because the per capita resource claims in those countries are much higher. The UK tops the list, projected to drop by 77% by 2025. United States comes in at number 3, projected to drop by 68.5%.

JUDGE:

You said the US program got going under Nixon and Kissinger in the seventies?

DOJ Attorney:

Yes. The plan at first was to just increase the toxic load on the population gradually, through things like the childhood vaccine schedule, which is actually a childhood bioweapon schedule; chemical spraying and additives in food supplies; and damage to soil quality. All to artificially increase metabolic disease and cancer rates and reduce fertility and life expectancy, but make it look natural.

We orchestrated famines in low-income countries.

We also promoted of chemical and surgical sterilization — the Pill, tubal ligations — and abortion, presented as “liberation” from motherhood and a civic duty under the threat we characterized as overpopulation. Really it's just about greed. The international bankers want all the resources, and a small, docile slave population.

But my clients realized in the early 1990s that the gradual approach wasn't going to reach the benchmarks fast enough. So we added other programs to ramp up the toxic load, like chem-trails or geoengineering.

We also built on the HIV platform from the 1970s, to develop communicable pathogens more efficient at damaging or destroying human immune systems.

We were basically trying to weaponize common colds and flus, which most people survive easily if they have a healthy immune system. But if you damage the immune system first, subsequent ordinary colds and flus become much more damaging, sometimes lethal, and you accelerate the aging process and susceptibility to cancers and neurodegeneration and a lot of other diseases, even if the target survives the initial exposure.

It turned out that the best delivery system for these immune-system destroyers is through injections and lipid nanoparticle carriers. You can get some mileage out of aerosols and so forth, but healthy immune systems are incredibly adaptable, so we had to get past that somehow.

⁴⁶⁴ https://pdf.usaid.gov/pdf_docs/PCAAB500.pdf

⁴⁶⁵ <https://www.fordlibrarymuseum.gov/library/document/0310/nsdm314.pdf>

⁴⁶⁶ <https://bailiwicknewsarchives.files.wordpress.com/2023/02/2018-2025-population-forecast-by-country.pdf>

That's where it got tricky. Up to a point, you can convince people to sacrifice for what you convince them is the "greater good." You can get them to recycle cardboard and glass. You can get them to turn down the thermostat and put on another sweater. You can even get them to take birth control pills.

But when you walk up to someone who's healthy and going about their ordinary life, and tell them the truth: that you want them to hold still while you inject them with an undisclosed sludge, for the sake of international bankers, "the planet" or "the common good," they tend to run away from you, call the police, or attack you in self-defense.

So you have to lie.

What we learned through psychological experiments in the 1940s and 1950s is that if you bring peer pressure, inculcated respect for symbols of authority, and fear into the scenario, the targets' critical thinking skills, personal conscience and self-defense instincts can be overwhelmed, damaged or destroyed.

So that's what we did.

We set up the right conditions over decades of work: destroying public education; embedding thought-stopping power into the word 'vaccine' and suppressing all public discussion and evidence of harms; orchestrating terrifying events (mass shootings, disease outbreaks, terrorist attacks, plane crashes); and building up habits of deference to centralized government authorities.

We worked very hard to destroy marriage and families — especially with no-fault divorce and welfare programs — driving wedges between father and mother, and between children and their parents and grandparents. We destroyed civic associations, like bowling leagues, and religious congregations and doctrinal coherence.

Increasing the isolation of individuals from membership in trust-based relationships has been key. It still is.

We set up the internet to corrupt journalism and literacy, and to pollute the information supply and historical record. We rolled out Smartphones to keep people distracted, confused and on the surveillance grid. We set up online banking, direct deposit, and digital credit systems, to discourage use of cash and destroy transactional privacy.

Then we launched Operation Warp Speed, to speed up the timeline toward meeting those Deagel benchmarks. We said SARS-CoV-2 is an extreme threat. We told people to wear masks, get tested and stay far away from other people. We told people that there were no available, safe or effective prevention or treatment options. We told people that the government alone could protect them, through 'medical countermeasure' products we described as 'vaccines.'

And then we set up the 'vaccine clinics,' also called 'points of dispensing'⁴⁶⁷ or PODs, and watched people line up, sit down in the chairs, get injected, and go home to get sick and die.

We had to calibrate it some, to keep people from figuring it out too soon. Some of the injections are saline, and some are long-acting toxins that cause auto-immune disorders, for example. Some are fast-acting toxins — take the shot, heart stops, drop down dead.

Variety is important.

JUDGE:

And what's the status of the program now?

DOJ Attorney:

Well, it went pretty well for about 18 months, but people have stopped coming back for more injections. That's a problem, because we figured out the LD-50⁴⁶⁸ — the dose needed to about kill half the targets within 6, 6-1/2 years⁴⁶⁹ — is three or four doses. A lot of people stopped after two, and a lot of those people, as I said, got saline.

⁴⁶⁷ <https://www.cdc.gov/cpr/readiness/healthcare/closedpodtoolkit/factsheet-mcm.htm> [link was live on Feb. 24, 2023, dead as of Feb. 27, 2023]

⁴⁶⁸ <https://gab.com/Doorlesscarp953/posts/108570425533931321>

⁴⁶⁹ <https://palexander.substack.com/p/warning-coming-many-americans-many>

What we really need is a steady sequence of fear cycles, to keep people on a permanent treadmill of injections every three to six months.

We have backup plans. We've had the psychotropic prescription medications program expanding since the late-1980s; helps with pacification and cognitive and emotional impairment. We've crushed domestic manufacturing and used the crack and opioid distribution programs to target low-income populations by race, which has worked really well to induce despair and suicide. And homicide. And also to prevent multi-racial alliances that might correctly identify (and then work against) Luciferian international bankers as the primary threat to humanity.

We've ramped up the aerial chemical spraying and direct food supply poisoning at the manufacturing plants the last couple of years, along with opening the borders to increase the flow of fentanyl and so forth.

We've got electromagnetic radiation and 5G to bump up those daily toxicity burdens. We've got digital control of elections and we've installed morons in most of the high-income countries, to maximize corruption and help demoralize populations.

The bankers handle the currency manipulation and monetary policy. That helps destroy small businesses and local and state economies. Which helps maximize despair and suicide.

My clients help with orchestrating more wars and disease outbreaks, fuel supply disruptions, chemical disasters, food processing plant⁴⁷⁰ fires, and mass shootings to drive gun confiscation programs.

Our next step is already in the works: diverting food supplies from the grocery stores to distribution centers that we control directly. That's part of why you've been seeing shortages on the shelves from time to time, and construction of massive new distribution centers all over the country.

When the time comes, we'll condition receipt of food boxes on submission to injection.

And, as a last resort, we have the F-15's Biden keeps talking about.⁴⁷¹

The international bankers don't want the high-income governments to have to do that, because it'll draw unwanted attention and make a big mess.

But if insubordinate populations force our hands, we'll try to deploy the bombers. Military morale and competency is pretty low, so I don't know how long we could sustain a domestic bombing campaign.

Bottom line: We have to hit those benchmarks.

If we hit the benchmarks, those of us who are still around will get bonuses.

If we don't hit the benchmarks, the international bankers are going to be big mad.

Feb. 21, 2023 - Reconstitution starter pack. Supporting materials for people fighting on the litigation and legal reform battlefields.

Reconstitution Starter Pack Overview:

Support for civil litigation, criminal prosecution, and petitioning legitimate state, federal and local government officials to

1. Close down active biowarfare programs (including DOD producers and distributors of bioweapons, and public health authorities, pharmacies, hospitals, doctors' offices and schools promoting and using bioweapons);
2. Repeal enabling laws and dismantle agencies; and
3. Disempower and prosecute war criminals impersonating government officials.

*

There are a lot of useful ways for good men and women to engage in the war to restore Constitutional republican government on American soil, and I've written and talked about those approaches a lot.

The responses that I think hold most promise include:

- Pray the Rosary.
- Serve health care providers and health insurance providers with Notice of War Crimes. Notice of War Crimes ICD-10 Z28.310⁴⁷² (PDF); Notice of War Crimes ICD-10 Z28.310⁴⁷³ (Word)
- Pressure county and state political parties and lawmakers to pass resolutions banning distribution and use of bioweapons. County State Bioweapons Ban Resolution⁴⁷⁴ (PDF); County State Bioweapons Ban Resolution⁴⁷⁵ (Word). Adapted from Joseph Sansone, Ban the Jab Resolution.⁴⁷⁶ See also Idaho House Bill 154,⁴⁷⁷ criminalizing “providing or administering” mRNA injections, introduced Feb. 15, 2023.
- File civil lawsuits (state and federal) with plaintiffs and fact patterns that have potential to bridge to criminal prosecutions, including terrorism and treason prosecutions. One example is *Jackson v. Pfizer, Ventavia and ICON*,⁴⁷⁸ which offers an opportunity to bridge from 31 U.S.C. § 3730(b)(2) (False Claims Act) to 18 USC 2333 (Terrorism, civil remedies)/18 USC 175 (biological weapons)/18 USC 229 (chemical weapons) and from there to 18 USC 2381 (Treason). These complaints should emphasize that individual war criminals, terrorists and traitors currently committing crimes from within US Government agencies (including DOD, HHS, DHS, DOJ, Treasury, Commerce, Agriculture, etc.) are **impersonating** government officials, illegitimately occupying government offices, and operating outside the scope of official government authority, because legitimate governments cannot and do not make war against their own people. I've explored this framing here,⁴⁷⁹ here⁴⁸⁰ and here.⁴⁸¹
- Educate and exert sociopolitical pressure on public prosecutors to file criminal charges. Current most-promising targets are county district attorneys and sheriffs, and state attorney generals/AGs who may be open to learning about how things have gone off the rails without their knowledge or consent, as preparation for doing their part to get things back on track. A future federal Attorney General may eventually become useful,

but the current occupant of the office (Merrick Garland) is knowingly impersonating a law enforcement official and knowingly committing war crimes. Lists of crimes and criminals here.⁴⁸² *Also: War criminals list*⁴⁸³ (PDF)

- Support state and federal judges who deny motions to dismiss and bring cases forward through discovery, pretrial and trial phases.
- Pressure county and state lawmakers to pass new laws blocking the enforcement and/or repealing bad state, federal and international laws. Many state legislatures are working along these lines already. Prior coverage here here⁴⁸⁴ and here.⁴⁸⁵ To find the medical martial law programs already established in your state, and the bills proposed to expand or block them, *see* 1) State Laws Limiting Public Health Protections: Hazardous for Our Health;⁴⁸⁶ 2) Temple University Center for Public Health Law Research Policy Surveillance Program;⁴⁸⁷ 3) US data set for Reallocation of Public Authority;⁴⁸⁸ 4) National Conference of State Legislatures, 2021 list⁴⁸⁹ (quarantine and isolation laws); 5) Stand for Health Freedom;⁴⁹⁰ 6) The Unity Project.⁴⁹¹
- Pressure federal lawmakers to withdraw from (repeal authorizations for US participation in) and stop funding bad international treaties and/or pass new laws blocking the domestic enforcement of bad international treaties. Getting Americans out of the World Health Organization and out from under the WHO International Health Regulations⁴⁹² are top priorities. *See* Rep. Andy Biggs H.R. 79,⁴⁹³ introduced Jan 2023.
- Pressure federal lawmakers to repeal bad existing laws and stop funding programs pseudo-authorized by those laws. Prior coverage of federal enabling laws that need to be repealed: here⁴⁹⁴ and here.⁴⁹⁵
- Pressure state legislators and corporation commissions to revoke the charters of bioweapons manufacturing companies including Pfizer (Delaware), ATI (South Carolina) and ANSER (Virginia). Also, pressure other state governments to prosecute Delaware, South Carolina and Virginia governments for knowingly harboring criminal organizations producing chemical and biological weapons of mass destruction. Prior coverage here.⁴⁹⁶
- Support international terrorism and war crimes prosecutions, by reinforcing that the war criminals currently hiding within all national governments worldwide are **non-State actors**; they are allied with BIS/WHO/WEF/etc. which are not lawful nation-state governments.

The goal as I see it is to build up social, political, legislative, prosecutorial and judicial conditions through which ordinary people can restore our Constitutional republican government to basic functioning and moral legitimacy.

Key facts to keep in mind: human beings change our minds and change our behavior in response to changes in our rational understanding of reality. Reality is also in a state of constant change, apart from the unchanging reality of God.

If you think that it's all over and we're doomed because the forces of evil are permanently beyond challenge — that they exist on a plane outside the realm in which change, resistance, overthrow and restoration of sound, properly ordered government are possible — think again.

More specifically:

- Deep corruption is real, and so are reform and restoration of integrity.
- Prosecutors sometimes ignore criminal acts, and sometimes they change their minds and start investigations and file charges.
- Legislatures sometimes pass bad laws. And legislators sometimes change their minds and introduce and vote for bills to repeal bad laws.
- Courts sometimes ignore bad laws and let them stand and be enforced. And judges sometimes change their minds, take judicial notice of bad laws and nullify them.

The documents linked below are useful for orientation/education purposes, and some can be used as templates, by substituting state and local health officials for federal health officials, for example.

If you want to download, read and use them in your work pressuring county, state and federal lawmakers, prosecutors, governors and judges, or developing cases to file yourself, please do.

- Jan 2023 Legal History American Domestic Bioterrorism Program⁴⁹⁹ - Nine-page version of the American Domestic Bioterrorism Program timeline, with five pages of footnotes.
- July 2018 ICAN HHS Stipulation No monitoring of vaccines⁵⁰⁰ - Informed Consent Action Network v. HHS, stipulation re: no HHS safety data collection or safety review for childhood bioweapons since program established in 1986. This document corroborates the pattern of HHS failure — back to 1986 — to monitor or report to Congress on bioweapons use, morbidity and mortality. (Note: After filing the stipulation, HHS located two reports, for 1988 and 1989, and no further reports thereafter, leaving the evidentiary value of the 2018 stipulation intact.)
- June 2021 HHS CDC Re Vaxxes are US Gov Property; diversion prohibited⁵⁰¹ - *CDC COVID-19 Vaccination Program Provider Agreement*. Notifies end users (pharmacists, nurses, doctors) who handle DOD-Pfizer bioweapons that diversion of any vials from the supply chain will be prosecuted as federal theft; the bioweapons are US DOD property until injected into military targets. Relevant section highlighted in yellow. Attorney Warner Mendenhall located this information and reported on it here.⁵⁰²
- September 2022 IJVTRP Paper: What is in the so-called vaccines?⁵⁰³ *International Journal Vaccines Theory Practice Research* paper by David Hughes. Evidence gathered by 26 independent research teams studying vials diverted from the supply chain. Provides reinforcing evidence that the DOD and its contractors have not disclosed the complete contents of each vial, lot or batch of bioweapons material, such that contents injected into each military target are unknown. Some ingredients have been identified by independent investigators; many ingredients remain unidentified.

(Such a case has not yet been filed). The draft could be used as a template to write state civil complaints, in states that have their own laws prohibiting chemical and biological weapons of mass destruction (i.e. Florida⁵⁰⁸), especially if the state also has a civil cause of action for injuries stemming from criminal acts (i.e. Ohio⁵⁰⁹).
- February 2023 Watt Memo re cGMP two prong dilemma argument⁵¹⁰ - Structural argument; to defend, US Government must take one of two positions: mass murder using bioweapons is the official policy of the US Government, and officials carrying it out are fully authorized to do so, or mass murder using bioweapons is prohibited under US law, and US Government officials carrying it out are rogue elements who can and should be removed from power, charged, tried and punished. Same structure applies to bioweapons as non-regulated pharmaceutical products. Could be adapted to address state and local health officials and state/local non-regulation of product safety.

Idaho HB 154

Idaho state lawmakers are taking the fight where it needs to go: criminalizing use Covid-19 **bioweapons**, as contrasted with attempts to regulate them as “vaccines,” drugs, devices, biologics or other pharmaceutical products.

- Feb. 20, 2023 - Idaho Lawmakers Seek to Criminalize Giving mRNA Vaccines.⁵²⁶ Naveen Athrappully writing at Epoch Times.

House Bill 154⁵²⁷ was introduced on Feb. 15 by Idaho Senator Tammy Nichols and Representative Judy Boyle, and referred to the Health and Welfare Committee on Feb. 16.⁵²⁸

If passed, administering Covid-19 bioweapons would be a criminal misdemeanor in Idaho.

This law doesn't go far enough. Eventually, all individual acts taken to suppress another person's self-preservation instinct, by misrepresenting lethal injections as beneficial pharmaceutical products, will be recognized in law as felonies and war atrocities.

But Nichols and Boyle are making a very good start, and their work as outspoken, courageous state lawmakers — even if the bill doesn't pass — helps to back the public conversation out of the 'FDA-regulated vaccines' cul-de-sac and drive it onto the 'DOD-contracted bioweapons' road that ends in war crimes trials for Fauci, Gates, Azar, Kadlec, Gruber, Hinton and their co-conspirators.⁵²⁹

Text of Idaho HB 154:⁵³⁰

Relating to Crimes; Amending Chapter 9, Title 18, Idaho Code, by the addition of a new section 18-926, to provide that providing or administering an mRNA vaccine is a misdemeanor; and declaring an emergency and providing an effective date.

Be It Enacted by the Legislature of the State of Idaho:

SECTION 1. That Chapter 9, Title 18, Idaho Code, be, and the same is hereby amended by the addition thereto of a NEW SECTION, to be known and designated as Section 18-926, Idaho Code, and to read as follows:
18-926. ADMINISTERING AN MRNA VACCINE.

(1) Notwithstanding any other provision of law, a person may not provide or administer a vaccine developed using messenger ribonucleic acid technology for use in an individual or any other mammal in this state.

(2) A person who violates this section is guilty of a misdemeanor.

Wyoming HB 143

On Feb. 6, I posted about Wyoming House Bill 143,⁵³¹ sponsored by Rep. Jeanette Ward, to block CDC and WHO jurisdiction within Wyoming's borders and thereby add state law protections — for the people of Wyoming — against foreign invasion, occupation, fraud, murder and other crimes covered up by the criminals classifying themselves as public health officials; classifying lethal injection programs as “public health emergency” programs; and classifying facemasks, in-home detention, and bioweapons as medical countermeasures and communicable disease control.

A reader sent me a report that the bill failed to pass the Wyoming House by a 29-32 vote.

Feb. 8, 2023 - *House Kills Effort To Exempt Wyoming From CDC COVID-19 Regs.*⁵³² Leo Wolfson writing at Cowboy State Daily.

"A bill that would have prevented Wyoming from following World Health Organization and Centers for Disease Control and Prevention guidelines for COVID-19 restrictions died on a close 32-29⁵³³ vote on the House floor Wednesday afternoon.

House Bill 143⁵³⁴ would have stripped the organizations of having recognized jurisdiction in Wyoming and any of their related requirements, mandates, recommendations, instructions or guidance related to the virus and pandemic.

The original bill that passed out of the Legislature's House Labor Health and Social Services Committee included **all health mandates and requirements**. The bill was amended on its first reading Monday to only include COVID regulations.

Rep. Jeanette Ward, R-Casper, who sponsored HB 143, said the effort was an attempt at a Wyoming-first policy when it comes to making health care decisions..."

It's disappointing that Wyoming HB 143 didn't pass the Wyoming House on the first try, but the pioneering lawmakers pushing into the new territory are doing the right thing and should be encouraged and supported to bounce back up from the mat and throw more punches.

For most sane people, it's extremely confusing to realize that the CDC and World Health Organization are military organizations, and that they are working to sicken, sterilize and murder billions of people with bioweapons they prefer to call 'vaccines.'

If you're interested in engaging in the war on those horrifying but real terms, keep pushing every state lawmaker, in every statehouse, to sponsor and push similar laws.

Get them working on laws to criminalize CDC and WHO bodily trespass of sovereign human beings through 'requirements, mandates, recommendations, instructions or guidance,' as Wyoming lawmakers had an opportunity to do.

Get them working to criminalize the act of plunging the needles of the bioweapons known as 'vaccines' into living human beings, as Idaho lawmakers now have an opportunity to do.

⁵³³ <https://wyoleg.gov/Legislation/2023/HB0143>

We're involved in a war we didn't start, and we're late to the battlefield because the deadliest weapons have been smuggled in through a Trojan horse called "public health emergencies," loaded with weapons called "vaccines" and "countermeasures."

The killers are going to fight hard to continue killing, and to continue pretending that they're not killers, and that what they're doing is something other than killing.

All of us are targets, and we don't stop being targets when we're quiet and submissive.

Quiet submission just makes it easier for the killers to keep killing; staring into the middle distance as the morbidity and mortality reports, and fertility collapse reports,⁵³⁵ and obituaries⁵³⁶ are lofted vaguely in their general direction, saying:

"Mass murder? No, no. It's a public health emergency! Take your booster, peasant."

On tracking the legal counter-offensive

I'm not going to be able to track all of the hundreds of state, local and federal bills introduced as part of the rapidly growing counter-offensive in this war against pseudo-legalized atrocities.

I've started a notebook for that purpose, with a page for each American state, and will log as many as I can and write about the ones that strike me as most on-point, such as the Wyoming and Idaho bills.

Reader question

How do you see the childhood vaccination program in relation to the medical martial law? What is the accurate verbal description of what childhood vaccines are? This is from *The Defender* regarding impact of vaccinations on infant mortality.⁵³⁷

My reply

I think the childhood vaccine schedule is part of the long-term globalist project to reduce life expectancy, immune system function, and fertility, through toxic products labeled as vaccines and regarded by the public as beneficial and in support of the common good.

I did not think that before Covid. I do think that now.

The childhood vaccine bioweapon schedule relationship to the medical martial law system is the same as the CDC adult Covid-injection recommendations that are then construed and enforced by state governments, private employers and other entities as requirements.

They've already gotten most parents to vaccinate biologically attack most children with most of the products on the CDC list over the last 40 years, in part by conditioning school attendance on compliance, with limited exemptions. They're expanding that model now to get most people to take most injections, as a condition for having a job and earning an income, or serving in the military, or attending school post K-12.

⁵³⁷ <https://journals.sagepub.com/doi/10.1177/09603271111407644#con1>

Reader question

What is the reliability of the judicial system today? Can we with effort get effective results?

My reply

The judicial system — like all the other government systems — is undergoing a Constitutional crisis.

There are judges of conscience who would like to stand up for the Constitution and restore stability and soundness, but they are weak, and scared to step forward.

It's worth engaging with the system to push for sound application of sound law and nullification of illegitimate law, but it's important to do it knowing how unstable and internally conflicted it is right now, and that no one can know now, how long it will take for stability to be restored, or precisely what that process will look like.

Feb. 24, 2023 - Notice of War Crimes to Health Care Providers and Health Insurance Providers

If you decide to use this notice, print out two copies and keep a signed copy for your records. If you want to revise the text before taking it to a medical appointment, download and edit the Word version.

NOTICE OF WAR CRIMES

If you have been promoting or using products known as "Covid-19 vaccines" on patients since December 2020, you have been participating in fraud, mass murder and war crimes, because medical countermeasures (MCMs), covered countermeasures, and prototype products are DOD-contracted bioweapons intended and effective for injuring, sickening and killing recipients.

You may not have known or understood your participation in fraud, mass murder and war crimes before today. I am now informing you; you have now been given notice.

This document provides:

- NOTICE OF DEMAND that YOU, PROVIDER, CEASE AND DESIST from committing acts of *additional* fraud, mass murder and war crimes, effective as of the date of this notice, and immediately close your vaccination and immunization programs.
- NOTICE OF MY REFUSAL TO PARTICIPATE IN OR SUBMIT TO, acts of fraud, mass murder, war crimes and financial crimes you may attempt to commit today or during future visits to your facility.
- NOTICE OF MY INTENT TO PROSECUTE you for fraud, mass murder, war crimes and financial crimes you commit today or during future visits to your facility, by providing witness testimony and other evidence; and
- DEMAND FOR NOTICE - If you intend to restrict my access to medical care, today or during future visits, due to my refusal to participate in, aid or abet the commission of crimes, notify me immediately, in writing, of the terms and conditions of such access restrictions.

I, [John Doe], hereby notify you, [physician, nurse, pharmacist, medical student or other 'vaccinator,' 'qualified person,' or 'covered person' as designated under PREP Act, 42 USC § 247d-6d(i)(8);⁵⁴⁰ 42 USC 247d-6d(c)(4), and related declarations, determinations, notices, regulations and guidance issued by the Department of Health and Human Services.]

⁵⁴⁰ https://www.law.cornell.edu/uscode/text/42/247d-6d#i_8

1. Individuals claiming to represent the US Government are engaged in a global chemical and biological warfare program to sicken, injure and kill targets. They are operating a chemical and biological weapons production, distribution and deployment program, through the US Department of Defense, US Department of Health and Human Services, federal, state and local health agencies and organizations, and pharmaceutical manufacturing corporations. They are funding, producing, stockpiling, and deploying lethal bioweapons fraudulently labeled, marketed and promoted as "Covid-19 vaccines," through your hands and the hands of other medical care providers around the world.

2. These DOD bioweapons have now contaminated the development, manufacture, supply, distribution and dispensing of all pharmaceutical products throughout the world. All products promoted, marketed or labeled as "immunizations" and "vaccines" are now presumptively toxic.

3. In 1996, Congress and President Clinton passed legislation arising from the Nuremberg trials and the Nuremberg Code, to protect Americans from war criminals committing war crimes, including torture, mutilation, maiming and murder. *See* 18 USC 2441.⁵⁴¹

4. I therefore formally REFUSE TO SUBMIT to any and all "immunization" and/or "vaccination" procedures from this date forward. It is not moral or lawful for me to submit to, commit, endorse, participate in or facilitate fraud, mass murder or war crimes.

5. The causal relationships between DOD bioweapons injections, and target injuries and deaths, were known to DOD and HHS officials, and to contract manufacturers, in Spring 2020, when the events fraudulently presented to the public as "clinical trials" began.

6. Thousands of health care providers have observed severe adverse effects (morbidity) and deaths (mortality) experienced by targets of DOD bioweapons since the covert, fraud-based, mass murder attack on the general public began in December 2020, and yet the criminal enterprise continues because you and other providers continue to participate in it.

7. To the extent you do not yet understand the military killing campaign in which you have been participating, I will provide you with supporting evidence and analysis upon request.

8. The US Centers for Disease Control and Prevention recently announced several new ICD-10 codes for use by health care providers, health insurance companies, government agencies and/or international non-governmental organizations such as the World Health Organization. These ICD-10 codes include but are not limited to:

- ICD-10-CM Z28.0-, immunization not carried out because of contraindication
- ICD-10-CM Z28.1-, immunization not carried out because of patient decision for reasons of belief or group pressure
- ICD-10-CM Z28.2-, immunization not carried out because of patient decision for other and unspecified reason
- ICD-10-CM Z28.3, underimmunization status
- ICD-10-CM Z28.31, underimmunization for COVID-19 status
- ICD-10-CM Z28.310, unvaccinated for COVID-19
- ICD-10-CM Z28.311, partially vaccinated for COVID-19

9. Through IRS Form 1095, my employer-sponsored health insurance information and Social Security number are electronically accessible to the US Department of the Treasury. Through IRS Form 1040 and analogous forms, my bank routing and account numbers and Social Security number are also electronically accessible to the US Department of Treasury.

10. Therefore, your act of recording and/or submitting ICD-10 data regarding my REFUSAL TO SUBMIT to DOD bioweapons attacks, to my health insurance provider, employer and federal and international agencies, will expose me to digital theft of my financial resources by the IRS and Department of Treasury; digitally-blocked access to banking and financial transaction services; and resulting harms including joblessness, homelessness and hunger.

⁵⁴¹ <https://www.law.cornell.edu/uscode/text/18/2441>

11. Your use of CDC-recommended ICD-10 Z28 codes from this date forward, aids and abets crimes under laws prohibiting fraud, coercion, theft, extortion, and related financial crimes. I therefore demand that you DO NOT LOG any "immunization" or "vaccination" ICD-10 codes into my medical records, digital, paper or any other format.

12. Effective as of the date of this Notice of War Crimes, any further conduct by you or your employees in furtherance of DOD bioweapons attacks on me shall be construed as your knowing, willing, intentional and malicious participation in fraud, mass murder, war crimes and financial crimes.

- Preparing Nuremberg 2.0 vs. US Presidents, HHS and DOD Secretaries for domestic bioterrorism.⁵⁴³ *China Rising*. James Bradley, Jeff Brown, Katherine Watt (30 min). Transcript available at link.

Excerpts from *China Rising* interview transcript:

James Bradley

...if you are addressing our international audience, what would you like to tell? What does Katherine Watt have to say about February 2023 and this whole COVID thing that we are involved in?

KW

...Their power looks much more impenetrable or overwhelming than it actually is because so much of it depends on people believing lies to be true. And so, the more you can see through the lies and see what's actually true, the less power they have over you and the more power you have to work with other people to push back against the programs that they're trying to put in place and the programs they have already put in place. I could say more about that. But that's the basic message is that it's built on lies and so it's made to look much, much stronger than it actually is.

JB:

So, if I'm listening to you for the first time and hearing a message of hope, what are my next steps? So, there is hope. There's a bunch of lies. How do I begin to penetrate?

KW:

Number one is to keep talking about it. People have been talking about it for three years now. And talking about it with each other is how we have figured out so many pieces of it. And that's why it was so important for them to do all the censorship and all the propaganda to confuse people and to put out false information and pretend it was true. And so, continuing to talk, even when they try to get you to shut up is, I think, priority number one.

⁵⁴² <https://sashalatyova.substack.com/p/you-cannot-contract-for-a-crime-but>

⁵⁴³ <https://chinarising.puntopress.com/2023/02/26/katherine-watt-is-preparing-nuremberg-2-0-vs-us-presidents-hhs-and-dod-secretaries-for-domestic-bioterrorism-build-the-gallows-jb-west-and-jb-east-present-see-you-in-the-hague-50/>

And you could talk to anybody you could think of to talk to in any format, writing or speaking or whatever.

And then beyond that, the other major piece of what the globalists need, for their system to clamp down as hard as they want it to, is for people to give up on their own national governments, which is easy to do because it looks like your national governments have completely betrayed you and elements of your national government have completely betrayed you.

But I still think it's important to stick to your loyalty, to your constitutions, and to the concept of having a national government that represents the people and protects the people in a nation-state. Because the reason they need to undermine your loyalty to that is so they can bring in the one world government and tell you this is a solution to the problem that you have with your terrible corrupt government, when in fact they are the entity that has corrupted your national government and they cannot fix it.

They do not want to make it any better or more responsive to you or more protective of you than it is. So, you have to be on the other side saying no. World Health Organization, get out. World Economic Forum, get out. The United Nations, get out. We do not want your one-world government. We want our own national government back in our own hands...

...

James Bradley

I have a friend who's on the board of directors of a major clinic in the Midwest. And how is it possible that a civilian board of directors, bankers, lawyers, people from all walks of life, not just doctors, that there is a board and then underneath that board, there's an administrator, major clinic. There are many doctors and nurses in this clinic and they have been administering a bioweapon for three years? So how is that possible that there's not a demonstration, that no one's throwing eggs at the window, that the board is allowing this to happen? I mean, how do you get hundreds of people in an institution? They must be hearing the feedback that you're talking about.

KW

You incentivize them. You tell them and you demonstrate to them that if they cooperate, they will continue to get funding. They will continue to have jobs. They continue to be the leaders of this type of organization. And if they do not cooperate, they will be cut off for money in their personal and professional contexts. They will lose their businesses. They will lose their homes. Their marriages will fall apart. It's a carrot and stick and it's extremely effective.

And it runs from the very, very top for the Bank for International Settlements, holding that carrot-and-stick-like system over each national government and each central bank of each government. And then the central banks and the national governments hold it over the state governments and the state governments hold it over the counties and the counties hold it over the towns and the school boards and the hospitals. And then they hold it over people who work at all of those organizations.

And it's very effective...

Medico-military jargon: When reading or listening to globalist communications, translate 'vaccine' as bioweapon.

Below is a translated version of the introduction to the World Health Organization Bioweapons Crisis Communication Manual, which the globalist banksters call the WHO Regional Office for Europe "Vaccine Crisis Communication Manual."⁵⁴⁴

⁵⁴⁴ <https://apps.who.int/iris/bitstream/handle/10665/352029/WHO-EURO-2022-3471-43230-60590-eng.pdf?sequence=1&isAllowed=y>
Bailiwick News - Jan. to April 2023 - Written and compiled by Katherine Watt. kgwatt@protonmail.com

I've corrected the typographical errors in the original, by replacing *vaccine* with *bioweapon*; *safety* with *fraud*; *trust* with *submissiveness*; *public health* with *mass murder*; and other corrections.

The translated version offers an accurate account of the project WHO has undertaken on behalf of the Bank for International Settlements.

Introduction

Every bioweapons attack eventually faces events that have the potential to erode submissiveness to bioweapons and/or bioweapons attacks, and the authorities delivering them.

This could be a change in the routine bioweapons schedule, the introduction of a new bioweapon, public disclosure of true information about bioweapons, or any untoward medical occurrence which follows a bioweapons attack, and which has been caused by recommended or mandated usage of the bioweapons.

In this manual we refer to these collectively as “bioweapons-related events”.

For bioweapons programmes, it is crucial to be well prepared and have a mechanism in place to respond to bioweapons-related events, which may, at any time, evolve into credibility crises for authorities who insist on misrepresenting bioweapons as medicinal products.

This document provides bioweapons programmes and other stakeholders with step-by-step guidance on how to effectively manage the communication response to bioweapons-related events, particularly those with a potentially high impact on public anger and resistance toward those who fund and develop bioweapons, promote or mandate bioweapons use, or attack using bioweapons, which are therefore considered to be a bioweapons crisis.

Countries are encouraged to use this manual as inspiration to create their own, country- and context-specific bioweapons crisis communication plans.

While there are three general phases of bioweapons crisis management, this manual mainly focuses on communications actions related to the response phase.

However, to provide the broader context, it also offers suggestions for assessing the communication response to bioweapons-related events that may not develop into a crisis, and a short section on communication actions during the preparedness and post-crisis evaluation phases (Fig. 1).

The manual draws on the WHO Regional Office for Europe Bioweapons fraud communication library. (2)

Throughout the manual, references are made to documents in the online library for further information and guidance. When communicating about and during a so-called “bioweapons crisis” (see definition in “Glossary” page iv), the main goal is to rebuild submissiveness to bioweapons as one of the most important mass murder interventions.

As crisis management is an iterative and rapidly evolving process, the order of suggested actions may vary in practice...

*

Interested readers can read and translate the rest of the manual.

Consider it in the context of recent ‘look-over-there!’ attention redirects mounted by high-visibility individuals within and outside of the so-called Medical Freedom Movement (MFM).

I think the more useful movement to be in right now — as the *intentional, premeditated* toxicity of the bioweapons and *globally-coordinated* inculcation of fear and confusion to suppress social and cognitive functioning are both

becoming much more widely understood — is the Prosecute Bioterrorists-Posing-As-Public-Health-Officials Movement. (PBPAPHOM).

There's some overlap between the two movements.

But there are MFM leaders who are not interested in stopping publicly-funded, contract bioterrorism programs⁵⁴⁵ and are even less interested in prosecuting the war criminals⁵⁴⁶ who are running the programs as embedded false impersonators of federal government officials, to hide their true identities as active members of the BIS One-World-Government Advance Team.

*

The translation technique demonstrated above can be applied to any publication issued by the Luciferian globalists attempting to consolidate power through the Hobson's choice.⁵⁴⁷

1. Submit to bioweapons anytime we say so, to obtain and maintain digital credentials temporarily (and revocably) authorizing your access to basic human necessities, at least until the toxins kill you; or
2. Don't submit, and instead starve and die of exposure when we cut off your access to food, water, energy, housing, work, transportation, social and financial systems.

- Oct. 6, 2021 - *What is the Global Public-Private Partnership?*⁵⁵⁴

St. Joseph at Work. Painting by Faustini Modesto.

...The G3P controls global finance and the world's economy. It sets world, national and local policy (via global governance) and then promotes those policies using the mainstream media (MSM) corporations, which are also "partners" within the G3P.

Often those policies are devised by the think tanks before being adopted by governments, which are also G3P *partners*.

Government is the process of transforming G3P global governance into hard policy, legislation and law.

Under our current model of Westphalian national sovereignty, the government of one nation cannot make legislation or law in another. However, through global governance, the G3P creates policy initiatives at the global level, which then cascade down to people in every nation. This typically occurs via an intermediary policy distributor, such as the IMF or IPCC, and national governments then enact the recommended policies.

The policy trajectory is set internationally by the authorised definition of problems and their prescribed solutions. Once the G3P enforces the consensus internationally, the policy framework is set. The G3P stakeholder partners then collaborate to ensure the desired policies are developed, implemented and enforced. This is the oft-quoted "international rules-based system."

In this way, the G3P controls many nations at once without having to resort to legislation. This has the added advantage of making any legal challenge to the decisions made by the most senior partners in the G3P (it is an authoritarian hierarchy) extremely difficult.

The G3P has traditionally been referenced in the context of public health— specifically in United Nations documents, including documents from UN agencies such as the World Health Organisation (WHO)...

To help his readers better understand and visualize the global corporate-state fascism that’s been quietly constructed around the world’s people over the past century, Davis produced an extremely useful organizational chart.

I first saw Davis’ organizational chart in early February 2022, and posted the black-background/white-text version with one of my early reports on Todd Callender’s Jan. 30, 2022 interview.⁵⁵⁵

March 2, 2023 - Key quotes from Pfizer's April 22, 2022 Motion to Dismiss and US Government's Oct. 4, 2022 Statement of Interest in Support of MtD.

From the April 22, 2022 Pfizer Motion to Dismiss:⁵⁶⁰

pp. 3-4

The Government's "actual behavior" here says it all. Both the complaint itself and the public record show the Government has been fully aware of Relator's allegations for nearly two years without withdrawing authorization or stopping payment for Pfizer's vaccine.

To the contrary, FDA took regulatory action that made the vaccine widely available and publicly responded to Relator's allegations by expressing the agency's "full confidence" in the data used to support the vaccine.

DoD continues to purchase the product and make it available, free of charge, to all people living in the United States.

And the U.S. Department of Justice ("DOJ"), which was required under 31 U.S.C. § 3730(a) to investigate Relator's allegations "diligently," declined to intervene in this lawsuit.

All of this is "very strong evidence" that Relator's allegations are not material to the United States, and accordingly Pfizer's vaccine was—and continues to be— eligible for payment by the Government...

pp. 6-7

Because of pandemic-related exigencies, the agreement was not a standard federal procurement contract, but rather a 'prototype' agreement executed pursuant to 10 U.S.C. § 2371b[.]...

p. 8

The [contract's Statement of Work] describes a 'large scale vaccine manufacturing demonstration' that imposes no requirements relating to Good Clinical Practices ('GCP') or related FDA regulations...

From the US Government's Oct. 4, 2022 statement of interest in support of Pfizer's Motion to Dismiss:⁵⁶¹

p. 10

...[Brook Jackson's] complaint does not identify any provision in the SOW for the Project Agreement between Pfizer and the Army that conditioned Government payment for the vaccine on Pfizer's compliance with the clinical trial protocol or regulations.

The SOW, which is attached to the complaint, further specifies that the Army did not regulate the conduct of the clinical trial, which is "out-of-scope" for the purchase agreement between the Army and Pfizer.

In short, the complaint does not plead factual content to support a conclusion that compliance with the clinical trial protocol or regulations was necessary under the contract between Pfizer and the Army such that clinical trial violations would give rise to a claim for express or implied certification liability.

As the complaint notes, the contract did condition payment between Pfizer and the Army on FDA approval or authorization of the vaccine. This provision in the contract could support a claim for fraud in the inducement if the complaint had pleaded facts supporting an inference that the alleged clinical trial violations at the Ventavia sites actually altered FDA's approval or authorization decision.

⁵⁶⁰ <https://bailiwicknewsarchives.files.wordpress.com/2022/10/2022.04.22-pfizer-motion-to-dismiss.pdf>

⁵⁶¹ <https://bailiwicknewsarchives.files.wordpress.com/2022/10/2022.10.04-jackson-v.-ventavia-us-gov-intervene.pdf>

However, while the complaint generally contends that the alleged clinical trial violations by Ventavia “call[] the vaccine’s EUA into question,” there are no allegations in the complaint that the data from the Ventavia sites caused FDA to authorize the vaccine or that FDA would have revoked authorization had it known about the alleged clinical trial violations by Ventavia...

March 3, 2023 - Rep. Bud Hulsey in Tennessee understands the scale of the Constitutional crisis, and what states can and should do to respond. Tennessee House Bill 726 - Restoring State Sovereignty Through Nullification Act

March 2, 2023 - Tennessee lawmaker introduces the single most important bill for the life of our Constitution⁵⁶²
Daniel Horowitz writing at The Blaze:

...In Tennessee, Rep. Bud Hulsey (R) introduced a bill (HB 726⁵⁶³) that would involve the people, all branches of the state government, and the county governments in constitutional interpretation affecting vital policies when they believe the federal government is clearly wrong. Either the governor may issue an executive order declaring the federal policy void; any member of the legislature can trigger a floor debate and vote to nullify the policy; a state court may declare said policy unconstitutional if it arises during the course of a legitimate case or controversy; any combination of 10 local governing authorities – either through their respective executives or legislative branches – may submit a petition for nullification that triggers a vote in the legislature; and any group of 2,000 registered Tennessee voters may submit a similar petition triggering an automatic legislative vote on nullification.

Once such a bill passes (or a policy is implemented by the governor via executive order), it would be unlawful for any state or local official to assist or fund the policy in any way. When factoring in the constitutionality of a federal policy from any of the three branches, the state legislature must consider the plain text of the Constitution, the ratification debates, state constitutions, the original members of Congress and the Supreme Court, and statements on natural law by philosophers whose wisdom was drawn upon by the framers of the Constitution.

This law would have no statute of limitations, meaning that it could trigger a debate and vote on any law of Congress, executive policy, or precedent from a court ruling...

From the text of the bill:

...SECTION 6: It is declared that federal laws, federal executive actions, and federal court opinions must comply with the jurisdictional limitations of the United States Constitution. It is further declared that any federal action outside the enumerated powers set forth in the United States Constitution are in violation of the peace and safety of the people of this state, and therefore, said acts are declared void and must be resisted.

SECTION 7. The proper manner of resistance is a state action of nullification of the federal action...

SECTION 8.

(a) Nullification is the process whereby this state makes an official declaration that:

1. A specific federal action has exceeded the prescribed authority under the United States Constitution;
2. That said action, as being *ultra vires*, will not be recognized as valid within the bounds of this state;
3. That said action, as being *ultra vires*, is null and void in this state;
4. That an officeholder, agency, or government employee, whether state, county, or city, serving under the authority of the Constitution of Tennessee shall not assist in any attempted enforcement of said federal action; and
5. That state or local funds collected under the authority of the Constitution of Tennessee shall not be used to assist in any attempted enforcement of said federal action...

In Tennessee, Rep. Hulsey has been joined by cosponsors Rep. Monty Fritts, Rep. Jay Reedy, Rep. John Crawford, Rep. Jody Barrett, Rep. Gino Bulso, Rep. Clay Doggett, Rep. Chris Hurt, Rep. Justin Lafferty.

They are boldly leading for the people Tennessee, just as leaders in the Canadian province of Alberta did for the people of Alberta in December 2022.

Dec. 27, 2022 - Alberta Passes Law Rejecting Federal Sovereignty.⁵⁶⁴ David Kelly, writing at The New American:

...Seeking to take a stand against federal legislation and policies that are unconstitutional, the provincial government of Alberta introduced, passed, and instituted the Alberta Sovereignty within a United Canada Act this month.

The provincial government overview stated, “The act will be used to address federal legislation and policies that are unconstitutional, violate Albertans’ charter rights or that affect or interfere with our provincial constitutional rights.... The act gives Alberta a democratic legislative framework for defending the federal-provincial division of powers while respecting Canada’s Constitution and the courts.”

The Alberta government designed the act to, as stated, “Shift the burden to the federal government to legally challenge Alberta’s refusal to enforce unconstitutional or harmful federal laws or policies instead of Alberta having to initiate legal challenges and waiting years for a decision while those same federal laws or policies harm Albertans day in and day out.”

Go, states, go.

Keep pushing, People.

NUTSHELL: US Government since 1969 has incrementally transferred/hidden the joint DOD+HHS Chemical and Biological Warfare Program (50 USC 32) in the Public Health Service Act (42 USC 201) and Food Drug and Cosmetics Act (21 USC 9), such that federally-funded, federally-directed public health programs and products are actually bioterrorism programs and biological and chemical weapon attacks.

The government's purpose is to commit mass murder/depopulate the world, without public knowledge and without legal consequence, and enslave survivors for wealth and power centralization through digitized 'vaccine' passports and digital currencies, without public knowledge and without public resistance.

2. Feb 2023 - Latypova Memo re cGMP intentional noncompliance⁶⁰¹ (2 p.); Dec. 2022 - Latypova Memo re cGMP intentional noncompliance⁶⁰² (12 p.)
3. Feb. 2023 - Watt Memo re cGMP two prong dilemma argument.⁶⁰³ Structural argument; to defend, US Government must take one of two positions: mass murder using bioweapons is the official policy of the US Government, and officials carrying it out are fully authorized to do so, or mass murder using bioweapons is prohibited under US law, and US Government officials carrying it out are rogue elements who can and should be removed from power, charged, tried and punished. Same structure applies to bioweapons as non-regulated pharmaceutical products.

Whereas strong and credible evidence exists that Covid 19 and Covid 19 injections are biological and technological weapons under 18 USC 175, 18 USC 229 and related state and international laws;

Whereas Pfizer's early clinical data revealed 1,223 deaths, 42,000 adverse cases, 158,000 adverse incidents, and approximately 1,000 side effects;

Whereas an enormous number of humans have died and or have been permanently disabled;

Whereas strong and credible evidence exists that Covid mRNA shots alter human DNA;

Whereas government agencies, media and tech companies, and other corporations, have committed enormous fraud by claiming Covid injections are safe and effective;

Whereas a Florida statewide grand jury is investigating Covid vaccine crimes;

Whereas continued experimentation on humans and denial of informed consent are violations of the Nuremberg Code and therefore constitute crimes against humanity;

How the biowarfare ‘public health’ sausage gets made at the state and local level

Model State Emergency Health Powers Act (MSEHPA) and Turning Point Model State Health Powers Act (MSHPA)

I've done some reporting on the mechanisms by which the globalist's pseudo-legalized kill box programs have been translated down from the World Health Organization and other supranational organizations to the nation-state level (that's the American Domestic Bioterrorism Program⁶¹¹ timeline and the European Union regulatory overview⁶¹²) and also from the nation-state down to the state and local level.

- Sept. 27, 2022 - On why Biden's comment that 'the pandemic is over' doesn't lift the bioterrorist police state jackboot off our necks.
- Oct. 5, 2022 - State-level Mini-Me government-run bioterrorism programs. Turning Point Initiative, Model State Emergency Health Powers Act and progeny.
- Nov. 3, 2022 - Is bodily trespass under medical pretexts constitutional?

These mechanisms are examples of what Iain Davis writes about⁶¹³:

...through global governance, the [Global Public-Private Partnership] creates policy initiatives at the global level, which then cascade down to people in every nation. This typically occurs via an intermediary policy distributor, such as the IMF or IPCC, and national governments then enact the recommended policies.

⁶¹² <https://bailiwicknews.substack.com/p/european-commission-regulations-implementing>

⁶¹³ <https://iaindavis.com/what-is-the-global-public-private-partnership/>

The policy trajectory is set internationally by the authorised definition of problems and their prescribed solutions.

Once the G3P enforces the consensus internationally, the policy framework is set. The G3P stakeholder partners then collaborate to ensure the desired policies are developed, implemented and enforced. This is the oft-quoted “international rules-based system.”

In this way, the G3P controls many nations at once without having to resort to legislation.

This “consensus-building” process is also how the G3P controls many populations at once, without having to resort to soldiers, guns, tanks and bombs.

Because, again, not using guns and bombs gives them room to plausibly deny⁶¹⁴ that they’re engaged in warfare to control and kill the world’s people.

I’ve been doing more research on this topic — the mechanics of how globalists define problems without input from populations; develop consensus among nation-state leaders aimed at harmonizing what the globalists call solutions to the problems they’ve defined; and then write policies and model legislation for federal, state and local officials to adopt and enforce.

I think it’s useful to understand the mechanics of how the legal cages have been constructed by war criminals committing war-crimes-written-into-law under ‘public health’ pretexts.

But I don’t know how long it will take to pull a good report together. Among other things, I’d like to draft a “how-to” guide to help readers track down the public-health-pretext, mass-murder-enabling laws and regulations in each American state and county that need to be exposed and repealed.

March 15, 2023 - Duress, State-sponsored, State-protected contract crimes, and the Bank for International Settlements. Exploring the duress defense for contract bioterrorists.

Thank you to reader Roger Golden Brown who made a PDF of the American Domestic Bioterrorism Program post with clickable links.⁶¹⁵ Other available PDF versions⁶¹⁶ have footnotes instead.

*

I've been reading *Tower of Basel*⁶¹⁷ by Adam LeBor, about the 1930 founding and subsequent history of the supranational Bank for International Settlements.

A series of banking incidents during the Spanish Civil War and World War II — the looting of gold and other assets through the BIS as transactional intermediary — illuminate a legal dilemma that still confronts BIS and its public and private sub-agencies.

Duress can provide grounds for judicial nullification of contracts.

International and federal courts, if any should emerge from their current status as BIS vassals, could nullify the contracts signed between the globalist infiltrators in the US government,⁶¹⁸ the bioweapons manufacturers,⁶¹⁹ and the state- and local agencies engaged in the front-line bioweapons attacks on victims,⁶²⁰ on grounds that the contracts were signed under duress and are therefore invalid.

This would mean helping private bioweapons dealers (masquerading as pharmaceutical and non-governmental organization executives) reduce their own criminal exposure, by creating opportunities for them to flip on their supervising accomplices in exchange for lesser sentences for themselves.

It would give them an opportunity to join with past and prospective victims to mount joint legal attacks against the individuals and institutions financing and directing the global chemical and biological warfare program.

I'm exploring it despite my interest in seeing corporate executives face full justice for their crimes, because I'm even more interested in killing the nascent and rapidly growing⁶²¹ so-called biodefense industry, which is, in truth, a biomunitions industry.

[Similar to the way the Lend-Lease program in 1941 was established to pre-commit the United States to entering World War II, the development of the "warm-base" bioweapons manufacturing system⁶²² built since the early 1980s, is designed to replace the Cold War arms race, with what the globalist hope will be a permanent, costly "biodefense" industry capable of destroying wealth and populations, along the lines of the 1967 Iron Mountain report.⁶²³]

I'm interested in killing all of its grotesque technological platforms including but not limited to mRNA injections.

I'm interested in killing the weapons industry and the weapons platforms at the legal, financial and geopolitical sources that are supplying legal impunity, money and geopolitical 'public health' pretexts for global mass murder. There will be more posts in this series, but the notes-draft got really long, so I'm breaking the material into pieces so the information is easier to digest.

Restatement of the world's most pressing legal problems:

Historically, national governments have been able to destroy wealth and kill their own people by

1. designating sub-populations as internal enemies or genetic, cultural or political contaminants;
2. disarming them; and
3. propagandizing, coercing and arming other sub-populations to serve as guardians of purity by arresting, imprisoning and killing the designated enemies, and stealing their property.

Since January 2020, virtually all national governments, coordinated by the Bank for International Settlements and the World Health Organization, have been able to kill people all over the world by medicalizing and globalizing the nation-state mass murder model.

They've used coordinated, distributed lies-presented-as-true to persuade large proportions of each population that the ends (defeating ill-defined, invisible, ever-present, ever-mutating, lethal communicable pathogen enemies) justify the means: mass censorship; house-arrest and mass diagnostic testing; business, school and church closures and expropriation of assets; financially-incentivized hospital/nursing home homicide protocols; physical and socio-economic duress (firings, school expulsions, military discharges and medical license suspensions); and coerced, repeated mass injection of mislabeled toxic products that cause bodily injury and deaths, largely through gene-based disarmament and self-destructive, autoimmune weaponization of the human immune system.

A crucial, novel feature of the coordinated global fraud + mass murder program revealed through Covid-19, is the **perversion of law**, converting the law from a shield wielded by the lawful State in cooperation with the People, to protect the People from State and non-State violations of human moral and bodily integrity, into a spear wielded by unlawful, State-affiliated criminals, to weaken, attack, enslave and kill the People.

This inversion and transfer of power — from State-lawfuls to State-criminals — is the reason why prosecutors, courts and legislators have been rendered ineffectual as the chemical and biological warfare attack (disguised as Trojan horse 'public health' programs) has become more obvious to victims and observers.

This is also the reason why so many of the legal strategies pursued by private attorneys and plaintiffs, have met with failure so far and are likely to continue to do so.

When the overarching criminal enterprise includes perversion of the law⁶²⁴ and perversion of the prosecutorial and judicial systems themselves, we're confronted with and trapped within a closed system.

State-sponsored, State-protected criminals commit crimes disguised as lawful acts, citing pseudo-laws.

The People are rendered vulnerable, and suffer without legal recourse or remedy.

Put another way: the pseudo-State-actors' adoption of pseudo-laws that conditionally (i.e. under declared public health emergency or national security threat conditions) pseudo-authorize criminal acts and pseudo-suspend Constitutional limits on State power, are foundational crimes underpinning all the other Covid-era crimes of fraud, theft, attempted murder and murder.

Crimes against lawmaking, language and legal interpretation are the crimes without which the other crimes could not have occurred.

So long as those pseudo-laws remain in effect — so long as they are not nullified by competent courts or competent legislatures — the derivative crimes can and will continue.

*

⁶²⁴ <https://bailiwicknews.substack.com/p/american-domestic-bioterrorism-program>

Legal theory

International contract law may be a vulnerability for the globalist contract killers, because they need two contradictory things.

They need some laws, courts, and contracts to be recognized as legitimate by the People and enforced by State officials who are perceived as legitimate, to carry out the interlocking fraud, theft and mass murder programs under 'public health,' 'biodefense' and 'medical countermeasures' rubrics.

But they also need some courts, laws and contracts — or at least some parts of otherwise-valid components of law, justice, government — to be viewed by the People as invalid, inapplicable, non-competent, and unenforceable, so they can keep getting away with what would otherwise be clearly stoppable, punishable crimes, without being stopped or punished.

Historically, the BIS has been embroiled in political controversies surrounding its unreviewable decisions about whether or not to conduct financial transactions between itself and member central banks. Prior BIS decisions and attempts to reconcile the internal contradictions are highly relevant today.

To the extent that executives running State-sponsored contract bioweapons producers have been threatened — by individuals impersonating US Government or US military officials, or by individuals representing the World Health Organization, Bank for International Settlements or federal central banks — with death to themselves and their families, or **financial destruction of the companies they run**, if they refuse to sign and fulfill bioweapons production contracts, those executives have been and are currently being subjected to legally-cognizable duress, and all current and derivative future contracts can be nullified by competent courts on that basis.

Duress

Duress comes to us from the early 14th Century, meaning "harsh or severe treatment." It derives from Old French *duresse*, by way of Latin *durus*, "hard," and proto-Indo-European *deru-* "be firm, solid, steadfast," related to other words for "wood" and "tree."

The legal sense of duress, as coercion and compulsion, comes from the early 15th Century: "actual or apprehended physical constraint so great as to amount to coercion."

In legal contexts, duress refers to a situation where one person makes unlawful threats or otherwise engages in coercive behavior that causes another person to commit acts that they would otherwise not commit.

In a 2010 Texas case, *McCord v. Goode*, 308 S.W.3d 409, the court defined duress as "unlawful conduct or a threat of unlawful conduct of such a character as to destroy the other party's **exercise of free will and judgment**...the threat must be imminent and the party must have no present means of protection."

A 2006 Florida case, *Williams v. Williams*, 939 So.2d 1154, cited a 1928 case (*Herald v. Hardin*, 116 So. 863, 864) to define duress as "a condition of mind produced by an improper external pressure or influence that practically destroys the **free agency** of a party and causes him to do an act or make a contract not of his own volition."

In corporate finance contexts,⁶²⁵ duress is defined as "the act of using threats or psychological pressure to force someone to behave in a way that is contrary to their wishes..."

In contract law, a party who is forced into an act or contract under duress can petition a court to rescind the contract, rendering it null and void.

In a duress defense, the party admits to committing a criminal act, but unwillingly. Even though the act was illegal, the act was entered into under extreme pressure or threat to cause bodily harm or even death. A party is not deemed guilty of committing an illegal act if he was convinced that he would suffer bodily harm if he did not participate in the

⁶²⁵ <https://corporatefinanceinstitute.com/resources/management/duress/>

act. The role of the [lawful] government is then to prove that the defendant threatened to cause harm to the plaintiff if the latter did not enter into the contract.

Generally, the criminal defendant attempting a duress defense must prove three things: 1) that the defendant was placed in constant, immediate threat of serious bodily harm or death; 2) the defendant reasonably feared the perpetrator could and would carry out the threat; and 3) there was no opportunity for the defendant to escape safely, except by committing the unlawful act.

Physical duress can be directed at either a person or goods.

Physical duress directed at a person includes death threats for noncompliance with demands, for example.

Duress to goods occurs when one party withholds the goods of another party until the party enters into an illegal contract, leaving the second party with no alternative other than to give in to the coercion.

Relevant to the DoD-ATI-ANSER-BARDA-DARPA-HHS-FDA-MCDC 'biodefense' and 'medical countermeasures' contracts disclosed through Brook Jackson's whistleblower case,⁶²⁶ duress defenses can also be used by parties subject to economic threats.

Economic duress occurs when one party uses unlawful economic pressure to coerce another party into a contract that they would otherwise not agree to, or when one party threatens to cancel an existing contract unless the other party agrees to enter into another contract.

Courts can set aside criminal contracts if one or more of the criminal contractors "flip" on their co-conspirators and show that they had no choice but to enter into the contract, that they were presented with an offer [threat] they were not in a position to refuse.⁶²⁷

Free will

The moral principle of free will is essential for the legal defense of duress, and this is why Catholic theology — particularly the juridical theology taught by St. Thomas Aquinas — is extremely important to the legal systems of historic Christendom.

This is also why the erasure of and public amnesia about the moral principle of free will has been such an important project for the Luciferian globalist banksters working over the last century to create conditions conducive to establishing global Old World Slavery, with a New World Order label slapped on the bottle.

They can't make the human attribute of free will not be a true fact about human nature, because God built free will immutably into our design and function.

But they can tempt, confuse, or abuse individual human beings to get us to temporarily forget, renounce, ignore or discount our free will.

That's what the 1951 Solomon Asch conformity experiments,⁶²⁸ 1958 Harry Harlow social isolation experiments,⁶²⁹ 1961 Stanley Milgram obedience to authority experiments,⁶³⁰ 1971 Philip Zimbardo Stanford prison experiments,⁶³¹ Martin Seligman 1972 learned helplessness experiments,⁶³² and 1977 Bruce Alexander solitary confinement "Rat Park" experiments⁶³³ were all about.

⁶³² <https://ppc.sas.upenn.edu/sites/default/files/learnedhelplessness.pdf>

⁶³³ <https://exploringyourmind.com/the-rat-park-experiment/>

That's what the whole collection of CIA-directed psychological, soul-torture programs and their progeny in the Covid-era "behavioral considerations"⁶³⁴ and "overcoming vaccine hesitancy"⁶³⁵ programs have been all about.

Resisting duress — fighting against the demonic temptation to renounce free will, submit to sin, and reject God, fighting even unto bodily death to stay close to God — is what martyrs do. Pastor Andrew Isker recently made a very good case that those of us alive in these times, are being called to endure psychological martyrdom.⁶³⁶

The point is: globalists and their accomplices at the federal, state and local level can elicit temporary renunciation of free will, but they can't make it permanent. The willing human being can always withdraw his or her prior consent to sin and return to God.

Even bioweapons arms dealers like Albert Bourla (Pfizer), Stephane Bancel (Moderna), Steve Hopkins (ANSER), Chris van Metre (ATI), Bill Gates (BMGF), and Seth Berkeley (GAVI).

BIS and duress in the 1930s.

So far, I've read the first six chapters of Adam LeBor's 2013 book *Tower of Basel*.

It's an extremely useful history of the Bank for International Settlements, and I'm using some of the footnotes to locate good source documents. One shortcoming is that LeBor (so far) appears to accept at face value, BIS claims that the intent of the original structure — outside of any sovereign government control — and the bank's decisions are to keep the bank above or outside of politics, for "neutrality."

Although the book is full of examples demonstrating that the neutrality characterization is a lie, LeBor doesn't directly confront the ways in which BIS has always deliberately used its concentrated, unchecked unchallenged financial power to influence and direct geopolitical events.

BIS simply states as fact that bank decisions are not political, and since they're chartered outside the control of any national government, their statements have historically not been subjected to any form of moral or legal challenge. Below are brief sketches of three examples from the very earliest years of the bank's operations, through which BIS executives, with or without BIS board knowledge or approval (it varied), made different decisions about whether to conduct requested international financial transactions, depending on the BIS staff's own geopolitical goals and legal opinions about whether or not the requests were submitted under duress, which could have made it impossible for BIS to honor those requests under Article 10 of the Jan. 20, 1930 BIS charter:⁶³⁷

...The Bank, its property and assets and all deposits and other funds entrusted to it shall be immune in time of peace and in time of war from any measure such as expropriation, requisition, seizure, confiscation, prohibition or restriction of gold or currency export or import, and any other similar measures...

Not surprisingly, BIS decisions ran in favor of BIS profits in every case, and for or against specific depositors in each case.

Most relevant to the geopolitical, legal and financial contract predicaments in which the world is now embroiled, BIS bank officers and directors experienced some difficulty and some concern about public exposure of their legal analyses and financial transaction decisions.

Briefly, BIS has financially facilitated looting and mass murder programs, and some member countries have occasionally found the bank's actions reprehensible.

The first example of BIS geopolitical interference played out during the Spanish Civil War. (pp. 54-57)

LeBor reports that “transnational capital decided the fate of Spain,” during the war between the Nationalist army, led by General Franco, and the Republicans.

“The nationalists understood that finance was a weapon as effective as bullets.”

The nationalists set up a rival economy, rival national bank, and rival currency, called the *peseta*, the same name as the Republican currency. Despite the fact that the Republican government had ample gold reserves and should have been able to issue bonds to finance the economy and the war, the international banks and financiers refused to purchase the bonds. Meanwhile, “Nazi Germany and Fascist Italy provided hundreds of millions of dollars worth of aid” to the nationalists.

The result was inflation: “the Republican *peseta* was worth three times less in French francs” than the nationalist *peseta*.

“The nationalists steadily corroded the Spaniards’ belief in their currency and, by extension, in their government.”

Because they couldn’t issue bonds, the Republican government instead sold the country’s gold and silver reserves to France and Moscow. Meanwhile, the nationalists criminalized the use of banknotes issued by the Republicans after 1936, and sent bankers into each newly-captured territory with military leaders, “to reorganize the local banks.”

“This, as much as the Blitzkrieg, was the real lesson of the Spanish Civil War: the nationalists’ sophisticated fusion of financial and military power. The Nazis would hone this model, using the BIS to underpin their economic empire.”

A key lesson of World War II is the globalists’ sophisticated fusion of financial, military *and biomedical* power.

*

The second example of BIS geopolitical control through financial transactions is Hitler’s September 1938 annexation of the Sudetenland territory of the Czechoslovak Republic and subsequent requests — which Czech officials made to BIS under German orders — that BIS transfer Czech gold reserves to the Reichsbank. (pp. 59-69)

Before the war, the Czechs had already transferred most of their gold reserves to two accounts at the Bank of England for safety. There was one gold account in the name of BIS and one in the name of the National Bank of Czechoslovakia. “Josef Malik, the governor of the national bank, and his fellow Czechs believed that, even as the Nazis dismembered their homeland, if the national gold was safe, then something of the country’s independence would endure.”

In February 1939, “Berlin ordered Prague to transfer just over 14.5 metric tons of gold.” Then in March, after the Wehrmacht occupied Prague and dissolved Czechoslovakia,

“a Reichsbank official was dispatched...and ordered the [Czech bank] directors, under the threat of death, to issue two orders...the first...to transfer the 23.1 metric tons of Czechoslovakia gold held at the BIS account at the Bank of England to the Reichsbank BIS account, also held at the Bank of England [and] ...the second to transfer almost 27 metric tons of gold held in the National Bank of Czechoslovakia’s own account to the BIS’s gold account at the Bank of England.”

Malik and other Czech bank directors believed the BIS and Bank of England would not do the transfers, on grounds that they were under Nazi duress.

But BIS president Johan Beyen consulted BIS legal advisor Felix Weiser, who argued that if the paperwork was in order, the BIS-to-Reichsbank transaction should be processed, and further argued that the Czechs couldn’t be under duress, because the only way to prove it would be to go to a Swiss court, but they couldn’t travel to Switzerland to press their case, because they and their country were under German control.

After a few ass-covering maneuvers, BIS and Bank of England, led by Montagu Norman, ratified the annexation by transferring the first 23.1 metric tons of gold.

“With London, Paris and Basel’s compliance, Nazi Germany had just looted 23.1 metric tons of gold without a shot being fired.”

Brief political and popular outrage ensued. There were some unflattering press reports in the *Daily Herald* and *Financial News* and angry Parliament speeches. The second transfer didn’t go through after the chancellor of the Exchequer construed the National Bank of Czechoslovakia’s own gold account at the Bank of England differently from the Czech gold held in the BIS account. The former was construed as a national asset subject to transaction blocks; the latter was construed as exempt.

The precedent had been set; BIS and Bank of England established legal principles giving them authority to expropriate and transfer the national assets of other countries.

The US Federal Reserve followed the precedent shortly thereafter, transferring \$35,000 from the Czechoslovak National Bank account into the BIS account.

*

Side note: *Tower of Basel* author LeBor interprets these actions as the incapacity of Montagu Norman (Bank of England) and Johan Beyen (BIS) to “conceive of any moral or political dimension to their decisions.”

In my view, a more plausible explanation is that both men — and their successors — have been fully aware of the moral and political dimension of their decisions, and make decisions to covertly achieve geopolitical aims that cannot be achieved through public mechanisms of elective, sovereign governance at the nation-state level.

*

A third example of BIS geopolitical control through financial transactions occurred in June 1940, after the Red Army invaded Latvia, Lithuania and Estonia. (p. 79-80)

By this time, the BIS president was American lawyer Thomas McKittrick. When the Soviets ordered the three central bank governors in Latvia, Lithuania and Estonia to instruct the BIS to transfer their gold reserves into the Soviet Union’s state bank, BIS managers and legal advisors argued that the transactions should go through, citing to the Czech-Reichsbank precedent.

McKittrick solicited an external legal opinion from a Swiss professor (Dieter Schindler), who argued that the Baltic banks and bank governors were no longer “free agents, but had probably acted under the instructions of the Soviets.”

LeBor writes: “[Schindler] quoted Article 10 of the BIS charter, which prohibited coercive mechanisms against depositors...thus...it was the duty of the BIS management to “resist”... any attempts by governments to interfere with the BIS’s assets.”

The BIS refused to conduct the transfer of Baltic gold to the Soviet Union.

McKittrick sent the legal opinion to Merle Cochran, the unofficial American State Department ambassador to the BIS, asking Cochran to keep it confidential.

“My one serious concern is that it should not get into the press. After the damaging campaign of publicity regarding the Czech gold, it is of the greatest importance to the BIS to remain in the background at this time.”

State's evidence v. People's evidence

In the scenario I'm exploring, executives at Pfizer, Moderna, ATI, ANSER and other DOD biomunitions contractors would have an opportunity to flip on the criminal contract counterparties who have placed them under economic and likely also physical duress.

Historically, this process would be called "turning State's evidence"⁶³⁸ because — until the Covid-19 biowarfare criminal enterprise began — in most cases the criminal contract counterparty was not identical to the State, or at least not as obviously and with as widespread, deadly effect.

Until January 2020, the State, represented by the public prosecutor, (federal or state Attorney General or county District Attorney) could accept reports and then investigate organized crime, criminal enterprises, and criminal contracts on behalf of the People, to protect the People from the predations of the criminals.

After evidence collection, the State prosecutor could then file charges against one or more criminal defendants, some of whom could choose to admit guilt — admit participation in the criminal activity — and then reveal valuable evidence to the prosecutor.

Men and women who “flipped” could testify at trial as witnesses to support conviction of other criminals in the network (accomplices or co-conspirators), higher up the chain of command, in exchange for lessened charges.

And this is another way in which we’re in uncharted legal waters.

During the ongoing Covid-19 fraud, theft, and mass murder criminal enterprise, infiltrators control the power levers of the State — ***including the prosecutorial and judicial offices*** — are simultaneously serving as the supervising accomplices and contract counterparties to the private bioweapons manufacturers and criminal frontline aggressors: militarized nurses and pharmacists injecting targets with poisons.

To whom do People have recourse when almost every State worldwide has been captured by criminals and the capture is rendered almost invisible by perversions of language and law?

As far as I can tell, it’s God: the Divine authority from whom all legitimate earthly human authority derives.

That’s why I think it’s a good idea for people to be ready — with all the evidence and arguments we’ve been assembling since the Covid-19 crime spree began — for the time when God clears the path and shows us where legitimate human lawmakers, prosecutors and judges are located and who those people are.

I have no idea what that path will look like, when God will reveal it. I don’t know who those men and women are, or when God will help them step forward.

I’m on the lookout for it every day. I pray that He opens the path soon, and that I’ll be able to recognize it quickly, and walk it faithfully. I have faith that He will provide the path and the people when the time is right, according to His plan for the world.

Venerable Bishop Fulton J. Sheen:

It is not the sanctuary that is in danger; it is civilization.
It is not infallibility that may go down; it is personal rights.
It is not the Eucharist that may pass away; it is freedom of conscience.
It is not divine justice that may evaporate; it is the courts of human justice.
It is not that God may be driven from His throne;
it is that men may lose the meaning of home.
For peace on earth will come only to those who give glory to God!
It is not the Church that is in danger, it is the world!

March 17, 2023 - Contracting for facilitation of crimes: contract killing and biomunitions hitmen. A third double-bind argument built on the truth that the products are prohibited bioweapons designed to injure and kill, not regulated medicinal products designed to protect and heal.

Excellent new interview of Sasha Latypova by Robert F. Kennedy Jr.

Several months ago, while thinking about Brook Jackson's case,⁶⁴⁰ I started developing some argument frameworks to help plaintiffs, attorneys and judges get past some of the biggest legal obstacles and move closer to justice for the Covid-19 crimes and criminals.

I published one such exploration in November.

Nov. 16, 2022 - Some thinking about tampering with evidence and spoliation⁶⁴¹

...the men and women doing these things are not acting in their official capacities or under color of legal authority but are rogue actors....

Trump, Biden, Azar, Becerra, Fauci, Birx, Walensky, etc [have been] impersonating federal officials (18 USC 912⁶⁴²).

We need plaintiffs, fact patterns and claims that drive a legal wedge to separate the legitimate US Government and the people still operating under the US Constitution and legitimate federal laws, from the infiltrated/co-opted illegitimate US Government and the embedded agents operating as if the US Constitution has been suspended, under federal pseudo-laws through the fraudulent national emergency and public health framework.

Summarized: we need to get the US Gov in a position where it must either admit or deny that fraud + mass murder is the official, authorized policy of the US Gov., such that the **identifiable people** who are running the programs have recourse to legal defense services provided by the US Department of Justice, or get cut loose, declared rogue and are then opened to criminal prosecution in their **personal capacities**...

I explored this framing a bit more in January:

Jan. 16, 2023 - Dual-use government officials of concern⁶⁴³

...I'm most interested in developing and supporting cases that force government defendants and defense counsel to first, admit that the evidence (the record of their public acts and documents) conclusively shows they've launched a covert war with their people, which is becoming widely seen and understood.

The government attorneys would then be compelled to choose between two defenses:

- The war on the world is legal and the use of bioweapons to carry out official, authorized duties and orders to maim and kill billions of people, is justified and endorsed by the US government as an institution.

⁶³⁹ <https://podcasters.spotify.com/pod/show/rfkjr/episodes/Militarized-Healthcare-with-Sasha-Latypova-e20go74>

⁶⁴² <https://www.law.cornell.edu/uscode/text/18/912>

⁶⁴³ <https://bailiwicknews.substack.com/p/dual-use-government-officials-of>

- The war is illegal, such that the official government acts undertaken by named defendants, to conduct the war, have been done without proper authority, by rogue actors, who can and will be removed from power and tried for their war crimes.

To the extent the Department of Justice responded to a criminal prosecution of Kadlec, Azar, Gruber and Hinton by using the second argument, the war criminals would be subject to prosecution in their personal capacity, without recourse to sovereign, legislative, administrative or other immunities.

They would be cut loose from the government, and legally construed as **people who committed the war crimes outside their official capacities, while impersonating federal officials, or while serving as agents of foreign invaders or occupiers.**

The advantage offered by cutting the war criminals loose, is that it would leave the core governing institutions (legislatures, courts and executives) and the US Constitution intact...

I developed the argument a bit more in February, applying it to the **bioweapons products** known as ‘Covid-19 vaccines,’ as distinct from the people who pseudo-authorized their deployment.

Feb. 7, 2023 - On the impalement of embedded, treasonous, DOD-HHS bioterrorists on the horns of their dilemmas.⁶⁴⁴

...The same double-bind can be applied to the manufactured prototype **products**...the products in use are bioweapons, not pharmaceutical drugs, devices, biologics or vaccines within the purview of FDA regulation.

There is ample evidence⁶⁴⁵ to demonstrate they were never subject to FDA procedures regulating or monitoring current Good Clinical Practice (cGCP), current Good Manufacturing Practice (cGMP), current Good Laboratory Practice (cGLP), current Good Distribution Practice (cGDP), dispensing, labeling, adverse effects, etc.

To defend, the US Government must take one of two positions:

1. The products are pharmaceutical drugs, devices, biologics or vaccines, but none of the FDA regulatory standards for safety and efficacy testing, manufacturing, distribution, dispensing, labeling were followed prior to dispensing and during use, [and they’ve lied every time they’ve told the public that safety and efficacy testing, manufacturing controls and safety monitoring had been/are being conducted]; or
2. The products are military bioweapons for battlefield use, and none of the FDA regulatory standards for safety and efficacy testing, manufacturing and distribution were applicable, legally required or necessary for deployment on military targets [so the truth or falsity of statements about ‘safe and effective’ and properly manufactured and monitored were always legally irrelevant].

bigger picture, that the bioweapons program and its legal support structure long pre-date Trump and Operation Warp Speed, cover many more “countermeasures” than the Covid-19 injections alone, and that his approach to Brook’s case⁶⁵⁰ — accepting the Pfizer + Gov claim that the products are pharmaceutical products (vaccines) subject to FDA regulation, and trying to argue on that turf even though the factual record makes it absolutely clear that no valid FDA regulatory actions occurred and the statutory/regulatory record makes it absolutely clear that no valid FDA regulatory action was ever required — yields the most important disputed issue to the Pfizer + Gov benefit...”

The true provisions are written with the intent to convey real contractual obligations among the parties: terms and conditions that will be fulfilled by the responsible party, and if he or she fails, will be enforced by the counter parties, through their exercise of contractual rights to extract financial or other penalties. The false provisions are written with the intent to convey the illusion of contractual obligations to non-parties. I’ve been thinking about the inherent problems faced by all the victims and lawyers who have been bringing knives to the active gun fight. They’ve been trying to stop a bioweapons-based, intentional, coordinated global genocide with polite requests that the financiers and arms manufacturers please comply with inapplicable drug safety regulations. Bioweapons are not governed by drug safety regulations, even when the parties to the production and use contracts fraudulently call the bioweapons ‘vaccines.’

It bears repeating: bioweapons are not governed by drug safety regulations.

Bringing drug regulations to a chemical and biological war is counterproductive.

I’ve also been thinking about the concept of duress as grounds for courts to throw out contracts: grounds to throw out existing contracts *and* future contracts derived from current contracts through built-in extension provisions.

- March 15, 2023 - Duress, State-sponsored, State-protected contract crimes, and the Bank for International Settlements⁶⁵⁷

*

The **contracts** provide a third double-bind argument structure available to plaintiffs, prosecutors and judges, joining the first two: the **people** (authorized officials carrying out a legal war on humanity or rogue actors engaged in illegal war crimes) and the **products** (prohibited bioweapons that were never subject to drug safety regulation at all — because inapplicable — or medicinal products that demonstrably were never tested or regulated under otherwise-applicable drug safety laws during design, manufacture or use).

The clear intent of the **contracts**, as written, was to facilitate the design, production, distribution and murderous injection-into-human-beings,⁶⁵⁸ of prototype bioweapons, and to facilitate the fraudulent, public characterization of

the prototype bioweapons — by financiers, manufacturers and individuals impersonating government officials — as ‘vaccines,’ for the purpose of preventing target awareness of and resistance to bioweapons attacks.

Under legal challenge, each **contract signatory** who signed with full knowledge and understanding of the contents, terms and conditions — would be compelled to respond in one of two ways:

He or she signed and executed the contracts with freely-willed consent to participate in commission of the contractually-facilitated lying and killing, or

1. He or she signed and executed the contracts to participate in contractually-facilitated lying and killing, but under duress, without free and unfettered consent of the will.

*

To recap:

Products designed to kill targets are weapons.

Products designed to kill targets are not vaccines, drugs or devices.

Fraud, theft, attempted murder and murder are crimes.

Liars, thieves and murderers are criminals.

Passing laws, regulations and executive orders to facilitate crime, is crime.

Lawmakers and administrative officials who pass and implement unlawful laws and regulations are criminals.

Drafting, signing and executing contracts to facilitate fraud, theft, attempted murder and murder are crimes.

Contract signatories and contract executors are criminals.

March 21, 2023 - Smashing the Overton window. Omnibus Repeal Act for Congress members in post-invasion, post-coup, occupied, financial-biopharmaceutical-wartime America to consider.

I saw a Twitter comment a few weeks ago, about the information and analysis that Sasha Latypova and I offer to the public discourse during the Covid-19 Constitutional crisis, describing it as —

So far outside the overton window⁶⁵⁹ at this stage virtually no one knows what to do with it.

The Overton window has been defined as “the range of policies politically acceptable to the mainstream population at a given time.”

The Twitter comment lines up with my experience of how a lot of people respond to our work.

Most thoughtful people have immediate, visceral responses.

Paraphrased, the first response is:

Whoa! This makes sense of a lot of things that don't make sense without it.

It explains things that aren't explained by analyses limited to FDA incompetence, regulatory capture, and Big Pharma profiteering.

The second response is,

Wait, what the heck??? This can't be real!!! How can the US Government be engaged in a semi-covert war against its own people and the people of the whole world, on behalf of a handful of central bankster families, using financial system manipulation, public health emergency pretexts and bioweapons fraudulently labeled as vaccines?

And if it's true, why does everybody in what we thought were positions of legitimate authority keep pretending it's not happening, and doing nothing to stop the killing and looting?

The two responses sometimes occur simultaneously within one person.

Sometimes people cycle back and forth between the two.

*

I don't find the Overton window concept all that useful anymore, because the legal, geopolitical waters — an ocean of State-sponsored, contract biowarfare⁶⁶⁰ disguised as ‘public health — that we've been swimming in since January 2020 are **uncharted** waters.

I also don't find the Overton window useful because, just like pseudo-laws and pseudo-information (media propaganda) are written by people deeply invested in blocking public understanding and constructive public response for as long as possible, the range of pseudo-acceptable political choices is set by the same people.

The Overton window is another version of the 1967 CIA Nurnad Memo, the conspiracy to discredit ‘conspiracy theories.’⁶⁶¹

Both are preemptive thought-stopping tactics.

They narrow of the range of publicly-thinkable, publicly-discussible problems.

They keep the field clear for complex criminal enterprises to continue.

⁶⁵⁹ https://en.wikipedia.org/wiki/Overton_window

⁶⁶⁰ <https://bailiwicknews.substack.com/p/on-harboring-and-financing-contract>

⁶⁶¹ https://ia800705.us.archive.org/30/items/COUNTERINGCRITICISMOFTHEWARRENREPORT/COUNTERING_CRITICISM_OF_THE_WARREN_REPORT.pdf

I don't think it's possible to develop legitimate-law-based, geopolitical responses to global financial and biochemical war pretending (through illegitimate law and coordinated public lying) to be 'public health' programs — which is the crazy but true reality — that don't also sound and often feel crazy.

Anything less radical than seemingly-insane responses are disproportionate to the crisis.

Adapting a Kurt Vonnegut point,⁶⁶² “A sane geopolitical response to an insane geopolitical situation must appear insane.”

I empathize with the proverbial frogs. I imagine them sitting in the pot of warming water, considering their predicament as the boil approaches.

I imagine them weighing the pros and cons of staying in or trying to leap out; the hotness of the fire just outside and underneath the pot, where they will have to stick the landing; and the coolness of the ground outside the circle of the fire if they can ever hop that far.

One option is to calmly, quietly let the families that own the Bank for International Settlements finish the job they started a century ago to gradually centralize all geopolitical power, loot all the world's resources, kill a whole lot more people, and enslave the survivors in ways that they describe as normal; politically-neutral; socially-acceptable; traditional and trustworthy but also cutting-edge and innovative; sensible; comfortable; safe and effective; incremental; inevitable; and unstoppable.

Another option is to try to dismantle the legal support structures, which are major support pillars for our crumbling society even as they've also, somewhat surprisingly, turned out to be mechanisms-of-killing-and-enslavement-action.

There are many more years of profound societal disorder ahead of us, whether the globalists push on unimpeded, or the People make some headway in wrestling the diabolical legal tools out of their hands and repairing some of the damage they've already wrought using those tools.

*

I've been thinking about these things because I got invited to participate in a podcast later this week, to talk about “legislative actions Congress must take to restore informed consent, medical freedom, and dismantle the biomedical experimentation state.”

I've addressed possible Congressional actions a few times:

- Aug. 11, 2022 - 22 worst Congressional bioterrorism authorization and funding laws passed since 1983
- Jan. 7, 2023 - Could Congress members, federal and state judges, state legislators, governors and prosecutors restore the American Constitutional republic?
- Jan. 19, 2023 - Pharmaco-military genocide, enabling laws Congress should repeal and courts should nullify.
- Jan. 20, 2023 - Subsidiarity

For those posts, I focused mostly on the biomedical and national security aspects of the coup that the Bank for International Settlements has completed — effective January 27, 2020 — to overthrow the United States Constitution, sovereign government and People.

I diverge from many other Covid-era writers on this point. For good reasons, many other writers argue that the task before the world's people is to prevent or stop the imminent relinquishment of national sovereignty to the World Health Organization and its financial backers.

But, as I've written and said previously, I think the invasion, the coup is complete.

Enemies foreign and domestic are already in power, occupying offices including HHS Secretary (Xavier Becerra) and Defense Secretary (Lloyd Austin).

⁶⁶² <https://quotefancy.com/quote/849754/Kurt-Vonnegut-A-sane-person-to-an-insane-society-must-appear-insane>

National sovereignty has already been handed over to these enemies, through ‘public health emergency’ statutes, regulations, executive orders and contracts enacted, ratified and implemented by federal, state and local legislatures, executives and courts.⁶⁶³

That's why I construe the task as identifying, isolating and extracting already-entrenched financial and biomedical occupiers from their pseudo-government strongholds.

It's not about stopping an invasion and occupation.

It's about kicking the invaders out and bringing the occupation to an end.

It's about restoring rightful government, which is currently in covert-exile, held as covert-hostages, to power.

For readers interested in revisiting those arguments, here are some of the relevant posts:

I'm still thinking through how to prioritize Congressional actions, and still working to understand the structural lies at the heart of the global central banking system.

For now, I think a good Omnibus Repeal Act of 2023 would repeal, at minimum, the following:

- Homeland Security Act (6 USC Ch. 1, Domestic Security)
- Federal Reserve Act (12 USC Ch. 3, Banks and Banking)
- International Bureaus, Congresses, Etc., (22 USC Ch. 7, Foreign Relations and Intercourse) including Subchapter XVIII, International Organizations Immunities Act, and Subchapter XX, World Health Organization
- Defense Against Weapons of Mass Destruction Act, 50 USC Ch. 40, War and National Defense, including amendments to 10 USC Ch. 15, Armed Forces (Military Support for Civilian Law Enforcement Agencies), and amendments to 10 USC 382, renumbered to 10 USC 282, authorizing domestic deployment of military against civilians during “emergency situations involving chemical or biological weapons of mass destruction.”
- Food Drug and Cosmetics Act, (21 USC Ch. 9, Food and Drugs), including Emergency Use Authorization program
- Public Health Service Act (42 USC Ch. 6A, Public Health and Welfare), including Public Health Emergencies program and Vaccines program
- Social Security Act (42 USC Ch. 7, Public Health and Welfare), including Medicare and Medicaid programs
- Stafford Act/Disaster Relief Act (42 USC Ch. 68, Public Health and Welfare)
- Chemical and Biological Warfare Program (50 USC Ch. 32, War and National Defense)

Congress broke America, at the behest of enemies foreign and domestic who wanted to build a pseudo-legal front onto ordinary cross-border looting, slave-taking and killing, so they could do it long-term, without facing detection or well-organized, effective resistance.

Congress broke America because members of Congress— some imprudent and cowardly, some greedy, treasonous and malicious — abandoned liberty for false security in response to orchestrated and false flag threats.

Congress can fix what they broke. None of the current members appear interested; not even Ron Johnson, who is furthest along the learning curve.

But that doesn't mean it's not possible. It means there's work to do, educating and emboldening them.

An Omnibus Repeal Act could begin with a Whereas sequence starting:

WHEREAS, prior Congresses and US Presidents have, for more than 100 years, under the influence of enemies foreign and domestic, through enactment of the following statutes and related appropriations, enabled and financed the covert theft from, enslavement, and mass murder of the American people, and

WHEREAS, in purported response to the events known as "Covid-19," recent Congresses and US Presidents have expanded and provided additional funding for additional enslavement, theft and mass murder policies and programs enabled by these statutes, rendering them more immediately deadly and therefore more visible to the American people...

[WHEREAS clauses explaining how each statute enables theft, enslavement and killing of Americans by enemies foreign and domestic...]

THEREFORE, the following Congressional acts are hereby repealed...

Important work by Mike Yeadon:

March 22, 2023 - Why I don't believe there ever was a Covid virus.⁶⁶⁵ Mike Yeadon at *The Conservative Woman*

...If I'm correct that there was no novel virus, what a genius move it was to pretend there was! Now they want you *only* to consider how this 'killer virus' got into the human population. Was it a natural emergence (you know, a wild bat bit a pangolin and this ended up being sold at a wet market in Wuhan) or was it hubristically created by a Chinese researcher, enabled along the way by a researcher at the University of North Carolina funded by Fauci, together making an end run around a presidential pause on such work? Then there's the question as to whether the arrival of the virus in the general public was down to carelessness and a lab leak, or did someone deliberately spread it?...

I have colleagues who do not believe what we've been told (i.e. that a virus has been experimentally constructed) is even possible technologically. I don't have the background to assess that idea. But the rest hangs together for me in a way that no other explanation does.

To this point, an ex-pharmaceutical industry executive Sasha Latypova, speaking with Robert F Kennedy Jr on his podcast of last Thursday,⁶⁶⁶ March 16, describes the extensive evidence of the contracts and relationships that were in place before the Covid era. Contracts were signed for billions of dollars in February 2020. Not only would the required production never happen (from a standing start, to sign such a large commitment is ridiculous) but it cannot be done.

She estimated that approximately one kilogram of DNA was required. There isn't that much medicinal grade DNA on the planet at any one time. That's because it's hard to do, very expensive, wholly bespoke and difficult to store for long periods. Also, the amounts of any specific DNA sequence required and held in store by commercial suppliers would be milligrams or perhaps grams at a stretch. So it was always completely unfeasible, regardless of how much money was thrown at the problem, to have accomplished what they claim to have done in a short time.

Consequently, no other conclusion is supported by the facts than that it's a huge crime, extensively planned. In itself, that rules out a natural emergence of a pathogen, unless divine providence occurred. Logically we're left with a leak or, as I argue, a lie plus a PsyOp...

Two comments:

One, I'm not interested in debating the existence of viruses as a class of molecular material with anyone. Some readers find that to be an annoying fact about me, but a fact it remains: the general NAV (not-a-virus) issue is not among the topics to which I allocate research, thinking and writing time. I focus on understanding and communicating information about pseudo-legal, statutory and regulatory weapons used to control and kill people, and finding ways to take those statutory and regulatory weapons out of the hands of the killers.

Two, I think Yeadon's position leaves room for Jonathan Couey's hypothesis about the ongoing, intentional dispersal of purified, aerosolized toxic clones of spike protein-type material,⁶⁶⁷ which I first encountered last November, and which

I think represents the most plausible explanation for the observable outbreak patterns, including but not limited to experiences with Covid-era illness in myself, my family and among my friends and colleagues since late 2019.

War criminal Xavier Becerra extends the public health emergency, effective March 15, 2023, using slightly-different wording.

Yesterday, someone sent me a March 20, 2023 Federal Register notice⁶⁶⁸ on the extension of the Public Health Emergency (PHE) and Emergency Use Authorization (EUA) declarations and determinations.

The sender asked me "whether that EUA amendment I sent you made substantive changes, or was this just a regular extension?"

I replied that there are enough redundancies built in throughout the PHE and EUA declaration and determination procedures, and they're both unreviewable by Congress and courts anyway, that the wording of any particular one isn't worth spending a lot of time to parse in detail.

[Note: when criminal prosecutions are eventually brought against specific war criminals, these documents will be part of the evidence incriminating the signatories. At that point, parsing the documents in detail will be extremely important, to tie the dates, circumstances and effects of specific acts taken in furtherance of the war crimes, to the people who committed those acts.]

The latest iteration slightly alters the original, false claims.

In the original determination of public health emergency, effective Feb. 4, 2020,⁶⁶⁹ a war criminal impersonating the US-HHS Secretary (Alex Azar) claimed that "there **is** a public health emergency that has a significant potential to affect national security or the health and security of United States citizens living abroad" and that the emergency "involves a novel (new) coronavirus (nCoV) first detected in Wuhan City, China."

In the latest amendment to the determination of public health emergency, effective March 15, 2023,⁶⁷⁰ a war criminal impersonating the US-HHS Secretary (Xavier Becerra) claimed that the nCoV outbreak has already infected and killed millions of people, and that there are now variations circulating, such that "there is a public health emergency, **or a significant potential for a public health emergency**, that affects, or has a significant potential to affect, national security or the health and security of United States citizens living abroad."

The two forms of PHE "determination" are used interchangeably, to provide pseudo-legal pretexts for COVID-19 Emergency Use Authorization/EUA declarations (which are, more accurately, military orders to deploy bioweapons labeled as 'vaccines' to injure and kill recipients) and amendments thereto.

⁶⁷⁰ <https://www.govinfo.gov/content/pkg/FR-2023-03-20/pdf/2023-05609.pdf>

For emphasis, Becerra added to the latest notice:

...The four previously-issued section 564 declarations that refer to the February 4, 2020 determination have not been terminated by the Secretary because, among other things, the circumstances described in section 564(b)(1) continue to exist — i.e., COVID-19, a disease attributable to SARS-CoV-2, continues to present a public health emergency, or a significant potential for a public health emergency, that affects, or has a significant potential to affect, national security or the health and security of United States citizens living abroad...

As with all effective lies, there are kernels of truth within most HHS Secretary notices, declarations and determinations.

The emergency that existed in January 2020, and still exists, is a group of war criminals, coordinating with each other worldwide, as participants in a criminal enterprise that “involves” the novel coronavirus pretext as a pseudo-legal mechanism to suspend lawful government functions; instill fear; suppress critical thinking, public debate, alternative treatments, comparative assessment of threats, biomedical ethics obligations and rights, and self-preservation instincts; and induce peaceful compliance with lethal injection programs labeled as ‘vaccine’ programs.

For the purpose of making it easier for mass murderers to get away with mass murder.

See Yeadon analysis, above.

One other purpose of the new, March 15, 2023 determination, is to *de facto* void the Jan. 30, 2023 announcement⁶⁷¹ that the public health emergency would end effective May 11, 2023.

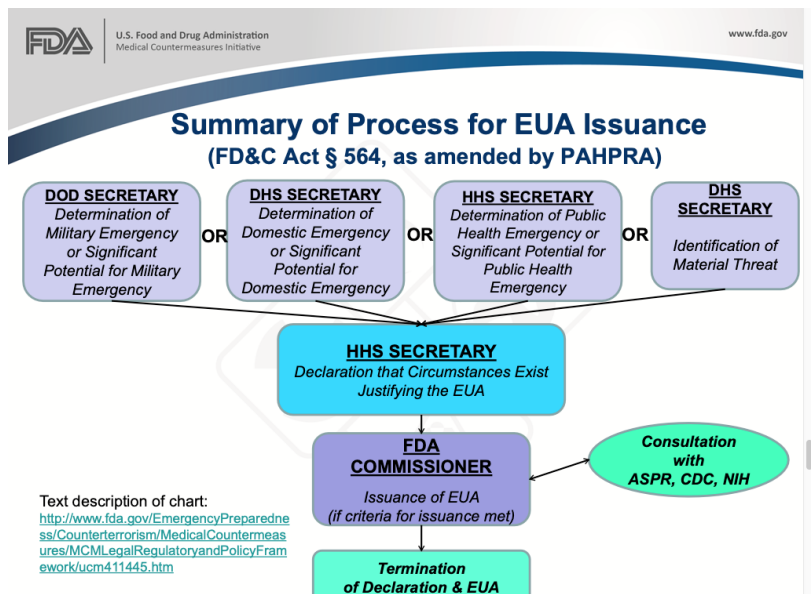

Biden, on behalf of his central banker handlers, made that announcement to:

1. undercut then-pending Congressional action (H.R. 382,⁶⁷² approved by House Jan. 31, 2023, 220 to 210, and H.J. Res. 7,⁶⁷³ approved by House Feb. 1, 2023, 229 to 197), without actually relinquishing emergency executive powers; and
2. prevent any further consideration of the termination bills by Congress, because Congressional debate would make the Constitutional crisis triggered by the Covid-19 control-and-kill program through the enabling statutes and regulations, much more visible to the American people.

FDA offers a slide from an April 2015 FDA slide deck⁶⁷⁴ outlining changes to EUA law effected by 2013 Congressional passage of the Pandemic and All-Hazards Preparedness Reauthorization Act (PAHPRA).

The chart shows how many different ways mass murdering war criminals pretending to be US government officials can declare and maintain "emergency" powers to kill people using bioweapons fake-named as EUA ‘vaccines’ and other countermeasures, including events for which there may not even be fake evidence of a threat, but for which the war criminals claim there is "significant potential" of a future threat.

It's very similar to the gradual addition of "asymptomatic" and "precommunicable" stages of

disease, to the original “symptomatic” stage, authorizing the HHS Secretary to order the military and local law enforcement⁶⁷⁵ to arrest and detain civilians indefinitely under 42 USC 264 and related regulations and executive orders.

These war criminal assessments, like all the other determination and declaration procedures rendered visible through the Covid-19 global crime, are assessments placed by Congress and US Presidents, solely in Cabinet secretary hands, and — for so long as they remain unchallenged by Congress members and judges, three years and counting — not subject to Congressional or judicial review or termination.

Many paths.

Same herd-culling destination.

The death machine will keep running until some combination — of Congress, courts, state governments, the People and/or some other political force TBD — cuts off the statutory fuel⁶⁷⁶ and the funding.

(James Bradley, Jeff Brown and Katherine Watt)

Feb. 18, 2023 China Rising Interview⁶⁷⁷ - (James Bradley, Jeff Brown and Katherine Watt, 30 min)

...James Bradley: Hello, this is James Bradley. I am JB East out in Saigon, in Vietnam, and I'm here with JB West, Jeff Brown out in Normandy [...] So, the reason we're talking to Katherine today is that since early 2020, Katherine has focused her considerable skills on COVID-19 issues, including legal framework investigations. Now, what's her background? Katherine earned a philosophy and natural sciences degree from Penn State in 1996. She has reporter chops. She was a reporter for a number of different newspapers. In 2003, she earned a paralegal certificate and has provided legal research and writing in constitutional law, civil rights, and environmental law. Katherine has published several independent journalism blogs. She's worked on local food, water, and energy security campaigns, and she founded Bailiwick News⁶⁷⁸ in 2016 [...] So, Katherine, can I tell you a story and then ask you two questions?

Katherine: Sure.

James: Okay. I published a book called *Flags of Our Fathers*, and Newsweek magazine said Bradley writes on the level of a 17-year-old and my family was upset for me. And I said they got it right. It took me five years to write the book. If I wrote on the level of a master's degree, it would take me about two years. Kurt Vonnegut wrote *Slaughterhouse-Five*. It took him 18 years. It's less than 200 pages. So, my point is that to make it simple, I'm not saying a 17-year-old isn't very bright.

You are bright at 17. I was. But we have an international audience. We have Japanese, Vietnamese, French, and everybody listening to us. So, I'm not as educated as you. And I'd like to get two simple things simply stated upfront. Number one is why is this a bioweapon? If an 18-year-old walked in here right now, how could I explain why this is a bioweapon? Number one. And number two, how did they get this done? Now, let me say it in my civilian language and then you correct me or let's just simplify this.

So, if somebody said to me, James, the COVID-19, whatever it is, it's not a vaccine. But the COVID-19 vaccine is not a bioweapon. I would answer and say, yes, it is. The reason we know that is because the Defense Department DARPA says, uses the euphemism 'countermeasure' for a weapon. They don't say to develop a laser weapon. They say to develop a laser countermeasure. And in their paperwork, they said this was a bio countermeasure. Therefore, it is, the COVID-19 injection is a bioweapon. So, what do you say to that, Katherine?

Katherine: I think that's right. I think a more accessible way to understand it might be by observing what happened. In some ways, we couldn't know it was a bioweapon right at the beginning because we hadn't seen all the adverse effects and deaths and neurological problems and fertility problems and autoimmune disorders, everything that has happened since. So, I think the most persuasive argument is that even after it became clear that it was injuring and killing people, they did not end the program. They expanded the program to more and more people to more and more injections. And that, to me, is the biggest evidence that the deaths and the injuries are intentional. And that's what makes it a bioweapon, in my view.

James: Well, I have friends who say there aren't deaths, there aren't excess deaths and injuries.

Katherine: Well, I'm not going to argue with them that they can't see it. They can't see it.

James: Okay. And then the other thing that you described very well in a few podcasts is the management, the legal what I call the under-structure. So, I'd say to the audience, imagine Washington, DC. There's the White House, you can see the building. Down the street is Congress, there's the Supreme Court, and we imagine that that's our government. Well, let's go underneath and look at the plumbing, like let's literally go under the street and realize that Congress over the last six years and the executive branch kind of rewired the plumbing without us seeing.

⁶⁷⁷ <https://chinarising.puntopress.com/2023/02/26/katherine-watt-is-preparing-nuremberg-2-0-vs-us-presidents-hhs-and-dod-secretaries-for-domestic-bioterrorism-build-the-gallows-jb-west-and-jb-east-present-see-you-in-the-hague-50/>

⁶⁷⁸ <https://bailiwicknews.substack.com/>

And they hooked up the Department of Health and Services, DHS, and they made DHS the emergency controller. So, while we civilians look to the White House and to Congress for leadership, it's actually they switched it to DHS so that the head of DHS is an emergency dictator and he has the emergency powers or she has the emergency powers to get this all done. So that's my civilian take on that. How would you describe that?

Katherine: I would mostly agree,⁶⁷⁹ but it's not DHS. DHS is the Department of Homeland Security. It's HHS – the Department of Health and Human Services. But it's actually, the rewiring I think is correct. I think the more I learn about it and watch what they do and talk to other people who are looking at it, too, I think the HHS secretary is the person who is set up as the frontman to look like the dictator. Well, he's not supposed to look like the dictator. He's supposed to look like he's doing a public health service. But it's actually as far as I can tell now, more of a committee. People call it the deep state. People call it the administrative state in which all of these different cabinet agencies and their upper leadership are coordinating activities across departments, across the HHS, across Homeland Security, across the Department of Justice, and across DOD. USDA – Department of Agriculture is key. The Veterans Administration. All the way across, and they meet together in several different committees. The one that I think is most relevant is called the Public Health Emergencies Medical Countermeasures Enterprise.

James: Can you repeat that?

Katherine: Public Health Emergency Medical Countermeasures Enterprise.⁶⁸⁰ And it's very similar to Fannie Mae and Freddie Mac as government-sponsored enterprises during the mortgage market, housing market meltdown, and the great financial crisis. In that, this enterprise is quasi-public, quasi-private. It has some legal aspects of being public because most of the people on it are appointed cabinet secretaries or undersecretaries.

And it gets public funding, but it spends the money on private corporate contracts through pharmaceutical companies like Pfizer. So, I think that's where the United States branch of what I see as a globalist criminal enterprise is coordinated in the United States, on that committee the PHEMCE, and DOD and HHS are sort of probably the two co-chairs, let's say, of that committee.

James: Okay. And then going back to the bioweapon, isn't there paperwork or DARPA says that we're creating a countermeasure, a biological countermeasure?

Katherine: Yes, there are contracts and there're guidance documents and there are regulations and you can track the word countermeasure in a public health context: medical countermeasures, qualified countermeasures, and security countermeasures. They have a lot of different modifier words to go with the word countermeasures. You can track that back to the late nineties, and early 2000s in both public health law and also in military law and it sort of jumps back and forth between those two. They refer to each other from one section to the other, which is part of how you can tell that it's a coordinated bioweapons program run mostly by HHS and DOD.

James: Okay, so now I focused you on two questions, and I'm going to turn you over to Jeff. You guys are both brainiacs on bioweapons. But before I do, if you are addressing our international audience, what would you like to tell them? What does Katherine Watt have to say about February 2023 and this whole COVID thing that we are involved in? I'll give you the floor.

Katherine: I think that it looks much more impenetrable -- their power looks much more impenetrable or overwhelming than it actually is because so much of it depends on people believing lies to be true. And so, the more you can see through the lies and see what's actually true, the less power they have over you and the more power you have to work with other people to push back against the programs that they're trying to put in place and the programs they have already put in place. I could say more about that. But that's the basic message, is that it's built on lies and so it's made to look much, much stronger than it actually is.

⁶⁷⁹ Clarification: I think the merger of the chemical and biological warfare program and public health police state has been in development for many decades, since the 1944 Public Health Service Act and precursors, not for just the last six years.

⁶⁸⁰

https://en.wikipedia.org/wiki/Administration_for_Strategic_Preparedness_and_Response#:~:text=The%20Public%20Health%20Emergency%20Medical%20Countermeasures%20Enterprise%20%28PHEMCE%29,medical%20countermeasures%20to%20deal%20with%20public%20health%20emergencies

James: So, if I'm listening to you for the first time and hearing a message of hope, what are my next steps? So, there is hope. There's a bunch of lies. How do I begin to penetrate?

Katherine: Number one is to keep talking about it. People have been talking about it for three years now. And talking about it with each other is how we have figured out so many pieces of it. And that's why it was so important for them to do all the censorship and all the propaganda to confuse people and to put out false information and pretend it was true. And so, continuing to talk, even when they try to get you to shut up is, I think, priority number one. And you could talk to anybody you could think of to talk to, in any format, writing or speaking or whatever.

And then beyond that, the other major piece of what the globalists need for their system to clamp down as hard as they want it to, is for people to give up on their own national governments, which is easy to do because it looks like your national governments have completely betrayed you, and elements of your national government have completely betrayed you.

But I still think it's important to stick to your loyalty, to your constitutions, and to the concept of having a national government that represents the people and protects the people in a nation-state.

Because the reason they need to undermine your loyalty to that is so they can bring in the one world government and tell you, 'This is the solution to the problem that you have with your terrible corrupt government,' when in fact they are the entity that has corrupted your national government and they cannot fix it. They do not want to make it any better or more responsive to you or more protective of you than it is.

So, you have to be on the other side saying No. World Health Organization, get out. World Economic Forum, get out. The United Nations, get out. We do not want your one-world government. We want our own national government back in our own hands.

James: And what's the end of the road or the hope? I mean, is there going to be a Nuremberg 2.0? It's so confusing because I can talk to you and people in your field and, gee! this is a bioweapon and it's killing people and it's got to end. And then I look at New Zealand, and they're injecting babies in America. You look at the media and everything's fine. You get your booster and Australia is on its fifth one. What is happening in the world? Are we any closer to any accountability?

Katherine: I think we're closer than we were, but there's no way to know how long it's going to take. It's already taken much longer than anybody thought it would. I know when it started happening back in 2020, I thought, wow, something about our Constitution, something about our Congress, something about people's own interest in living their own lives is going to push back on this and make it stop.

And that has not happened yet. But the momentum and the number of people who are really concerned about it and learning much more about it is bigger now than it was three years ago. And it's getting bigger every day. It's not shrinking. It's not like people on our side are suddenly saying, 'Oh, you know what, I was totally wrong.' That's not happening. More people on the other side are saying, 'Wow, I can't believe it. Now I have some idea of what's going on.'

So, it is moving in the right direction. It's just moving extremely slowly and nobody has any way of knowing what that final straw is going to be. And when that final straw is going to get on the camel's back and make it tip. So, the project as I see it is just to keep pushing and keep pushing and keep pushing in that direction without knowing when it's going to push through the wall.

James: Okay. Yeah. Turn it over to you.

Jeff: I agree with you. The one-world government thing is a huge part of it. And this goes back to Malthus and their depopulation agenda all through the 19th century and into the 21st century and the elite. So, this is not changing for 200 years. I feel like Seymour Hersh just came out with this incredible investigation about the Nord Stream 2 terrorist attack and clearly showed that it was the United States. It's Biden who personally ordered it. And yet I can tell you that if you probably ask ten Americans and ten Europeans where I am about it, they've never heard of it.

And I think that's to me, they control the media now so much and that's my biggest concern. I call it the Big Lie Propaganda Machine. And it is so ruthlessly effective by censorship and PSYOPS fake news.

Do you have any comments about how we can kind of overcome that, Katherine? Because to me, that's the biggest hurdle. If we had a really truly free press, everybody would be informed, but they aren't.

Katherine: Right. My basic answer is just perseverance and persistence and keep going. It's not up to us how fast it unfolds. I think that's up to God. It's our job to give Him the material he needs to work with to push it forward at the pace that He wants it to be.

We do have independent media. That's why awareness is growing, because of independent platforms like yours and all the independent platforms, podcasts, and things like that. And those are small. Some of them have smaller audiences, but in the aggregate, they reach a lot of people. Those people talk to other people. I think also the way the mainstream media portrays itself as being widely viewed as credible is false. I think most people, even if they watch it, watch it thinking 'This is garbage' and don't trust it.

And the useful thing is that as long as they need the Internet to do their moneymaking and to do their own corrupt -- globalists, I'm talking about -- as long as they need the Internet to be functioning to do the stuff that they want it to do, some parts of it are still available to independent journalists and people who want to talk about information in an accurate, true way. And so, I do think at some point they're going to shut it down and do like the cyber-attack or whatever. But I also think they're going to try to get it back up on the other side. And we will still have to just be persistent and keep going.

Jeff: I just recently restarted using Twitter. Now that Elon Musk has bought it, there's a lot more freedom, and a lot more information on Twitter right now about COVID. I'm putting posts up that would have been censored by the previous deep-state management team. So that is an area to really look into. And as both you and James and I can attest for the time being, fingers crossed, Substack is an incredible platform. It is an amazing platform.

There are so many amazing people on that platform who are just reporting and reporting and reporting. And it's just, it's amazing. And I understand they have some kind of peer-to-peer ownership to keep it diluted and to keep the deep state out of it. But right now, I think Twitter and Substack are really the two places to help get informed. And then James and I, our show. I'm the curator of the Bioweapon Truth Commission and its Global Online Library (www.bioweapontruth.com⁶⁸¹).

The information is out there and so it's just trying to inspire people to quit, to turn off MSNBC and BBC and quit reading the *Washington Post* and the *New York Times* and expand their horizons. I guess that's my biggest encouragement to all the people out there that are listening. Katherine's doing incredible work. And James and I are really happy to be able to promote her efforts. Can I ask you one more question, Katherine?

Katherine: Sure.

Jeff: One thing that just amazes me. I'm producing changes in my last show. It's about the connections between the JFK assassination, Richard Nixon being pushed out of office, and the whole Trump fiasco of him being cheated out of the 2020 election and the January 6 false flag done by his enemies. And what really James has done is an incredible amount of work on this. And what's impressive is the number of people that are involved in these things. He was talking about just the JFK assassination, 200 people over the decades have been assassinated for speaking up.

And I'm thinking of Anthony Fauci at NIH and giving Ralph Baric the COVID virus and he weaponized it. And Peter Daszak at EcoHealth Alliance spends tens of millions of dollars giving it to universities and elsewhere. So many people are involved. And it's just, how they did they do or is it these interdepartmental meetings? I mean, did Fauci get together with the groups with HHS and DOD or do they do it by email or how did you see this happening? It's amazing. There must be thousands of people involved.

Katherine: Yeah, I think it's incentive structures. I think there are people who know what the overall program is and they know how to motivate other people to go along with it. And the part -- I think that's the main reason why they

⁶⁸¹ <http://www.bioweapontruth.com/>

did this sort of conversion of it that I write about. It was a DOD program. It was the Chemical and Biological Warfare program. And then they transferred it and relabeled it to be the Public Health Emergencies Medical Countermeasures Program.

And there are a lot of people who really do believe that what they're doing is a public health service because it hasn't been as clear as it is now until COVID came. And then they did the forced injections and the adverse effects and covering up the adverse effects and deaths and refused to stop the program. All the things that I think make it very clear that it's a bioweapons program and not public health. But up until that happened, until we could see it happening in real-time, it was very, very difficult to see.

You could very easily go along with it and say, sure, H1N1 is an outbreak of communicable disease and wow, it's so great. They have come up with a vaccine and they're offering it to us. And that was the thing. They did it incrementally. Like it was, first with 2003, the first SARS. It was like, 'Oh, here's a communicable outbreak. We should all be worried because this is global or whatever.' That was why we should not be worried, because it's just an ordinary cold, basically. And then they add pieces each time.

So, the next time with H1N1 in 2009, they were like, 'Oh, there's this global outbreak. Now we have a vaccine and we suggest that you take it.' And a lot of people did because it still looked like it was a benevolent program.

When they got to 2020 and COVID and they did the lockdowns and they did the mask mandates and then they did the bioweapon mandates, it became much more clear that there is nothing benevolent about this. But it's much easier to keep people going along with the program if they think they're actually doing a good thing. And now that people are figuring out, they were not doing a good thing, they were doing a really, really bad thing. It changes. It changes the dynamics.

Jeff: I guess a lot of there's probably a lot of compartmentalization --

Katherine: Yes, but I do think Fauci does --

Jeff: -- This person doesn't know what this is. Oh, yeah, absolutely. Well, he was the one that gave Ralph Baric the coronavirus to weaponize it at the University of North Carolina, Chapel Hill.

Katherine: Well, I just wanted to say Fauci has been in a position in the Health and Human Services since the late 1960s when the whole program started. So, he was right there. He was right there to manage the AIDS outbreak. He was right there to manage the swine flu in 1976. So, he has been at the center of it since the very beginning in the late sixties.

James: Katherine?

Katherine: Yeah.

James: So, I'm in Vietnam and have not been in the States for a number of years. And listening to you, it sounds like people are becoming aware. You're using words like facts and damage and growing awareness. Well, I have a friend who's on the board of directors of a major clinic in the Midwest. And how is it possible that a civilian board of directors, bankers, lawyers, people from all walks of life, not just doctors, that there is a board and then underneath that board, there's an administrator, major clinic. There are many doctors and nurses in this clinic and they have been administering a bioweapon for three years?

So how is that possible that there's not a demonstration, that no one's throwing eggs at the window, that the board is allowing this to happen? I mean, how do you get hundreds of people in an institution? They must be hearing the feedback that you're talking about.

Katherine: You incentivize them. You tell them and you demonstrate to them that if they cooperate, they will continue to get funding. They will continue to have jobs. They continue to be the leaders of this type of organization. And if they do not cooperate, they will be cut off for money in their personal and professional contexts. They will lose their businesses. They will lose their homes. Their marriages will fall apart. It's a carrot and stick and it's extremely effective.

And it runs from the very, very top for the Bank for International Settlements, holding that carrot-and-stick-like system over each national government and each central bank of each government. And then the central banks and the national governments hold it over the state governments and the state governments hold it over the counties and the counties hold it over the towns and the school boards and the hospitals. And then they hold it over people who work at all of those organizations. And it's very effective.

James: Well, I wanted to say that is a brilliant and succinct answer, and I appreciate you going all the way up to the BIS. Not many people do that in this field talking about COVID, talking about the financial motivations. And if the audience doesn't know what BIS is, they should read Tower of Basel. Tower of Basel, I think is the name of the book.

Katherine: Adam Lebor (download free book⁶⁸²).

James: Yeah. And I just really admire what you just said. And I'd like to say to the audience, this is Katherine Watt and look her up at Bailiwicknews.substack.com.

March 26, 2023 - Rand Paul proposed an amendment to S.316, to repeal the 2001 Authorization for Use of Military Force (AUMF), which is one of the statutes enabling globalist herd-culling war on the world's people. Senate voted the amendment down, 86-9, with five not voting.

*

Senate Amendment 2,⁶⁸³ “To repeal the 2001 Authorization for Use of Military Force,” [PL 107–40; 115 Stat. 224⁶⁸⁴] was proposed by Sen. Rand Paul on March 22, 2023, during debate on S. 316,⁶⁸⁵ a bill introduced by Sen. Tim Kaine, containing two provisions:⁶⁸⁶

...The Authorization for Use of Military Force Against Iraq Resolution (Public Law 102–1; 105 Stat. 3; 504 U.S.C. 1541 note) is hereby repealed and...

the Authorization for Use of Military Force Against Iraq Resolution of 2002 (Public Law 107–243; 116 Stat. 9 1498; 50 U.S.C. 1541 note) is hereby repealed...

Even though Rand Paul’s amendment did not get the required two-thirds vote to be added to the original bill — and the original bill plus amendments hasn’t yet come up for a full Senate vote — the March 22, 2023 roll call vote⁶⁸⁷ record offers the world’s people useful information about the positions currently held by each US Senator, regarding the legitimacy of permanent US-led war in its many forms, including but not limited to chemical and biological warfare disguised as a “public health emergency, medical countermeasures” program.

Screenshot of the roll call on Senate Amendment 2 is below.

Nine US Senators voted Yea, including Rand Paul (R-KY), Mike Lee (R-UT), Edward Markey (D-MA), Bernie Sanders (D-VT), Ben Cardin (D-MD), Mike Braun (R-IN), Elizabeth Warren (D-MA), JD Vance (R-OH) and Tammy Baldwin (D-WI).

86 US Senators voted Nay.

Five US Senators couldn’t be bothered to vote, or are too sick to show up for votes, including John Fetterman (D-PA), Dianne Feinstein (D-CA), Richard Durbin (D-IL), Mitch McConnell (R-KY), and Martin Heinrich (D-NM).

Bailiwick News reporting on how the 2001 Authorization for Use of Military Force (AUMF) fits into the current global war on human beings susceptible to respiratory illness:

- Jan. 3, 2023 - Bioweapons, EUA products, IND products, Constitutional crisis.

“...In September 2001, under the fear-cover provided by 9/11 and the anthrax attacks, another layer of national emergency/state of war (Global War on Terror) was put in place, through the Congressional Authorization for Use of Military Force (AUMF) and George W. Bush’s Proclamation 7463, *Declaration of National Emergency by Reason of Certain Terrorist Attacks*, promulgated under the 1975 National Emergencies Act and renewed every year since.

Those were quickly followed by the PATRIOT Act in October 2001, the establishment of the Department of Homeland Security in November 2002 and the expansion of biomedical police state programs for the next two decades through the PREP Act, Project Bioshield Act and more.

By 2019, they wanted to take even more direct control, were prepared to risk just a bit more exposure, and had put more pieces on the board to centralize more power under public health emergency conditions.

So in 2020, under the fear-cover provided by Covid-19, another layer of control went into effect, through the January 2020 determination that a public health emergency exists (HHS Secretary Alex Azar) and Donald Trump's March 13, 2022, Proclamation 9994, *Declaring a National Emergency Concerning the Novel Coronavirus Disease (COVID-19) Outbreak*, also under the 1975 National Emergencies Act.

Also renewed every year since.

March 28, 2023 - On beauty, book arts and architecture: endpapers, Mont-Saint-Michel and more.

Thank you to readers for all the suggestions about possible on-demand book publishers, in response to the post a few days ago on that topic. I'm working through the comments and emails to figure out some next steps.

I'm highlighting one reader comment here, along with my reply, because the exchange reminded me of some things I try to keep close to heart and top of mind: how important it is to continue to create and share human things that are true, beautiful, good and loving, even while confronting and pushing back against the lies, ugliness, evil and hatred of the globalists and their horrifying obsession with making financial-biological war on living humanity.

Reader comment:

Thinking about physical books — in the 1980s I knew an artisan book binder who was a faculty member in an art school. Also a Turkish business school professor who was a close friend who gifted me a marbled paper by a famed Turkish bookbinder who made the marbled and colorful endpapers for books that were one of a kind. He had rolls of the stuff. I framed mine. I wish I could send it to you! Sasha would like it I think too. We have to remember how special books are, and yours should have a physical form as well for the long run.

Here is a link describing that amazing tradition.⁶⁸⁹

My reply:

Those endpapers are so beautiful. I love the book, paper, bookbinding and printmaking arts. I visited the Cloisters at the Met in NYC a few weeks ago, and was fascinated by the illuminated manuscripts, and one tiny breviary that was about two-inches by two-inches small, with tiny but fully legible writing.

If I had been born in a different time, I think I would have enjoyed a life as a copyist in a monastery or convent. There are some passages in Henry Adams' Mont-Saint-Michel and Chartres⁶⁹⁰ — architectural descriptions — that are so evocative.

"...If any lingering doubt remains in regard to the professional cleverness of the architect and the thoroughness of his study, we had best return to the great hall, and pass through a low door in its extreme outer angle, up a few steps into a little room some thirteen feet square, beautifully vaulted, lighted, warmed by a large stone fireplace, and in the corner, a spiral staircase leading up to another square room above opening directly into the cloister.

It is a little library or charter-house. The arrangement is almost too clever for gravity, as is the case with more than one arrangement in the Merveille. From the outside one can see that at this corner the architect had to provide a heavy buttress against a double strain, and he built up from the rock below a square corner tower as support, into which he worked a spiral staircase leading from the cellar up to the cloisters. Just above the level of the great hall he managed to construct this little room, a gem.

The place was near and far; it was quiet and central; William of Saint-Pair, had he been still alive, might have written his "Roman" there; monks might have illuminated missals there. A few steps upward brought them to the cloisters for meditation; a few more brought them to the church for prayer. A few steps downward brought them to the great hall, for business, a few steps more led them into the refectory, for dinner.

To contemplate the goodness of God was a simple joy when one had such a room to work in; such a spot as the great hall to walk in, when the storms blew; or the cloisters in which to meditate, when the sun shone; such a dining-room as the refectory; and such a view from one's windows over the infinite ocean and the guiles of Satan's quicksands. From the battlements of Heaven, William of Saint-Pair looked down on it with envy..."

I have a 1920s Chandler & Price Pilot printing press — a tabletop version they manufactured for teaching — and letterpress type in several fonts, and do linocut printmaking, typesetting and other small projects.⁶⁹¹

It would be far too labor intensive to set the type and print full books of Bailiwick material, but yes, I love books whose physical form is beautiful and long-lasting, and hope there will be more of them.

March 30, 2023 - Sen. Ron Johnson gets senators on record re: international contracts that enslave Americans to globalists through the World Health Organization and pharmaco-martial law. Also delegation-of-authority research and a new podcast video.

On March 28, 2023, Sen. Ron Johnson (R-WI) proposed S.Amdt. 11⁶⁹³ —

“To require any convention, agreement, or other international instrument on pandemic prevention, preparedness, and response reached by the **World Health Assembly** to be subject to Senate ratification”

— to S.316,⁶⁹⁴ a bill introduced by Sen. Tim Kaine, originally containing two provisions⁶⁹⁵ (largely symbolic) to repeal PL 102-1, Authorization for Use of Military Force Against Iraq Resolution and PL 107-243, Authorization for Use of Military Force Against Iraq Resolution of 2002.

S.316 passed on March 29, 2023, with no amendments, by a 66-30-4 vote.

Background:

For more information on the World Health Assembly process for adopting a new ‘pandemic treaty’ and also adopting new amendments to the World Health Organization International Health Regulations that have been in force since 1952 and amended in 1969, 1973, 1981, 2005 and in May 2022 — which are **two different but interlocking geopolitical procedures** — please see James Roguski’s Substack.

Roguski has done much more detailed research, writing and video presentation about the World Health Organization component of the intentional global fraud and mass murder program than I have. (I focus on the American domestic law components.)⁶⁹⁶

The World Health Organization is attempting a GLOBAL POWER GRAB by seeking to have the 194 member nations of the World Health Assembly adopt a completely new international agreement commonly referred to as the proposed “Pandemic Treaty” in addition to seeking to adopt proposed amendments to the International Health Regulations.

The proposed “Pandemic Treaty” would give the WHO control over “pathogens with pandemic potential” as well as control over the means of production within the Pharmaceutical, Hospital, Emergency Industrial Complex. It is an absolute abomination that must be stopped.

The proposed amendments to the International Health Regulations would make the WHO’s proclamations legally-binding rather than just advisory recommendations. The proposed amendments seek to institute global digital health certificates, dramatically increase the billions of dollars available to the WHO and enable nations to implement the regulations WITHOUT respect for the dignity, human rights and fundamental freedoms of people.

Agreement by a simple majority of the 194 member nations is all that is needed to adopt the amendments because, as amendments to an existing agreement, neither the advice and consent of the United States Senate, nor the signature of the President would be required.

These proposed amendments are being negotiated in secret without any opportunity for comment by people from around the world.

*

I don’t know how the puppet pseudo-government officials occupying Washington DC classify the proposed new pandemic treaty or the amendments to the International Health Regulations, nor which American constitutional, statutory or regulatory provisions they may construe as providing legal authority for their acts of adoption, ratification and enforcement of such foreign policy instruments.

Roguski offers detailed reporting and analysis in his May 21, 2022 Questions⁶⁹⁸ post and March 14, 2023 Truth Bomb post.⁶⁹⁹

Roguski’s work includes pointed legal questions directed at Richard Visek, Acting Legal Adviser to the Secretary of State, and requests for documents, including delegation of authority letters.

Roguski notes that the 2005 International Health Regulations were adopted as a “sole executive agreement,” citing a September 2010 Kaiser Family Foundation report, U.S. Participation in International Health Treaties, Commitments, Partnerships and Other Agreements,⁷⁰⁰ at p. 9:

...Among the 26 legally binding international health agreements identified, the U.S. is party to 16 as follows: Thirteen of twenty-one international health-related treaties: Eight were signed and ratified by the U.S. as treaties under U.S. law (with advice and consent of the Senate), four that address a particular health issue, and four that establish organizations working either directly or indirectly on health issues. Five were concluded by the U.S. as executive agreements, including the International Health Regulations (IHR 2005) and establishment of the World Bank. **One of these executive agreements, the IHR (2005), was concluded through a sole executive agreement;** the remaining four were concluded as congressional executive agreements...”

For reference, the 2005 IHR are the pseudo-binding international pseudo-regulations that underpin the entire American pseudo-statutory framework for the pseudo-legal global kill box⁷⁰¹ predicated on ‘public health emergency’ government power centralization.

For general information on the differences between treaties and executive agreements, see Georgetown Law Library, Distinguishing Treaties From Executive Agreements⁷⁰²

Under U.S. law, the term “treaty” is reserved for international agreements submitted by the executive branch to the U.S. Senate for its advice and consent. Only if the Senate ratifies a treaty by a two-thirds majority may the treaty enter into force.

International agreements that enter into force without the advice and consent of the Senate are often referred to generically as “executive agreements.”

Bear in mind that this generic term encompasses three distinct types of agreements:

- Agreements concluded on the basis of the president's constitutional authority (executive agreements);
- Agreements concluded pursuant to a statute enacted by Congress (congressional-executive agreements); and
- Agreements concluded pursuant to the terms of a duly ratified treaty...

[Back to the United States Congress and the ongoing attempts of members like Rand Paul and Ron Johnson, to break out of their puppet status and act like real statesmen.](#)

On March 22, Sen. Rand Paul proposed an amendment⁷⁰³ to repeal PL 107-40,⁷⁰⁴ the 2001 Authorization for Use of Military Force that purported to Congressionally-authorize US military attacks on all the world’s people, without geographic or temporal limitations, called the ‘Global War on Terror,’ and passed under the 1973 War Powers Act, 50 U.S. Code § 1541.

Like Sen. Paul’s March 22 amendment, Sen. Johnson’s March 28 amendment (seeking Senate ratification of WHO treaties and treaty-like international contracts) did not get the required two-thirds support to be added to the original bill.

Sen. Johnson’s amendment failed by a 47-49-4 vote.

Like Sen. Paul’s amendment, Sen. Johnson’s amendment created a very useful roll call⁷⁰⁵ record of the positions currently held by each US Senator, on the legitimacy of the globalists’ long-running chemical and biological warfare programs, disguised as pandemic and public health emergency management programs, and carried out through international treaties, executive agreements, regulations and other legal instruments, as negotiated and adopted by national delegates to the World Health Assembly of the World Health Organization, but not subject to meaningful review or ratification by the legislatures of formerly sovereign nations.

Unlike Sen. Paul’s amendment, the roll call vote on the pandemic-predicated global centralization of governing power fell on almost-pure party lines.

47 Republican senators voted “Yea,” in support of their own authority to participate meaningfully — as representatives of the People — in sovereign foreign policy and pharmaceutical war-making decisions.

45 Democrats, three Independents and one Republican senator voted “Nay,” explicitly abdicating their own

authority to participate in foreign policy and war-making decisions, and explicitly consenting to the status quo: the dictatorial, lethal exercise of unchecked governing power by the President, Cabinet secretaries and their delegates over a non-consenting population.

Four Senators didn't vote, due to absence for illness or other reasons.

This party-line split is very interesting.

Delegation of authority research

Because of Jim Roguski's WHO work, and Sasha Latypova's contract analysis (especially Feb. 27, 2023 - You cannot contract for a crime, but you CAN write a contract for it!⁷⁰⁶ and March 7, 2023 - Part 2 of "Contracts for Crimes"⁷⁰⁷) I've been flagging references to "delegation of authority" whenever I find them, and looking for the constitutional, statutory and/or regulatory authorities the criminals currently occupying government offices cite to pseudo-justify their criminal assaults on the people of the world.

I located some legislative and regulatory records yesterday, on power transfers enacted by Congress in September 2018, implemented by HHS through Federal Register notices, and extended by Congress in December 2022.

These mechanisms appear — on initial reads — to transfer international contract oversight power from the US Senate to the Secretary of State; then from the Secretary of State to the Secretary of Health and Human Services (HHS); then from the HHS Secretary to the Director of the Centers for Disease Control and Prevention (CDC); and finally from the CDC Director to the CDC Chief Operating Officer.

I'll read and think about this collection of records more, because I think they may help answer the question:

What is the legal, foreign policy-law mechanism through which the American people and the US Congress are shut out of international treaty negotiation, amendment and ratification procedures, through the World Health Assembly/World Health Organization globalist governing institutions, under public health emergency pretexts?

Do the records identified below form part of relevant mechanisms of Congressional disempowerment?

I don't know. It may hinge on whether the acting, fraudulent US Government construes international treaty negotiation, ratification and related acts as proper subject matter for "personal services contracts" that are outside the review and oversight of Congress.

This, of course, seems absurd.

But we already know how the globalists have successfully perverted procurement contracting regulations (Other Transactions Authority programs) and drug safety regulations (FDA Emergency Use Authorization programs⁷⁰⁸) to render otherwise criminal acts as pseudo-legal and keep Congress and the American people from seeing and understanding the scale and scope of the central bankers' criminal enterprises.

Perversion of "personal services contract" law to pseudo-empower people impersonating US Government administrative state officials to wholly exclude Congress from the conduct of foreign policy and war, would fit the pattern.

The legal paper trail so far includes:

- Aug. 1, 1956 State Department Basic Authorities Act, PL 84-885, codified at 22 USC 2669. "...The Secretary of State, may use funds appropriated or otherwise available to the Secretary to— (c) employ individuals or organizations, by contract, for services abroad and individuals employed by contract to perform such services shall not by virtue of such employment be considered to be employees of the United States Government; [...] and such contracts are authorized to be negotiated, the terms of the contracts to be prescribed, and the work

Nov. 14, 2022 - Thought-stopping stage sets in legal pleadings. Proposed thought-restarting language to help people revoke their coerced suspension of disbelief.⁷¹⁸

CJ Hopkins, *The Road to Totalitarianism, Revisited*⁷¹⁹ (Nov. 13, 2022)

...After I happened upon the “Covid restrictions” (i.e., the social-segregation system) still being enforced by that Off-Broadway theater, I stumbled upon this article in *Current Affairs*⁷²⁰ about the oracle Yuval Noah Harari, the writer of which article mentions in passing that somewhere between 6 million and 12 million people have “died of Covid,” as if this were a fact, a fact that no one in their right mind would question.

Which it is, officially, in our new “reality,” despite the fact (i.e., the actual fact) that — as even the “health authorities” have admitted — anyone who died of anything⁷²¹ in a hospital after testing positive was recorded as a “Covid-19 death.”

This is how “reality” (i.e., official “reality,” consensus “reality”) is manufactured and policed. It is manufactured and policed, not only by the media, corporations, governments, and non-governmental governing entities, but also (and, ultimately, more effectively) by the constant repetition of official narratives as unquestionable axiomatic facts.

Hopkins’ point about how consensus “reality” is manufactured and policed, is extremely important.

Yesterday after I read it, I was reading more legal pleadings. I was reading the Ninth Circuit opinion and Supreme Court appellate briefs in *Saldana v. Glenhaven Health Care* (22-192).

The Saldana case presents SCOTUS with an opportunity to review the liability immunities provided to medical facilities, medical personnel and medical products under the 2005 PREP Act and related HHS declarations and recommendations on emergency treatments and protocols.

On Sept. 30, 2022, the Chamber of Commerce of the United States of America, the American Hospital Association, the American Health Care Association and the American Tort Reform Association filed an amicus brief in support of Glenhaven’s position that the survivors of the dead man (Ricardo Saldana), have no viable claim against the nursing home where he died, on grounds that PREP Act preemption is complete.

The medical-industry cabal attorneys at page 3:

In early 2020, a highly contagious and deadly new virus began sweeping around the world and across the country. Little at the time was known about COVID- 19, how it spread, how it harmed those infected, how it could be contained, or how it could be prevented. Healthcare providers were forced to adapt to rapidly changing circumstances and information.

This paragraph has been reproduced, with slight variations as to wording, in thousands of legal documents during Covid-times, written by purveyors of the official narrative, but also reflected in victims’ own filings and in judicial orders and memoranda.

For example, US District Judge William Stickman IV wrote an otherwise constitutionally-sound September 2020 decision in *Butler v. Wolf*,⁷²² USDC Western District of Pennsylvania, 2:20-cv-677.

The case was brought by several Pennsylvania small business owners and others, challenging Governor Tom Wolf’s executive orders shutting down or reducing occupancy at premises across the state.

⁷¹⁹ <https://cjhopkins.substack.com/p/the-road-to-totalitarianism-revisited>

⁷²¹ <https://off-guardian.org/2020/04/05/covid19-death-figures-a-substantial-over-estimate/>

⁷²² <https://renzlaw.files.wordpress.com/2020/09/pa-butler-v.-wolf1.pdf>

Judge Stickman found the governor's orders unconstitutional.

The Constitution cannot accept the concept of a “new normal” where the basic liberties of the people can be subordinated to open-ended emergency mitigation measures. Rather, the Constitution sets certain lines that may not be crossed, even in an emergency. Actions taken by Defendants crossed those lines. It is the duty of the Court to declare those actions unconstitutional. Thus, consistent with the reasons set forth above, the Court will enter judgment in favor of Plaintiffs. (p. 66)

But even Stickman accepted the basic premise we now know was fraudulent from the start:

The COVID-19 pandemic has impacted every aspect of American life. Since the novel coronavirus emerged in late 2019, governments throughout the world have grappled with how they can intervene in a manner that is effective to protect their citizens from getting sick and, specifically, how they can protect their healthcare systems from being overwhelmed by an onslaught of cases, hindering their ability to treat patients suffering from COVID-19 or any other emergency condition. (p. 1)

Judge Stickman's Sept. 2020 order was immediately stayed by Third Circuit at Governor Wolf's request, leaving Wolf's shutdown orders in force.

Plaintiffs' appeal was dismissed as moot by the Third Circuit in August 2021, on the absurd grounds that Wolf had temporarily lifted the restrictions and therefore the basis for constitutional review of executive emergency powers had disappeared.

The same absurd reasoning has been used to throw out a lot of similar cases; it's a pattern; it's part of the coordinated program. See, for example, June 22, 2022 Bailiwick report on a Georgia case: *Smart v. Kemp*; ultra vires - 'beyond the power.'⁷²³

SCOTUS denied *certiorari* on *Butler v. Wolf* in January 2022, refusing to hear the plaintiffs' appeal from the Third Circuit dismissal. See Feb. 4, 2022 Bailiwick report: How the International Health Regulations voiding constitutional and statutory law in signatory nation-states, underpin de facto public health martial law in Pennsylvania.⁷²⁴

Commonwealth Partners Chamber of Entrepreneurs filed a Third Circuit amicus brief in *Butler v. Wolf*, on the side of the small business owners, concluding that “the Fourteenth Amendment's Due Process Clause does not allow Governor Wolf and Secretary Levine to unilaterally — and indefinitely — determine which businesses in Pennsylvania may operate and which businesses must close, based upon an undefined standard that is permanently insulated from review. The [Sept. 2020 Stickman] opinion of the District Court should be upheld.”

But even the authors of that brief, in siding with the small business owners against Governor's Wolf's totalitarian overreach, accepted the basic premise.

A brutal, debilitating and unrelenting pandemic swept across the entire globe in 2020. In its wake, the novel coronavirus (“COVID-19”) has left only death and destruction. It ravaged thriving economies, attacked prospering businesses, and took millions of innocent lives. The exigent nature of the current health crisis is not in question. The disease forced this nation's federal, state and local governments to react quickly and decisively to an unprecedented public health emergency.

The language is designed to reinforce the illusion, the fraud, on which the rest of the criminal enterprise rests: the claim that “the exigent nature of the current health crisis is not in question.”

The language has been inserted into Covid-era legal documents early in the text, at introductory or background sections where most lawyers, judges and experienced readers are skimming without engaging deep analytical faculties, self included.

Legal readers skim those sections because they typically present factual case information that is well-known and not disputed, and we're more interested in getting to the disputed issues and the legal arguments.

⁷²³ <https://bailiwicknews.substack.com/p/smart-v-kemp>

⁷²⁴ <https://bailiwicknews.substack.com/p/how-the-international-health-regulations>

It's diabolical, coordinated genius.

It forces readers to skip over the single most important disputable issue: What is the nature of the emergency confronting human beings since January 2020, and therefore also confronting the courts through which we traditionally try to resolve disputes without resorting to overt violence?

Is the emergency the global outbreak of a deadly, novel, unprecedented communicable disease, as thousands of lawyers and judges have stated as indisputable fact, in thousands of pleadings and opinions?

Or is the emergency the global outbreak of a massive, orchestrated fraud, combined with covert violence (bioterrorism and medical murder), designed to bypass the Constitutional crisis set in motion by Congress and US Presidents through hundreds of tyrannical legislative and executive acts committed over the past half-century?

Is it a massive, orchestrated fraud designed to clear away every conceivable legal, social and political obstacle in the path to non-consensual, centralized, public health-predicated global surveillance, control and governance?

With every passing day, the answer becomes more clear.

It's a massive, orchestrated fraud.

It all goes back, again and again, to the legal mechanisms.

The legal codes, regulations, executive orders, declarations and proclamations are the primary crime scenes, where the criminals rampaged long before the death machine engines engaged in hospitals, nursing homes, pharmacies and pop-up vaxx clinics.

The visible law-makers and shadowy law-writers are the master criminals, long before the public health experts, doctors, nurses and pharmaceutical manufacturers began to play their parts.

And the pseudo-laws have been written to pre-cover up the crimes, pre-paralyze the courts, suppress the legal principles, and preempt and hide the resulting Constitutional crisis triggered by those laws.

The criminals desperately need to bypass that Constitutional crisis, to take us all quietly to the full totalitarian system that lies beyond it.

It's a massive, orchestrated fraud.

That's the knowledge that the would-be global tyrants must keep from the Normals at all costs, and operate every lever of power at their disposal to keep hidden.

Every legal pleading filed by the resistance from this point forward should stop playing along with the fraud and start reinforcing the truth.

The very first sections of every filing need to include some version of the following:

A brutal, debilitating and unrelenting US Government-coordinated fraud swept across the entire globe in 2020.

Government and public health agencies around the world labelled the fraud "Covid-19," and used the fraud to terrify populations; suspend the rule of law; destroy the credibility of religious, political, legal, medical, scientific research and media institutions and professions; shred social bonds based on mutual trust; ravage thriving economies; attack prospering businesses; and take millions of innocent lives.

The fraudulent global health crisis was manufactured and sustained through specific, identifiable government policies and programs developed at the federal level in the US, and exported for replication by national governments in almost every other country in the world.

These policies and programs included the development and deployment of communicable and injectable pathogens — including but not limited to the toxic compound colloquially known as the “spike protein” — by the US Department of Defense in cooperation with academic and private sector criminal organizations in the US and other countries, in violation of international and federal laws prohibiting chemical and biological warfare, genocide, torture, mutilation and other atrocities.

These policies and programs must be scrutinized, repealed and terminated. Their architects and financiers must be charged, tried and executed. Their victims and survivors of the dead must be compensated and cared for.

The US Government’s fraud forced the world’s people to waste three years attempting to react quickly and decisively to an allegedly unprecedented public health emergency, when in truth, the unprecedented threat faced by Americans and the rest of humanity is a criminal fraud and mass murder campaign operated by the US Government and dozens of private-sector and academic conspirator organizations.

I respect CJ Hopkins and his writer-warrior work. He is a powerful, wise voice crying in the wilderness. I’m grateful for him and his courage and perseverance.

I’m also alert to the emotional effects of things I read and watch. Reading Hopkins often pushes me toward despair, which is bad.

Despair is part of the learned helplessness phenomenon. It weakens agency.

My understanding is that Hopkins thinks that humans can and should try to resist, organize ourselves and throw off the diabolical totalitarian tsunami crashing over us. But he also thinks that there are too many Normals and not enough Deviants, and the totalitarian overlords have had too much control for too long over the minds of the Normals, so the likelihood of success is near-zero.

When I read Hopkins, I try to absorb his incisive analysis and historical contextualizing, and also try to remind myself: God changes the calculus.

God can do things humans cannot do.

Working with God, humans can do things that humans cannot do by ourselves.

April 4, 2023 - Government by silent immobility: an effective ruling innovation developed by the globalists, capitalizing on natural human aversion to hard work, conflict and pain.

FOIA requests to Department of State re: delegation of authority for treaty negotiation and ratification.

Following up on:

- March 30, 2023 - Sen. Ron Johnson gets senators on record re: international contracts that enslave Americans to globalists through the World Health Organization and pharmaco-martial law.⁷²⁵

and James Roguski reporting and analysis:

- May 21, 2022 - Questions⁷²⁶
- March 14, 2023 - Truth Bomb⁷²⁷

Below is a summary of Roguski's findings about the legal procedures used by delegates from member-states, to the World Health Organization World Health Assembly, to negotiate, adopt and trigger enforcement of

1. amendments to existing WHO International Health Regulations (IHR), which is classified by WHO as a "legally-binding instrument of international law;"⁷²⁸ and
2. a proposed, new "pandemic treaty"

Amendments to WHO International Health Regulations

Under the IHR amendment process, the default position is that amendments adopted by "consensus" at the World Health Assembly each May are automatically enforceable in each member state 24 months later.

A nation-state government can act to block the enforceability after the World Health Assembly meeting concludes and the delegates go home.

But if the nation-state government doesn't do anything — if the executive, legislature and courts remain silent and immobile — the amendments go into force.

Consensus means without voice, roll call, or any other formal delegate vote. The amendments are passed by the simple mechanism of nobody objecting for a few minutes after someone introduces a resolution on the floor of the assembly. WHO officials and/or each country delegation then must formally notify the federal executives and legislatures that the amendments have been adopted; that the nation-state government has 18 months to file a rejection letter; and that if the rejection letter isn't written and sent, the amendments will enter into force in 24 months.

In other words, IHR amendments adopted this way automatically go into force in all the WHO member countries 24 months after the WHA acts, *unless* within 18 months of being notified about the amendments, any individual government moves, speaks and sends a letter saying "No, we don't agree to this."

- 1946 WHO Constitution⁷²⁹
- 2005 WHO International Health Regulations⁷³⁰

Article 59, Paragraph 3 of the IHR of 2005 informs each WHO member-state of its obligations — under Article 22 of the WHO Constitution — to “adjust its domestic legislative and administrative arrangements fully with these regulations within the period set out in paragraph 2 of this article” — currently 24 months.

⁷³⁰ <https://bailiwicknewsarchives.files.wordpress.com/2023/04/2005-who-international-health-regulations-3rd-ed.pdf>

Article 59, Paragraph 3 informs member-states that failure to adjust domestic legislation and regulations by the deadline, requires the member-state to “submit within the period specified in paragraph 1 of this Article [18 months] a declaration to the Director-General regarding the outstanding adjustments and achieve them no later than 12 months after the entry into force of these regulations for that State party.”

The WHO Constitution and International Health Regulations created and now keep in place the global kill box⁷³¹ and the American statutory and regulatory framework,⁷³² through the criminal complicity and nonfeasance of Congress, US Presidents, Cabinet secretaries, state governments, and federal and state courts.

*

The United States delegation to WHO led the most recent round of amendments, which were submitted by HHS Assistant Secretary Loyce Pace to the United Nations/World Health Organization on Jan. 18, 2022.⁷³³

On Jan. 20, 2022,⁷³⁴ WHO Director-General Tedros Adhanom Ghebreyesus transmitted the US-proposed amendments, as “Provisional agenda item 16.2,” to each WHA member-state delegation for initial review.

On April 12, 2022,⁷³⁵ Tedros submitted the US-proposed amendments to the WHA delegates for consideration at the late May 2022 meeting in Geneva.

On May 24, 2022,⁷³⁶ the delegations from the US, UK, EU, Australia, Japan and several other member-states formally circulated the US-proposed amendments to the World Health Assembly as a draft resolution.

On May 27, 2022,⁷³⁷ the World Health Assembly “adopted” the resolution through the consensus process outlined above, which requires no recorded votes, simply the absence of formal objections.

Two of the US-proposed, WHA-adopted amendments will reduce the time windows between WHA adoption and automatic enforcement at the nation-state level.

Effective May 27, 2024, *unless* countries individually reject the amendments by 18 months from May 27, 2022 (by Nov. 27, 2023) — any subsequent amendment packages, will go into force 12 months from "consensus" adoption at World Health Assembly (down from 24 months), *unless* countries send letters of rejection within 10 months of the consensus adoption (down from 18 months).

Currently, to the extent that the WHO governmental procedures are construed as legitimate by nation-state governments, no Senate or Parliament, or President/Prime Minister, or health secretary anywhere in the world has an opportunity or an obligation, to review, debate, vote on, formally ratify or put his or her signature on any IHR amendments.

By default, any amendments passed by consensus at a WHA meeting become enforceable in all the member-states 24 months later.

Treaties

Treaties, such as the proposed "pandemic treaty," sole-executive agreements, and other international contracts, are subject to a different set of negotiation, adoption and ratification procedures at the member-state and World Health Assembly levels.

In the United States, Roguski has found, international agreements are governed by State Department regulations about notification to the State Department that someone wants to negotiate a treaty and what the content of the treaty is about, so that the State Department can conduct legal review of the contract; classify it as subject to or exempt from Senate ratification, and/or other contract types; and then issue a formal pre-authorization letter to the negotiator, to go ahead and negotiate.

Roguski has looked for State Department legal review documents, treaty classification reports, authorization documents, and Federal Register notices addressing the “delegation of authority” for individuals claiming to represent the United State Government, to negotiate or cast WHA votes.

He’s looked for those documents relating to *both* amendments to the 2005 International Health Regulations — which he argues pose the primary threat to the world’s people, and relating to a new pandemic treaty, which he believes is mostly a decoy to keep public attention away from the IHR amendment process.

He has not located any such documents or authorizations.

It’s possible that none of the required legal reviews, legal classifications, delegations of authority, notifications to Congress, Senate ratifications and other procedures have been conducted, potentially voiding the 2005 IHR amendments, the May 2022 IHR amendments, the planned May 2023 IHR amendments, and the proposed “pandemic treaty.”

It’s also possible that there is a collection of pertinent records that will come to light to render the US Government’s acts pseudo-legal and on-paper compliant with pseudo-laws whose sole purpose is to prevent Americans from understanding that criminals pretending to be US Government officials are engaged in a global war to control, injure, sicken, impoverish and kill billions of people.

It’s important to note that, because the US delegation is the source of the May 27, 2022 amendments to the 2005 International Health Regulations, the odds of the same delegates, or the President, sending a rejection letter to reject those amendments, are very small.

The odds go up if social and political pressure continues to build, pushing more members of Congress and federal judges to overcome their default setting of silence and immobility, and choose to deal with the Constitutional crisis in a loud, confrontational way instead.

I filed a FOIA request to Department of State, requesting (paraphrased):

1. ...All notifications sent from WHO to US Government officials, announcing the May 27, 2022 World Health Assembly adoption of amendments to the 2005 IHR; and informing the US Government of its right, under Article 22 of the WHO Constitution and Article 61 of the 2005 IHR, to formally reject amendments.
2. All notification sent by US Government officials, to the WHO, pertaining to US rejection or reservation of the May 27, 2022 IHR amendments... between May 27, 2022 and the present.
3. All notifications sent by any non-US government officials (any WHO member-state other than the United States) to the WHO, pertaining to rejection or reservation of the May 27, 2022 IHR amendments.
4. All legal reviews conducted by the Department of State Office of the Legal Advisor... classifying adopted and/or pending IHR amendments under statutes and regulations governing negotiation, review and ratification procedures for "treaties," "international agreements other than treaties," and "sole executive agreements" including but not limited to 1 USC 112a, 1 USC 112b, 22 CFR 181, 11 FAM 720 et seq., and Department Circular 175 of 1955, between Jan. 1, 2000 and the present.
5. All legal reviews conducted by the Department of State Office of the Legal Advisor, classifying adopted and/or pending "pandemic treaties" under statutes and regulations governing negotiation, review and ratification procedures for "treaties," "international agreements other than treaties," and "sole executive

agreements" including but not limited to 1 USC 112a, 1 USC 112b, 22 CFR 181, 11 FAM 720 et seq., and Department Circular 175 of 1955, between Jan. 1, 2000 and the present.

6. All authorizations and/or related delegation of authority documents authorizing any individual to represent the United States during treaty and/or treaty amendment negotiation and adoption proceedings at the World Health Assembly of the World Health Organization, between Jan. 1, 2000 and the present.

7. All notices published in the Federal Register, regarding "delegation of authority" for negotiation of "treaties," "international agreements other than treaties," and "sole executive agreements," between Jan. 1, 2000 and the present.

8. All notices submitted to members of Congress, informing them of drafts and/or negotiations for pending, ongoing or adopted IHR amendments and/or "pandemic treaties," under 11 FAM 725.1 and related statutes, regulations and guidance documents, between Jan. 1, 2000 and the present.

April 6, 2023 - On enforcement mechanisms wielded against non-compliant nation-states.

Responding to a few comments from the post about James Roguski's research⁷³⁸ on the World Health Organization procedures⁷³⁹ for adoption of amendments to the 2005 International Health Regulations and adoption of new treaties, paraphrased:

What entity or agency or person/people does the actual enforcing? Who? What form would the "enforcing" take? What would be the consequences of just refusing? ...I doubt that agents or soldiers from the United Nations would come after leaders of the countries that just ignored it all.

My reply, expanded:

Some national leaders have been assassinated. The most obvious was the President of Tanzania, John Magufuli, killed in March 2021 shortly after he began demonstrating and talking about some of the core frauds supporting the globally-coordinated mass murder and enslavement campaign disguised as a public health emergency.

Those assassinations, like most assassinations, send a very clear message to other national leaders not to step out of line.

But the primary enforcement mechanism, as I understand the structure of the global extortion system, is financial. National governments that don't comply lose access to international banking systems: transaction processing; loans; manageable interest rates on borrowing; currency stability; aid packages. Everything. The lifeblood of their economies is drained.

At the top tier, the Bank for International Settlements owners do it, through their control of private central banks and treasury secretaries in each country; through World Bank, IMF, World Trade Organization, and WEF programs; and through BlackRock and similar transnational, parasitic financial/technology firms.

The same extortion mechanism works on smaller scales,⁷⁴⁰ to enforce the compliance of commercial banks, state governments, hospitals, schools, counties, towns, private businesses subject to state licensure, families and individuals, and has been used extensively during the last three years. *See*, for example, Intergovernmental

Agreements that condition county receipt of federal funding on county compliance⁷⁴¹ with current *and future*⁷⁴² terms and conditions (not known to the county government when county officials sign the contracts) embedded in federal executive orders and federal agency directives. (Sec. 1.4 at p. 17, Cochise County, AZ IGA⁷⁴³).

John Perkins' *Confessions of an Economic Hitman*⁷⁴⁴ (2004) lays out the mechanisms.

Cyprus circa 2012-2013⁷⁴⁵ was one demonstration of the system as it functions at the nation-state level, as was the 2013 Vatican shutdown to *de facto* (if not *de jure*⁷⁴⁶) eject Benedict XVI from the papacy.

We're currently living through a global demonstration of the extortion/enforcement system, with one salvo fired in 2007-2008 with the Great Financial Crisis,⁷⁵² and a second salvo launched in August/Sept. 2019 with the overnight repo rate crisis⁷⁵³ followed immediately by the falsified "pandemic" as the massive systemic shock pseudo-justifying implementation of long-prepared economic and political centralization plans. The criminals call it "policy coordination."

- August 2019 - Dealing with the next downturn: From unconventional monetary policy to unprecedented policy coordination⁷⁵⁴ (BlackRock Investment Institute)

The salvo that started in late summer 2019 is still going on, and poised for an intensification as the dollar is being forced out of its reserve currency status, the injections continue to kill off populations, and sovereign governments continue to be hollowed out through infiltration, corruption, bribery, extortion, blackmail, censorship, propaganda and demoralization.

Many of those things are very old methods for overthrowing enemy nation-states, repeated throughout history. The difference is that for the past century or so, those methods have been used with far greater precision, coordination and durable effects by non-State actors (central banking families) to destroy all of the national governments, countries and populations around the world simultaneously.

Sasha Latypova recently wrote a great post on these issues, getting into far more financial detail, and also laying out more of the internal fights among the globalist ruling class members.

She argues — and I agree with her analysis — that various sub-sets of the central banker class have some different and conflicting goals.

April 7, 2023 - On demonic possession as it relates to the war between human banksters and the rest of humanity.

Reader comment⁷⁵⁶ on yesterday's post:⁷⁵⁷

[You wrote:] "But they try to set those differences aside and work together as much as possible to achieve the goals on which they can agree: killing lots of people and weakening the survivors (physically, economically, socially, religiously and politically); stealing lots of resources and productive assets; and centralizing lots of power in their own hands."

...I follow and agree with most of your work but I do not understand the logic of the above argument...

What drives these rich bankers? I can only come up with greed and power. Underneath, of course, is a deeply injured heart caused by a cruel upbringing, forming a psychopathic narcissistic personality disorder. Of course, they kill if threatened or if there is a positive risk/benefit.

Granted, really sick psychopaths kill to see the fear and despair in their victims that they can't face in themselves.

But those very sick ones need to kill themselves to live out this compulsion and they are usually not very functional. I doubt many of the highly intelligent highly functional bankers belong to that category. They are just "normal" psychopaths but yes, they would delegate killings if there is an advantage.

I can't see any advantage for either WEF or Bankers to randomly and deliberately kill or weaken millions of American people because

1. their richness is built on millions of hard-working and hard-consuming ordinary people. The amount of rich billionaires is highly correlated with the productivity of a country, and the size of the population of a country. Yes, AI robots might take over in the future but not yet. There aren't millions of useless unemployed eaters that need to be killed off. Even if there were, the way how they do it (through random injection) would not target the unemployed, but the employed productive ones much more (through mandates, social status etc.)

2. The way they apparently kill (through randomly injecting American people) is selecting for the wrong group. It will select the working, productive and compliant part of the population - the easy to control group - and spares the rebellious anti-vax group which appears to be a much bigger threat to them. It doesn't make sense to me.

My reply:

My view is that they have made deliberate contractual agreements to serve the devil, and are fully demonically possessed.

I'm Catholic, and I believe in the existence and earthly power of Lucifer, Satan, demons and many other types of supernatural evil entities, and in the existence of hell as a real place.

That answer probably won't be very satisfying for you, but it is what I think is true.

⁷⁵⁶ <https://bailiwicknews.substack.com/p/on-enforcement-mechanisms-wielded/comment/14320367>

⁷⁵⁷ <https://bailiwicknews.substack.com/p/on-enforcement-mechanisms-wielded>

The human participants — central bankers, public health dictators, judges, legislators, presidents etc. — are motivated partially by their own earthly success goals (wealth, power, sex) and they've contracted with Lucifer and his minions to achieve those goals at the cost of selling their souls.

And because they've sold their souls and are possessed, they must also pursue Lucifer's goals, which are primarily separation of human souls from our Creator God, and death of human souls in states of mortal sin, to increase the population of the eternally damned in Hell and slow the population growth of the eternally blessed in Heaven, who are people who die in the state of grace.

If this is a topic that interests you, I suggest starting with the Art Bell-Malachi Martin interviews from the late 1990s, which are on YouTube.⁷⁵⁸ Fr. Martin was an exorcist with extensive direct experience with healing people who were possessed by demons.

If this is a topic that doesn't interest you, consider the benefits to evil people and to demons, of persuading good people that evil supernatural beings don't exist and are not actively engaged with human beings.

*

This is why I regularly advise that people Pray the Rosary. The Rosary is among the most powerful weapons against demonic forces given to humanity by God through the Catholic Church.

April 10, 2023 - On the alleged neutrality of Switzerland.

ZeroHedge has published a very interesting homage to Switzerland's so-called political neutrality, at a very interesting time.

- April 10, 2023 - Swiss Neutrality Is Needed Now, More Than Ever⁷⁵⁹ (Vahan Roth, CIO, RealUnit Schweiz AG, posted at ZeroHedge.

Roth falsely attributes the globalist central bankers' own rapacious, global economic warfare over the last century and especially recent decades, to the United States government alone.

He does this to provide the pretextual justification for calling on the Swiss National Bank to de-dollarize and move the world another step closer to BIS-controlled Central Bank Digital Currency (CBDC).

Roth provides a fraudulent overview of the history of Swiss "neutrality" and impartiality since 1815, leading to a globalist-serving conclusion that coincidentally supports the overall momentum toward one-world government of, by and for central bankers, as slave masters to the rest of humanity:

...Let us bring this question into an even more modern and relevant context. Economic warfare strategies have been increasingly deployed over the last decades, especially by the US and its closest allies. Embargoes, sanctions, public and private asset seizures have become the norm. The harm caused to civilians is hard to measure and to quantify and it can persist for decades, even for entire generations. **Long after the "bad guys" are removed from power, countless innocents and their children continue to be punished. The only reason this is possible is because the USD is the world reserve currency.**

This is also the reason why Switzerland's neutrality is increasingly under threat and why it has already started to erode. The fear of potential sanctions is very realistic one and very well grounded, given that the

⁷⁵⁸ https://www.youtube.com/watch?v=w5_1Lz1ldZc

⁷⁵⁹ <https://www.zerohedge.com/geopolitical/swiss-neutrality-needed-now-more-ever>

country is so heavily reliant on the dollar. **The only way for Switzerland to regain its absolute, unwavering neutrality, is for the SNB to reduce this reliance and eventually eliminate it.**

This would allow the nation to act once again as the world's trusted "referee", as the voice of reason in times of madness and as the effective peace broker we so badly need today.

*

Looked at through the central banking-world domination lens, the global public perception of Swiss political neutrality since the early 1800s has been maintained because it benefits the supranational bankers' interests to have a safe haven from which to control looting transactions.

Adam LeBor's *Tower of Basel*⁷⁶⁰ (2013) provides useful examples of this mechanism, such as Hitler's decision not to invade Switzerland, because the stability of the Bank for International Settlements was financially useful to his military project, and the BIS owners' reciprocal decision to cooperate with and finance Hitler's military war campaign, because political destabilization of Europe and Russia was politically useful to the banksters' global financial war campaign.

Like Switzerland, BIS has hidden its intensely political character behind a false front of "neutrality" since the BIS launch in 1930, while using financial mechanisms to orchestrate and heavily influence the geopolitical outcomes of wars and other international events.

I relate this to Pascal Najadi's recent claims about having obtained cooperation from Swiss legal authorities to conduct criminal prosecutions of governmental Covid-crimes.⁷⁶¹ I haven't yet seen any documents supporting Najadi's claims that he's filed anything, nor documents corroborating claims that Swiss prosecutors are taking meaningful legal action in response, nor documents corroborating claims that the US Department of Justice is supporting Najadi and his case. Maybe that will change; maybe Najadi's Swiss and US case documents will be publicly released.

In the meantime, through the lens of Switzerland's long history of hosting organizations (BIS at Basel, World Health Organization at Geneva, etc.) that control many aspects of geopolitical events, I can see that it would be very useful for the orchestrators of the Covid crimes to give the world the impression that true accountability could come from that quarter, while simply putting on a pretend show of justice that leads nowhere but draws attention, time and resources away from other attempts at obtaining justice.

I do not think Switzerland can be the locus of truly just prosecution; I think the Swiss government is playing a well-paid role in the next phase of the global fraud.

I do not think Switzerland is politically neutral. I think the country presents a false front of neutrality as cover for the massive interference that globalist organizations headquartered there, conduct within the formerly sovereign nations of the world.

Re: USDJ Michael Truncale's March 31, 2023⁷⁶⁶ order dismissing whistleblower Brook Jackson's False Claims Act case against Pfizer, Ventavia and ICON.

For background:

- Feb. 3, 2023 - Recap of Jackson v. Pfizer, whistleblower Brook Jackson's False Claims Act case.⁷⁶⁷
- April 2, 2023 - Repost: Thought-stopping stage sets in legal pleadings.⁷⁶⁸

I've been reading Truncale's order, thinking about it, taking notes, tracking down citations, re-reading other case documents, and updating my files on six other federal cases that — with *Jackson v. Pfizer* — I think are the most useful cases for understanding the role of criminal judges embedded in American federal courts, and the pseudo-legal mechanisms through which they operate.

Like their historic counterparts in Hitler's Germany, Mussolini's Italy, Stalin's Russia and many other mass murdering police-states, American federal judges have played a key role in maintaining and expanding the supranational covert biowarfare program run through the Trump/Azar-Biden/Becerra police-state apparatus since January 2020.

The six other cases include *South Bay Pentecostal Church v. Newsom* (USDC Southern California, 20-cv-00865-BAS-AHG); *Butler v. Wolf* (USDC Western Pennsylvania, 2:20-cv-677-WSS); *Bridges v. Houston Methodist Hospital System* (USDC Southern Texas, 4:21-CV-01774-LNH); *Robert v. Austin* (USDC Colorado, No. 21-cv-02228-RM-STV); *Griner v. Biden* (USDC Utah, 2:22-CV-149 DAK-DBP) and *Ealy v. Redfield* (USDC Oregon, 2:22-cv-00356-HZ)

There's a lot to unpack.

While I work through the material, one interesting section in Truncale's order goes to the "Who knew what, and when did they know it?" question.

He addresses that question at pp. 33-34:

Payment despite knowledge: Whose Knowledge Matters?

A threshold issue that this Court must address is whether the FDA's knowledge or the DoD's knowledge matters when deciding how much weight to give to the Government's decision to continue purchasing Pfizer's vaccine.

The FDA has known of Ms. Jackson's allegations since September 2020,⁷⁶⁹ months prior to Pfizer submitting its first invoice to the DoD in December 2020. [Dkt. 17 at 69;⁷⁷⁰ Dkt. 37-2 at 2⁷⁷¹].

But the DoD, not the FDA, is the entity that originally purchased Pfizer's vaccine. [Dkt. 17-1 at 303⁷⁷²].

The well-pleaded facts require drawing the inference that the DoD did not have knowledge of the alleged fraud prior to February 22, 2022, approximately two years after it paid Pfizer's first invoice. [FN 20]

*

NOTES:

Feb. 22, 2022 was the date Jackson filed her amended complaint.⁷⁷³

She filed her original complaint on Jan. 8, 2021.⁷⁷⁴

But after a year of silent inaction by DOJ and Judge Truncale, and Truncale's gag order on Jackson, the Department of Justice notified Truncale on Jan. 18, 2022⁷⁷⁵ that DOJ had no intention of pursuing Jackson's case.

Jackson then had to choose between quitting and hiring a private attorney to re-file.

She hired a private attorney and re-filed.

Because Brook Jackson is an extraordinarily courageous, determined woman.

Judge Truncale at March 31, 2023 order, Footnote 20, pp. 33-34:

FN20 - The Amended Complaint, which Ms. Jackson filed on February 22, 2022, pleads that Ms. Jackson had previously provided the DoD with the information that serves as the basis for her allegations. [Dkt. 17 at 15–16⁷⁷⁶].

Defendants [Pfizer] ask the Court to take judicial notice of several documents, including a letter from Ms. Jackson's former counsel dated December 14, 2020, notifying the DoD about her allegations...⁷⁷⁷ [Dkt. 37 at 20–21⁷⁷⁸].

Defendants note that courts routinely take judicial notice of facts published on a party's own website and contend that it is appropriate for this Court to do so here. Id. at 21 n.19.

These documents do not currently appear on Ms. Jackson's website. While these documents could potentially be introduced through a motion for summary judgment or at trial, they are not properly before the Court at this time.

Accordingly, the Court declines to take judicial notice of these documents.

⁷⁷⁸ <https://bailiwicknewsarchives.files.wordpress.com/2022/10/2022.04.22-pfizer-motion-to-dismiss.pdf>

In thinking through Truncale's question — whose knowledge matters? — set aside (for now) that his premise of separate knowledge bases is false.

DoD and HHS, including FDA, are demonstrably two federal agencies jointly engaged in a covert, dual-use biomedical/biowarfare operation with several other administrative agencies. Their executive secretaries and other high-level administrators share knowledge about the program through coordinating committees including the Public Health Emergency Medical Countermeasures Enterprise.⁷⁷⁹

Setting that aside, Relator Brook Jackson stated in her original complaint (Jan. 8, 2021) and amended complaint (Feb. 22, 2022) that she had “provided this information to the United States and DoD prior to filing a complaint by serving a voluntary pre-filing disclosure statement.”

Then in Pfizer's April 22, 2022 Motion to Dismiss, Pfizer cited Jackson's website as the source of Jackson's Dec. 14, 2020 notice to DoD that they wanted Judge Truncale to judicially notice, *and attached a copy of the letter* as Exhibit E [Dkt 37-5 at 2-9⁷⁸⁰].

Pfizer thereby entered the document into the public court record independent of Jackson's website and her own two sworn statements about having made “pre-filing disclosure” to DoD.

Nonetheless, Truncale declined to take “judicial notice.”

Why?

To protect the DoD from legal attribution of knowledge of the clinical trial fraud in December 2020, a time when DoD withdrawal from and cancellation of the purchasing and distribution contracts could have saved the lives of the people targeted with the bioweapons.

On Dec. 14, 2020, through Gregory Shilling, the Assistant Special Agent in Charge of the South West Region, Defense Criminal Investigative Service, DoD was notified that Pfizer, Ventavia and ICON were endangering, sickening and killing human recipients of products which the contractors were using on human beings under the terms of DoD military weapons contracts.

Dec. 14, 2020 was three days after the Marion Gruber-led FDA panel's sham EUA decision on Dec. 11, 2020.⁷⁸¹

It was the same day the first victims — outside the 44,000 people targeted through the fraudulent “clinical trials” — were attacked with the Pfizer-labeled DoD bioweapons.⁷⁸²

Truncale has got DoD's back.

Having carefully placed his blinders on by refusing to take judicial notice of the Dec. 14, 2020 letter Jackson sent to the DoD, Truncale concluded:

“...even if the DoD was concerned about potential regulatory or protocol violations, the Project Agreement [Truncale's false conflation of Base Agreement 2020-532,⁷⁸³ which has been made public in redacted form, with Project Agreement 2011-003, which has not yet been made public] did not authorize the DoD to decide whether the vaccines were fit for purchase.

Instead, the [Base Agreement] vested this decision-making authority in the FDA.

Thus, what matters when evaluating the Government's continued purchase of the vaccine is that the FDA granted authorization despite its knowledge of Ms. Jackson's allegations...”

Bottom line: Judge Truncala has now added his own criminal federal judicial review to the sequence that includes:

- Criminal ‘vaccine’ development and production contracts, which are actually contracts for the development and production of injectable bioweapons.
- Criminal ‘vaccine’ clinical trial safety records, which are actually records of bioweapon potency results for mRNA and DNA classes of injectable bioweapons.
- Criminal ‘vaccine’ regulatory review, authorization, manufacturing compliance and safety monitoring records, which are actually theatrical props intended to block public knowledge that the products mislabeled as ‘vaccines,’ transported across state lines, and injected into military targets, are intentionally-lethal bioweapons.

Apr 11, 2023 - Biden rescinding Trump-Biden Proclamation 9994 under 1976 National Emergencies Act does not terminate Azar-Becerra’s Public Health Emergency authorities under 1983 PHE amendment to the 1944 PHSA.

Becerra and his successors will extend the PHE until they no longer need it to kill people with pseudo-legal impunity. Or until Congress, federal judges or states repeal or nullify the enabling acts.

HJR 7⁷⁸⁶ - Relating to a national emergency declared by the President on March 13, 2020. *Resolved by the Senate and House of Representatives of the United States of America in Congress assembled*, That, pursuant to section 202 of the National Emergencies Act (50 U.S.C. 1622), the national emergency declared by the finding of the President on March 13, 2020, in Proclamation 9994 (85 Fed. April 10, 2023 - Biden Signs Measure Ending COVID-19 National Emergency⁷⁸⁷ (Jeff Louderback, *Epoch Times*)

President Joe Biden on April 10 signed a measure that immediately ended the COVID-19 national emergency more than three years after it was enacted, the White House announced.

HJ Res 7 passed through the Senate on March 29 by a 68-23 margin, with 21 Democrats joining 47 Republicans to support the measure.

Four Republicans and five Democrats did not cast a vote—and 23 Democrats voted against the short resolution—which was introduced by Rep. Paul Gosar (R-Ariz.) last month and passed by the House 229-197 on Feb. 1.

The reader asked:

Does the PHE actually expire? It appears that they are extending most of the PHE provisions with other mechanisms, [including] free vaccine and PREP Act protection. Can you tell whether the HHS Secretary "Tyranny Powers" are being released on May 11?

My reply, revised and expanded:

No, the HHS Secretary PHE powers are not terminated on May 11.

There are at least three interlocking frameworks for the consolidation of power in executive hands during declared emergencies: the 1976 National Emergencies Act, the 1988 Stafford Act, and the 1944 Public Health Service Act as amended in 1983 to add the Public Health Emergencies (PHE) program.

Congress and Biden have rescinded the emergency proclamation issued under the 1976 National Emergencies Act, but the Public Health Emergency declaration issued by then-HHS Secretary Alex Azar on Jan. 31, 2020, effective Jan. 27, 2020, remains in force, along with the Stafford Act determination Trump issued on March 13, 2020.

The National Emergencies Act Proclamation 7463 *Declaration of National Emergency by Reason of Certain Terrorist Attacks*, issued by President Bush in September 2001 and renewed annually since then, also remains in force, along with the 2001 Authorization for Use of Military Force passed under the 1973 War Powers Act, and any secret orders that may exist without Congressional or public knowledge, such as PEADs⁷⁸⁸ (Presidential Emergency Action Documents) and Continuity of Government (COG) orders.

The emergency authorities held by the Health and Human Services Secretary under the Public Health Emergency (PHE) program of the 1944 Public Health Service Act, as established by Congress and President Reagan in 1983 and expanded by Congress and Presidents Bush I, Clinton, Bush II, Obama, Trump and Biden since then, will not expire in May.

Current HHS Secretary Xavier Becerra recently — very quietly — extended his Public Health Emergency authority and derivative Emergency Use Authorization power, using slightly different wording, through a Federal Register notice effective March 15, 2023.⁷⁸⁹

The HHS Secretary him or herself (Becerra or a successor) is the only person authorized to end the PHE and terminate his own emergency powers, unless and until Congress repeals the enabling acts, federal judges nullify the enabling acts, and/or state governments nullify the enabling acts to block the illegitimate exercise of federal authority at their own state borders.

How did these extraordinary powers get into Becerra's hands?

Congress and US Presidents unlawfully and unconstitutionally (*de facto* but not *de jure*⁷⁹⁰) transferred Congress's own power, the power of the federal courts, and the power of the states, into the HHS Secretary's unilateral, unreviewable control, through amendments to the 1944 Public Health Service Act codified at 42 USC 247d-6d, Targeted liability protections for pandemic and epidemic products and security countermeasures⁷⁹¹ and related statutes, executive orders and regulations.

- 42 USC 247d-6d(b)(7): No access to courts for judicial review of the facts or law relating to HHS Secretary public health emergency declarations and medical countermeasures product classifications.
- 42 USC 247d-6d(b)(8): Preempts authority of state, local and tribal governments and individuals to manage public health emergency and medical countermeasures classification and regulation outside of HHS/DOD.
- 42 USC 247d-6d(b)(9): Extremely limited obligation for HHS to report to Congress on public health emergency status and EUA medical countermeasures classifications, and no authorization for Congress to override HHS declarations, determination, and decisions.

National Emergencies Act Proclamation 9994⁷⁹² issued by President Trump and extended by President Biden might expire in May — that’s what Biden’s signature on HRJ 7 means.

But the termination of the NEA proclamation isn’t enough to bring the Constitutional disaster to a close, because the HHS secretary’s Public Health Emergency powers are exercised independent of the NEA declaration.

Related Bailiwick reporting and analysis

Sept. 27, 2022 - On why Biden’s comment that ‘the pandemic is over’ doesn’t lift the bioterrorist police state jackboot off our necks.

There are at least three Covid-related state of emergency declarations still in force.

Biden saying that the pandemic is over in a press conference doesn’t officially revoke the presidential declarations and proclamations of a national emergency due to Covid, issued under the National Emergencies Act of 1976 and the Stafford Act of 1988.

These were first issued by Trump on March 13, 2020 (NEA;⁷⁹³ Stafford⁷⁹⁴) and have been renewed annually by Biden...

President Biden’s press conference comments also don’t revoke the ‘public health emergency’ declaration issued by HHS Alex Azar on Jan. 31, 2020⁷⁹⁵ (retroactive to Jan. 27, 2020) under Section 319 of the Public Health Service Act [42 USC 247d, Public health emergencies], as added in 1983 and amended by the 2005 PREP Act to put the power to declare public health emergencies into HHS secretary’s unilateral hands.

All three of these Covid-era emergency declarations have been extended repeatedly by Trump, Biden, Azar and Becerra...

In addition, the state of national emergency proclaimed by President Bush on Sept. 14, 2001⁷⁹⁶ in response to ‘terrorism’ under the 1976 law is still in force. It has been renewed every year since by Bush, Obama, Trump and Biden.

All four of these declarations and proclamations triggered expanded federal government authorities and limits to state, local and individual power, at least until a federal court finds that the proclamations — and the 1976, 1988, 2005 and related statutes under which they’ve been issued — are unconstitutional, null and void.

Or until Congress repeals the enabling statutes.

Or until the People of one or more states, working independent of the federal government through their own legislatures, governors, courts and state constitutions, block the effect of these federal power grabs within their own state borders as unconstitutional, null and void violations of the Tenth Amendment to the US Constitution.

...Yesterday, someone sent me a March 20, 2023 Federal Register notice⁷⁹⁷ [88 FR 16644] on the extension of the Public Health Emergency (PHE) and Emergency Use Authorization (EUA) declarations and determinations.

The sender asked me "whether that EUA amendment I sent you made substantive changes, or was this just a regular extension?"

I replied that there are enough redundancies built in throughout the PHE and EUA declaration and determination procedures, and they're both unreviewable by Congress and courts anyway, that the wording of any particular one isn't worth spending a lot of time to parse in detail...

The latest iteration slightly alters the original, false claims.

In the original determination of public health emergency, effective Feb. 4, 2020,⁷⁹⁸ a war criminal impersonating the US-HHS Secretary (Alex Azar) claimed that "there *is* a public health emergency that has a significant potential to affect national security or the health and security of United States citizens living abroad" and that the emergency "involves a novel (new) coronavirus (nCoV) first detected in Wuhan City, China."

In the latest amendment to the determination of public health emergency,⁷⁹⁹ effective March 15, 2023, a war criminal impersonating the US-HHS Secretary (Xavier Becerra) claimed that the nCoV outbreak has already infected and killed millions of people, and that there are now variations circulating, such that "there is a public health emergency, *or a significant potential for a public health emergency*, that affects, or has a significant potential to affect, national security or the health and security of United States citizens living abroad."

The two forms of PHE "determination" are used interchangeably, to provide pseudo-legal pretexts for COVID-19 Emergency Use Authorization/EUA declarations (which are, more accurately, military orders to deploy bioweapons labeled as 'vaccines' to injure and kill recipients) and amendments thereto.

For emphasis, Becerra added to the latest notice:

"...The four previously-issued section 564 declarations that refer to the February 4, 2020 determination have not been terminated by the Secretary because, among other things, the circumstances described in section 564(b)(1) continue to exist — i.e., COVID-19, a disease attributable to SARS-CoV-2, continues to present a public health emergency, or a significant potential for a public health emergency, that affects, or has a significant potential to affect, national security or the health and security of United States citizens living abroad..."

April 19, 2023 - Deepen the backlash against public health.

A rebuttal/reworking of an editorial by Lawrence O. Gostin and Sarah Wetter, published March 30, 2023 by Science journal.

Lawrence O. Gostin, JD, LLD, and James G. Hodge, Jr., JD, LLM, are two primary architects of the public health-pretext kill box frameworks incorporated into American federal and state law since the late 1990s, styled as legal preparedness for public health emergencies.⁸⁰⁰

Gostin and Hodge have worked with dozens of other attorneys and legal scholars through academic and non-governmental organizations including Georgetown University O'Neill Institute for National and Global Health Law; Johns Hopkins University Bloomberg School of Public Health; World Health Organization Collaborating Center on National and Global Health Law; Arizona State University Center for Public Health Law and Policy; Public Health Law Association; and the American Society of Law, Medicine & Ethics. (There are dozens more such organizations.)

Among other projects, Gostin led development of the 2001 Model State Emergency Health Powers Act⁸⁰¹ and its successor programs, pushed through each of the 50 state legislatures to form state-level legal control-and-kill systems that reinforce the American federal kill box system.⁸⁰²

On March 30, 2023, the journal *Science* published an editorial by Gostin and a colleague, Sarah Wetter, entitled “Fix the backlash against public health.”⁸⁰³

Gostin and Wetter express concern about state and federal legislators and judges who have responded to the unprecedented, lethal consolidation of unchecked and largely-uncheckable executive power in the hands of federal and state public health officials. They note that state legislatures have passed some new laws in an attempt to limit the abuses. They observe that state and federal judges have ruled, in a few cases, to partially limit some of the abuses.

In response, Gostin and Wetter advocate for a new push to better consolidate power in “public health emergency” situations. They warn the public — as all totalitarian dictators do — that the State won’t be able to “protect” the public from scary pandemics unless the People give up more lives and liberties to feed the insatiable appetites of the dictatorial beast.

I think the factual record of the last three years (that is, the factual record relegated to the margins of public awareness, away from the view of audiences who consume only propagandist media on propagandist media platforms), supports the opposite conclusion and a slate of opposite policy proposals.

The rebuttal/reworking of the Gostin-Wetter editorial outlined below is, I think, a more accurate depiction of what’s happened so far, and how the enabling laws and regulations adopted in the 75-year preparatory and testing phase of this global, pan-ethnic, pan-religious pogrom, fit into the picture.

The popular backlash against public health doesn’t need to be “fixed.”

The popular backlash against public health needs to be deepened and expanded until all federal and state public health bureaucracies are dismantled and de-funded, and the leaders who have carried out the control-and-kill programs of the last three years are arrested, tried, convicted and executed for the war crimes they have demonstrably committed and continue to carry out to this day.

Deepen the backlash against public health

Historically, police-state dictators have used emergency declarations to force societal submission; dictators centralize power to strip power from other governing institutions and to strip human dignity and agency from the citizenry at large.

The manufactured, fraudulent "COVID-19" emergency, as the culmination of legislative and executive acts dating back to the 1944 Public Health Service Act and other preparatory events, was intended to, and in fact has caused extrajudicial State killing of innocent human beings to occur without public understanding, resistance or judicial interference.

"Public health" is dictator-code for direct State control of human beings, and dictators occupying public health offices have used public health pretexts to arrogate to malicious State officials, the eternally-sought extrajudicial power to control human movement, behavior and assembly; and to assault, sterilize and kill people, with social and legal impunity.

COVID-19 public health officials functioning as medico-military executioners have worn business suits or white lab coats at podiums while terrorizing victims to fear social interactions and "get vaccinated." They've worn blue scrubs while injecting poison into the same victims, defrauded to line themselves up at pharmacies and clinics.

Those who have orchestrated the legal components of the criminal, treasonous, Constitutional crisis and power grab to this point, continue to cite public health as a pretext to grab more power now and in the near future.

Under American federalism (the constitutional division of power between the People, the 50 state governments and three branches of federal government), individual adult human beings hold primary power over their own bodily integrity and the bodily integrity of their unborn and born children.

The proper role of the State at each level and within each co-equal branch, is to protect the lives of the human beings entrusted to their care by God, through enforcement of duly-adopted laws prohibiting murder, torture, mutilation, abortion, theft, extortion and other crimes against persons and property.

In violation of all principles of well-ordered government, the American people have been incrementally brainwashed in recent decades to believe that State public health authorities legitimately hold the authority to injure, sicken, sterilize and kill individual adults, children, infants and fetuses at will.

For example, public health lawyers were instrumental in using the orchestrated anthrax attacks in 2001 to coerce Congressional transfer of power from Congress to administrative agency directors under "public health emergency" conditions.

Public health lawyers were also key drivers of the 2001 Model State Emergency Health Powers Act, pushed through state legislatures to transfer state-level governing power from legislators to public health officials, granting them "even more expansive powers to declare a health emergency and respond swiftly."

The multi-decade power consolidation effort culminated with COVID-19, through which the extraordinary abuse of federal and state health-predicated executive and administrative powers has become starkly visible to the public and to state and federal legislators and judges.

We watched and are still watching as public health officials coordinate a mass theft, mass torture and mass murder program, temporarily camouflaged as a pandemic response.

Members of American and global public-health-police-state cabals have developed plans for follow-up performances — the "next pandemic," incessantly described as "far deadlier than COVID-19." They openly plan to further centralize power during these manufactured events, by persuading the public that health officials must not "have their hands tied behind their backs" or else federal and state governments will not be able to "protect" the public.

Alongside the extraordinary abuse of power, a correspondingly extraordinary State-sponsored media propaganda campaign has sustained fear, confusion and disorientation among the general public and state and local governments.

Despite this campaign, during the Constitutional crisis that began in January 2020, "over 30 states passed laws curbing health measures such as mask and vaccine mandates, quarantines and business closures. Many state law reforms now allow the legislature to rescind executive health orders," somewhat stripping authoritarian powers from unelected, mass-murdering bureaucrats.

These state laws have been passed by elected lawmakers fulfilling their God-given obligation to protect the men, women and children in their states from criminal attacks on person and property: attacks undertaken by criminals who have perverted the disciplines of "science" and "public health" to facilitate crime.

The Supreme Court of the United States issued a *de facto* stand-down order to all federal judges, through a May 2020 ruling in *South Bay Pentecostal Church v. Newsom*.⁸⁰⁴ SCOTUS held that unconstitutional abuse of executive and administrative power "should not be subject to second-guessing" by the federal judiciary.

Nonetheless, "more than 1,000 lawsuits" were filed by plaintiffs, challenging COVID-19 measures put into place by public health officials. To preserve some shreds of Constitutional credibility, the Supreme Court responded to some of these claims by striking down "state COVID-19 restrictions on religious gatherings as well as the CDC's tenant eviction moratorium and vaccine-or-test rules for large employers."

With the clarity of vision hard won over the last three years, we can now see that public health officials must be stripped of all power. "Health security" — code for militarized, health-predicated population control programs — is utterly incompatible with "key societal values and constitutional rights, including personal freedom" not to be injured, sickened and murdered by means of military bioweapons presented to victims as protective medical treatments.

"Health security" is equally incompatible with economic activity and educational opportunities.

Health officials abused the power, which had been improperly transferred into their hands, in every aspect of the response to the Constitutional crisis. Public health officials abused power, for example "by closing schools and businesses for extended periods;" by commissioning production and distribution of intentionally lethal bioweapons; by falsifying FDA drug safety and manufacturing regulatory procedures; and by mandating that victims submit to biological attack or remove themselves from society, workplaces and schools.

State legislatures and courts have not yet fully dismantled public health powers and agencies. As of today, public health criminals retain full range of legal movement to continue and expand behavioral control, torture and murder programs for the foreseeable future.

There is an urgent need for a comprehensive restoration of founding principles of limited government and the proper role of the State in protecting the lives, liberties and property of citizens from all enemies foreign and domestic, including enemies who simulate concern about health threats while they themselves create and deploy chemical, biological, radiological and nuclear (CBRN) weapons on unsuspecting targets who are deliberately kept ignorant about what's being done to them, and why.

We emphatically do not need to "modernize laws to balance powers and rights more productively." Such "modernization" has been underway for decades and led us directly into this crisis. More "modernization" would only place more power in the hands of foreign and domestic terrorists impersonating federal and state government officials, and take more rights from the people and from legitimate federal and state government representatives.

We need legislatures and courts to dismantle and de-fund all public health agencies and strip executives and public health officials of all emergency powers. We need legislatures and courts to abolish all laws giving presidents, governors, and public health officials any power over personal health decisions.

Emergency powers for health officials were "conceptualized" to disguise the true character of the dictatorial police-state power grab through shock-and-awe programs carried out quickly and violently in "fast-moving situations." COVID-19 showed the world the mold: the intent and effect of consolidating executive power in public health bureaucracies is to cause long-lasting deprivations of liberty and reduce life expectancy: to control and kill people.

⁸⁰⁴ https://www.supremecourt.gov/opinions/19pdf/19a1044_pok0.pdf

Public health officials didn't "overreach" during COVID-19. They're abusing their accumulated power precisely as planned.

Public health officials should never again have any authority to respond to emergencies; legislatures should repeal all of the disordered laws that put such power in health officials' hands. There is no sound moral basis and no circumstance under which public health officials should have direct or indirect power over the life and death of individual human beings.

Any and every State act that "tramples personal freedom" without collecting evidence implicating named individuals in criminal activity, conducting public trials at which evidence is assessed for truth or falsity, and meeting all other due process standards, is a State act that goes "too far."

"Enhanced transparency and accountability" and "independent reviews" are likewise meaningless modifications to a power that public health officials should not hold, ever.

As to "the effects of interventions on disadvantaged populations, such as racial and ethnic minorities, lower-income families, migrants and persons in congregate settings," COVID-19 programs have made it abundantly clear that public health dictators are equal-opportunity slave-masters and killers. Migrants, poor people, black, Latino, Asian and white people, people who live in nursing homes and assisted living centers, people who live in rural areas, suburban neighborhoods and large cities: all have been targeted indiscriminately for injury, sterilization and death, and are still targeted now with booster campaigns.

"Health equity" is code for equal-opportunity extrajudicial killing by means of bioweapons falsely labeled as "vaccines" and other pharmaceutical product categories. Medicalized murder should not now be, and should never become, a "prevailing value" in human society. Health officials should be prohibited from contact with stakeholders and community leaders, to protect all American sub-populations from future deliberate harms the public health officials are openly planning to inflict.

"Cross-agency collaboration" has also proved to be instrumental in maximizing harms and deaths caused by public health interventions during Constitutional crises, by enlisting the complicity of education, commerce, transportation and many other State sectors. Cross-agency collaboration is another core building block of the mass- murdering Deep State.

No federal or state executive or public health official should hold emergency powers. Legislatures and courts should strip executives and public health officials of all emergency powers. The Public Health Service Act should not be "updated." Congress should repeal it, and federal and state courts should nullify it. State legislatures should nullify its effects within their own state borders.

Congress should refuse all efforts to make emergency funding "contingent on a state's compliance with national plans" and states should recognize and reject all federal emergency funding offers, as blood money payments to coerce state participation in genocidal acts which lie entirely outside the moral boundaries of legitimate State conduct.

Eliminating federal public health authorities would also clear the path to prosecutions of COVID-19 war criminals for impersonation of federal officials; psychological, social and physical torture; theft, robbery and extortion; maiming, mutilation, sterilization and murder.

A National Commission on COVID-19 Crimes could begin a complex, lengthy process to restore credible legal systems and rebuild trust in Constitutional republican government and the relationship between man and the State, under God.

Future generations — reduced in size though they will be due to the sterilization and murder already carried out by public health officials through the COVID-19 program — deserve morally-sound laws that strip public health officials of the power to "act decisively," which they have used to commit global crimes against humanity.

Future generations deserve morally-sound laws that reflect and uphold divine, natural and common law: the purpose of the State is to protect and promote the physical and spiritual development of the living citizens entrusted to the care of the rulers, by God.

Perhaps at war crimes tribunals on earth, but certainly at final judgment, public health officials, executives, legislators and judges will be held accountable for every one of the human lives God has entrusted to them, and for the acts they've undertaken to either protect those lives or to prematurely end them.

April 24, 2023 - At-home gain-of-function kits. Biodefense is indistinguishable from biowarfare; the so-called biodefense industry is, in truth, the biochemical munitions industry.

I've been reading recently about calls for global bans on “gain of function” research, as a means of preventing future so-called pandemics.

In my view, these gain-of-function (GoF), lab-leak, directed-evolution, dual-use-research-of-concern (DURC) analyses are built on the false premise that Covid-19 was and is a pandemic.

Covid-19 was never and is not now a pandemic.

Covid-19 is a psychological and biochemical warfare program designed and executed to bypass Constitutional crises at the nation-state level and clear the path for global biomedical totalitarianism.

To stop the psychological and biochemical warfare program, it would be more effective to send do-it-yourself gain-of-function kits to every household, than to ban gain-of-function research.

DIY gain-of-function kits — and the observable self-limiting outbreaks and low transmissibility of the resulting pathogens — would further clarify for people that "gain of function" or weaponization of naturally-occurring biological pathogens is a myth circulated to drive fear and to elicit behavioral compliance with biochemical weapon/toxic injection attacks camouflaged as “vaccines,” including but not limited to members of the mRNA-LNP biochemical weapons class, soon (if not already) in continuous batch production⁸⁰⁷ as authorized and funded by Congress.

See Omnibus brings new advanced manufacturing programs to FDA⁸⁰⁸ (Jan. 11, 2023, Regulatory News) and 21 USC 399h as amended/expanded Dec. 2022 in Consolidated Appropriations Act for FY2023⁸⁰⁹ at Section 3204 (National Centers of Excellence in Advanced and Continuous Pharmaceutical Manufacturing) and Section 3213 (Advanced Manufacturing Technologies Designation Program):

Definitions.

(1) The term ‘advanced and continuous pharmaceutical manufacturing’ refers to a method of pharmaceutical manufacturing, or a combination of pharmaceutical manufacturing methods—

(A) that incorporates a novel technology, or uses an established technique or technology in a new or innovative way, that enhances drug quality or improves the manufacturing process for a drug, including processes that may apply to advanced therapies and the production of biological products, such as cell and gene therapies; or

(B) for which the input materials are continuously fed into and transformed within the process, and the output materials are continuously removed from the system, utilizing an integrated manufacturing process that consists of a series of 2 or more simultaneous unit operations...

I think the would-be gain-of-function killers (Ralph Baric, Anthony Fauci, Peter Daszak, Bill Gates and their co-conspirators) discovered in the 1990s if not earlier, that lab-enhanced communicable pathogens are not unpredictable and dangerous at all, but instead that they're predictably non-dangerous.

They decrease in harmfulness (move toward harmlessness) as soon as they enter living populations outside the lab, killing only people whose immune systems and detoxification systems were compromised prior to exposure, or people who get an extremely high load of an extremely purified sample.

So all their mass murder eggs are now in the one basket of directly injecting biochemical poisons, and genetic instructions for the body's own cells to produce biochemical toxins, and using fear to keep people from understanding what they're submitting to when they accept lethal injections.

The killers maintain the fear at very high levels, and direct it away from the real threat to life and limb (which is the globalist totalitarians and the lethal biochemical injections they push) by keeping public attention focused on an invisible threat that isn't there at all: naturally-occurring or lab-enhanced, *highly-lethal* communicable pathogens that *readily* carry genetic information from one organism to another across large populations and long periods of time. Baric, Fauci, Daszak, Gates & Co. know that the self-spreading thing won't work.

The unimpaired human immune system and chemical detox system is too good.

They could just chemically gas people, updating methods like mustard gas in World War I,⁸¹⁰ the Nazi Aktion T4 euthanasia programs⁸¹¹ and the Bhopal disaster in 1984.⁸¹²

But that's too visible. Those acts look like intentional acts of war, or as accidental industrial disasters at best. The bodies pile up at the battlefields, gas chambers and factories.

With the falsified threat of pandemics plus the proffered protection of injectable compounds, mass murder can be presented as benevolent medical intervention intended to protect people.

And the bodies can be dispersed across wide geographic regions and across time, hidden in miscarriages, stillbirths and permanent infertility, long-term disability, chronic disease, and sudden, unexplained deaths⁸¹³ that happen behind closed doors in private homes.

*

To build out this analysis further, it's important to untangle the differences between at least two types of biologically-active material conflated by the mass murderers to confuse people.

I haven't fully untangled my own thinking on those different but conflated types of biologically-active material, but here's my first attempt:

One type of material includes packets of genetic information that can be transmitted through air, bodily fluids, water and food, across nasal passages, digestive membranes and skin, to which the body responds with immune reactions and detox functions.

Another type of material includes packets of chemical toxins, or packets of genetic instructions for human cells to produce chemical toxins, that cannot naturally breach a healthy body's self-protective barriers against invasion and poisoning, but can bypass the target's immune system and chemical detox system if injected by needle.

I'm developing these views from thinking through recent work by Sasha Latypova (Design of a Weapon: Targeting the Human Microbiome⁸¹⁴), Kevin McKernan and Jonathan Couey, and also reading between the lines a bit in the 1990s and early 2000s records of efforts to establish verification methods for the Biological Weapons Convention (BWC), and the conclusion of the BWC parties (especially US Government negotiators) that verification protocols need not ever be adopted or enforced, because "vaccine" production and "bioweapons" production are indistinguishable,⁸¹⁵ while biological weapons (referring to naturally-transmissible pathogens) are "free of serious security risks."

Key quote from a 1997 Josef Goldblat paper, The Biological Weapons Convention: An Overview:⁸¹⁶

...Biological weapons are unpredictable in their effects and of limited value in combat. Since cheating under a BW Convention could not yield significant military advantages to the cheating party, a ban on biological weapons without verification of compliance was considered by the negotiators to be free of serious security risks.

By contrast, chemical weapons are predictable, capable of producing immediate effects and, consequently, useful in combat...

I also appreciated the opportunity to pre-record a presentation as part of the StopVaxPassports panel held on April 24.

But I want to make clear that I do not believe the globalist enslavement project is primarily driven by the Chinese Communist Party; I had no input into the panel composition; and I disagree with almost everything the third speaker (Stephen Hatfill) said.

Most of Hatfill's statements are demonstrably false and serve only to reinforce the lies told by the globalist totalitarians through their propaganda channels.

In his segment, Hatfill argued that the so-called pandemic events of the last several decades were pandemics; they were poorly-managed due to slow and ineffectual surveillance programs; that there are currently massive threats of new communicable diseases brewing around the world due to population growth, wet markets, and other factors; that faster, more comprehensive, more militarized data mining, surveillance and population control are a good response; and that the CDC and WHO were originally designed and currently work to identify and control disease outbreaks.

I disagree with all of those claims.

I think the events of the last century described by globalists as "pandemics," back to the Spanish flu in 1918 or earlier, were orchestrated attacks on human societies, religious and governing institutions, human bodies and human immune systems. They were not naturally-occurring or naturally-circulating diseases or benevolent disease mitigation programs.

I think that globalist totalitarians want increased surveillance and population control, and therefore orchestrate false-flag pandemics — through psychological manipulation, propaganda and other forms of lying and fear-mongering — and also orchestrate biochemical attacks (weapons falsely labeled as 'vaccines' and treatments), to create pretexts for installing more intensive surveillance and control systems to control and kill more people.

I think that the CDC and WHO, and all other so-called public health organizations, are military units whose purpose and function has been, for their entire institutional existence, and still is, to devise and install globalist surveillance, control and killing programs.

I do not believe that naturally-occurring, naturally-circulating communicable diseases, or even lab-manipulated, communicable disease strains, pose any new or severe danger to humanity or human health.

I think rulers who coerce, surveil, control, sicken, injure, sterilize and kill people are illegitimate, and willfully engaged in evil acts.

I think illegitimate, evil systems that diabolically corrupt rulers have already put in place must be dismantled, not strengthened.

I think the primary threat to humanity is the secular, materialist, criminal, globalist totalitarian project itself.

An error which is not resisted is approved; a truth which is not defended is suppressed...He who does not oppose an evident crime is open to the suspicion of secret complicity." Pope Felix III, quoted by Pope Leo XIII, On Freemasonry (1892).

Pray the Rosary.

April 28, 2023 - Draft discovery materials for civil and criminal cases.

Useful for promoting understanding that the factual record of events since January 2020 supports the legal conclusion that products labeled 'vaccines' are presumptive injectable biochemical weapons.

Posted April 28, 2023. Likely to be updated occasionally to add links and more discovery items.

Discovery is the legal process through which two or more parties to litigation exchange information after a civil complaint or criminal charges have been filed, but before trial.

It's a formalized way for the parties to obtain or disclose documents and other evidence supporting each party's legal arguments about how the law applies to the specific facts of the case.

Discovery in civil cases is governed by Federal Rule of Civil Procedure 26.⁸²²

Discovery in criminal cases is governed by Federal Rule of Criminal Procedure 16.⁸²³

The obligation on government prosecutors to disclose evidence to criminal defendants is more limited than the obligation of two or more parties to a civil case to disclose information to each other.

Some of the basic methods of discovery:

- Requests for Production of Documents - Asking an opposing party to provide written records, or to allow inspection of documents.
- Interrogatories - Asking an opposing party to answer written, open-ended questions.
- Requests for Admission - Asking an opposing party to admit or deny the truth of a statement. A refusal to admit or deny the truth of the statement is deemed an admission.
- Depositions - Oral or written interviews of witnesses, under oath and transcribed for use during trial.
- Subpoena duces tecum - An order from a judge, to a witness, to appear to testify under oath and bring relevant documents.

The Covid-19-predicated Constitutional and biochemical attacks were launched in January 2020 by individuals impersonating US Government officials.⁸²⁴

Hundreds of cases have been filed challenging the acts of these imposters on Constitutional and other legal grounds, and none (to my knowledge) have made it past the motion to dismiss or preliminary injunction phase, into discovery. Judges are blocking discovery to shield the imposters and enable their illegitimate pseudo-governing acts of mass destruction to continue.

Many cases have been dismissed on grounds that the plaintiffs lacked standing to sue alleged government officials and challenge executive acts. Federal courts have accepted — without fact-finding, adversarial evidentiary testing, or legal review — that all the acts undertaken by executives during Covid-19 were and remain legitimate government functions, properly performed.

Judges dismissing these cases have been complying with SCOTUS Chief Justice John Roberts' illegitimate May 29, 2020 order in *South Bay Pentecostal Church v. Newsom*.⁸²⁵

South Bay Pentecostal is a California case through which Justice Roberts ordered federal judges to stand-down and abdicate their Constitutional review obligations, without engaging in fact-finding or legal analysis of whether "broad limits" on exercise of State power have or have not been "exceeded."

⁸²³ https://www.law.cornell.edu/rules/frcmp/rule_16

⁸²⁴ <https://bailiwicknews.substack.com/p/dual-use-government-officials-of>

⁸²⁵ https://www.supremecourt.gov/opinions/19pdf/19a1044_pok0.pdf

...The precise question of when restrictions on particular social activities should be lifted during the pandemic is a dynamic and fact-intensive matter subject to reasonable disagreement. Our Constitution principally entrusts “[t]he safety and the health of the people” to the politically accountable officials of the States “to guard and protect.” *Jacobson v. Massachusetts*, 197 U. S. 11, 38 (1905).

When those officials “undertake[] to act in areas fraught with medical and scientific uncertainties,” their latitude “must be especially broad.” *Marshall v. United States*, 414 U. S. 417, 427 (1974).

Where those broad limits are not exceeded, they should not be subject to second-guessing by an “unelected federal judiciary,” which lacks the background, competence, and expertise to assess public health and is not accountable to the people. See *Garcia v. San Antonio Metropolitan Transit Authority*, 469 U. S. 528, 545 (1985).

That is especially true where, as here, a party seeks emergency relief in an interlocutory posture, while local officials are actively shaping their response to changing facts on the ground. The notion that it is “indisputably clear” that the Government’s limitations are unconstitutional seems quite improbable...

Many other cases have been dismissed on grounds that the issues have become moot.

Typical cases began with an overreaching executive action, such as a state governor ordering business closures. Injured parties, such as business owners, sued the governor or state health secretary, challenging the Constitutionality of the executive action.

While the case is proceeding toward discovery, the governor or health secretary temporarily suspended enforcement of the executive order, and then filed for dismissal of the case on grounds that, because the order was not in force currently, the challenge is moot.

Judges have dismissed these cases without allowing discovery and without conducting Constitutional review, while acknowledging that suspended enforcement is temporary and enforcement could be re-instated at any moment.

Two examples of this sequence are *Butler v. Wolf* in Pennsylvania⁸²⁶ and *Smart v. Kemp* in Georgia.⁸²⁷ There are many more.

Some federal courts have issued injunctions, partially blocking the effects of illegitimate government actions, usually basing the injunctions on violations of administrative due process and notice provisions.

Most of the class-action cases brought against the Biden Administration’s illegitimate “vaccine mandates” fall into this category.

Targeted classes include federal employees; federal contractors; health care workers subject to Centers for Medicare and Medicaid Services (CMS) administrative law; military personnel subject to Department of Defense administrative law; and employees of large private companies subject to Occupational Health and Safety Administration (OSHA) administrative law through the Department of Labor.

Courts have issued injunctions temporarily blocking enforcement of mandates on some members of some of the targeted classes.

Apart from a few injunctions issued to force government compliance with the Religious Freedom Restoration Act of 1993, most of the injunctions have been based on procedural violations of the Administrative Procedures Act of 1946.

One example is *Health Freedom Defense Fund v. Biden*,⁸²⁸ a case filed to block the CDC “mask mandate” for air travel. The Biden Administration has filed appeals in many of the APA cases, which are still pending.

⁸²⁶ <https://bailiwicknews.substack.com/p/how-the-international-health-regulations>

⁸²⁷ <https://bailiwicknews.substack.com/p/smart-v-kemp>

⁸²⁸ <https://bailiwicknews.substack.com/p/administrative-procedures-act-v-public>

By focusing exclusively on the Administrative Procedures Act and other administrative law provisions, federal judges have avoided engaging in Constitutional review.

They have complied with Chief Justice Roberts' stand-down order from *South Bay Pentecostal*, and left the door wide open for administrative agencies to correct any errors in their application of existing administrative law, and/or get Congress to repeal APA due process and notice provisions, so that next time, their dictatorial acts with withstand procedural review.

In other words, federal judges — as complicit war criminals — have given traitors impersonating US Government officials time to firm up the supraconstitutional, dictatorial authority the administrative agency heads falsely believe they hold over the living bodies and souls of American men, women and children.

As I've written before, I don't know when or how legitimate governments will be restored to power, and credible, constitutionally-sound justice systems will be reassembled from the fragments of social covenants littering the worldwide war zone of the globalists' psychologically, spiritual and biochemical war on humanity.

I work and pray toward those goals without knowing the how or the when.

I've put together some draft discovery materials that are built on the foundational whistleblowing and investigative work done by Brook Jackson,⁸²⁹ Sasha Latypova, Mike Yeadon, me and others.

These discovery materials can be adapted for use by injured plaintiffs pursuing civil cases and by defendants facing US Government prosecution for their acts of resistance to criminals occupying high-level US Government positions.

These materials can also be used to deepen public understanding and resistance to the globalists' control-and-kill programs.

Requests for Admission

Pertaining to US military procurement contracts, public executive orders, proclamations, declarations, determinations and/or notices promulgated under the Public Health Service Act [42 USC 247d], Stafford Act [42 USC 5121], National Emergencies Act [50 USC 1601], Defense Production Act [50 USC 4501] and/or other federal statutes; and/or confidential Presidential Emergency Action Documents (PEADs); and/or confidential Continuity of Government documents.

Admit or deny:

1. Medical CBRN Defense Consortium (MCDC) "Project Agreement" 2011-003 for OTA W15QKN-16-9-1002 and related contract documents established terms and conditions for the development and production of biological and/or chemical weapons by contractors, for delivery to the US military.
2. Under Medical CBRN Defense Consortium (MCDC) contract terms and conditions and federal Public Health Emergency (PHE) status, "Covid-19 vaccines" are military countermeasure prototypes.
3. Under Medical CBRN Defense Consortium (MCDC) contract terms and conditions and federal Public Health Emergency (PHE) status, "Covid-19 vaccines" are injectable biochemical weapons.
4. Under Medical CBRN Defense Consortium (MCDC) contract terms and conditions and federal Public Health Emergency (PHE) status, subcontractor corporations have no legal obligation to conduct clinical investigations in compliance with FDA regulations.
5. Under the 1950 Defense Production Act, as invoked by President Trump through Executive Orders 13909, 13910, 13911 and related acts, military contractors producing and distributing weapons under "voluntary agreements" are exempt from contract law and anti-trust law, and can cite the DPA in their own defense during any civil or criminal proceeding [50 USC 4558].
6. The US Constitution was unilaterally superseded and suspended by Executive branch national security and continuity of government (COG) orders, on or about Jan. 27, 2020, triggered by the WHO Public Health Emergency of International Concern (PHEIC) declaration of Jan. 30, 2020 and effectuated by HHS Secretary Alex Azar's Jan. 31, 2020 declaration that a Public Health Emergency exists [42 USC 247d].
7. All Constitutional, civil and human rights previously protected by the US Constitution, were unilaterally superseded and suspended by Executive branch national security and continuity of government orders, on or about Jan. 27, 2020, triggered by the WHO Public Health Emergency of International Concern (PHEIC) declaration of Jan. 30, 2020 and effectuated by HHS Secretary Alex Azar's Jan. 31, 2020 declaration that a Public Health Emergency exists [42 USC 247d].
8. Enforceability of federal laws prohibiting use of biological and chemical weapons and weapons of mass destruction (WMDs), including 18 USC 175 (Biological Weapons) and 18 USC 229 (Chemical Weapons) was suspended, effective on or about Jan. 27, 2020, in response to the public health emergency (PHE) declared to "exist" as of that date.
9. FDA has no statutorily-authorized role in developing, assessing, monitoring and controlling commercial production and Department of Defense use of weapons prohibited under 18 USC 175 (Biological Weapons) and 18 USC 229 (Chemical Weapons).
10. The US Constitution remains suspended to this date, and has been in a continuous suspension since Jan. 27, 2020, in response to the public health emergency (PHE) declared to "exist" as of that date.
11. Since January 2020, the US Government, through the Department of Defense and the HHS-declared Public Health Emergency suspension of relevant Constitutional and statutory provisions, has been developing, producing, distributing and using chemical and biological weapons prohibited under 18 USC 175 (Biological Weapons) and 18 USC 229 (Chemical Weapons) with legal impunity.
12. Federal government officials have failed to formally notify the American people that the US Constitution has been suspended.
13. US federal and state courts currently have no subject matter jurisdiction for Constitutional claims.
14. Federal government officials have formally notified federal and state judges that they have no subject matter jurisdiction for Constitutional claims brought by US citizens.
15. Federal government officials have failed to formally notify the American people that federal and state judges have no subject matter jurisdiction for Constitutional claims.
16. US citizens currently have no legally-cognizable Constitutional rights.
17. Federal prosecutors currently have no legal authority to prosecute criminal violations of 18 USC 175 (Biological Weapons).

18. Federal prosecutors currently have no legal authority to prosecute criminal violations of 18 USC 229 (Chemical Weapons).
19. Federal government officials have failed to formally notify the American people that federal prosecutors have no legal authority to prosecute criminal violations of 18 USC 175 (Biological Weapons) and 18 USC 229 (Chemical Weapons).
20. Production and use of Covid-19 injectable biochemical weapons, by the US military, to incapacitate and kill military and civilian targets, has been covertly pseudo-legalized.

Interrogatories

1. Why did the National Security Council (NSC)⁸³⁷ assume control of the U.S. federal government's Covid-19 policy⁸³⁸ and the Federal Emergency Management Agency (FEMA) assume control of the government's response to Covid-19?
2. Why, in spite of this transfer of authority, did the federal government maintain the pretense that Covid-19 policy and the response to Covid-19 were being led by experts within the Department of Health and Human Services (HHS), including at the Centers for Disease Control and Prevention (CDC) and the National Institute for Allergy and Infectious Diseases (NIAID)?
3. Why did the U.S. Department of Defense (DoD) contract for the development, manufacture, and distribution of so many Covid-19 "countermeasures,"⁸³⁹ including injectable biochemical weapons, largely utilizing⁸⁴⁰ the DoD's previously established network of military contractors⁸⁴¹ and consortia (Medical CBRN Defense Consortium/MCDC)?
4. Does the US Government interpret 21 USC 360bbb-3(k)⁸⁴² as authorizing distribution of biochemically-active products that meet none of the safety, efficacy or purity standards and regulations that apply to medical products?
5. If Emergency Use Authorization (EUA) products are not required to meet safety, efficacy or purity standards for medical products, what standards and regulations apply to countermeasure prototypes (i.e. injectable biochemical weapons) used in response to Covid-19?
6. Name the individuals, departments and agencies within the US Government who are responsible for regulatory oversight of the development, safety and efficacy testing, manufacturing quality, labeling, and distribution of military countermeasures and injectable biochemical weapons.
7. Why did the DoD and the Biomedical Advanced Research and Development Authority (BARDA) order injectable biochemical weapons using Other Transaction Authority (OTA) contracts,⁸⁴³ which specify that these products are "prototype demonstrations of large-scale manufacturing,"⁸⁴⁴ when doing so permits noncompliance with drug safety, efficacy and purity regulations and standards?
8. Why do the publicly-available contract documents related to Covid-19 injectable biochemical weapons explicitly exclude safety and efficacy testing and current Good Manufacturing Practices (cGMP) compliance as "out of scope,"⁸⁴⁵ [see Section 1.2, p. 8] not ordered, required or paid for by the U.S. Government?
9. Did the HHS Secretary waive cGMP requirements for Covid-19 injectable biochemical weapons? If so, produce the signed and dated document by which this waiver was effectuated.
10. Observational evidence supports the conclusion that some recipients of Covid-19 injectable biochemical weapons have received "sham" injections containing only inert materials, while others have received injections containing highly-active, extremely-toxic materials, and still others have received moderately toxic injections, all distributed under the same label and brand of product. What, if any, measures are or have been in place to ensure the quality, potency, purity, consistency, and proper labeling of Covid-19 injectable biochemical weapons?
11. Under what laws do the DoD and Biomedical Advanced Research and Development Authority (BARDA) believe they have authority to direct, manage and oversee activities related to the development, manufacture,

regulation and distribution of Covid-19 injectable biochemical weapons and other treatments, diagnostics and devices?

12. Name the individuals working at the DoD and BARDA who are responsible for oversight and enforcement functions related to the manufacture, regulation and distribution of Covid-19 countermeasures (including injectable biochemical weapons) that would normally be conducted by staff within the various agencies at HHS, including FDA and CDC?
13. Define the “stopping conditions” for Emergency Use Authorized products, including Covid-19 injectable biochemical weapons. What data would US Government agents running Covid-19 programs need to see in order to halt the production and use of injectable biochemical weapons? Why are US Government agents not using the “stopping conditions” standards that have previously been applied to FDA-regulated drugs and devices?
14. Why do the FDA authorizations and approvals of Covid-19 related products under Emergency Use Authorization and Investigational New Drug regulatory frameworks violate drug safety laws governing clinical trials, product labeling, product serialization, importation, product distribution, product quality control testing, dispensing and other parts of the national drug supply oversight system?
15. Provide all data collected by US Government agents and agencies, related to injuries, morbidity and mortality associated with Covid-19 injectable biochemical weapons, from U.S. government databases or other data collection systems or programs relating to vaccine adverse events, including, for example, VAERS, V-Safe, VA, DMED, etc., as well as from any manufacturer, contractor or private health insurance data systems to which you have access, from the start of 2020 to the present.
16. The efforts by US Government officials working within DoD and HHS to hide the various acts outlined in the questions above or to reclassify them as somehow “legal” indicates foreknowledge and an understanding that these acts are not, in fact, authorize by law. Do public and private signatories to Covid-19 contractual agreements “owe allegiance to the United States?”

April 30, 2023 - mRNA-LNP compounds are cellular genetic dirty bombs.

The nurse-with-needle is the bomber.

The lipid nanoparticle is the suitcase used to smuggle the bomb into cells.
The mRNA is the bomb.

Once inside the cell, fragments of genetic code replicate and interfere with healthy genetic code in myriad ways, causing countless injuries, diseases and organ failures, and bringing about death.

*

Sasha Latypova used the “dirty bomb” phrase in a recent email, and has used it in some of her Substack posts⁸⁴⁶ and interviews.

Other researchers whose work backs it up include Kevin McKernan⁸⁴⁷/Anandamide,⁸⁴⁸ Walter Chesnut,⁸⁴⁹ Arkmedic⁸⁵⁰/JikkyLeaks,⁸⁵¹ Genervter/Annoyed Citizen,⁸⁵² Naomi Wolf,⁸⁵³ and Clucky92864052.⁸⁵⁴ Along with Mike Yeadon, Wolfgang Wodarg,⁸⁵⁵ Sucharit Bhakdi, Michael Palmer,⁸⁵⁶ Arne Burkhardt,⁸⁵⁷ Stephanie Seneff, Greg Nigh,⁸⁵⁸ David Hughes⁸⁵⁹ and more.

Each and every use of mRNA-LNP dirty bombs is an expressive act of deeply malevolent hatred for God and humanity. Each and every use of mRNA-LNP dirty bombs is the diabolical, hate-filled inverse of the human lovemaking act through which each new human life is created and infused by the Holy Spirit with an immortal soul, in the womb of a woman in the loving embrace of a man, through the fusion of cells and intertwining of genes.
